THE METHODIST PUBLISHING HOUSE.

(THE RIGHT OF TRANSLATION AND REPRODUCTION RESERVED.)

1892.

PREFACE.

THE "Indian Middle School Grammar" was prepared at the request of the Text-Book Committee, which met in Lucknow in April, 1891.

It has been prepared with special reference to the Grammatiical course prescribed for the Middle English Examination in this Province, and to the Middle standard, which usually prevails at A.-Y. schools elsewhere. It does not go into those parts of Grammar, which are reserved for matriculation, such as the Synthesis of sentences, the Analysis of words, and the Figures of Rhetoric; but it goes rather minutely into every part of Grammar that leads up to these.

The author in preparing this book has kept three objects mainly in view:—(1) to make it exhaustive; (2) to make it explanatory; and (3) to make it practical.

That an exhaustive Grammar of some kind was needed is shewn by the fact that teachers and students are at present compelled to hunt about for particular points from one book to another. One Grammar says a good deal about the parts of speech, but nothing about the analysis of sentences. Another says much about the analysis of sentences, but is almost silent about syntax and the government of words. Another goes upon the plan of being exhaustive, but puts too much matter into too small a compass.

The practical aim of this Grammar is shown by the large number of examples to be worked out by the students. In this respect the method which has been followed might be compared with what is seen in books an Arithmetic or Geometry, in which not only are rules and principles laid down for guidance, but numerous examples are appended to each rule for practice. The practice here enforced of working out examples in Grammar is a step towards composition,—probably the only step which at this early stage an Indian student can be expected to take with any hope of success.

As to whether the treatment has been explanatory or not, those who use the book will be best able to decide. The plan of compressing a manual of Grammar into the smallest possible space, leaving little or no room for explanation or illustration, has not been found to answer. Rules thus given are conveniently short, if the chief aim of the student is to learn them by heart; but they are seldom understood, nor is their practical application properly mastered. In the classical languages, where the case-endings and verb-endings show at a glance in what relation a word stands to the rest of the sentence, further explanation on this point is scarcely needed; but in the English language, where aimost all such inflections have been lost, the relation of one word to another is almost entirely a matter of common sense; and hence we must appeal to the reason and intelligence of a student, if we wish him to derive any profit from the study of English Grammar.

This brings me lastly to make a few remarks as to the manner in which this book (according to the Author's own views and intentions) should be used and taught. It should not be used merely or even chiefly as a book of reference. It should be taught in class like any other class book, just as Geometry or Arithmetic or even a Persian or English Reader is taught. Let it be read out by the students in class, each student taking his turn : let the teacher explain each point as it occurs, and take care that the class as a whole has understood what has been read: let the students work out the examples before the teacher and before each other, each taking an example in turn. Much that is contained in the book will be found very simple and easy, especially to those students, who in an earlier stage of their school-career have mastered the Grammar lessons occurring in the Anglo-Oriental series of English Readers, all of which are reproduced in the present volume. But there are other parts which are not so simple; and the teacher must take care that the student dwells upon these with sufficient care and attention, making the ground sure as he proceeds.

Of the books published in England, the Author has been chiefly guided by Bain's English Grammar, the Grammar by Mr. Mason, the works by Dr. Morris, and those by Dr. Abbott. His acknowledgments are also due to certain books published in this country and written by gentlemen who have had expecien in Indian education, especially to MacMordis's Studies in English, Rowe and Webb's Hints on the Study of English, and Shoppard's Matriculation Manual.

THE

INDIAN MIDDLE SCHOOL GRAMMAR.

CHAPTER L

THE PARTS OF SPEECH: GENERAL DEFINITIONS.

(THE different kinds of words are called Parts of Speech,
They are eight in number }—

1. Nouns.

5. Adverbs.

Verbs.

Prepositions.

3. Pronouns.

- Conjunctions.
- 4 Adjectives. 8. Interjections.

Rdm saw a make in the garden.

Here Rdm is the name of a person; snake is the name of a

thing; and garden is the name of a thing. So Rdm, snake, and garden are all nouns.

N. B.—Under "thing" we include not only individual objects, but places, cities, countries, and collective groups, as "flock." Thus garden

in the above example is the name of a place.

2. (A Verb is a word by means of which we can say

something about a thing or person :--)

Ten men fill from the top of a house.

Here by means of the word fell we say something about ten
men, namely, that they fell from the top of a house. So fell is
a verb.

 $N.\ B.$ —There are four kinds of things that we are able to say by means of verbs :—

(a.) What a thing or person is, seems, or becomes; as "ripe fruit is (or seems, or becomes) fit for food."

(b.) What action a thing or person does: as. "Ham killed a

anake."

(c.) What action is done to a thing or person; as, "Ten men were killed by the fall of a house."

(d.) In what state a thing or person is; as, " The boy sleeps," " the boy feels a pain in his eat.".

3. / A Pronoun is a word used instead of a Noun: -

". I told him, that the anake which he saw in the garden, would do him no harm. If he let it go its own way.

Here I is used for the speaker; he and him are used for "Ram"; which, it, and its own are used for "snake." So all these words are Pronouns.

4. (An Adjective qualifies, (that is, adds something to the meaning of,) a Noun or Pronoun.

A strong man killed a floree tiger.

Here strong shows the quality of the man, and flerce shows that of the tiger. So strong and flerce are both Adjectives.

5. (An Adverb qualifies a Verb, Adjective, or other Adverb:-

An almost black snake crept very quickly through the grass.

Here almost qualifies the Adjective "black;" quackly qualifies the Verb "crept;" and very qualifies the Adverb "quickly." So all these words are Adverbs.

6. (A Preposition is a word placed before a Noun or Pronoun, to show in what relation the thing named stands to some other thing: \(\times\)

I place my hand on this table.

Here if you leave out the word on, and say "I place my hand this table," there is no sense: for you do not say whether you place it on the table, or suder the table, or adore the table. In fact the relation between the hand and the table is not known, and cannot be known, until some Preposition has been inserted to show what the relation is.

7. A Conjunction joins one word to another word, or one sentence to another sentence:

Rám and his brother reached the house, before our friend saw us.

Here the Noun "brother" is joined to the Noun "Rám" by the Conjunction and; and the second sentence "our friend saw us" is joined to the first "Rám and his brother reached the house" by the Conjunction lefters. 8. An Interjection is a word thrown into a sentence to express some feeling of the mind :-

Hurrsh! I have found my watch. Oh! how footisk I was to lose it! Here hurrsh! expresses the feeling of joy; and oh! expresses the feeling of surprise.

N. B.—(Sometimes the same word, as will be seen hereafter,)
can be in two Parts of Speech and not merely in one. Of
this doubleness there are two examples, which are of very common occurrence:—

(a) ¿A Participle is a Verb and Adjective combined as, "Herein cought the thief, he sent him to jai," Here "having cought" is a Verb, because it governs the object "thief," and an Adjective, because it qualifies the Pronoun "he." Hence Participles can be very properly called "Verbal Adjectives.".

(5.) (A Gerund is a Verb and Noun combined); as, "I m tired of eading this book." Here reading is a Verb, because it governs the object "book," and a Noun, because it is governed by the Preposition "of." Hence Gerunds can be very properly called "Verbal Nouns."

CHAPTER II .- NOUNS.

\$ 1 .- THE KINDS OF NOUNS.

* 1. (Nouns are of five different kinds: (1) Proper, (2) Common, (3) Collective, (4) Material, (5) Abstract-

PROPER NOUNS.

[†] 2. (A Proper Noun denotes one particular thing as distinct from every other thing)

(The thing denoted by a Proper Noun may be of various kinds, as for example :-

- .. (a,) Some particular person; as James, Gopal, Hasain, Queen Victoria.
- (b.) Some particular book; as the Bible, the New Testament the Randyan, Galistan, etc.

Indian Middle School Grammar.

- (c.) Some particular city, town, village, or building; as Lucknow (city), Hoogly (town), Tdj Mahdl (building).
- (d.) Some particular country, river, mountain, range of mountains, cape, gulf, Island, etc.; se India (country), Genges (river), Mount Abu, Himdleya (range of nountains), Cape Comorin, Gulf of Cambay, Ceyton (island).
- N. B .- (1.) The writing of a Proper Noun should be commenced with a capital letter.

(2.) A word or phrase is sometimes added to a Proper Noun to prevents ambiguity of referenced. Thus we say, f Alexander the Greatiou "S. Paul," or "Booton is America," to abobe which Alexander or which Paul or which Booton is meant: for many different persons or places might be called by these names.

COMMON NOUNS.

1 8. (A Common Noun is so called, because it denotes no one thing in particular, but is common to any and every thing of the same kind; as "man," "book," "country."

Thus, man does not point out any particular man, such as James, but can be used for any and overy man. Boolt does not point out any particular book, such as the New Testament, but can be used for any and every book. Country does not point out any particular country, such as India, but can be used for any and every country in any part of the world.

- 14./(A Proper Noun is said to be "used as a Common Noun, and has in fact become a Common Noun, when it denotes, (a) some rank or office, or (b) some class of things or persons. 4.
- (a) Sank words as Cesor, Caliph, Sulton, Khelive, Czar, &c., are often used as Ommon Mona: thus we can speak of "the tredve Cesars," "the first four Caliphs," "the Sultan Turkey," "the Sultan the Car of Russia." All these words are titles, which may belong to many different individuals, and are meant to indicate some rank or office.

(b). A Proper Moun when it denotes a class of things or persons, is used in a descriptive and general sense, "A Daniel come to judgment"; that is, a the greatest astronouser of the age, "He is the Nestor of his service"; that is, the oldset man of his service. Such words should be parsed as "Proper Nouns used as Common Nouns."

COLUMNITY NORMS

÷ 5. A Col·lec'-tive Noun, denotes a group, collection, or multitude, considered as one complete whole.)

> For instance there may be many sheep in a field, but only one flori. Here "sheep" is a Common Noun, because it may stand for any and overy sheep; but "flook" is a Collective Noun, because it stands for all the sheep at once in that field, and not for any one sheep taken separately.

In the same way there may be many students reading the same book under the same teacher, but all these students taken together make up only one class. "Student" is a Common Noun, because it may stand for any and every boy or girl in the class. But "class" is a Collective Noun, because, whan we speak of a class, we do not think of this student or that student senantativ, but of all the students at once.

[†] 6. (Every Collective Noun is also a kind of Common Noun.)

Thus the term "flock" may stand for many different flocks (or groups of shades); "class" for many different classes (or groups of shadesia.) [Sluch nouss are Collective, so far as the indiminist finings or pursees, are conscitud, but Commun, so far as the graphiles conceined.

Human Groups.

Heuseheld) men, wome children of the Family. same house. Tribe, union of families. Caste, union of families. Nation, people of a country. Class, of students. School, union of classes.

Gang, of thieves. Gang, of labourers. Band, of musicians

Choir, of singers. Bench, of magistrates. Jury, body of men sworn /Sect, men of the same creed

Club, men of the same pursuit. Congress, senate, parliament. assembly of public men.

Orowd, throng, multitude, or concourse, of any men. / Company, of merchants. · Company, of soldiers. Regiment, collected companies. Cavalry, horse soldiers. Troop, or squadron, of cavalry. Infantry, foot soldiers. Army, collected forces. Fleat, collected ships.

Animal Groups.

, Flight, of birds, locusts. Brood, of chickens. / Swarm, of flies. Hive, or swarm, of bees. Nest, or swarm, of ants. . Hord, of cattle gracing. Brove, of cattle on march.

, Pack, of wolves, hounds.

Litter, of pupples. Fidelt, of shoop, goats, Hard, of swine, horses,

Yelle, pair of plough-oxen.

Groups of Natural Objects. Clumber, of stars. Bunch, of grapes, plantains, Fall, of snow, rain, hall. Shower, of rain. Clump, a small group of trees. Grove, large group of trees.

Tuft, of grass, feathers, hair. Mass, of clouds, Range, or chain, of mountains. Shrubbery, of shrubs and bushes-Group, of islands. Imals. The animal kingdom, all ani-The vegetable kingdom, all vegetables.

The mineral kingdom, all minerals. Groups of Artificial Objects.

Bundle, of out grass. Sheaf, of cut corn. Nosegay, of cut flowers. Faggot, of out sticks. Stack, of cut wood. Orchard, of planted fruit trees. Alphabet, a set of letters. Library, of books,

Flight, of stops. Abuse, words of represch. Suit, of clothes. Bunch, of keys,

Quiver, of arrows. Heap, or pile, of stones, mangoes, Row, or terrace, of houses. Village, small group of houses. Town, larger group of houses. City, largest group of houses. Numeral Groups.

Pair, brace, couple, two things. An eleven, set of crinketers. Dozen, twelve things. GPOSE, twelve dozen. Score, twenty things.

A hundred, a thousand, a lac. a million, etc.

NOUNS OF MATERIAL.

(A Noun of Material denotes the matter or substance of which things are made.

A cow eats greas. Sooils are servin in soil, and not on rech. Soil is incoossary to life. Fish live in custor. We cannot live without sir. All things exist in space. Fire burns. That box is made of frow, and not of in. They had job for disnee. We shall disso on select to day. Milk in a better drait than wise. Some men serve eats fire. We can write with ink or with chells. A blackboard is made of secol. Most man are found of bread. Air is lighter than coster. Welter in heavier than oil. Cas and used are the best kinds of first, own will not set kerf. Silver in note o had a grid. Some mon little to 4π better than coffer. It is not to had a grid. Some mon little to 4π better than coffer. It will be well as warmer than cetter. Languages it made up of words.

8. (The same word can be a Material Noun or a Common Noun according to the sense.) -

(Ful live in the water. Fifth is good food. Al'

In the first sentence the Noun denotes individual fish or fishes, and is therefore a Common Noun. In the second it denotes the matter of which the bodies of fish are made, and is therefore a Material Noun.

Common, Material,

Mango, The name of a tree.

Lamb. The young of a sheep.

Lamd. A country or tract of land. Earth as distinct from water,

Potato. The name of a plant,

Cork. The name of a rea.

Stone. A gem or precious stone.

Rocky matter of any thnd.

Stone. A gem or precious stons. Rocky matter of any kind.
Sai. The name of a tree. The timber of the all tree.
Wood. A forest or grove. The matter of which trees are made.
Sixte. A slate used in school. Slate-rock, out of which slates

see made.

Sometimes there is one word for a Common Noun and another for the corresponding Material Noun.

Or.

Material. Hog, pig, swine. Ham, bacon, pork. Book. Vasl.

Call. Deer. Stag. Venison. Mutton Sheep.

Poppy, the plant. Opium, the juloe. Beer, the fermented juice of barley. Barley, the plant.

Tree. Timber. Oil, the juice of the olive. Olive.

Vaccine, a juice from the cow. Cow. Vine, the grape-plant. Wine, the fermented juice of grapes, Palm-tree, Toddy, the fermented juice of the palm. Bread, wheat, Loaf, or loaves. - Apple, apples.

ABSTRACT NORMS.

Cider, the fermented juice of apples-

9. An Abstract Nonn denotes some quality, state, or action, apart from the thing or doer. }

The four kinds of nouns already named all relate to objects, that is, to things which can be seen, touched, heard, smelt, or tasted : and all such nouns are called Concrete Noung.\ But an Abstract Noun relates to things which cannot be seen or touched, etc., and which are thought of apart from any object or objects/

For example-We know that a stone is hard. We also know that iron is hard. We also know that a brick is hard, We can therefore speak of hardness apart from stone, or iron, or brick, or any other object having the same quality. " Abstract" means "drawn off" or "apart from" the object. Hence hardness is an Abstract Noun ; while a stone or brick or piece of iron is a Concrete Noun.

(The things denoted by an Abstract Noun may be of various kinds, as : 1

(a.) Some quality of men or things, as goodness (men,) hardness (objects,) color (men or things.)

(b) Some state of mind or body; as fever, weariness, good health, wouth, old age, hunger, anger, love, hatred, heat, cold, sleep, disease, joy, happiness,

... Concrete. ... Abstract.

- (c.) Some kind of time or space ; as, childhood, wouth, (time.) height, shortness, depth (space.) Some kind of art or science; as, grammar, arithmetic, music, geography, cricket, postry, (e.) Some kind of action or some posture of the body; as, motion, movement, walk or walking, seat or sitting, journey, flight, march, speech, revenge, work or working, punishment. 10. The same word may be an Abstract Noun or a Common Noun, according to the sense.) When an Abstract Noun is "used as a Common or Concrete Noun," it may denote (a) the person possessing the quality, or (b) the thing to which the action, state, or qualiby refers :-{ 1. The quality of being just ... Abstract, 2. A judge, or one who administers justice, Concrete, Justice. 1. The quality or state of being beautiful. Abstract. Beauty. 2. A person possessing beauty ... Concrete. 1. Inborn ability ... Abstract. Gantus. 2 A person possessing genius ... Conorete. 1. The power or right to command ... Abstract. Authority. 2. A person possessing authority. ... Concrete. 1. The power or right to govern 2. Those who exercise government ... Abstract. Government. ... Concrete. 1. Advice from a barrister ... Abstract. Counsel. 2. The man who gives advice or counsel, Courrete. ... Abstract. 1. The quality of being great Majesty. 2. The King or Queen possessing majesty, Concrete. 1 The quality of being noble ... Abstract.
 2. The men belonging to the class of
 - Witness. 2. One who gives the evidence or bear the testimony ... Concrete. EXAMPLES OF (b.) 1. The act or quality of judging ... Abstract. Judgment. 2. The judgment given by the judge ... Concrete. 1. The act of sitting ... 2. The chair or thing you sit on ... Abstract. Seat. ... Concrete,

nobles

Evidence or testimony

Nobility.

- 1. The act or faculty of seeing 2. The thing seen : "a fine sight" ... Abstract. Sight. ... Concrete. 1. The quality of being true ... Abstract. 1. The quality of being true 2. The thing which is true; the fact Truth. ... Conjovete.
- ... Abstract. (). The faculty of speaking Speech. 2. The speech delivered; the word spoke n, Concrete. L. The feeling of wonder or surprise ... Abstract.
- Wonder. 2. The wonderful event or object ... Conercte.

EXAMPLES OF (b).-(Contd.)

Action.	1. The state or act of doing something, Abstract 2. The thing done; the deed itself Concrete,
Building.	(1. The act of building Abstract. 2. The thing built Concrete.
Service.	1. The act of serving or condition of a servant Abstract. 2. The work done by a servant Concrete.
Kindness.	1. The quality of being kind Abstract. 2. The act of kindness; the kind thing

Folly. {1. The quality of being foolish ... Abstract. 2. An act of folly; the foolish thing done, Converts.

11. (ABSTRACT Nouns can be formed from Adjectives, or from Common Nouns, or from Verbs.)

(b.)-ABSTRACT NOUNS FORMED FROM VERBS.

Verb.	Abstract.	Verb.	Abstract Nous
Serve	service,	Advise	advice.
Live	life.	Defend	defence.
Hate	hatred,	Judge	judgment.
Obey	obedience.	Conceal	conceniment.
Choose	choice. [ment	Seize	seisure
Move	motion,move-	Laugh	laughter.
See	mght.	Free	freedom.
Relieve	relief.	Expect	expectation.
Believe	behef.	Protect	protection.
Please	pleasure.	Think	thought.
Die	death.	Punish	punishment.
Fly	flight	lry	trial.
Sit	seat	Revenge	vengeance.
Speak	speech	Utter	ntterance.

(d)-ABSTRACT NOUNS OF THE SAME FORM AS VERBS

Verb.	Abstract Noun.	Verb.	Abstract Nun
Fear	fear.	Walk	walk.
Hope	hope.	Run	run.
Desire	desire.	Step	step.
Regret	regret.	Crv	ory.
Order	order	Sob	sob.
Move	move.	Laugh	laugh.
Rise	rise.	Taste	taste.
Fall	fall.	Ride	ride.
Stay	stay.	Touch	touch.
Stop	stop.	Love	love.
36		W	

(a)-VERBAL NOUNS AND INFINITIVES.

	(a)-VERBEL ROOMS	WHY THE THE	TA WY.
Vos.	Abstract Nous.	Verbal Noun.	Infinitive.
Serve	service.	serving	to serve.
Laugh	laughter.	laughing	to laugh.
Sit	seat-	sitting	to sit.
Walk	walk.	walking	to walk.
Work	work.	working	to work,
Ride	ride.	riding	to ride.

A Verbal Noun is so called, because it is both a Noun and a Verh An In-fin'-i-tive is a part of the Verb, which has the force of an Abstract Noun, although it is not a Noun in form: it is always preceded by to.

There is no difference in meaning between an Abstract Noun, a Verbal Noun, and an Infinitive.

Work is good for the health, Abstract Now.
Working is good for the health, Verbal Nows,
To work is good for the health, Infinities. Abstract Nous

These three words, (the Abstract Noun, the Verbal Noun, and the Infinitive,) all mean exactly the same thing. The difference is only one of form, not of sense or meaning.

Examples for Practice.

Point out the nouns in the following sentences, and say to which of the 5 classes each noun belongs :-

Alexander the Great, king of Macedon, was conqueror of Persia. A man ignorant of the arts of reading, writing, and caphering is, in point of knowledge, more like a child than a man The proper study of mankind is man. Cows are as fond of grass, as men are of milk, or bears of honey. Health is one of the greatest blessings, that a man or woman can hope to enjoy in this bodily existence. The Czar of Russia, although he is lord of the eastern half of Europe and the northern half of Asia, besides being master of a huge army and a large fleet, cannot live in neace and safety with his own subjects, and cannot leave his own palace without fear. Arjun was the bravest of the Pandayas. Kalidas was the Homer of India; but his fame is not so widely known throughout the world as the fame of Honer is. Almost every Hindu belongs to some caste; but the bondage of rules founded on caste is in a state of decline. A shower of rain does not give so much trouble to a traveller as a fall of snow. The eleven of our school defeated an eleven selected from among the best cricketers of the town. Most kinds of food are not conducive to health, unless they are mixed with a certain amount of salt. The love of money is the root of all evil; but by a proper use of money men can do much good. He has done me so many kindnesses, that I shall always remember his name with gratitude. Cleon is a justice by rank and office, but he is not a genius in the science of law. Speech is one of the highest faculties with which man is endowed; but speech without goodness and purity may prove an evil rather than a blessing to its possessor. Language is a form of matter consisting of words, and words are displayed either in sounds or in letters.

§ 2.—Gender of Nouns.

 That difference in the form of a noun, which shows whether we are speaking of a male or female, is called Gender.

 (The names of males are said to be of the Masculine Gender) as man; the names of females are said to be of the

Feminine Gender, as woman)

(Things without life cannot be either male or female; hence the names of such things are said to be of the Neuter (that is, neither) Gender; as house, stone.)

(A name, which can be given either to a male or female, is said to be of the Common Gender; as purent (father or

mother); child (girl or boy.)

(All Material and Abstract Nouns must be Neuter, since they denote things without life. All Collective Nouns must be Neuter, since they denote groups, and groups as such have no life! (The only kinds of nouns which can be Masculine, Feminine, or Common are Proper Nouns and Common Nouns, since these only can denote things possessing life. !

(There are three different ways by which a Masculine Noun is distinguished from a Feminine:—(1) by a change of ending; (2) by a change of word; (3) by placing a word before or aften

1.-By a CHANGE OF ENDING.

Marouline.	Femanose.	Masouline.	Fominine.
Actor	actress.	Master	mistress.
Author	authoress,	Murderer	murderess.
Duke	duchess.	Jew	Jewess.
Emperor	empress.	Patron	patroness,
Giant	giantess.	Poet	postess (or post)
God	goddess.	Priest	priestess.
Heir	heiress.	Prince	princess.
Host	hostess.	Prophet	prophetess,
Hunter	huntress.	Shepherd	shepherdess.
Lad	lage.	Songster	acanguareas.
Lion	Honess.	Tigar	tigrees.
Hero	heroine.	Tutor	tulfifenn.
Negro	megrees.	Widower	- Litter
Boat	belle.	Wissed	which,

2 -BY A CHANGE OF WORD

Masouline	Poppasie.	Masouline	Гермин
Boar Boy Brother Ball Bellock (or sees Cook Buok Dog Drake Bari Basther Friar (or monk) Gentleman Sloven Bachelor Majter (fah)	ghi sater cow ghi sater cow r) helfer hen doe bitch (or slu duck countees, mother nun lady slut maid spawner	Husband King Lord Man	mare, dam dam joint of colt) wife queen lady woman nisoe ewe madam daughter hand, aunt witch goose

3 -By Placing a Word Bafore of After

Masculine	F m une	Vasculine	F тангы
He-goat	she-goat	Brade groom	brade
Land-lord	land lady	Great uncle	great aunt
Man servant	maid servant	Pea-cock	pes hen
Grand father	grand mother	Cock sparrow	hen sparrow

4-Examples of Nouns in the Common Gender

Parent-father outnother. Relation—male or female relation
Friend—energy—male or female friend or enemy Course wile or female course Bred-orde or hen Fowt-cook or ben Child-boy or garl, son or daughter

Deer-stag or hind Fallow dear-buck or doe Baby-male or female child Infant-male or female infant Servant-man servant or maid-servant.

4 .- Examples of Nouns .- (Continued.)

Monand-king or quees, emperor or empress. Perron.—mass or women. Pupil—boy students or girl students. Pupil—boy students or girl students. Piq.—boar or sow Simbary—and or core Simbary—and or ever Silephant—male or female elophant Cat—male or female or female or Cat—male or female or Semale or Se

Calf-bullook or herfer

4. Inanimate objects are sometimes spoken of the they were persons. They are then said to be "personsified." Such nouns are regarded as male or female, and admit therefore of being Masculine or Femiline.

A noun, when it is thus personified, is commenced with a capital letter.

As a general rule things remarkable for strength, greatness, supercrity, &c., are regarded as males; as the Sun, June, Sammer, Winter, the Dawn, the Moren, Death, Wax, Majesty. States or qualities expressed by Abstract Nouns, and whatever is supposed to possess beauty, fertility, grace, inferiorty, &c., are regarded as females, as the Earth, Spring, Hope, Yutue, Truth, Justice, Mercy, Charity, Feather, Humility, Jacober, Pritte, Fame, Modesty, Liberty, Flattery, &c. The Moon is regarded as Feminien, because she is an inferior lummary to her supposed brother, the Sun, from whom her xays are borrowed.

There is nothing in the form of these personifications which can show the genders. The gender is disclosed by the pronouns he or she, which may be used instead of them.

A ship, though it is not commenced with a capital letter, is always spoken of as she. The same is eften said of a railway-train, Point out, the genders of the nount in the following sentences:--

A fitted alled at 'one brown last hight. Did you see the elephant that came into the two with supporing! I ferivene a over and a fig there seems to be a sintra/similty. The quess of Bingland is nongeriot at sum outper. I here'd does eading much to the beauty of a park. Know many inhesp and how many guts are there in your floot! There are overtain animals, such as eath, include, forces, own, and tigens, which see things much more clearly in the night than men can. The heroton of that story was a poor least, who was left an orphan at six years of ago. The catchianey graring on the side of the hills, and the cowherd in seated on the grass beside them. The bridgroom brought the brids to this house a few days ago. A psacock is one of the most beautiful of birds, and a lion is one of the statelless of animals.

Give the feminine gender of each of the following nouns:— Landlord, ram, bull, boar, lad, aloven, gaader, drake, milter, hart, sire, hetr, wizard, widower, master, tiger, unde, king, horse, poet, hero, negro, cock, bachelor, earl, boy, he-goat, bridegroom, man-servant.

§ 3.—Case,

- That change in the form of a noun, which shows in what relation the noun stands to some other word, is called its Case.)
- 2. (There are said to be three Cases in English,—the Nominative, Possessive, and Objective)

But the Possessive is the only case that is now indicated by a case-ending or change of form. The other cases have lost their case-endings, and are indicated only by grammatical relation, or by the help of propositions.

3. (When a noun is used as the subject to a verb or for the sake of address, it is said to be in the Mominative Case.)

Bain falls ... (Subject.)
Are you seeing, my friend? ... (Address.)
4: When a noun is the object to a verb or to a Pre-

position, it is said to be in the Objective Case.

The man killed a ret.

The earth is moistened by refa. (Object to Free.)

5. The Possessive case is so called, because is denotes the possessor or owner. It is formed by adding 's (which is called a-pos'-tro-plas' s) to the noun; as—)

Singular—man's. Plural—men's.

But if the plural form of the noun ends in s, or if the eingular ends in s or s or in ce having the sound of s, the Possessive Case is formed by simply adding the apostrophe.)

Plural	Horses	horses'	"the horses' heads."
Singular.	James Jewess Conscience	James, Jemes,	"James' book " "the Jewesa' face, " "conscience' sake."
	Nom.	Poss.	"the ox' head."

- N B—The old and now obsolete inflection for the Possessive case was ex. When the e was omitted, as it now always is in modern English, the absence of the e was indicated by the comms or apostrophe: as moon, mooner, moon's
- 6. (The Possessive case-ending is for the most part limited to persons, living animals, and personified things. It is not used for manimate things.)

Thus we can say "the rat's tail, the horse's back; the boy's book; the oa' tail, the barrister's fee; the serpent's tongue, the elephant's trunk, For time's favourite, Sorrow's tears: etc."

But we cannot say "the house's roof; the town's street; the garden's frust, Bengal's sea-port; buman life's brevity;" etc., "Qr. B.—Evgn if the noun denotes some person or liming animal, the Possessive case-ending should be avoided, whenever the Possessive noun is the Astecodent to some Relative Premoun following: as

We picked up the man's body who was slain-(incorrect.)
We picked up the body of the man who was slain-(opricet)

Why is it here bester to use the proposition of than the case-anding? Because it brings the Antecedenh as close as possible to its Relative Pronoun. As a standing rule, the Relative and Antecedent should not be separated, or, if they are comparated at all, by as few words as possible.

7. (There are two kinds of nones, which are often used

in the Possessive case, although they do not denote either living beings or personified things!—

(a.) Nouns denoting time or space :-

Time. A day's journey; a month's holiday; three weeks' leave; a year's absence; at six months' sight; three days' grace.

Space. A best's length; a hand's breadth; a hair's breadth; a

razor's edge; a stone's throw; a needle's point.

(b.) Nouns signifying certain dignified objects, which

(b.) Nouns signifying certain dignified objects, which we are accustomed to speak of as if they were living persons:—

The court's decree; the sun's rays; the moon's crescent; nature's works; the carth's creatures; the soul's delight; heaven's will; the law's delays; truth's triumph; the mind's eye; reason's ear, etc.

8. A Collective Noun, even when it denotes a collection of persons or living animals, is regarded as inanimates and hence it cannot be used in the Possessive case,

Thus we cannot say:—"The flock's shepherd; the multitude's shout; the school's teachers."

 When we speak of a person's house, or place of business, the noun denoting house, &c., is frequently left out;

88,

This book can be bought from the publisher's. They have returned from the judge's. I shall sleep to night at my uncle's.

I shall sleep to night at my usele's.

Bring me that tool from the carpenter's.

But if a pronoun is put for a noun, the noun denoting "house" must be expressed, and not left out :---

Thus we cannot say "They have returned from his." It is necessary to add the word "house" or "shop," &c. "They have returned from his house."

10. The **Double Possessive**— This occurs in such phrases as "that fine poem of Homer's." It is made by putting the preposition "of" before the Possessive case.

This is not a suitable expression, although it is not uncommon. We must explain it by saying, "that fire poem of Homer's (poems), where the noun poems is understood after the Possessive case,

This double Possessive is more common with pronouns than with nouns; as, "that fine horse of yours," "this house of owrs." "that smile of hers." "that book of his."

PARKING MODEL

(a) .- " Boys learn grammar in the class."

Boys.—Common noun, plural number, masculine gender, nominative case, subject to the verb "learn."

Learn .- Verb.

Grammur.—Abstract noun, singular number, neuter gender, objective case, after the verb "learn."

In .- Preposition, having " class " for its object.

The .- Adjective qualifying " class."

Class. - Collective noun, singular number, neuter gender, objective case, after the preposition "in."

(b.) Cow's milk is often drunk by young children.

Cow's.—Common noun, singular number, feminine gender, possessive case.

Milk.—Noun of Material, singular number, neuter gender, nominative case, subject to the verb " is drunk."

Often.—Adverb of time, qualifying the verb " is drunk."

Is drunk.—Verb.

By.—Preposition, having "children" for its object. Young.—Adjective qualifying "children."

Children.—Common noun, plural number, common gender,

objective case, after the preposition "by."

(c.) The flock of sheep is eating grass in James' orohard.

The.—Adjective qualifying "flock."

Flock.—Collective noun, singular number, neuter gender, nominative case, subject to the verb " is eating."

Of .- Preposition, having "sheep " for its object.

Sheep.—Common noun, plural number, common gender, objective case, after the preposition "of."

Is eating .- Verb.

Grass.—Noun of Material, singular number, neuter gender, objective case, after the verb " is eating."

In.—Preposition, having "orchard" for its object. James.—Proper noun, singular number, mesculine gender, possessive case.

Orchard.—Collective noun, singular number, neuter gender, objective case, after the preposition "in."

§ 4.—NUMBER.

- .1. (When a noun denotes one thing, it is said to be in the Singular number. When it denotes more than one, it is in the Plural number.
- Some nouns, from the kinds of meaning contained in them. cannot have a plural:—
- , (a.) A Proper noun has no Plural, because it denotes one particular thing or person as distinct from every other thing or person; as, Calcutta. (We cannot say Calcuttas.)
- N. B.—Whenever a Proper Noun is put into the Plural number, it is no longer a Proper noun, but has become or "is used as" a Common Noun signifying different things or persons of the same stamp:—

```
... (Proper.)
Many Egypts (-coonstries as large as Egypts)
could be contained in India.

Kälidda was poet of India.

India did not produce two Käliddes (—two
poets equal to Kälidda.

(Common.)
```

- (b.) A Material Noun has no Plural, because it simply denotes matter of some kind, without reference to the number of individual things in which that kind of matter is found; as gold. (We cannot say golds.)
- N. B.—Whenever a Material Noun is put into the Plural number, it is no longer a Material Noun, but has become or "is used as" a Common Noun signifying different kinds or different examples of the matter named:—
- | Tee is a pleasant drink | Material. | Material. |
 | The best teac—bes_plants) grow in India. ... (Common.) |
 | All men thought drink motion ... [Material.] |
 | The outers (___tereasif or rivers) of Babylon ... (Common.) |

- / (c). An Abstract Noun has no Pluns, because it denotes some quality apart from the different objects possessing that quality; as, hardness, sleep. (We cannot say hardnesses, sleeps.)
- N. B.—Whenever an Abstract Noun is put into the Plural, it is no longer an Abstract Noun, but has become or "is used as "a Common Noun signifying different acts, kinds, or examples of the quality named:—

| Kindness is part of his character (Abstract.)
| He did many kindnesses (—act of kindness) ... (Comson.)
| He is a lover of virtue (Abstract.)
| He has many virtues (—kinds of virtue) ... (Comson.)

3. [The only kinds of nouns, then, which (strictly speaking) can have a Plural are Common nouns and Collective Nouns. But as "every Collective Noun is also a Common Noun," (See § I, pars. 8.) it is right to say that only Common Nouns can be put into the Plural: -

Hands, the plural of Aand ... (Common Noun.)

Flocks, the plural of flock ... (Common Collective Noun.)

How Plubals are formed from Singulars.

 The general rule for forming the Plural number of a noun is by adding s to the Singular; as,

Hand hands. Star stars.

Hand hands. Garden gardens.

Map maps. Star stars.

House houses. Blow blows.

But if the noun ends in s, z, sh, or ch, the Plural is formed by adding es to the Singular; as,

Crack

cracks.

i by adda	ng es	so the Sing	umr; as,		
Singular, Glass Hiss		Plural- glass-es. hiss-es.	Singular. Gash Brush	٠,	Plural. gash-es. brush-es.
Moss Tax Box	•	moss-es- tax-es- box-es-	Bench Coach Biroh		beach-es coach-es birch-es

If the noun ends in y and the y is preceded by a consonant, the Plural is formed by changing the winto ies:-Singular. Plural Singular. Plural. duties. Duty Army armies. ladias.

Fly Slee. Lady

But if the final y is preceded by a vowel (as in ay, ey, or ov.) the Plural is formed by simply adding s to the Singular in accordance with the general rule given in para. 4.) :-

Singular. Plural. Singular. Plural. Day days. Monkey monkeys. Play plays. Chimney chimneys. K.ev keys. Tov tovs. Journey iourneys. Boy boys. Valley valleys. Jov iovs.

If the noun ends in o, and the o is preceded by a consonant, the Plural is generally formed by adding es to the Singular:--

Bingular. Plural Plural. Singular. Cargo -860**978**3 Mango mangoes. Hero heroes Potato potatoes. Buffalo buffaloes. Echo echoes-Motto negroes. mottoes Negro. tomatoes. Volcano volcanoes. Tomato

But all words ending in oo, all words ending in io, or yo, and a few words ending in o, form the Plural in s, and not in es:-

Ringular. Pluval Bamboo bamboos. Cuckoo enekoos. Hindoo Hindoos. Kangaroo kangaroos. Folio folios Trio trios. Portfolio portfolios. Embryo embryos.

Singular. Plural. grottos. Grotto cantos. Canto balos. Halo quartos. Quarto mementos. Memento pianos. Piano provisos. Proviso

Tyro (or tiro) tyros. There are a few nouns ending in o, which form the

Plural both in s and es :-Singular.

Calina Musquito Portico

Plural. calicos or calicoes. musquitos or musquitoes. portions or portions.

7.	If the noun	ends in	f or	fe, the	Plural	is	generally
forme	d by changing	ng f or f	inte	ves :			

Singular. Losi Wife Wolf Knife Life	Plural, loaves, wives, wolves, knives, lives.	Singular. Thief Half Myself Shelf Lonf	Plural. thieves. halves. ourselves, shelves. leaves.
Calf	calves.	Sheaf	sheaves.

But there are some nouns ending in f, which form the Plural by simply adding s (in accordance with the general rule given in para, 4):—

Singular,	Plural.	Singular.	Plural.
Reof	reefs.	Dwarf	dwarf
Chief	ohiefs.	Turf	turís.
Roof	roofs.	Gulf	gulfs.
Hoot	hoofs.	Cliff	oliffis.
Proof	proofs.	Grief	griefs.

There are three nouns ending in je, which form the Plural by simply adding s:—

Safe—safes ; strife—strifes ; fife—fifes.

8. There are 7 or 8 nouns in common use, which form the Plural by a change in the middle of the word:—

Plural.	Bingular,	Piurai.
men.	Tooth	tooth.
women.	Louse	lice.
fect.	Mouse	mice.
geese.	Dormouse	dormice.
	men. women. fect.	men. Tooth women. Louse feet. Mouse

9. There are 4 nouns which form the Plural in en

or ne:			
Singular. Ox	Plural.	Singular. Brother	Plural. brothren (or
Child	ohildren.	Cow	brothers.) kine (or oews.)
10 A		11 4	.1 70 11

10. A compound noun generally forms the Plural by adding s to the principal word:—

Stagular, Plural,
Father-in-law fathers-in-law.
Son-in-law sons-in-law.
Mother-in-law mothers-in-law.
Daughter-in-law daugtters-in-law.

Singular. Plural. Step-son Step-daughter step-sons. step-daughters. Hanger-on hangers-on. Passer-by Maid-servant i-servants. Foot-man foot-men. washer-men. Washer-man Knight-errant knights-errant. Coat-of-mail coats-of-mail. courts-martial. Court-martial

There are three Compound Nouns which take a double Plural :-

Singular. Man-servant Woman-servant Lord-justice

Index

Commander-in-chief

24

Plurul men-servants. women-ser vants. lords justices.

seraphs.)

commanders-in-chief.

In a phrase like "Miss Brown," two different forms are used for the Plural. We may either say "the Miss Browns," or "the Misses Brown"

11. Foreign Plurals. These are Plurals which have been borrowed direct from foreign nouns. The following are among the neuns of this kind, that are most commonly

met with :-Singular. Plural. Singular. Plural. (Greek) (Latin.) Analysis analyses Addendum. addenda. Rania bases. data. Datum Crisis crises. dicts. Dietum Hypothesis hypotheses. offinyla. Effluvium Oasia 08866. Erratum errata. Parenthesis | parentheses Memorandum memoranda Thesis theses. Medium media. Phenomenon phenomena. Stratum strata Criterion criteria, Alumnus alumni. (Italian.) Fungus fungi. Bandit bandittl Genius genii. (French.) Beau Radius radii. beaux. Burean Terminus termini (Hebrew.) Formula. formulæ. Cherub cherubim (or Genus Stamen cherubs.) Axia Seraph seraphim (or

Repeat and spell the Plural form of each of the following words :---

> Addendum : seraph : tooth : echo : bamboo : vallev : dutv : play ; goose; chief ; loaf ; looker on ; lord-justice ; erratum; crisis; criterion; memento; mouse; buffalo; map; birch; musquito: maid-servant: man-servant; Miss Brown: tooth: strife : oasis : radius : datum : genus : cuckoo : lady : monkey ; child : step-son : proof : thief : folio : Hindoo : mango : washerman : foot , foot man : knife : wife : dictum : bandit : beau : stamen : piano : cow : kev : fiv : box : hero : memorandum : chimney; stop daughter; motto; joy.

PECULIAR USES OF SINGULARS AND PLURALS.

12. APART from the different forms of the Plural, (all of which have been described in paras. 4-11,) there are certain peculiarities in the use of Singular and Plural nouns which can be shown under the following headings:-

I .- Nouns which have the same form for the Plural as for the Singular :-

	(a) Names of Anti-	(b) Nouns of	(c) Weight and	(d) Missellaneout.
	mals.	Number.	Money,	
	_	Pair	Pound (weight)	Series.
	Desr	Brace	Stone	Species.
	Sheep		Hundredweight	Apparatus.
ı	Fish, rarely fishes	Dozen	Pound (money)	Heathen.

	Money.	()
	Pound (weight)	Series.
	Stone	Species.
ı	Hundredweight	Apparatus
i	Pound (money)	Heathen.
ł	Pice	

This deer, these der. That sheep, those sheep. That fish, those fish (rarely fishes.) This series of names, those series.

That species of birds, those species of birds. Those apparatus. Those heathen. Two paw of boots. Nine brace of birds, Four yoke of oxen. Ten dezen books. Three score men. Twelve pound weight. He weighs ten stone and a half. That box weighs three hundred-weight. Four pound ten shillings (English money), Three pice (Indian money.)

N. B .- Some nouns, which take the Plural form at ordinary times, retain the Singular form when they are joined to Numeral Adjectives to express some specific quantity or number :-

A ten repre note. A twelve most. A three-feet rule. An eight-day clock. A six year old have. A fortnight, (which is a contraction of a tention nights.") Forty head of cattle Seven fathom deep.

II.—Nouns, which are not Plural in form, but are always used in a Plural sense

Cattle, "These cattle (cows, oxen, bullocks, &c.) are mine.
To say this cattle, or these cattles is wrong.

Vermin, "These vermin (rate, mios, &c.,) do much injury to the fields." We cannot say this sermin or these vermins.

Swine, "Those swine must not be admitted into the garden." We cannot say that solve or those solves.

; III.—Nouns which have no Singular form. These are for the most part names of things, which imply plurality

or consist of more parts than one:—

(a.) Instruments or tools:—arms (in the sense of weapons)
bellows, fetters, pincers, nippers, soissors, tongs, shears, suiffers,
tenerous

(b.) Articles of dress: -breeches, drawers, pantaloons, trappings, trowsers, hose.

 (c). Kinds of disease: —measles, mumps, staggers, small-post (originally spelt as small-pocks).

(d). Parts of the body: --bowels, entrails, intestines, giblets, links.*

* The word "lungs" is generally included in this list; but this is a mistake; for we can correctly say "the right lung." or "the left lung." So the word is used in the Singular, and not only in the Plural-

(e). Miscellaneous:— Ashes, grains of dust from burnt wood or coal.

Annals, public records.

Assets, property granted by will or claimed for debt.

Credentials, certificates to a man's credit.

Dreas, the sediment of any kind of liquid.

Embers, coal and ashes mixed.

Chattels, moveable goods or property.

Lers, the same as dregs.

Nuptials, ceremonies of marriage.

Obsequies, ceremonies of burial,

Shambles, butchers' shops in a line.

Statistics, figures and facts collected and arranged for some special purpose.

Victuals, various kinds of food.

Hustings, a platform for making a public speech. Proceeds, the sums of money realized by a sale.

Thanks, words expressive of gratitude.

Tidings, news about some thing or person.

Downs, Sloping banks of unwooded land. Sade, water mixed with scap. Tactice, a plan for gaining some object. Ethics, the theory of the duties of life. Wages, payment for work done-Chaps, the upper and lower jaws. Auspices, guidance, leadership. . Billiards, a game played with ivory balls. Environs, the fields, houses, &c., surrounding a place. Those, the muscles of the body. Contents, the things contained in something.

IV .- Nouns, which have one meaning in the Singular and another in the Plural :-

Singular. Advice, counsel. Beef, flesh of ox. Compass, range or extent. Good, benefit. Iron, a metal. Physic, medicine. Return, coming back. Vesper, evening. Sand, a kind of matter. Force, strength or energy. Air, atmosphere.

Plural. Advices, information, Beeves, cattle, bulls & cows. Compasses, an instrument. Goods, moveable property. Irons, fetters made of iron. Physics, natural science. Returns, statistics. Vespers, evening prayers. Sands, a tract of sandy land. Forces, army. Airs, demeanour.

V .- Nouns which have two meanings in the Plural

against one	in the Singula	r:	_
Sin	gular.	Plural.	
Custom,	habit.	Customs,	1. Habits. 2. Toll or Tax.
Letter, $\begin{Bmatrix} 1 \\ 2 \end{Bmatrix}$	Of alphabet. Epistle,	· Letters,	1. Of alphabet. 2. Epistics. 3. Learning.
Pain,	Sufferin.	Pains,	1. Sufferings. 2. Trouble, care.
Effect,	Result.	Effects,	1. Results. 2. Goods & chattels.
Manner,	mode or way.	Manners,	1. Modes, ways. 2. Behaviour.
Number,	as in counting,	Numbers,	I. As in counting.
Part,	portion.	Parts,	1. Portions.

Singular,		Plural.		
Spectacle,	anything seen.	Spectacles,	1. 2.	Things seen. Glasses to help the sight.
Premise,	a statement or proposition.	Premises,	{2.	Propositions. Surroundings to a house.
Quarter,	a fourth part.	Quarters,	{1 2	Fourth parts. Lodgings.
VINo	une which he	To two forms	ı in	the Plurel -

VI.—Nouns, which have two forms in the Plural, each form with a separate meaning of its own.

Brother, Brothers, sons of the same mother, Brethren, members of the same society. Clotha. kinds or pieces of cloth. Cloth. Clothes, articles of dress. Dies, stamps for coining. Die. Dice. small cubes used in games. Geniuses, mon of genius or talent. Genius. · fabulous spirits of the air. Index, table of contents. Index. Indioes, signs used in algebra. Staves, sticks or poles. Staff. Staffs. a department in the army. (Shot. little halls discharged from a gun. Shot. discharges ; as, " he had 2 shots." Shots.

VII.-True Singulars used as Plurals.

By a True Singular I mean that the final s is part of the original Singular noun, and not a sign of the Plural.

Such nouns, though Singular by etymology, are liable to be considered Plural on account of the final s; and two of them are now always used as if they were Plural:—

Summons.—This nonn is still correctly used as a Singular; as, "I received a summons to attend"; "this summons reached me to-day." The Plural form is summonses.

to-day." The Fitted form is summones.

Alms.—"He asked an alms," (New Testament.) But now the word in generally used as if it were Plural; as, "I gave alms to the began, and for there he thanked me."

Eaves.—The edge or lower borders of the roof of a house. The word is now always used as a Plural; as, " the caves are not yet finished."

Riches.—This too is really a Singular; as, "In one hour is so great riches come to naught." (New Testament); but now on account of the final s this noun is always used as a Piural; as, "Riches do not last forever."

VIII .- True Plurals used as Singulars.

By "True Plurals" are meant nouns in which the final s is really a sign of the Plural.

5 18 Feality & Sign Of Une Fluttal.
Amends,—This is sometimes used as a Singular and sometimes as a Flural; es, "He made as a smends"; "I accept these amenda."
Hears.—This is now always used as a Singular: es, "By this

means."

News.—This is now always used as a Singular; as, "Ill news ransansee."

Innings.—This is a word used in cricket to denote the turn for going in and using the bat. It is always used as a Singular; as, "We have not yet had as innings," "Our cleven beat the other by as innings and 10 runs."

Gallows.—The frame-work from which criminals are hanged. This noun is used as a Singular; as, "they fixed up a gallows."

noun is used as a Singular; as, "taey nixed up a gallows."

Odds.—A word used in betting, to denote the difference of one wager against another. "We gave him a heavy odds against ourselves."

N.B.—The student should guard against certain errors which are very common in practise:—

Abuse.—This word when it means "misuse" or "wrong use," may be used in the plural number; ss, "This rule is liable to many abuses," that is, "this rule may be wrongly used in many ways."

But when "abuse" is taken in the sense of "bad language, reproach, &c.,"it can never be used in the plural number. Thus we cannot say," "He gave us many abuses"; but instead of "abuses" we should say "words of abuse" or "abusive words."

"abuses" we should say "words of abuse" or "abusive words."

Information.—This word is never used in the Plural.

We cannot say, "He sent us all the informations."

Alphabet.—We cannot say "alphabets," but "letters of the alphabet."

Furniture.—We cannot say "furnitures," but "article or pieces of furniture."

Offspring.—This is never used in the plural: we cannot say "offsprings," but " children."

Many more instances of common errors of this kind could be given. Such errors often arise from pluralizing Material and Abstract Nouns, which custom does not allow to be used as Common Nouns.

CHAPTER III .-- ADJECTIVES.

1 1.-THE KINDS OF ADJECTIVES.

- 1. As adjective qualifies a noun or pronoun; that is, it describes or limits its meaning.
- 2. There are altogether six different kinds of adjectives:-
 - (1.) Proper; describing a thing by some Proper Noun.
 - (2) of Quality; showing of what sort or is what state a thing is.
 - (3.) of Quantity : showing how much of a thing is meant.
 - (4) of Number: showing how many things or in what order.

 (5) Demonstrative: showing which or what thing is meant.
 - (8.) Distributive: showing which or what thing is meant
 (8.) Distributive: showing that things are taken separately.

PROPER ADJECTIVES.

3. To this class belong all such adjectives as are formed from Proper Nouns:—

The Indian plains = the plains of India.

A Chinese pilgrim a pilgrim from China. The Shin sect=the sect of Shins.

A Shirite temple = a temple to Shiva.

A Persian poet = a poet of Persia.

The Christian faith the faith in Christ.

The Turkish empire=the empire of the Turks.

The Gangetie plain=the plain watered by the Ganges. The English language=the language of England.

Adjectives of Quality on State.

 This kind of Adjective describes or limits the noun by showing the quality or state of the thing named.

A brave boy; a sick lion; a tame eat; a large field; a black horse; an industrious atudent; a careful workman.

Adjectives of quality are much more numerous than those of any other class. The different kinds of quality or state pertaining to different things, persons, or places are almost numberless; they cover the whole range of human knowledge.

ADJECTIVES OF QUANTITY OR DEGREE.

 This kind of adjective describes or limits the noun by showing the quantity of the thing named, that is, how much of the thing is intended or specified.

There are very few adjectives of this class, and they are all contained in the following list:—Much, little; no or none; some, any; enough or sufficient; all or whole.

He ate much (a large quantity of) bread.

He ate little (a small quantity of) bread.

He ate some (a certain quantity of) bread.

He did not eat any (any quantity of) bread.

He are enough or sufficient bread. He are all the (the whole quantity of) bread.

 Adjectives of quantity are always followed by a Singular noun; and this Noun must always be either a noun of Material or an Abstract noun; as "much bread" (Nono f Material). "much pain" (a high degree of pain,

Abstract Noun.)

Note.—It is idiomatic to speak of a quantity of matter (Material Noun), and a degree of some quality (Abstract Noun.) Hence adjectives of Quantity have also been called adjectives of Degree.

7. Some, any. There is not much difference in the meaning of these two words, but there is a great difference in the way in which they are used:—

(a.) "Some" is used in affirmative sentences; as "He has procured some bread." We cannot say, "He has procured any bread."

(b.) "Any" is used in negative sentences; as, "He has not procured any bread." We cannot say, "He has not procured some bread."

But although "any" is used in nagative santenoes like the above, we must never say "no any", as is so commonly done by Indian students. Thus we must not say "the has procured so sny bread," but we must say "the has not precured any bread," or "He has procured no bread," Both are in correct idioms.

(c.) "Any" and "some" are both used in Interrogative

sentences and without any difference either of meaning or idiom. Thus, "Has he procured some bread" and "Has he procured any bread" are equally correct, and both mean the same thing.

ADJECTIVES OF NUMBER.

 This kind of adjective qualifies (that is, describes or limits) the noun by saying something about the number of the thing or things named.

Adjectives of this kind are called Numerals; and they are subdivided into two main classes:—

9. Definite Numerals denote some exact number.

Those which show how many things there are (as, one, two three four &c...) are called Cardinals.

Those which show in what order a thing stands, as, first, second, third, &c.,) are called **Ordinals**.

Those which show how often a thing is repeated are called Multiplicative.

Curdinals.	Ordinals.	Multiplicatives.
One Two Three Four Eive Six Seven	first second third fourth fifth sixth seventh	one only, single, simple. twofold, double, threefold, treble, triple, fourfold, quadruple (four times one, fivefold, quintuple (five times one,) sixfold (six times one.)
Eight Nine Ten	eight ninth tenth	sevenfold (seven times one.) eightfold (eight times one.) nincfold (nine times one), tenfold (ten times one.)

 Indefinite Numerals denote number of some kind, without saying precisely what the number is. For this reason they are called Indefinite. The only adjectives of this class are :---

All, some, enough, no, or none; many, few; several, sundry.

All men are mortal. Some men die young.
No men were present.
Many men are poor.
Fru men are rich.
Study men wett away.

A Definite numeral is made Indefinite by prefixing the word some or about:—

Some twenty men, (= about twenty men,) twenty men more or less, were present.

11. The words "some," "enough," "all," "no or none," are adjectives of Number or adjectives of Quantity, according to the sense.

If the noun qualified by such words is a Material or Abstract Noun, the Adjective belongs to the class of Quantity, as has been explained in para. 6. (But if the noun is a Common Noun (or one used as a Common Noun) and capable therefore of being in the Plural Number, the adjective belongs to the class of Number:—

Quantity (Singular) Number (Plural.)

Much; he had much bread.
Little; he had little bread.
Enough; he had soungh bread.
Some; he had some bread.
Some; he had some bread.
Some; he had some bread.

Some; he had some bread.

No; he had no bread.

No; he had no loaves of bread.

All; he had all the bread.

All; he had all the loaves of bread.

Few, a few, the few. Each of these expressions has a distinct meaning of its own :—
 (a.) "Few" is a Negative Adjective, and signifies "not

(a.) "Few" is a Negative Adjective, and signifies "not many."

He read a few books: (he did not read-many books.)

(b.) "A Few" is an Afterwative Adjective, and signifies "some at least":

Heread a few books; (that is, he read some books at least, though the number wm small.)

(c.) "The few" implies two statements, one Negative, and the other Affirmative :-

He read the few books he had.

That is; (1) the books he had were not many; (Negative.) (2) he read all the books he had. (Affirmative.)

13. Many a. a many. The former phrase is followed by Singular nouns, and the latter by Plural ones.

(a) "Many a." Here "a" = "one:" "many a man" means " many-times one man," or "many men;" "many" has here the force of a Multiplicative Numeral.

> Manu a youth and manu a maid Dancing neath the greenwood shade.

(b.) "A many." Here "many has the force of a Collective Noun, and of is understood after it :-

They have not shed a wany tears,

Dear eyes, since first I knew them well. -Tennyson.

In prose it is more common to put in the word "great" between a and many. "A great many men" means "is large number of men," the of being understood, and many having the force of a Collective Nonn

N. B.-In Old English "menigu" was a Collective Noun, signifying "a multitude or large number," and "manig" was an Indefinite Numeral Adjective signifying " many." In modern English the same word "many " stands for both , for it is equivalent to "menigu" in the phrase a many, and to " manig" in the phrase many a or simply many.

14. Definite Numeral Quantities are sometimes Collective Nouns, and, as in the case of "many," the of is understood after them :--

A dozen (of) sheep. A score (of) applea.

A hundred (of) years ; a thousand (of) years. A hundred-thousand (of) rupees. (But we must say " a lac

of rupees," and not " a lac rupees.")

DEMONSTRATIVE ADJECTIVES.

15. This kind of adjective describes or limits the noun by pointing out which thing or what thing is intended.

The word Demonstrative means " pointing out."

16. Adjectives of this kind are subdivided, (as Numeral Adjectives are.) into two main classes:—

I. Definite.

II. Indefinite.

When a thing is pointed out exactly, as "this man," the adjective is called a **Definite** Demonstrative.

When it is pointed out in a certain sense, but not exactly, it is called an Indefinite Demonstrative:—

De	Ente.	1	nde Ane	te.
Singular.	Plural.	Singular.		Plural,
The	the	A, an	***	mil.
This	these	One, any		any.
That, yon, youd	er those, yon, yonder,	A certain	•••	certain.
Such	, such	Such	***	such.
The same, or se	if the same, or	Some .	***	some.
same.	self-same	Another, an	y othe	r other, any
The other	the other.	1		other.

Demonstrative Adjectives are few in number, and all of them are given in the above list.

 The adjective the is sometimes called the Definite Article, and a or an is called the Indefinite Article.

It they are called by these names, it must be remembered that they are not distinct parts of speech, but simply adjectives. For the is only a shorter and less precise form of this, that, these, or those; and a or an is only a shorter and less emphatic form of one:—

A stitch in time saves nine.
(Here a signifies one stitch as against sine stitches.)

An is used before a vowel or silent h; as,—

An apple; an egg; an ink-bottle; an heir; an hour; an hour; an

A is used before a consonant, before u sounded as you, and before a sounded as wu:—

> A kite; a cart; a bottle; a useful thing; a unit; a one-eyed man.

Even before an aspirated & we use on, provided the accent is on the second syllable;—thus, we say "a bis'-to-ry," because here the accent is on the first syllable "he"; but we say "on his-tor'-local account," because here the accent is on the second syllable "tor."

- 18. Definite Demonstratives. The uses of these adjectives are shown below:—
- (a.) This, these. Something near at hand is pointed to by these adjectives; as,

 The tree: these trees.
- (b.) That, those, yon, yonder. These adjectives point to something further off; as,

That tree; these trees, you or youder tree (or trees)

N. B.—"You or youder" is seldom seen except in poetry.

They can be used with nouns of either number.

(c.) Such. This adjective means of this or that kind, and refers to something previously mentioned:—

His praise of me was not sincere: I do not like such a man (or such men.)

"Such" is also used as an *Indefinite* Demonstrative. In this case it does not refer to any thing previously mentioned, but is vague or indefinite.

He called at my house on such a day (maome day or other,) and I gave such and such an answer (some answer or other) to his questions.

(d.) The same, self-same, very same. These adjectives all refer to something previously mentioned. "Self-same" and "very same" are more emphatic than "same."

You told him to come have to-morrow; and I gave him the same (or the self-same, or the very same,) answer,

(e.) The other. This means the opposite to "the same"; or "the one"; as.

Two women shall be grinding at the mill; the one shall be taken, and the other left. -- Now Testament.

"The other day." This peculiar phrase has an Indefinite sense, and means any day (some day or other) recently preceding and therefore distinct from the present.

> He came to see me the other day (-a few days ago, some day or other which I cannot exactly remember.)

19. The Definite Demonstratives are very frequently used to point out the noun, which stands as Antecedent to some Relative Pronoun following:-

The man who did this deserves to die.

This man whom you now see came here to-day.

That book that you are reading is mine. Yonder tree which stands there is dead.

He is not such a clever student as you are. You are reading the same book which (or that) I read many

years ago.

sentences as the following :-

The other men who have come will go away again to-morrow.

 The Indefinite Demonstratives are used as follows .___

(a.) A, an, a certain. These are used with singular nouns, to show that no thing or person in particular is intended or specified . as, " a man," " a certain man," " an apple," Certain

is used with Plural nouns in the same sense ; as, " certain men." (b.) One. This word is generally a Numeral Adjective : but it may also be used as an Indefinite Demonstrative in such

He came our day (on a certain day which I cannot remem-

her) to see me. One Mr. James (a certain man whom I do not know, but who is called Mr. James) came to see me.

(c.) Any. This is more emphatic than " a " or " an "; and it can be prefixed to Plural as well as to Singular nouns.

> Any man (that is, any and every man) could do that. You may take any book or books (no book in particular

but any book) that you like best. (d.) Some. This is used in two senses, (1) as showing that no thing or person in particular is specified; (2) for making a Definite number Indefinite. (See above, pare, 10.)

- (1) Some man (I do not know who he was) called here to-
- (2) He is owing me some 20 rupees, (about 20 rupees, more · or less.)

- (e) Another, any other, other. "Another" (with Singular nonns) and "other" (with Plural ones) are used in affirmative sentences; but "any other" (with nouns in either number) is used in negative ones; as,
 - . We have seen another man (or other men) to-day.
 - We have not seen any other man or men to-day.
- "Other" is sometimes followed by "than," and in this case it should be placed immediately before it, or as close to it as possible.—

He has no books other than Sanskrit

This is better than saying, "he has no other books than Sanskrit." Here "other than" means "different from" or "except." "He has no books except Sanskrit."

21. Some, any, one. It depends upon the sense whether these are Demonstrative Adjectives, or Adjectives of Ouantitu. or Adjectives of Number.

Some.	(1) Some man called here to day	*	Indef.	Demons.
	(2) Give me some bread		10	Quant.
	(3) Give me some loaves of bread		22	Number.
Any.	(1) Take any book you like best			Demons.
	(2) He has not had any bread			Quant.
One.	(1) He visited me one day		11	De mons

(2) There is one loaf in the house ... Def. Number.

DISTRIBUTIVE ADJECTIVES

22. Distributive Adjectives denote that the things named in the sentence are taken singly, separately, or one at a time.

There are 6 adjectives of this class, 4 of which are used with Singular nouns, and 2 with Plural ones.

- 23. The 4 Distributives used with Singular nouns are each, every, either, neither.
- (a.) Each. This means one of two things or one of any number erceeding two :--

The two men cach had a gun, The twenty men had each a gun. (b.) Every. This is never used for one of two, but always for some number exceeding two:—

Every man (out of the twenty present) had a gun.

We cannot say; -" The two men had every men a gun.

- "Brery six hours" and similar expressions. This means every period or space of six hours, six hours being taken collectively as one period of time. Thus, "he fall hungry every six hours"; which means, "he felt hungry at the close of every space of six hours,"
- "Every other." This means every eccond or each alternate; as, "he was attacked with fever every other day"; which means that he was attacked on every second day or on each alternate day.
- (c.) Either. This has two meanings, (1) one of two, or (2) each of two, that is, both.
 - (1.) You can take esther side; that is, one side or the other.
 (2.) The river overflowed on esther side; that is, on both sides.
- (d.) Neither. This is the negative of "either" in its first meaning, and signifies not one of two, that is, neither the one nor the other.
- "You should take neither side"; that is, neither this side nor that,
- 24. The 2 Distributives used with Plural nouns are respective, several; and between these two there is no difference of meaning or idiom:—
 - They returned to their respective (each to his own) homes.

 They returned to their *** real (each to his own) homes.
- Note.—The word respective or served is in fact a double part of speech, being partly a Distributive Adjective and partly a Possessive Pronoun. It is a Distributive Adjective so far as it signifies each, and a Possessive Pronoun so far as it signifies the com. her own, its own, or their com.
- 25. The drift of a Distributive Adjective can be also expressed by the phrase " a piece," which is equivalent

in sense, though not in grammatical form, to each or every :---

The two men had a gun a picce (=the two men had cach a gun.)

The two my men had a gun a pucc (=the twenty men had cach
a gun.)

- 26. Each other, one another. In these phrases we have a Distributive Adjective (each or one) combined with an Indefinite Demonstrative Adjective (other or another.)
- (a.) "Each other" is used when two things or persons are concerned; as,

The two men struck cach other (that is, cach man struck the other man.)

(b) "One another" is used when more than two things or persons are concerned; as,

They all loved one another. (that is, each man loved every other man.)

Examples for Practice.

Say to what class of adjectives each of the adjectives noted below belongs:-

A contented mind is a continual feast. Theeler pies make one anna, sirter a annas make our rupes; so a pas is the twelfth part of an anna, and an anna is the susteenth part of a rupee. You have sent mough food for the short journey that we shall take, but not enough men to carry our five boxes. To mind one's own business, and not to meddle with other man's concorns is a some and weefel rule All the men who came here to-day were provided with an ample meal, and they have consumed all the food that we had in the house All work and no play makes Jack a dell boy. Truth in the long run will prevail over every thing that is false. Some men brought us some wood, with which we lighted a bright fire and cooked some potatoes in the open air; they then returned to their respective homes All the men who took part in this dishonest affair, hated one another ever afterwards. He had a shorp attack of fever every other day. Much jungle could be seen on rather bank of the river. Both sides claimed to have won the game; but the game was won by neither side.

- § 2.--OTHER WORDS USED AS ADJECTIVES.
- THERE are certain other words, which, though they are not Adjectives Proper, are used like adjectives to qualify nouns.

These are:—(1) Participles, (2) Adverbs, (3) Nouns, (4) Infinitives, (5) Verbal Nouna. All of these say something about the quality or state of a thing, and hence if they were adjectives in form, they would belong to the class of "adjectives of quality."

 Participles. These are "Verbal Adjectives," that is, adjectives formed from verbs,—being partly verbs, and partly adjectives:—

A fading flower; a defeated enemy; a fallon tree.

Having gained his case in court, he returned home.

(Here "his case" is the object to the verb "having gained; " but "having gained" is a Verbal Adjective qualifying the noun or pronoun "he.")

3. Adverbs. There are certain adverbs of Time or Place, which are used like adjectives, provided they are preceded by the article a or the:—

The then king=the king then reigning.

The late king = the king lately reigning.

The now king = the king now reigning.

The once king = the king once or formerly reigning.

The above account = the account given above.

A far country=a country far distant.

A downward course = a course leading downwards.

An outside traveller a traveller sitting outside.

As up mail=an up-going mail.

- N. B.—After each of these adverts there is some participle or adjective understood. The advert qualifies not the noun, but the understood participle. Thus "the then king"—the then reigning king"; and so with all the other examples. An adverb cannot qualify a noun or prenoun.
- 4. Nouns. A noun is often used to qualify another noun; but though it is used like an adjective, it is still a noun, and not an adjective:—

Home joys = the joys of home.

A village watchman = a watchman of a village.

The summer heat = the heat of summer.

II a hyphen is put between the nouns, as in "summer-heat," then we should say that "summer-heat" is a compound noun,—that is, a noun compounded of "summer" and "heat."

5. Infinitives. An Infinitive placed immediately after a noun qualifies the noun going before:—

Water to drink adrinkable water.

A chair to set on = a chair fit to be used for a seat.

- N. B.—This is called the Infinitive of Purpose, or the Gerundual Infinitive. What is the purpose for which the water is wanted? To drink. What is the purpose for which the chair is wanted? To six on.
- Verbal Nouns. A Verbal Noun ending in ing has
 precisely the same force as a Gerundial Infinitive. Only it is
 put before the noun which it qualifies, and not after it:

 Drinking water—water to d in it.
- N. B.—The full phrase would be "water for drinking" or "water for the purpose of drinking." It the for is omitted and the phrase is changed into drinking water," then how should "drinking" be parsed? It should be parsed as a Verbal Noun used like an adjective to qualify the noun "water," This is on the same principle as that explaned above in pars.

§ 3.—Degrees of Comparison.

 Most Adjectives of Quality, two Adjectives of Quantity, viz., much and little, and two Adjectives of Number, viz., many and few, have degrees of comparison.

Demonstrative Adjectives and other Adjectives of Quantity and Number cannot, from the kind of meaning contained in them, have any degrees of comparison.

The degrees of comparison are three in number:—
the Pos'-i-tive, the Com-par'-a-tive and the Su-per'-la-tive.
The Positive denotes the simple quality: as a heavitive.

The Positive denotes the simple quality; as a heaviiful horse.

The Comparative denotes a higher degree of the quality.

The Comparative denotes a higher degree of the quality; as, a "more beautiful horse." This is used when two things of the same class are compared together, and shows which of the two possesses the quality in a higher degree than the other. The Superlative denotes the highest degree of the quality; as, "the most becautiful horse." This is used when one thing is compared with many other or all other things of the same class, to show that it possesses the quality in a higher decree than all the rest.

3. In all Adjectives of more than two syllables, and in most Adjectives of two syllables, the Comparative is formed by adding "more" and the Superlative by adding "most,"

as in the examples already given.

4. But Adjectives of one syllable and some Adjectives of two syllables can also form the Comparative by adding or or r. and the Superlative by adding est or st.

(a.) If the Positive ends in two consonants, or in a single

Small	smaller	smallest.
Thick	thicker	thickest.
Bold	bolder	boldest.
Light	lighter	lightest.
Short	shorter	shortest.
Great	greater	greatest.
Brief	briefer	briefest.
Deep	deeper	deepest.
Loud	louder	loudest.

(b.) If the Positive ends in one Consonant, and the Consonant is preceded by a short Vowel, the final Consonant is doubled, when er and est are added:—

Thin		thinner	thinnest
Fat		fatter	fattest.
Hot		hotter	hottest.
Fit		fitter	fittest.
Big		bigger	biggest.
Wet		wetter	wettest.
Glad		gladder	gladdest

(c.) If the Positive ends in e, only r and st are added, and not er and est:—

Brave	braver	bravest-
Wise	wiser	wisest.
True	truer	truest.
Large	larger	largest.
Fine	finer	finest.
White	whiter	whitest.
Tame	tamer	tement.

(d) If the Positive ends in y and the y is preseded by a Consonant, the y is changed into i, when er and est are added:—

Happy happler happlest,
Dry drier driest.
Mexry merriest merriest.
Lasy laster laxiest.

(a.) If the y is preceded by a Vowel, the y is not changed into i :=

Gay gayar gayast.
Grey greyer greyest.
Coy coyer coyest.

Coy coyer coyest.

5. Some Adjectives form their Comparatives and Superlatives in an irregular way:—

Post roc. Comparative. Superlative. Bad, ill, svil worse worst. Fore former foremost, first. Good heat. hetter Hind hinder hindmost. Late later, latter latest, last. Little lees least. Much (quantity) more most-Many (number) more most. Nigh nigher nighest, next. Did older, elder oldest, eldest.

There are six words, which are Adverbs in the Positive degree, but Adjectives in the Comparative and Superlative:—

Positive. Comparature. Superlature.
Forth further furthers.
Far farther farther inner to the control inner to the control inner the contro

Be-neath nether nothermost, upmost. The noun "top" gives a Superlative Adjective "top. most."

6. There are some Adjectives of Quality, which do not admit of Degrees of Comparison, since they denote some

fixed or unique quality that cannot be either greater or less:---

- (a.) Proper Adjectives; ss. Indian, English, Victorian, Biblical. (If a thing is Indian at all, it cannot be more Indian or less Indian.)
- (b.) Adjectives denoting single objects, such as the sun, the moon, the air, &c.; as "solar heat, a lunar eclipse, arrial motion, a single example."
- (c.) Adjectives formedifrom nouns of Material; as, "an iron pipe, a gold bracelet, a leathern bag, a vegetable substance, a wilky fluid, a grassy plain."
- (d.) Adjectives denoting shape; as, "a square box, a round hole, an oblong room, a triangular figure, a right angle, an oval table."
- (e.) Adjectives denoting time; as, "an annual festival, a daily newspaper, a momentary pause, nightly slumber."

Demonstrative Adjectives, as is self-evident from their meaning, never have Degrees of Comparison.

Two, and only two, Adjectives of Quantity admit of Degrees of Comparison.

Much more most.

Two, and only two, Adjectives of Number admit of Degrees of Comparison.

Many more most Few fewer fewest.

- 7. In comparing objects, one with another, the modes of expression to be used are as follows:—
- (a.) When two things are said to be equal in respect of some quality, we use the Positive Degree with as——as, or with some other phrase:—

This boy is as clover as that. This boy is no less cloves then that. This boy is not more elever then that. (b.) When two things are said to be unequal in respect of some quality, we use the Comparative Degree:—

This boy is more clever or cleverer than that.

This boy is the cleverer of the two.

(.) When one thing is said to surpass all other things possessing the same quality, we use the Superlative Degree with the—of:—

"This boy is the cleverest of all."

Note 1.—The learner should guard against the common blunder made by Indian students of using from instead of than after the Comparative Degree, as in the following examples.—

This boy is cleverer from me.

My book is better from yours

Work is more healthy from idleness

It will help him to guard against the above error, if he will remember that then is a Conjunction and from a Preposition, and that hence they are in point of grammar as distinct as possible:—

> This boy is cleverer than I (am.) He likes you better than I (like you.) He likes you better than (he likes) me-

Note 2.—The Superlative Degree can also be expressed by the Comparative, in the following way:—

"This boy is more clever than all other boys."

If this mode of expression is used, care must be taken not to leave out the word other; for there is no sense in saying "this boy is more clever than all boys."

3. Latin Comparatives. There are some comparatives, which have been taken direct from the Latin language. All of these end in or, and not in er; and all are followed by to instead of than.

His strength is His strength is	superior to inferior to	(greater than) mine. (less than) mine.
This event is This event is This event is	prior to	(earlier than) that.
This man is	senior to	(older than) that.
This event is This man is This man is	posterior to	(later than) that (older than) that (younger than)

- Comparatives which have lost their force. There are some adjectives in the Comparative Degree, which have lost their comparing one thing with another.
- (a.) Latin Comparatives:—interior, exterior, ulterior, major, minor. These are now never followed by to, but are used as Adjectives in the Positive Degree:—

A fact of miner (secondary) importance.

He had an siterur (further) purpose in doing this.

The interior (inside) parts of a building. Some have become nouns:—

He is a minor (a person under age)

He is a major (in military rank.)

The interior of the room was well furnished.

(h.) English Comparatives:—former, latter, elder, hinder, inner, outer, upper, nether. These are now never followed by than:—

The former and the latter rain.

-Old Testament.

The enser meaning: the outer surface.

The upper and the sether mill-stones.

The words elder or eldest are often used to qualify "son" or "daughter"; as, "this is the elder of my two sons," "this is the, eldest of my sons." Elder and elders are also used as nouns, to denote some person or persons of dignified rank or ege.

PARSING MODEL

"The man, who shot four tigers and two tigresses from an elephant's back on his first day of sport, received much praise, and won the highest honor."

The—Demonstrative adjective, qualifying the noun "man."

Man—Common noun, measculine gender, singular number, nominative case, subject to the verb "received."

Who—Relative pronoun, masculine gender, singular number, third person, agreeing with its antecedent "man," nominative case, subject to the verb "shot."

Shot-Verb.

Four—Numeral adjective, cardinal, qualifying the noun "tigera."

Tigers—Common noun, masculine gender, plural number, objective case after the verb "shot."

And—Conjunction, joining the two nouns "tigers" and "tigress-

Two-Numeral adjective, cardinal, qualifying the noun "tigress-

Tigresses—Common noun, faminine gender, plural number, objective case after the verb "shot."

From-Preposition, having "back" for its object.

An-Indefinite demonstrative adjective, qualifying the noun "elephant's."

Elephant's—Common noun, common gender, singular number, possessive case, taken with "back."

Back -- Common noun, neuter gender, singular number, objective case after the preposition "from."

On-Preposition, having "day" for its object.

His—Personal pronoun, masculine gender, singular number, third person, possessive case, stands for the noun

"man."

First—Numeral adjective, ordinal, qualifying the noun "dsy."

Day—Abstract noun, neuter gender, singular number, objective

case after the preposition "on."

Of-Preposition, having "sport" for its object.

Sport—Abstract noun, neuter gender, singular number, objective case after the preposition "of."

Received-Verb.

Much—Adjective of quantity, positive degree, qualifying the noun "praise,"

Praise—Abstract noun, neuter gender, singular number, objective case after the verb "received."

And—Conjunction, joining the sentence "received," &c., to the sentence "won." &c.

Won-Verb.

The highest—Adjective of quality, superlative degree, qualifying the noun "honor."

Honor.—Abstract noun, neuter gender, singular number, objective case after the verb "won."

§ 4.—Position of the Adjective.

 THE position of an Adjective in relation to its noun depends upon whether the adjective is used attributively or predicatively.

Note.—An Adjective is used "attributively" when it qualifies its noun directly. It is used "predicatively," when it qualifies its noun through some verb going before.

ADJECTIVES USED ATTRIBUTIVELY.

- 2 When an adjective is used attributively, the invariable rule is to keep it as close as possible to the noun which it qualifies.
- 3. In prose the adjective almost always precedes its noun. In portry, for the sake of rhyme or metre, it may be placed after its noun:—

Prose

A just man Bright prospects This rose. Other roses.

Much pain Its men The fifth class. Double promotion

Partry.

He sang to lords and ladies gay The unpremeditated lay

- Seatt
The old man eloquent

-Byron

4. When an adjective is enlarged by some qualifying phrase, it must always be placed after its noun:—

> A man dear to all. A matter too wegens to be put off any longer. A doctor well practised in all the arts of medicine and worthy of public confidence

Note,...In such examples as the above the adjective must be placed after its noun, in consequence of the "invariable rule" given in para. 2: for if we said "a dear to all man," this would separate the adjective from its qualifying noun.

When several adjectives qualify the same noun at once, they can be placed either before or after their noun.

A horse strong, swift and young; or a strong, swift and young horse. Note 1.—If one of the adjectives is much longer than the other, it sounds better to put the shorter one first:—

An old and conscientions servant.

The shorter and less laborious of the two methods.

Note 2.—If the adjectives consist of long words, it sounds better to place them after the noun:—

God is the maker of all things verble and invisible, animate and enanimate.

Sometimes an adjective is placed after its noun for the sake of point or emphasis.

How does this position give point or emphasis to the adjective? Because the natural position of the adjective is to stand before its noun. By putting it out of its natural place, greater attention is drawn to it; and hence arises the emphasis:—

Things temporal are less precious than things eternal

No man living could have done so well.

I appeal from Philip drunk to Philip sober.

Note.—Sometimes a prepositional phrase is substituted for an adjective for the sake of emphasis or point:—

A word is scason, how good it is !

(This is more pointed than to say " a seasonable word.")

A bird to the hand is worth two in the bush.

A friend in need is a friend undeed.

7. For the sake of emphasis or distinction, (as explained in the previous para.) an adjective used as a qualifying sitle is placed after its noun:—

Alfred the Great. Alexander the Great. Yadisthir the Just Ethelred the Unready. Albert the Good. Louis the Pious. Charles the Fat. Philip the Fair. Richard the Lion-hearted. Charles the Bold.

To the same principle must be ascribed the titles "Elder" and "Younger"; as,

Cato the Elder, Cato the Younger. Pliny the Elder; Pliny the Younger.

Kings of the same name have been distinguished into first, second, third, etc., to indicate their historical order.

These titles of order are usually shown by means of Roman figures. I. II. III. etc:—

Edward I. Edward II, Edward III, etc.

Note.—If we supply some noun, such as "man" after these titular adjectives, the phrase would then be a noun-phrase in apposition to the noun going before; as, "Edward I"—" Edward, the first son or King of that name." "Cato the Elder" — "Cato, the elder of the two men bearing that name."

Hence have arisen a large number of titular nouns, each standing after some Proper Noun, to which it is in apposition:

Peter the Hermit. William the Conqueror. Edward the Conference. Warwick the King maker.

8. There are certain stock phrases, in which the adnective habitually stands after its noun.

This is chiefly due to what has been borrowed from the French language or French idiom; but it has sometimes been done for the sake of emphasis or antithesis:—

The body politic—the state or community (This is due to the old antithesis between the body natural (that is, the body of the individual man as made by nature,) and the body politic or the collective body as made by sosiety.

Maker preprise: some evil purpose previously devised or med itated.

Here apparent one who by right of birth, and hence "to all

appearances," will succeed to the throne or to some estate.

Lords Temporal and Spiritual: This is the distinction between
those who are peem or lords by temporal or worldly rank, and

those who are lords by spiritual or ecclesiastical rank.

Notary public: one who registers deeds, wills, and other legal documents for the public

Knight errant: a knight who makes it his business to move from place to place in search of wrongs to be righted.

Gowrnor-General; Inpector-General; Vicercy elect; blahop elect, etc., (the adjective "elect." denotes an officer who has been nominated or selected for the post, but has not yet been formally appointed.)

The sum total; price current; a fiend incarnate; a god incarnate; point blank (the white or blank spot in the centra of a target.)

ADJECTIVES USED PREDICATIVELY.

- When an adjective is used predicatively, that is, when it qualifies its noun through some verb going before, it is always placed after its noun.
 - (a) When the verb is Intransitive or in the Passive Voice. All men are mortal. He lay dead on the ground. He became very ruch. He was left rich by his father. He was considered west.
 - (b) When the verb is Transitive and in the Active Voice. My father left me poor, but well educated. The judge declared him quality

N, B.—In examples (a) the adjective relates to the $`ub\mu c'$ to the verb.

In examples (b) it relates to the object to the verb.

It will be afterwards explained that the adjective in example (a) is called the Subjective Complement, and that in example (b) it is called the Objective Complement.

\$ 5 .- IDIOMATIC USES OF A AND THE.

 THERE are certain idiomatic uses of the articles a and the, which are common to both. It will be convenient to recapitulate these before describing what is peculiar to either.

(a.) When a Proper Noun is "used as a Common Noun," (that is, when it is used in a descriptive or general sense), it must have an article placed before it. (See Chap. II., § 1, pars. 4.)

Kdlidds was a great Indian poet. Proper, He is the Kdlidds of his age. Common.

(b.) When a Material Noun is used as a Common Noun, it generally has an article placed before it, (See Chap. II, § 1, para. S.)

This box is made of wood.

He is fond of walking in the wood.

Common.

(c.) When an Abstract Noun is used as a Common Noun, it must have an article placed before it. (See Chap. II., § 1, para. 10.)

He is a man of justice.

Abstract.

He is a justice of the High Court.

Common.

(d.) When an Adverb of Time or Place is used as an adjective to qualify some noun, it must have an article placed before it. (See Chap, III., § 2, para. 3.)

A messenger from the king then came. Adverb.

He was a messenger of the then king. Used as adjective.

(c.) When an Adjective is used as, or has been changed into, a Common Noun, it must have an article placed before it. (See Chap, III, § 6, parss. 3 and 5)

That act of yours was nable.

He is a noble by birth.

Adjective.

THE INDEFINITE ARTICLE.

2. A is sometimes used in its original sense of number, as signifying "one," or "one and the same"; as,

Ho stunned the tiger at a blow = at a single blow, not two blows.

Birds of a field it flock together; (that is, birds of one and the

same feather or species)
His conduct to-day is quite of upun (of the same sort) with his conduct yesterday.

Two of a trade (of the same trade) should live apart.

They all consented to a man (to a single man; that is, every single man without exception consented.)

A stitch (=one stitch) in time saves nine.

A bird in the hand is worth two in the bush.

3. Λ is sometimes used to indicate a class or kind of anything; as,

A tig: is a fierce animal; that is, any and every tiger, tigers generally.

A cat is not so faithful as a doq; that is, the cat species is not so faithful as the dog species.

An Englishman (=any person of the English nation) is more fond of travelling abroad than a Hindu (=any one of the Hindu race.)

A rest (-the rose species) is the most beautiful of flowers.

THE DEPINITE ARTICLE.

4. The main and ordinary use of the Definite Article is to "define" mark out, or particularize something; to show that some particular thing is meant as distinct from any other thing or things of the same class.

The principal ways in which "the" defines or marks out an object are shown in the following examples:—

- (a.) To indicate something familiar or near at hand.

 Let us go and bathe in the river.—(the river nearest our house.
 - or the river where we usually bathe.)
 He told the boy to open the deor,—(the door of the room in
 - which he was.)
 The air is cool on the top of the house,—(the house in which we like.)
 - We live.)

 He procures the years for convocation day, (that is, the gown suitable to the occasion.)
 - come out with me into the street, (the street where our house stands.)
- (b.) To indicate something uppermost in the mind.
 - The enemy will soon attack us; (that is, the enemy in whom we are concerned)
 - This settles the matter,—(the matter with which we are engaged.)
 - We have not yet finished the work,—(the work that we are required to do.)

 Neither side gained the victory.—(the victory for which both
 - were contending)
- (c.) To indicate some property or possession.

 He was not in the house (his own house,) when we arrived
 He seized the bull by the horns (the bull's own horns.)
 - They struck him in the face (his own lace)
 He drove the horse and carriage (his own horse and carriage)
- into the town.

 5. The is sometimes used to indicate a class or kind of anything. (Here its force is exactly the same as that of a.
- (See above, para. 4):—

 The lion is the king of beasts; (here the lion stands for lions generally, or the lion species)
 - The row (the rose species) is the most beautiful of flowers.
 The lear (liars generally) shall not go unpunished.

- The placed before a Common Noun semetimes gives it the meaning of an Abstract Noun:—
 - He felt the patriot (the patriotic spirit or feeling) rise within his breast.
 - He acted the lord (the lordly or overbearing character,)
 - wherever he went.

 He allowed the father (his fatherly feelings) to be overcome by the judge (his sense of duty as a judge,) and declared his own son to be guilty.
- As a general rule a Proper Noun should not have the placed before it. But the following are exceptions:--
- (a.) Name of rivers; as, the Ganges, the Indus, the Nerbudda, the Rhine, the Danube.
- (b.) Names of groups of islands; as, the Andaman Islands, the East Indies, the Hebrides. (But individual islands do not have the placed before them: as, Ceylon, Ireland, Sicily.)
- (c.) Names of ranges of mountains; sa, the Himalayas, the Vindhyas, the Alps. (But individual mountains do not have the placed before them; as, Mount Abu, Mount Everest, Paras-

nath.)

(d.) Names of straits, gulfa, soas, and oceans; as, the Palk Straits; the Straits of Babelmandob; the full of Cambay; the Persian Gulf, the Bay of Bengal; the Arabian Sea; the Mediterranean Sea; the Indian Ocean, the Atlantic Ocean

The name of a province is sometimes proceeded and sometimes not preceded by the; as, "Bengal," the Punjab.

The same uncertainty exists about the proper names of books; as, "the Bible," "the Ramayan," "Galisten," "Bostan." Custom alone can docide this pioot,

The is not placed before the names of towns, (as London, Calcutta); nor before the names of capes (as Cape Comerin, Cape Horn); ner before the names of countries (as England, India); nor before the name of continents (as Asia, Europe); nor before the names of single islands (as Ocylon, Sicily); nor before the names of single mountains, (as

Mount Abu, Parasnath, Everest); nor before the names of lakes (as Lake Sambhar, Lake Chilka, Lake Huron).

Omission of Article.

 As a general rule a Common Noun should have some article placed before it. Thus we should not say "I saw dog," but "I saw a dog or the dog."

But the following exceptions may be noted :-

(a.) Names of titles or professions; as,

Queen Victoria: King George I; Lord Ashly; Saint Paul; Judge Anson; General Roberts; Father Ignatius; Victoria; Queen of England; George I, King of England; Kareem Bux, Carpenter; Ram Dutt, Goldenick; Jugal Klahore, Banker or Maddjøn; Kishna Mohan, Brahman.

(b.) In many verbal phrases of frequent occurrence, the Common Noun which follows the verb is used without any distinction of article or number:—

The trees mruck root (not their roots) into the ground.

The boys leave school (not the school) at 4 o'clock.

Students must give ear (not their care) to what the teacher tells them.

He sent word that he would come soon-You cannot set foot in this house. He shook hands with his old friends.

We will keep house in this village.

The king resolved to give battle to his enemy.

The sailors cast auchor for the night, and set sail again next day.

The pile of logs has taken fire, or caught fire. He took breath, when he rose up out of the water.

(c.) In prepositional phrases, which are intended to be used for all persons and on all occasions alike, the article is omit-

ted before the Common Noun :--

Some came by land, and some by water.
You had better go on foot, than on horse-back,
He is out at sea, on beard ship.
A rat is quite at home, when it is under ground.
Men who are in jull work out of doors.
He is a schoar by same, but not in fact.

not.

much cash is hand.

He fell sick at sphoel, and is now so hed.
These who work hard by day must not work by night also.
He haper head and ears is debt, or is trouble, do.
He bagins work at days from an or bess.
Such hood is not fit for man or bess.
Such hood is not fit for man or bess.

We shall never get this either for love or money.

The ship is riding at anchor, and the sallors are now at ease.

This will be paid at sight or on demand.

I met your old riend at dimner to-day.

He lends out much money at interest, for he has always

§ 6.—ADJECTIVES USED AS NOUNS.

 ADJECTIVES have in many instances come to be used as Nouns; and sometimes the change from Adjective to Noun has become so complete, that the word can be correctly called a Noun; as "a secret," "secreta."

"Secret" was originally an adjective; and it is still an adjective of very common occurrence; as, "a secret meeting," "secret information." &c.

 Why have Adjectives been thus changed into Nouns? For the sake of shortness. Some noun belongs, or did once belong, to the adjective; but for the sake of shortness the noun was first understood, and then at last dropped altogether out of sight.

8. When can the change from Adjective to Common Noun be considered complete?

The change from Adjective to Noun is complete under one or more of these three conditions:—(a) when we can place an article before the word, without adding any noun after it, (b) when we can add so the end of the word to express the Plural Number, (c) when we can add apostrophe s to the end of the word to express the Possessive Case.

4. Is there no limit, then, to the use of adjectives as nouns? Yes; the limit is custom.

Thus, we can say "Cleon is a noble by birth," because custom has changed "noble" into a noun.

But we cannot say "Cleon is a wicked by nature," because custom has not authorized any one to use "wicked" as a noun.

- 5. Adjectives used as nouns can be arranged under the main headings shown below :---
 - (a.) Names denoting a nation or people :--

The Persians (authe Persian people) once ruled a great empire.

This is a Persian's house, not a Greak's.

Here the change from Adjective to Common Noun is complete, since s can be added to the end of the word to denote the Plural Number or the Possessive Case.

But if the Proper Noun ends in ch, sh, or se, the Adjective cannot be changed into a Noun, and man or men must be added to it. Thus we must say "an Englishman" not "an English"; "Frenchmen," not "Frenches; " "a Chinese man's garden," not "a Chinese's garden."

- (b.) Names denoting a sect or religion :-
 - A Hindu; a Hindu's notions; the Hindus.
 - A Christian; a Christian's creed; the Christians,

Here the change from Adjective to Noun is complete, since s can be added to the end of the word to denote the Plural Number or the Possessive Case; and we can place the article before the word without placing any noun after it.

(c.) Names denoting language. Thus we can say:— He speaks English,—the English language.

He reads Souskrit, -the Sanskrit language.

In such cases the word "English" and Sanskrit" are Proper Nouns, and for nouns of such a kind, the change from adjective to noun is as complete as it could be, (d.) As Common Nouns denoting Persons only, and always in a Plural sense. In such cases the adjective must be preceded by the:—

None but the brave (=brave men) deserve the fair.
-Drydes. .

To the pure (=pure persons) all things are pure.
—Proverb.

The blind receive their sight; the lame walk; the dumb speak; the dead are raised up; to the poor the gospel is preached.

Here the change from Adjective to Noun is apparent, not real. If the change were real and complete, it would be correct to say the poors; but this is quite wrong. We can only say the poor; that is, we can never add s to the word "poor," and therefore "poor," cannot be parsed as a noun in the Plural number. We must parse it as an Adjective qualifying the noun "men." understood.

(e.) As Abstract Nouns, (Singular.) A real Abstract Noun is formed from the adjective by placing the Definite Article before it:—

The gvod = goodness in general.

The beautiful=beauty in general.

The future—future time in general.

All the motions of his nature were towards the true, the natural, the sweet, the gentle.

-De Quincey.

(f.) As names for some particular part or aspect of a thing. Here again the adjective is changed into a noun by prefixing the article the:—

The white (-the white part) of the eye.

The vitals (-the most vital parts) of the body.

The thick(-the thickest parts) of the forest. Sheep are grazing on the green (-the green plot.)

The wilds (-the wild parts) of a country.

The interior (-the inside part) of a house.

The exteriors (---the outside parts) of a house.

The middle (---the middle part) of a river.

The middle(-the middle part) of a river, The small(-the smallest part) of the back.

(q) Miscellaneous Adjectives used as Common Nouns -

I -Tames

Bingular only

Ow: all—all the property, &c, that we have
The whok—the sum total of any thing or things
Ou: best = the best thing or state belonging to us

• Our worst—the worst thing or state belonging to us

Much=a great amount "much has been done

More=a greater amount "more has been done than was
expected

Plural mly

Opposites as, 'good and evil are opposites, (opposite things)

Vital' as "he is a man of good morals ' (moral conduct)

(trer as, "dreams go by contraries (bad dreams turn out
good ones, and ve tires)

Part lars as, "let me know the particulars '(the particular facts or figures, the details)

Mote all tem moveable goods

State and betters the sweet and better contingencies of life

I alwabl * — goods of especial value

Gr '* green vegetables of any kind

Lutalles things fit to be eaten

Dr itall things it to be drunk

I tid ntal casual or incidental expenses

Fig. And on the Andaman Islands
Fig. 1 and was —the Vindhya Mountains

Sagiler

An extra —something added A due,—something owed A scoret,—something hidden A Singular,—noun A Plural,—noun A liquid,—substance A capital, city

A total,—amount
A sweet,—sweetmeat
A daily,—newspaper
A weekly,—newspaper
A uniform,—dress

Plurale

Lixtra—thrings added Diese,—things owed Secreta,—things hidden Singulars,—nomes suggilat Plurals,—nomes plural Liquids,—things liquid colds,—things solid Capitals,—capital other Totals,—total amounts Sweets,—sweetmests Daltes,—dally newspapers Woekhos,—weekly nowpapers Uniforms,—drasses

II .-- PERSONS.

Plural only.

Our betters-the man better than ourselves. Our equals-the men equal to ourselves.

The Commons-men below the rank of Lord.

The ancients men of the ancient time

The moderns = men of the modern time.

Singular.	Plural.	Singular.	Piural.
Another	others	A prodigal	prodigals.
An elder	elders	A criminal	oriminals.
A senior	seniors	A noble	nobles.
A junior	juniors	An individual	individuals
A minor	minors	An innocent	innocents.
An inferior	inferiors	A white, (man)	whites.
A superior	superiors	A deaf-mute	deaf-muter
A native	natives	A dear	the dears.
A mortal	mortals	A rough	roughs.
An elder	olders	A worthy	worthies.
A invenile	inveniles	A menial	menials.

6. There are certain colloquial or idiomatic phrases in which adjectives go in pairs, some noun being understood after them :-

From bad to worse, "He is going from bad to worse" (from a bad state to a worse one.)

The long and short. " The long and short (the sum and substance) of the matter is, &c. In black and white. " Let me see it in black and white " (written with

black ink on white paper.) Through thick and thin. "He makes his way through thick and thin," (through thick or difficult obstacles and through thin

or easy ones.) From first to last-from the beginning to the end.

At sizes and sevens-in a state of disorder. "The men of the house were all at sixes and sevens" (in a state of discord.) " Every thing in the city is at sixes and sevens," (in a state of

confusion.) High and low. " He searched for his property high and low," (in high

places and low ones, everywhere, up and down.) Right or wrong. " I intend to do this, right or wrong," (whether the act is right or not.)

For better for worse, "She married you for better, for worse," (for any good or evil that may fall to your lot hereafter.)

Fast and loose. "He plays fast and loose," (with a tight or loose hold, as he may prefer; that is, at random, recklessly.)

Black and blue, "He beat them black and blue," (so as to bring out black and blue marks on the skin) Right and bft. "He struck out right and left," to this side and that

side.)

Sinv and steady. "Slow and steady (patience and perseverance) wing

the race."

For good, for good and all (=finally, permanently, for all future conse-

good, for good and all (=inally, permanently, for all future consequences, good or evil)
 In poetry, adjectives are used in the same way

7. In postry, adjectives are used in the same way without nouns, (that is, with some noun understood,) at the option of the poet:—

Fair is foul, and foul is fair

-Shakspeure

O'er rough and smooth she trips along.

From grave to gay, from lively to severe.

From grave to gay, from lively to severe.

—Pow.

 There are several adverbial phrases, made up of a preposition and an adjective, in which some noun is understood after the adjective:—

Extent On the whole, in the main, in general, in particular, at the full or in full, at all, not at all, at most, at large, in short, a little.

Time. At last, at the latest, at first, at the first, to the last, at present, for the present, in the past, in future, for the future, once for all, before long, for long, first and foremost.

Place On the right (hand,) on the left (hand,) on high, in the open (air.)

Manner. In the right (on the true or right side of the question,) in the wrong (on the wrong side of the question); in the dark; in common : on the loose.

State At best, for the best, at worst.

CHAPTER IV.—PRONOUNS.

- § 1.—DEFINITION AND CLASSIFICATION OF PRONOUNS.
- 1. A Pronoun is a word used instead of a noun.
- To avoid repeating a noun that has been either mentioned before, or is clearly understood already, we put another word instead of it; and this word is called a Pronoun, because (pro means "for or instead of.":
- 2. The usefulness of pronouns is best seen by trying to do without them.
- It would sound very awkward, besides being very tedious, if we were forced to repeat the same noun again and again. We are saved all this awkwardness by pronouns:—
 - John saw a make in the garden, this esake John thought would hurt John, unless John killed the snake with a stick, this stick John had in John's hand.

The nouns in Italics can all be replaced by pronouns; and the sentence can be much better expressed as follows:---

John saw a make in the garden, saktoh ke thought would hurt hem, unless he killed if with a side which he had in he hand. Here the words he, him, and hie are pronouns used instead of "John"; the first "which" is used instead of "garden" the second which is used instead of "stick;" and it is used instead of "anke".

- (The great use, then, of Pronouns is to save the repetition of
- Three rules or principles follow from the fact last named:—
- (a.) Since a pronoun is used instead of a noun, it must be itself a noun or something equivalent to a noun.
- (b.) Since a pronoun is intended to stand for some noun going before, the pronoun should not as a rule be mentioned small the noun has been mentioned.

- (c.) Since a pronoun is intended to be a substitute for a noun, it must be of the same number, gender, and person as the noun it stands for.
 - 4. There are 4 different kinds of pronouns:-
 - (1.) Personal; as, I, thou, he, she, &c.
 - (2.) Demonstrative; as, this, that, such, one, &c.
 - (3.) Relative; as, which, who, that, as, &c.
 (4.) Interrogative; as, who? which? what?
 - § 2.—PERSONAL PRONOUNS.
- 1 The Personal Pronouns are so called, because they stand for the three persons, viz:—
- (a.) The First, which denotes the person speaking; as, I, we muself.

I (the person now speaking) will do all I can to win a prize at the end of the year.

(h.) The Second, which denotes the person spoken to, as, thou, you, thuself.

You (the person now spoken to) should leave off this habit of idlenses.

(c.) The Third, which denotes the person or thing spoken of; as, he, she, it, himself, herself, itself.

He (the person already mentioned) did a good day's work with his tutor.

Personal Pronouns have the same differences of Gender, Number, and Case that nouns have; and, in order to show these differences, they take a greater change of form than nouns do.

I .- THE FIRST PERSON, MASCULINE OR FEMILINE.

Case.	Singular.	Plural.
Nominative, Possessive, Objective,	I My, mine Me	We Our, ours Us

IL.-THE SHOOKS PERSON, MARCULINE OR FEMILIES.

Case.	Singular,	Plural.
Nominative.	Thou	Ye or you
Possessive.	Thy, thine	Your, yours
Objective.	Thee	You

III .- THE THIRD PERSON, OF ALL GENDERS.

Case.		Plural.		
	Masculine,	Feminine.	Neuter.	All Genders.
Nominatire. Possessitt. Objective.	He His Him	She Her or hers Her	It Its It	They Their or theirs Them

3. The Possessive cases of most of these pronouns have, as you will have seen, two forms:—

Singular.						Plural,			
First	F	orm		Мy	Thy	Her	Our	Your	Their
Secon	d	10		Mine	Thine	Hers	Ours	Yours	Theirs

The first form is used when it is placed before its noun the second is used when it is placed after its noun:—

First form.

Scond form,
This is ey book,
This is the book.
This is the book.
This book is then.
This lock is out.
This book is then.
This is one book.
This book is our.
This is one book.
This book is year.
This is there book.

Note—The possessive cases of the Personal Pronouns, being placed immediately before some nour look like adjectives. But there is no need to consider them as other than nouns, or pro nouns, because (a) they have retained the forms of the old English possessive cases from which they are derived, and (b) Common Noun in the Possessive Case is placed before another noun in precisely the same way, as, 'the wache must' build, where 'bundle' is quilined by the Possessive Noun 'washer man's 'Similarly a Common Noun in the Possessive Case can be used after its noun in the same way as 'must thine yours,' &c Thus we can say, 'that bundle is the wisherman's, not your s'.

4 When the word 'self" is added to any of the above pronouns, the pronoun is called **Re flex-ive**

Cas	T	Singular Mysell My or mine own		Plusal Ourselves Our own	
Nom or Ol					
-	II —Tu	g Spound 1	Person	-	
(usc		Singular		Plwal	
Nom or Ob		Thyself Thy or thine own		Yourselves Your own	
	III —T	не Тиго	Person		
Case	1	Singular		Plural	
	Masculine	sculene Feminene No		All Genders	
Nom or Obj	Hunself	Herself	Itself	Themselves	

5. The Reflexive forms of the pronouns are used for two purposes -- (a) to show that the person (or thing) does -something to himself (or itself); (h) to make the pronouns more emphatic.

EXAMPLES OF (a).

Singular. I hid myself.

I hit my own head. Thou pleasest thyself. Thou lovest thine own work. He (or she) hid him (or het) self. The oat seated itself.

Plural.

We hid ourselves. We hit our own heads You please yourselves You love your own work They hid themselves. The cats seated themselves.

EXAMPLES OF (b).

Sugaber

I myself saw the horse. Thou thyself sawest the horse, He himself or (she herself) any it-The wall strelf fell.

Plural

We ourselves saw it. You yourselves saw it. They themselves saw 1t The walls themselves fell.

Examples for Practice.

Put pronouns in the place of the nouns noted below :-

- (a) I told Ram that the snake seen by Ram in the garden would do Ram no harm, if Ram left the snake alone to go the snake's own way.
 - (b) The girl went into the green field, and there the girl saw the sheep and lambs, as the skeep and fambs played about us the field
 - (c) A man brought round some wild beasts for a show. Among the beasts there was an elephant. The man threw cakes at the elephant, and the ch phant caught the cakes in the ch phant's taunk.
 - (d) A dog was carrying an unabrella for the dog's master. Some boys tried to take away the umbrella from the dog. But the deg was too quick for the boys. The deg ran past the bous at full speed, and carried the umbrella safely out of the bone' reach.
 - (c.) When the camel is being loaded, the camel kneels down, so that the load may be put on the came la back. The camel loves men, if men treat the camel well,
 - (f.) The bees are fiving towards the flowers. The bree suck the flowers, and fill the bera' bags with honey.

(g.) Wolves hunt in large packs, and when wolves are pressed by hanger, wolves become very flerce, and will attack men and eat men up greedily.

(A.) A horse cannot defend a horse against wolves; but a horse can run from sooless, and makers are not always able to each a horse.

§ 3.—Demonstrative Pronouns.

 A Demonstrative Pronoun is so called, because it demonstrates or points to some noun previously mentioned, and is used instead of it.

Note.—The noun previously mentioned, in whose place the Demonstrative Fromon is used, might with perfect propriety and with much convenience be called the American. But the name "Antecedons" has been hitherto limited to the noun referred to by a Relature pronoun. No valid reason exists for thus limiting the use of the term "Antecedent": for the Relative and Domonstrative Pronouns have this one essential point in common,—they both imply an Antecedent; that is, they both point to some noun which has gone before. The only difference between them is that a Relative Pronoun joins one sentence to another besides pointing to some noun that has gone before.

The chief pronouns belonging to the class of Demonstrative are:—this, that, three, those; one, ones, none; such, or.
The student will have observed that these words have appeared already in the list of Demonstrative Adjectices Where, then, is the difference?

[When they are followed by a noun or require some noun to be understood after them, they are Adjectives.

When they are used as substitutes for some noun previousty mentioned, and cannot have any noun either expressed or understood after them, they are Pronouns.

He came to my house our day.

Here one is an adjective (Indefinite Demonstrative) qualifying its noun "day."

Your coat is black; mine is a white ow.

Here one is a pronoun, which is used instead of the previously-mentioned noun "coat," and is qualified by the adjective white." The simplest forms of Demonstrative Pronouns are he, she, it, they.

These have been hitherto called "Personal Pronouns," partly because they give the shortest form of the Third person as distinct from the First and Second, and partly because "he" and "she" and sometimes "they" do actually relate to persons, and not to things.

Yet, it is equally and in fact more correct to call them. Demonstrative Pronouns, because they demonstrate or point to some noun previously mentioned and are used instead of it.

- 1—Wy father has gone we saw him start a short time ago-(Here him is a Demonstrative Pronoun used as a substitute for the noun "father")
- 2 -- 4) mother came yesterday, we were glad to see her. (Here her is a Demonstrative Pronoun used as a substitute for the noun "mother.")
- the noise mother.")
 3 —The van has risen, if shines brightly. (Here it is a Demonstrative pronous used as a substitute for the noise "aun.")
- 4 The travellers fell saleep, as soon as they arrived. (Here thy is a Demonstrative Pronoun used as a substitute for the noun "travellers.")

There are few points on which grammarians are more divided amongst themselves than that relating to Demonstrative Pronouns.

The distinction which I have given in pages. 2, between Demonstrative Adjectes and Demonstrative Personent, is substantially the same as that given in Murison's Pire Rook in Regists (edited by John Aslam) up, 10-15; in Mason's Shorter Eberlesh Gremmers, 2 146, p. 42; Shopper IX, p. 110 ff; in Mason's Shorter Eberlesh Gremmers, 2 146, p. 42; Shopper IX, p. 110 ff; in Mason's Shorter Eberlesh Gremmers, p. 309 and p. 122. It is less until print, Douglas' Eberlesh Gremmers, p. 309 and p. 122. It is less cheety given in Eschlishford Septiles Language and Gremmers, p. 300, Lordy given in Eschlishford Septiles Language and Gremmers, p. 300, Masoni of Eberlesh Gremmers, published by the Chitatian Veranacular Education Science; p. 37.

(1) the other hand no distinction is drawn in Hiley's Regists Grassmar, p. 35, § 102, and p. 42, pars. 3, where the same words are given first. In Demonstrative Adjectives and then an Demonstrative Pronouns without any distinction being shown Nor is any distinction given in Mortis Primer, p. 93, and p. 44, or in Davidson and Alcook's English-Virasmar and Analysis, p. 41, or in Rowe and Webb's Hints on the Nadle of English-1; p. 57, and p. 5.

- 4. It. This pronoun has three distinct modes of reference:
- (a) To a noun going before. In this sense it is merely a Demonstrative Neuter Pronoun used in the ordinary way:—

The sun has risen ; it (-the sun) shines brightly.

(h,) (To a clause going before :-

I have treated him as he deserved; and he knows it.

(Here "it" points to the clause "I have treated him as he deserved.")

(r.) To a clause coming after :-

It is sail to hear such had news.

It is probable that it will ram to-day.

It, piz, " that it will rain to-day," is probable.

It has not been decided here far we can go.

- It has not been decided how far we can go.

 It, riz., " how far we can go," has not been decided.
- 5. This, that, these, those. The uses of these words as promouns, and not as adjectives, can be explained under the following heads:—
 - (a.) When two nouns have been mentioned in a previous sentence or clause, "this" has reference to the latter and "that" to the foremer:—
 - Work and play are both necessary to health; this (=play)
 gives us rest, and that (= work) gives us energy.
 - Dogs are more faithful animals than cats; there (= cats) attach themselves to places, and those (=dogs) to persons.

Observe that in the first of these sentences this does not specify which or what play is meant, and therefore it is not a Demonstrative Adjective. It is simply put as a substitute for the noun "play," and therefore it is a Demonstrative Pronoun.

The same explanation holds good for the other examples,

- (h) The word "that", together with its Plural form.
 "those," is used as substitute for a single noun previously mentioned.
 - The air of the hills is cooler than that (= the air) of the plains.
 - (2.) The houses of the rich are larger than thou (= the houses) of the poor.

(Observe the word "a has" in the first example does not qualify the noun "air" by asping which air or woke air, and therefore it is not an Adjective. It stands for "air" in general, and is a substitute for the noun "air"; and therefore it is a Pronoun.)

— (c.) The words "this" or "thats" can be used as sub-

- stitutes for a clause or sentence previously mentioned :-
 - (1.) I studied Greek and Latin when I was young, and that (=I studied Greek and Latin) at Oxford.

Here by using the pronoun that as a substitute for the sentence "I studied Greek and Latin" we not only avoid repeating this sentence a second time, but we give some emphasis to the words "at Oxford."

> (2.) Make the best use of your time at school; that's a wise boy.

Here "that" = "one who makes the best use of his time at school." All this repetition is avoided by using the pronoun that as a substitute for the implied sentence,

- (3.) You paid your debts; and thin (the payment of your debts) was quite sufficient to prove your honesty.
- 6. One, ones, none. When the noun previously mentioned is in the Singular Number, we use one; when the noun is Plural, we use ones. "None" is a shortened form of "not one" or "not ones," and is therefore used for nouse in either number:—
 - He gained a prize last year; but he did not gain one (=a prize) this term. (Singular.)
 - There were aix lazy boys and four industrious ones (=boys) in our class, (Plural.)
 - You are a coward, but I am some (= not one or not a coward.) (Singular.)
 - You have four books, but I have near (=no books) at present. (Planal.)
- 7 Such, so. "Such" can be substituted for a noun in either number:—
 - (1.) He is the judge appointed to hear this case, and as such = as the appointed judge) you must not speak to him before the triel. (Singular.)
 - Kings are constituted such (= kings) by law, and should be obeyed. (Plural.)

So is sometimes used in places where we could also use "such"; but "so" is a Demonstrative Adverb rather than a Demonstrative Pronoun:—

(1.) Nought to desire is all the art I know

To make men happy and to keep them so.

Here "so" means "in state of happiness," or simply "happy."

(2.) My business is urgent, and I hope you will treat it so

(=as urgent.)

Examples for Practice.

Show whether the words printed in Italics are Demonstrative Adjectives or Demonstrative Pronouns:—

This horse is stronger than that.

Health is of more value than money; this cannot give such true happiness as that.

1 prefer a white horse to a black one.

You will repent of this one day, when it is too late.

You have kept your promise : this was all that I asked for.

You have much money: I have none.

The faithfulness of a dog is greater than that of a cat.

One Mr. B. helped his friend in need; that was a true friend-

Return to your work, and that immediately.

Bring me that book, and leave this where it is.

The step you have taken is one of much risk.

The name of that man is Wise, and rightly is he called such.

Such a book as yours deserves to be well read.

Prosperous men are much exposed to flattery; for such alone

can te made to pay for it. Prosperous men are not always more happy than unlucky

A pale light, like that of the rising moon, begins to fringe

the horizon,
Will you ride this horse or that?

A stranger could not be received twice as such in the same house.

The plan you have chosen does not seem to me to be a wise out.

One man says this, another that; whom should I believe?
8. Indefinite Demonstrative Pronouns. Sometimes

Demonstrative pronouns are used indefinitely; that is, they are not used as substitutes for some noun expressly mentioned, but for some noun which can be readily understood 4rom the context or from idiom.

- They. This prenoun is sometimes used for men in general, or some person whose name is purposely concealed.
 - (1.) They say (-men in general say) that truth and honesty is the best policy.
 - (2.) They told me (==some person or persons, whom I do not wish to name, told me) that you were guilty of theft.
- 10. One. This pronoun is often used in the sense of any person or every person.

One should take care of one's health.

A man (any and every man) should take care of his health.

Note...(a.) Whenever "one" is used as the subject or principal word in a sentence, it must be followed by "one" and not by "he." Thus we cannot say "one must take care of his health."

Note—(b.) This use of "one" is derived from the French on, which is a corruption of homen=man: and hence it means "any person, every person, no person in particular."

11 It. The indefinite use of this pronoun is against all rules of number, person, and gender, and can only be ascribed to idiom:

Who is it? It is I, Is it you? No; it is he. It is the men who work hardest, not the women. It was the queen, who, died yesteriay.

In such phrases it gives emphasis to the noun or propount

following.

Sometimes the noun or object, for which the word "it"

- is used, can be understood from the context:---
 - It snows=snow falls. It hails=hail falls.
 - It is blowing hard = the wind is blowing hard.
 - It thunders—thunder is thundering or rolling.
 - It is fine to-day the weather is fine to-day.
 - It is hot = the air is hot. It is cold = the air is cold.
 - It is very windy=the air is very windy.

 It is still early=the hour is still early.
 - R is now late=the time of day is now late.
 - It is two miles from here = the distance is two miles from here.

It was Autumn = this season of the year was Autumn.

by who or which.

Sometimes the word "it" is used instead of some Personal Pronoun to express endearment, familiarity, or contempt.

What a pretty little girl it is (*she is)!

What an ass it is (*that man is).—Shakepeare.

It is a fire account indeed!

\$ 4.—RELATIVE PRONOUNS.

 A Rel'a-tive Pronoun is so called, because it relates or refers to some noun or other pronoun going before.

The noun going before is called the An'te-ce'-dent.

2. So far as the above description goes, no differencehas been shown to exist between a Demonstrative Pronoun and a Relative Pronoun; for both of these "refer tosome noun going before." Where then is the difference?

The difference lies in this. A Relative Pronoun not only refers to some noun going before, (as a Demonstrative Pronoun does,) but it also joins two sentences togethers, (which a Demonstrative Pronoun does not do.)

'This is a good house:—I live in it. (Demonstrative Pronoun.)
Here are two sentences. If we wish to join them together, we must use the Relative Pronoun and say:—

This is a good house, in which I live. (Relative Pronoun.)

3. The Relative Pronoun is most commonly expressed

CASE.	SINGULAR.	PLURAL.	
	Mas. and Fem.	Neuter.	
Nominatire.	Who	Which.	
Possessire.	Whose	Whose.	
Objective.	Whom	Which.	

Point out the Antecedents to the Relative Prenouns noted

We have those persons who are kind to us. The pan where point was broken has been mended. The ground which we dig will bear a fine crop. That is the man whom we awy yestectlay, Is this a dauger which I see before me? We left the house in which we had long lived. He least the box of dichles which I brought.

The child where parents are deed is an orphan.

4. The word "who" is used only for persons, that is, men and women; and is therefore of the common gender, that is, masculine or feminine.

The word "which" is used for all kinds of living things except men and women, and for things without life.

Correct the mistakes noted below :-

The bird aho sings. The man which came. The ape who climbs the tree. The horse aho carried me. The girl which sings. The ox who draws the plough. The man which drives the ox.

5. The Relative Pronoun is always in the same number, gender, and person as the Antecedent; but in case it is dependent on its own sentence.

Substitute a Relative for the Demonstrative Pronoun in each of the following sentences:-

This is the house; Jack built it.
The hook is a good one; I read it.
This is the man; I read it is book.
The boy has come; Jac lost his hat.
The girl has come; you were looking for Arr.
These are the trees; Ithir leaves have fallen.
You built this home; I have lived long in it.
These men have gone; the box was stolen by then.
Look at those boy; we read in clear with Riven.

After you have supplied the Relative Pronoun in each sentence, show whether it is in the Nominative, Possessive, or Objective Case,

- 6. The Relative Pronoun is sometimes used in such a way that the Antecedent is either included in it or is understood:—
 - (a.) Who=he who, or she who, or they who.
 - (b.) What = the thing which or the things which.
 - I cannot tell you now sokat (-the thing which) happened afterwards.
 - If the laws are what the (things which) you describe them to be, we must observe them.

Who ("he who) steals my purse, steals trash.

We do not know who (-the persons who) have done this thing.

- (c.) So, ever, or soever added to the Relative gives the meaning of Plurality.
 - Whose (-any and every person who) comes here will be sent back again.

Whosever (many and every person who) breaks this law will be punished.

Whateur they did (-every thing which they did) was wrong.

Among the books lying there, I took whichever (-every book which) I liked.

 The Relative Pronoun in the Objective Case is often deft out; but never in the Nominative or Possessive.

Supply the Relative Pronoun in the following sentences:-

The box-I hought was soon lost by him. The man-I found was an old friend.

These are the only things-I was looking for.

This is the book—I won as a prize.

Show where the Relative is left out in the following sentences, and supply its place in each sentence:—

Kindly pick up the book I dropped. The girl you teach is very clever.

Have you seen the boy I sent?

This is the house we lived in.

These are the wolves I shot to-day.

8. The word "that" is often used for "who," "whom," or "which." but never for "whose :--"

This is the house that Jack built.

The man that we were looking for has come.

He that fights and runs away,

Will live to fight another day.

The house that we lived in has fallen down. The horse that carried me here is lame.

The boy that you promoted is clever. In each of the above sentences put "who," "whom," or "which," for "that,"

The word "as" can be used for "who" "whom." or "which," provided it is preceded by "such" or "the same." But as is never used for " whose."

> This is not such a good book as I expected. He is not such a clever student as you are.

Yours is not the same book as mine (is). This is the same story as I heard ten years ago;

one in time.

It must be observed that after "such" the word or isalways used. But after "the same" it is equally or morecommon to use who, or whom, which, or that,

> This is the same story which or that I heard ten years ago. This is the same man whom or that I saw yesterday.

This is the man who or that came here vesterday... 10. The word "but" is used as a Relative Pronoun in the sense of "who not" or "which not":---

There was no one present, but (who not; saw the deed. There is no vice so simple, but (which not) may become seri-

11. The word the is used as a Relative, provided it is placed before an adjective or adverb in the Comparative Degree, and provided a similar combination of the with. a Comparative follows immediately after :-

> The more wealth men have, the more they desire. The nearer the bone, the specier the meat.

The sooner he comes, the better for him.

The stronger the ox is, the heavier weight it will carry. The more rain falls, the better it will be for the crops.

Such sentences are always used in the sense of quantity or decree. The first "the "is a Relative Propoun, and the second one is a Demonstrative Adjective :--- by what quantity of wealth men have, by that quantity they desire more."

§ 5.-INTERBOGATIVE PRONOUNS.

1. An Interrogative Pronoun is one which asks a question.

The Interrogative Pronoun has five different forms:
 — Who moke? (Nominative to the verb.)

of whom did he speak? (Objective after preposition.)

What did he say? (Objective after verb " say.")
Which book is the best? (Nominative to verb.)

Whose book is that? (Possessive Case.)

 When the choice lies between two or more things, we say which, and not what; as,

Which boy (out of two or more) won the prize ?

Which of these books is the best?

Which houses have fallen down?

The word whether, which signifies one of two things or persons, is now almost obsolete:—

Whether of them twain (=which of these two men) did
the will of his father?

-- New Testament.

PARSING MODEL

"I heard my father speak well of the man whom he brought to the house."

I—Personal pronoun, first person, common gender, singular number, nominative case, subject to the verb "heard."

Heard-Verb.

My-Personal pronoun, first person, common gender, possessive case.

Father—Common noun, masculine gender, singular number, objective case after the verb " board."

Speak-Verb.

Well-Adverb qualifying the verb "speak."

Of-Preposition, having " man " for its object.

The—Demonstrative adjective qualifying the noun "man."

Man—Common noun, masculine gender, singular number,

objective case after the proposition "of."

Whom—Relative pronoun, masculine gender, singular number, third person, agreeing with its autecedent "man;" objective case after the verb "brought."

He—Personal pronoun, third person, masculine gender, singular number, nominative case to the verb "brought.".

Brought-Verb.
To-Preposition having "house" for its object.

His.— Personal pronoun, third person, massuline gender, singular number, possessive case.

House—Common noun, neuter gender, singular number, objective case after the proposition "to."

CHAPTER V.-VERÈS.

\$ 1 .- Transitive and Intransitive.

- (A VERB is a word by means of which we can say something about a thing or person.)
- The Subject. The thing or person about whom the statement is made is called the Subject. This is usually denoted by some noun or pronoun in the Nominative case.

He sat in the shade. The san has risen.

But the Subject to a verb is not always a noun or pronoun. It may take the form of a sentence or phrase or a verb in the Infinitive Mood:—

To ore is human : to forome (is) divine.

Whither we could do this or not was a matter of doubt.

3. Position of the Subject. In most cases the Subject is placed hefore the verb.

But sometimes the Subject is placed after its verb, and in this case the verb is often introduced by the particle there.

This word is not the Adverb signifying in that place. It has no meaning as all and cannot be translated. It is a mere expletive used for introducing the verb, whenever the verb is placed before its Subject:—

There are two parts to every man.

Here the Subject to the verb is parts, and the verb is introduced by the particle there.

Pick out the Subject in the following sentences :---

There were ten men in the boat. There seems to be a very hot wind blowing to-day. There came a messenger from the king's court. In the morning there were four men present, and only three in the evening. Outside the gate there stands a mai.

4. A verb generally expresses some kind of action, and

hence verbe have been distinguished into two great classes;

I. Transitive.

T T-to-----

Intransitive.

If the action does not stop with the doer, but passes from the doer to an object, the verb is Transitive.

If the action stops with the doer and does not pass from the doer to an object, the verb is Intransitive.

"Stars shine;" here the action implied in the verb "shine" stops with the doer. So "shine" is Intransitive.*

"The man killed a snake;" here the action implied in the verb "killed" does not stop with the man, but passes from him to the snake. So "killed" is Transitive,

TRANSITIVE VERRS.

5 A Transitive Verb, then, is one in which the action does not stop with the doer, but passes from the doer to an object.

The object to a Transitive Verb is in the **Objective** Case whenever the object is expressed by a noun or pronoun :—
The man killed a mult with his stick.

The man lifted we up out of the water.

But the object to a Transitive Verb (like the subject to any verb.) may be expressed by a sentence or by a phrase or by a verb in the Infinitive Mood, and not always by a noun or pronoun:

No one knew how to make a beginning.

We must find out who he is.

I hope to see you soon.

6. Position of the Object. The noun denoting the object is usually placed after the verb to which it belongs.

[&]quot;Verte which take no object have been conscience distinguished into (a) intransitive which demote some acket, as "run," "vigue," "jump," &c., and (b) Feutzer, which demote some state, as "sing," "jump," &c., and (b) Feutzer, which demote some state, as "sing," "it is "rever; it as "in steeps, like oftwa, or reads." The distinct, however, is of no uses at all, since no Grammatical principle or change of construction depends upon it. Hence it is not worth attending to ; and the naine "Infrastitive" should be used for all verte, which take no object; that b, fewell week, which are not Tennatifive.

But when the object is a relative or interrogative pronous, or when emphasis is required, the object is placed, not after but before the verb.

Relative. The man whom I saw yesterday has come back

I will now return the books which you lent me a short time

interrogative. What did you say? Whom were you looking for?

Emphasis, Silver and gold have I none; but what I have give I unto thee —New Testament
Reason you possess by nature; but Learning you must acquire

Reason you possess by nature; but learning you must acquire by labour and study.

Omission of the Object. Sometimes a verb is Transitive; but the object to it (instead of being expressed) is implied or understood.

So if you do not find any object after the verb, you cannot be certain from this that the verb is Intransitive. It may be Transitive, or it may be Intransitive; and thus will depend upon the sense.

"Men eat to preserve life." Eat what I Food of some kind. Some word like "food" must be supplied or understood in order to complete the sense. So "food" is the Object understood after the verb "eat," and therefore "eat" is a Transitive Verb.

"Men sleep to preserve life." Sleep what? This is nonsense. No Object is here needed to complete the sense, and so "sleep" is an Intransitive Verb.

Pick out the Transitive and the Intransitive Verbs in the following

Birds Joy with their legs, and peck with their bills. Fire borses, and water force. The wind is bleeding very park to-day. Do not form's no fast. He reads two hours a day; swriter once y and elsewiere sight hours. Can you are as well with your left ope, as with your right? The clock has struck four. The sum has as i. My tooks cheef. Then shall not steal. The kitten tears with its claws. Our master feacher well, I cannot shoet as and all a you can, hou I can nove better.

N. B.—Transitive Verbs, like some of the above, are said to be need intransitively, when the action denoted is of so general a nature, that no objects are thought of in connection with it. "Fire burse":—here the verb "burne" expresses a universal

.. Like onuses .. :--- mena suie asco .. mirros .. exbiosses w finitens

fact, and hence, though it is Transitive at bottom, it may be said to be used intransitively. "A new-horn child sees, but a kitchen is born blind":—here the verb "sees" denotes simply "the faculty of sight," and hence, though it is Transitive at bottom, we may here any that it is used intransitively.

 Omission of the Relative as Object. This is very to common in English. (See above, Chap. IV., para. 27.)

This occurs in two kinds of sentences,—(a) When the verb is Transitive, (b) when the verb is Intransitive, but followed by a Preposition:—

- (a) The books I bought cost three rupes The house we compled has fallen down. The man I engaged has now come He was not exertful about the sif he breathed, The king spared the snamice he had conquered. He tuned, to please a peasant's ear, The harp a king had loved to hear.
- (b.) The house we lived in has fallen down The chairs we sat on are ten in number. We have at last got the thing we fought for. I have brought the book you spoke about. The man you were staring at is gone.

Supply the Relative Pronoun that is understood in each of the above

- × 9. The Double Object. Some Transitive Verbs take
 two objects after them, one of which is the name of some
 thing and the other of some person.

 The Double Object.

 The Double Object.

 **Some Transitive Verbs take
 two objects after them, one of which is the name of some
 thing and the other of some person.

 The Double Object.

 The Double Object.
- . The thing named is called the Direct object; the person named is called the Indirect.

Most of the verbs which take two objects are shown in the following examples:---

Bring me that book. I forgare him his faults. We allowed him two rapees. We easy him his good lock. He teach? me English. He refused me the loam of a book. I have asked you a question. You answered me nothing. They gave the boy a prize. They sent the boy a book. They rave to a rapeas. Thisy faced him ten rapees. He over me twelve rapees. The man told me the story. He should me the way. He left them all his wealth. They played him a trick. He promoted me his

halp. He saved me much grief. They sold him two horses. He did me a great kindness. He mode me a handsome present. This man bears me a gradge. This affair caused him much trouble, and revised him up enemies.

Point out the Direct and Indirect objects in each of the above sentences.

10. Dative of Interest. The First Personal Pronoun can be placed in the Objective Case after a verb, to denote the interest taken by the speaker in the action of the verb. This is called the Dative of Interest.

Ho tore my open the sealed envelope,

Here me implies that the speaker took much interest,—was much surprised or much pleased,—at seeing him tear open the sealed envelope.

The Mussulman sailor ate me a piece of sait pork, which he chose to call fish.

Hero, as before, the me implies that the speaker watched the event with much surprise or with any other kind of interest. You shall bear me a bang for that

-Shakeneure.

This means "you shall bear (or receive) a bang or blow for that, and I shall take a delight in giring it you."

Priok me Bullcaif, till he roar again.

This means "Prick Bullcalf till he roar again, and I shall watch you doing it with interest or amusement."

- N. B.—Rhis peculiar use of "me" appears to have been produced by the omission of the preposition for. "Prick me Bulleal!," that is, prick him for me, for my sake, for my amusement, for my interest. "He bought me a horse," that is, "he bought a horse for me, for my use, &c."
- 11. Facilitie Verbs. There are some Transitive Verbs, which take one object only, but require some word or phrase to be added to the object for making the sense complete.
- These verbs are called **Factitive**; and the additional word or phrase, by which the sense is made complete, is called the Complement.

The Complement may be in various different forms:—

A noun, an adjective, a participle, a prepositional phrase, or a verb in the Infinitive Mood:—/

	Subject.	Verb.	Object,	Complement.
Noun.	They The king	made appointed	him him	king. a judge.
Adjective.	That grief The judge	drove set	him the prisoner	mad. free.
Participle.	They They	caught found	the man	stealing a clock, still weeping.
	{ This plot	filled put	us all the engine	with terror, out of order,
Infinition	We The judge	compelled ordered	the prisoner him	to confess, to be punished.
		cellaneous e	xamples of	Factitive Verbs

followed by a Complement:--

You must let that matter alow. They hald here the plot. They dyed the cloth black. He took the thind prisoner. The driver held the reins typh: The punishment he got saved him right. We must hold this plan in rewrs. I wish he would cut his speech short. We heard him conject his fault, and made him he parshon. The driver let lows the rein.

Intransitive Verbs.

12. An Intransitive Verb, (as above defined,) is one in which the action stope with the doer and does not pass from the door to an object.

Rivers flow Winds blow. Horsos 14th, or walk, or genze, or he down. Birda fly. All animals sloep. All animals due. Fish swise. Nerpents craul. Jackals head.

31. Intransitive Verbs of Incomplete Predication. Berry verb in the examples just given makes a complete statement about its subject. "Rivers flow":—nothing more is here needed to make the sense complete. (But there are some Intransitive Verbs which do not make a complete sense by themselves, but require some word or phrase to be placed after them for this purpose.

Any such verb is called a Verb of Incomplete Predica-

tion; and the word or phrase placed after it is called its Complement.

The Complement, (as in the case of Factitive Verbe, see para. 11.) may be in various different forms:—a noun, an adjective, a participle, a prepositional phrase, or a verb in the Infinitive Mood.

	Subject.	l crb	Complement
Noya.	A house That beggar	ie turned out	a four-legged animal a thief.
Adjoctus.	The man	has fallen went	sick mad.
Particept	The man	appears continued	pleased. running and jumping
Prep.	Your coat That book	proved	of many colours.
Infinitive	The flower	appeat	to he fading. to have forgotten m

N. B.—When the Complement comes after an Intransitive Verb, it is called a **Subjective Complement**, because it relates to the Subject.

But when it comes after a Factitive Verb, (see para. 11,) it is called an **Objective Complement**, because it relates to the Object.

The following are miscellaneous examples of Subjective Complements:—

He lived a lower of wines, and died a unwerelle pauger. His croice sounds is errich. The flower mells sever. The boy turned out to be a nencessful man. The cuttle are running wide. The amount is thing bright. The engine is out of order. The drawn cano from. The travaller feels cold and awayy. His speech stopped over in his middle I have a grown selver and hetter. Your plan proved (or turned out) successful. His face turned and.r. Prices are high last year. This coin will not pass overest. The horse has broken lower from its stable. The grass seem years and stope. He field it of ever. The book he published full flat. He fall desloys. Your horse went oken or at a loop price.

14. The Complement usually stands after its verb but for the sake of emphasis it may be placed before it:— Wede is the gate, and broad is the way that leadesh to des-

traction, and meny there be that go in thereby Strast is the gate, and narrow is the way that leadeth unto

life, and few there be that find it.

-New Testament

-New Testament

An honset man is the noblest work of God.

-Pope

Pain, varn was all Llewellyn's woe.

Lifeless, but beautiful he lay.

-Longfellow.

Blusted are the merciful; for they shall obtain mercy.

-Now Testament.

15. Intransitive Verbs with a Preposition. There are some verbs, which, when they stand alone, are Intransitive, but become Transitive when a Preposition is added to them.

Intrassitivi.

ransitivi. Transitive

(1) We laughed. (2) We laughed at him.

Here "him" might he parsed oither as the objective case

after the preposition "at," or as the objective case after the

Prepositional Verb "laughed-at."

But if we change the second sentence into the Passive form,
"He was laughed at by us," then of must be considered a
part of the verb " laughed." for since there is no object, we
cannot parse it as a preposition.

Intranettee. Transition

I agree I nover to these terms. Did you attend to Did you attend to that fagt. The dog barks . The dog barks . The dog barks of a stranger. They stepized of mooses. They still hoped They still hoped He simed or took aim He stand at the bird. He repeats which is fault.

They submitted ... They submitted to the order.
They all spoke ... They all spoke well of him.
He stared ... He stared at the picture.

16. The Organte Object. An Intransitive Verb, as you know from the definition, is never followed by an outside or foreign object, as a Transitive Verb in (But it may cometimes be followed by a noun implied already in the verb itself.)

Thus we can say "he has lived a sad life," where the noun life is implied already in the verb "lived," and is in fact part of its meaning. (Such objects are called cognate) or "kindred," because the noun denoting them is of kindred or similar meaning to the meaning of the verb itself.

[The noun used for this purpose may be either (a) one formed directly from the verb, or (b) of similar or nearly similar meaning

(u.) Cognate Nown formed directly from the verb.

lie laughed a hearty laugh. He died a sad drath. He lived a long life. - He fought a good fight. He alept a sound sleep. He prayed an earnest prayer. He sighed a deep sigh. He sang a fine song.

(b.) Cognate Noun of similar meaning.

lie went a long way.
He fought a good battle.
He struck a deadly blow.
It blows a brisk gale.
He ran his own course.
He walked his ten miles.

They shouted applaces,
= shouted an applauding shout.
He served his appronticeship,
= his service as apprentice.
He ran a great risk,
= he ran a very risky course.

What is the use, (you will ask,) of repeating a noun, which is already contained in the verb itself? (The use of a Cognate Noun is that you can put an adjective before it, and thus express something more than is contained already in the verb.)

Thus "he breathed his breath" involves a useless repetition of the same word; for it merely means the same as "he breathed." But "he breathed his last breath "means something more than "he hreathed;" for the notion of last has been superadded, and the sentence now means that "he died."

17. The Cognate Nova, or object, is sometimes understood after the adjective; as.

He shouted his londest (shork.) He ran his fastest (run or pace.) He fought his best (fight.) She sang her awoetest (song.) He breathed his last (breath.) He tried his hardest (tried or attempt.) He walked his longest (walk or distance.) He swam his quicknet (swim or pace.) He dived his deepnet (dive.) He laughed his merriest (laugh.) He played me false of taker game.)

18. Sometimes the pronoun it is used in the place of a Cognate Noun, provided that no adjective is placed before it:—

We must fight of (=the fight) out to the end.

We have no horse; so we must foot at, (that is, go the distance on foot)

Lord Angelo dukes it (=acts the part of a duke) well-

—Shakepen...

Come and trip it (that is use your light, and tripping step,) as you go.

—Muton.

Go at ' run at out !

He failed in the examina-

19.' Intransitive Verbs in a causal sense. (If an Intransitive Verb is used in the sense of causing a thing to be done, it becomes Transitive.) Of this there are only a few examples in English:—

Intranuting. Causal. The horse trotted out They trotted out the horse (caused it to trot out.) Water boils He boils the water (=causes st to hall) The prisoners walk out He walks out the prisoners (=causes them to Walk our.) A thorn ran into his hand He ran a thorn (= caused it to ron) into his hand. The kite flew into the air He flew the kite (= caused it to fly) into the air. The soldiers march out .. He marches out the soldiers, (-causes them to march out.) Wheat grows in the field He grows wheat (= causes it to ... grow) in the field.

tion fail) in the examination.

The boat floated . He floated the boat (secansed)

it to float.(

I falled him (=caused him to

20. (There are a few Intransitive Verbs, in which the Causal sense is indicated by some change of vowel or consonant:—

Transitive Transitive Cover.

The test fails He fell the tree with an axe.

The test multi-me at six I cannot rese or roses this by

The cow He on the grams . The man legs down his cost

We must not if the ... He of the books in order.

He dive into the water ... He dige the sponge into the water.

The horne dow ... He sewed the hores with the yellor.

Water drips from the jug ... He drops water from the jug.

In the same way drench=causes to drink, and soal =causes
to sack.

7\ 21. Omission of the Reflexive Pronoun. (Many Transitive Verbs, through the habitual omission of the Reflexive Pronoun, have acquired an Intransitive counterpart:—)

He drew (himself) near to me. Move (yourself) on a little faster.

It is more idiomatic to omit the Reflexive Pronoun after these verbs. Whenever this omission has become well established, the verb must be considered Intransitive. The following examples show the Transitive Verb on one side.

The following examples show the Transitive Verb on one sid and the Intransitive counterpart on the other.

Transitioi. Intransitive Counterpart. The fire burnt up the house He burnt With rage Do not step me ... Let us stop here a little They open the doors at nine School opens at tan o'clock A man breaks atones with a The day breaks at six. hammer. The ox drew this cart He dre m near to me. More away this stone More on a little faster. He broke up the meeting ... School broke up at three. The mouse strals food ... The mouse steals into its

They bathed the child

He rolls a ball down the hill

He barst the door open...

Bad man hids their faults

He terness me out of the

He terness on me and spoke.

They drop the boat into the ... Rain drops from the sky water.

They keep the boat on the left bank.

He sets the school in order He must refrais his tongue He feeds the horse on gram He rested his horse ...

Holengthened his journey He spread his garment

The shepherd gath, red the sheen.

clonds.

He closed the business The sun welts the snow He dashed down the cup

The wind dispressed the

ed by a Personal Pronoun, either reflexive or used reflexively.

A few of such verbs have survived to the present day as in the following phrases :--

Hie thee home. Fare thee well Haste thee away. They sat them down. He over-ate kimself. To over-aleep exeaclf. Vaulting ambition which o'er leaps it wif .- Shakspeare.

Observe, that in all these phrases or sentences the pronoun following the Intransitive Verb is of the same person as the noun or pronoun which is the subject to the verb.

§ 2.—ACTIVE AND PASSIVE

1 1. A Transitive Verb has two voices, the Active and the Passive

2. A Verb is said to be in the Active Voice, when the subject acts or is active

A Verb is said to be in the Passive Voice, when the subject does not act, but is acted on by something.

(a.) Active Voice, "Ram kills a snake," (the subject) acts; that is, he does something; he kills a anake.

... The boat keeps on the left. bank. The sun arts at six p. m

.. He must refrain from tears. Many men ford on rice.

The horse rested in the stable.

The days begin to lengthon. .. The mist spreads over the earth.

.. The sheep gathered round their shepherd.

The clouds have dispersed from the sky.

The day closed at six p. m. The snow sults in the sun

He dashed out of the room.

- (b.) Passes seres. "A snake is killed by Ram." Here a snake (the subject) is acted on by something or by some one, that is, it is killed by Ram
- 3 When a sentence is changed from the Active form to the Passive, the object to the Active Verb becomes the subject to the Passive Verb

Object to detwee 1 crb

None knew the right road

He gave aix apples to me

The king expelled the thet thing him

The king expelled the thet thing the first t

We drove him out of the house
We need are camels for our work,
Brutes do not posses hands
I have lost are hip p
God will bless good wan
Have you shut the d r?
I am cooking food

He was driven out uy us
Six amels are needed by us
Fick cannot be made by brutes
Hands are not possessed by brutes
tis the p were lost by m
food men will be blessed by 6 al
Has the door been shut by you
Fand as boung cooked by me

- (a) Change th filming a draws from the Act v to the Passet — A cat chased a mouse, and a dog chased the cat the brought are applied from The lower animals do not need tools. Man-ione knows how to make tools. God has given no such much to other animals. We must find out the reasons of things. This king conquered that. Who mad you and all the world?
- (b) Change thirful as in a sucrificial Plane. I Actus The abops are closed by all the dealers. Fins book was brought here by my corvant. The root of the house we, blown offly the wand. The root of the house we, how no find the word of India is made fertile by the arnual ranze. That fine tree was guit by lightings. The walls of the house were crecked by an earthquake in a varial of the house were crecked by an earthquake in a varial property. The control of the control of the control property of the property of the control of the property of the control of the law dealth was howarded by all of the control of the law dealth was howarded by all of the control of the control of the law dealth was howarded by all of the control of the control of the law dealth was howarded by all of the control of the control of the law dealth was howarded by all of the control of the control of the law dealth was howarded by all of the control of the control of the law dealth was howarded by all of the control of the control of the law dealth was howarded by all of the control of the control of the law dealth was howarded by all of the control of the control of the law dealth was all the law dealth was all the control of the control of the law dealth was all the law deal

Verbs, which take two objects after them in the Active Voice, can still take one in the Passive. This object may be:—

(a.) The Indirect object of the Active Verb; as,

I forgave him his fault . The fault was forgiven him by me.
We allowed him two rupees ... Two rupees were allowed him by us.

(/) The Direct object of the Active Verb; as,-

Action Viro Passion Virb.

I forgave him his faul! ... He was forgiven his fault by me.
We allowed him two rupess by us.

- (**) In the following sentences make the Indirect object of the Letive Year the subject to the Passive Year:—
 He taught me (trauman: He refused me the loan of a book. I have asked you a question You answered me nothing. They gas the boy a prize They sent me a book. He leat me ten rupees He owed me twelve rupees The mast add me the story He showed me the way. He left them all this wealth They played him a trick. He promised me his help.
- They sold him two horses. He saved me much trouble.

 In the following asstances make the Direct object of the Active Verb the subject to the Passive Verb —
 He taught me Grammar Herdused me the loan of a book.

 I have asked you a question You answered me nothing.
 They gave the boy a prize. Helen time ter rupees. Here of me they have the prize. He was the true present when me twelve tripees. The matt told me the story, He showed me they way. He left them all his wealth. They ruleved him.

a trick He promised me his help. They sold him two

\(\) 5 Whenever a Factitive Verb is changed from the
Active Voice to the Passive, the Objective Complement
becomes a Subjective one;
—

Artive voles: Complement to Passive voice: Complement to Subject.

horses.

They proclaimed him king
They appointed him judge
They called Cromwell protector
They called Cromwell protector
They called Cromwell protector
They called protector
They called protector by them.

They did not crown him king ... He was not crowned king by them.

They considered the boy a scholar, The boy was considered a scholar by them.

I took the thief prisoner

I took the thief prisoner

I took the thief prisoner by me.

I took the thief was taken prisoner by me.

I is face was painted black by him.

You must leave the mad dog slone, The mad dog must be left slone by

He held the thief fast ... The thief was held fast by him.

The prince were set fast by him.

He set the prisoners free

He laid bare their designs

The prisoners were set free by him.

Their designs were laid bare by him.

An Intransitive Verb cannot be put into the Passive Voice.

But if a Preposition is added to the verb, and if this preposition coheres so closely with it as to be considered a part of it and to form a Transitive Verb, the Transitive Verb so formed can be put into the Passive Voice in the ordinary way.

We act on this rule Active.

This rule is acted on by us Passive.

a) Change the following sentences from Active to Passatve:— They adhered to this plan. I agree to these terms. He simed at the bird. Did you attend to this? The dog barks at me. They dealt kindly with him. Can we depend on him? They despair of success. I did not dream of this. All men wondered at his seal. They came to this resolution. He proceed-

with the case. He hinted at a new plan.

(b.) Change the following sentences from Passive to Active :--

This was not hoped for by me. Their rights are insisted on by them. He dress was laughed at by all of them. He was well looked after by us. He was pointed at by the crowd. Was this referred to by you? Can be be relief on by his master? The fault was repeated of by him. The fox was run after by the dogs. He is well spoken of by all men. The prisoner was much stared at by the multitude. Will this hope the second of the second of the second of the second ty his excitions. He was third with by y all the arrival was long waited for by his parents. Thus faults are without at by their masters.

N. B.—(1.) It depends entirely on custom whether a Propositional Verb can be thus used in the Passive Voice, Thus we can say "he sat on the beach;" but we cannot say "the beach was sat on by him."

- (2.) Whenever a Propositional Verb can be used in the Passive Voice, that Verb may be considered Transitive; but if it cannot be put into the Passive Voice, it must be considered Intransitive.
- %.7. Verbs Active in form, but Passive in Sense. There are a few Transitive Verbs, which are used in a Passive Sense without being put into the form of the Passive Voice; as.—

The stone feels rough (is rough when it is felt.) Honey tastes sweet (is sweet when it is tasted.)

The milk smalls sour (is sour when it is smelt.)

Your blame counts for nothing (is worth nothing when it is counted.)

Your language reads well (sounds well when it is read.)
The house does not let (is not taken when it is meant to be let.)

The house does not sell (is not taken when it is meant to be let.)
The horse does not sell (is not taken when it is meant to be sold.)

The meat cuts tender (is tender when it is cut.)

That cloth will wear thin (will become thin when it is worn.)
The wheels dragged heavily (moved heavily when they were
dragged.)

Such verbs are uncommon; and no one should use an Active Verb in a Passive sense, unless the use is permitted by custom.

- 8. The present participle passive in English is ambiguous. Thus the form "being built" may be used in two different senses:—
 - (a.) To denote a continuous or unfinished action; ss:— The house is being built (i. s., the work of building is still going on.)
 - (b.) To denote a perfect or finished action; as:— The house being built (i. c., the work of building being over and completed,) the workmen were paid off.

In consequence of this ambiguity, a custom has aprung up, (which however should not be imitated except with great caution,) of using the active form of the present participle in a Passive Sense:—

The house is building (=is in a state of being built.)
The trumpets are sounding (=are being sounded.)

The cannons are firing (mure being fired.)
The drams are beating (mure being beaten.)
The house is finishing (mis being finished.)

The book is printing (=1s being printed.)

A book is massing!(=1s being printed.)

The cows are milking (=are being milked.)

§ 3 .- THE INDICATIVE MOOD.

A .- Mood, Tense, Number, and Person.

- 1. A Mood denotes the mode or manner of the action expressed by the verb.
- There are four Moods, three Finite and one Infinite, or as it is usually called. Infinitive.
 - (a.) Three Finite Moods:-
 - 1. Indicative.
 - Imperative.
 - Subjunctive,
 - (b.) The Infinitive Mood.

the example given.

3. In the Indicative Mood we assert or indicate an action as a fact; as, "He comes," "he came," "he will come."
In the Imperative we command an action: as. "Come

thou," "come you," or "come."

In the Subjunctive Mood we suppose an action; as, "If

- he come or should come."

 N. B.—The Subjunctive Mood is generally introduced by some Conjunction either expressed or understood, such as if in
- 4. The word Finite means limited;—limited by what? By the noun, pronoun, or other word placed before it as Subject. A "Finite Verb," (then, means any form of the verb that is limited in number and person by its Subject.)

But in the Infinitive Mood us Subject is mentioned; and this Mood is called Infinitive or "unlimited," because it is not limited in number or person.)

The Infinitive Mood is formed by putting to before the verb; as, "to come."

Point out the Mood of each of the verbs noted below:-

Owes and tell me what you have heard. If you should be at home when I coll at your house, I heall be glad. I feel as me to my home at 4 cylock in the afternoon. You will be killed, if that stone pilled upon your head. Why were these books brought to me? My tather mill not return for some time. If he should riture to nonzow, I shall be much asymptosis. Will the health. He told them to call for him at 6 cylock. Put away the books and shut the door of the room.

 Number and Person. The number and person of a Finite Verb depend (as you have just learnt,) upon the word or words placed before it as Subject.

The verb is Singular, when its Subject is singular, and Plural, when its Subject is riural: as.

Singular. He loves, Plural. They love.

The verb is in the **First Person**, when its Subject is the pronoun *I* or we; as, "I love," "we love,"

The verb is in the Second Person, when its Subject is thou or you; as, "thou lovest," "you" or "ye love."

The verb is in the Third Person, when its Subject is the pronoun ha, she, it, or they, or when its Subject is some noun, or some sentence that is put for a noun; as, "he comes," "the cat comes," "they come," "the cats come," "that we are mortal is certain."

Hence arises the following invariable rule:—A Finite Verb must be in the same number and person as its Subject: Point out the number and person of every verb in the following sentences:—

The cow is a quiet and useful animal. Oxen draw the plough. I see four men coming. They see the sun rising. We see the hills in the distance. Thou see it the wisses man in the room. The horse cervice his rider. Four men cervy the palsanquin. That the horse is lame is seen by all of us. How to do this was not understood.

6. Tense denotes the time of an action.

The verb may tell you :--

- (1.) That an action is done at the Present time; as,
- (2.) That an action was done in the Past time; as, "he saw a star."
- (3.) That an action will be done in the Future time; as. "he will see a star."

A verb, then, has three main times or tenses; viz., the Present: the Past; and the Future.

7 7. To each tense there are 4 different forms:-

- I. Indefinite; which denotes Present, Past, or Future time in its simplest form; as "I love," "I loved," "I shall love."
- II. Continuous; which denotes that the action (in Present, Past, or Future time) is still in progress or still continuing; as, "I am loving." "I was loving," "I shall be loving."
- III. Perfect; which denotes that the action (in Present Past, or Future time) is in a complete or perfect state; as, "I have loved," "I had loved," "I shall have loved."
- IV. Perfect Continuous; which combines the meanings of the two preceding forms; as, "I have been loving," "I had been loving," "I shall have been loving,"

B .- Forms of the Tenses, Indicative Mood.

7. The three Tenses and twelve forms of a verb in the Indicative Mood are shown in the following table:---

I .- Active Voice.

	Form.	Present Tener.	Part Tense.	Future Tense.
1.	Indefinite	I love	I loved	I shall love.
2.	Continuous	I am loving	1 was loving	I shall be loving.
3.	Perfect	I have loved	I had loved	I shall have loved.
4.	Perfect. Com-	I have been	I had been lov	· I shall have been
	£17110WF	loving	ing	loving.

II .- Passive Voice.

Past Tonse. Form. Present Tense. Future Tenes. 1. Indofinite l am loved I'was loved I shall be loved. 2. Continuous I am being loved I was being loved Wanting. I have been loved. I had been loved. I shall have been 3. Perfect 4. Perfect Conloved Lingous Wanting. Wanting. Wanting.

 The Present, Past, and Future Tenses, (Indefinite) are declined in the following form, for all numbers and persons:—

I .- Active Voice, Present Tense.

Post Tense.

| Singular | Plural, | 1st Pr. 1st of | Those | Those

Future Tense.

 Singular.
 Plural.

 1st Person
 I shall love
 We shall love.

 2nd
 Thou wilt love
 Ye, or you will love.

 3rd
 Ile will love
 Thoy will love.

N. B.—(1.) The singular forms of the Second Person. (thou lovest thou loredst, thou wilt love.) are now saidom used except in poetry. They have been superseded by the Pluraf forms, (you loved, and you will love,) which, though Pluraf in fact, are used in a Singular sense, as well as in a Plural sease:—s. "Have you come, my son?" "Have you," being addressed to "son," is used in a Singular sense, and may be parend as Singular.

(2.) The form "he loveth" is now seldom used except in poetry.

II .- Passive Voice.

Present Tente.

	Singular.	Plural.
1st Person	I am loved	We are loved.
2nd 11	Thou art loved	Ye or you are loved,
3rd	He is leved	They are loved.

Past Tense.

1st Poveon . 2nd :- 3rd :-	Singular. I was loved Thou wast loved He was loved Future Tense.	We were loved Ye or you were loved. They were loved.	
1st Person		Plural. We shall be loved.	

Thon will be loved Ye or you will be loved. He will be loved They will be loved.

10. (Do and Did. The present Indefinite in the Active-Voice can also be formed by do, and the Past Indefinite by did. (The words do and did are called Auxiliary or helping verbs.)

Present Tense.

	Singular.	Phral.
1st Person	I do love	We do love
2nd	Thou dost love	Ye, or you do love
3rd p	He does love	They do love.
	Past Ter	18C.
	Bingular.	Plural.
1st Pryson	I did love	We did love.
Ond	Then didet love	Ve. or you did love

He did love * This form is used for three different purposes :-

- (a.) For the sake of emphasis :- as, " I do love," I did love (b.) For the sake of bringing in the word "not"; as. "]
- do not love," (which is better than saving "I love not.") " I did not love " (which is better than saying " I loved not.")
- (c.) For the sake of asking a question : as. " Does he love." "Why did he love ?" "Did he not love "P
- 11. Whenever do or did is used for asking a question. the noun or pronoun which is the subject to the verb is placed after the do or did, and not before it; as,
 - "Do I love "? "Did he not love "? (Question.) But whenever do or did is used for the sake of em-

phasis or with "not," the noun or pronoun stands before the verb, and not after it : as.

" I do not love,"-(Negative.) " I do love."-(Emphasis.)

Correct the following :-

Loved he not? Came he? He not saw this book. He reads not his book with care. They not slept long last night. They broke not the slate, but he broke it. You not read your book well. This letter came for me to-day or yesterday? It came not for you to-day, but yesterday. You not yet finished reading the letter?

12. (Has come, is come. In almost all verbs the Present Perfect Tense is formed by means of the Past Partici-

ple and the Auxiliary Verb " to have " :-

		Singular.
Ist	Person	I have loved
Snel	,,	Thou hast love
Ird		He has loved

ød Ye or you have loved, They have loved. But there are a few Intransitive Verbs of going or coming

which can substitute the verb to be for the verb to have in forming this tense :-

Plural.

Plural. We have loved.

Singular. 1st Person I am or have come Thou art or hast come

We are or have come. You are or have come. 3rd He is or has come They are or have come. The verbs that can be used in this form are go, cone,

begin, end, rise, set, full, and pass.

I am gone. Thou art come. The summer is begun. The summer is ended. The sun is risen. The sun is set. Rome is fallen. The rains are passed,

13. Shall and will. These, (as the student has learnt already,) are the two auxiliary verbs, by means of which the future tense is formed in both the Active and the Passive Voice.

One of the puzzles in English is to know when to use shall-and when to use will.

With a view to clearing up this matter, it should be understood that there are three senses in which the future tense can be used :-

- (a.) To express merely future time, and nothing more.
- (b.) To express future time with an implied command.
- (c.) To express future time with an implied intention.

(a.)-Merely future time.

When nothing but future time is intended, -mere futurity, without any idea of command or intention being mixed up with it, -whall must be used for the First person, and will for the Second and Third persons has below:-

Summittee District

		Buguar.	Timras.
1st	Person	I skall go	We shall go.
Suci	**	Thou will go	You will go.
310		He will an	They will as

The reason is this. Shall implies some command or order, which must be carried out, whether the doer desires it or not. But will implies freedom of action,—some will or intention, which the doer may act upon or not, as he likes best.

We think it rude to give an order to a Second or Third Person, and so we use will instead of shall for these Persons. But we do not think it rude to give an order to ourselves, and so we use shall for the First Person.

(b.) An Implied Command.

Whenever we desire to express, not merely future time, but some command or order in addition, shall is put for will in the Second and Third persons; as, ;

You shall be hanged (by some one's order)

Thou shall not steal, (a general commandment)
He shall receive his prize to-morrow, (that is, some one has

given the order.)
To-morrow the school will be closed; (this merely expresses a future fact)

To-morrow the school shall be closed; (this implies that a holiday has been granted by some one's order.)

(c.) An Implied Intention.

When the speaker wishes to express some intention of

х

his own, then will is put for shall in the First person, and ahould be spoken with some emphasis:— /

I will not steal (= I do not intend to steal.)

I will finish this work to-day (= I intend to finish it to-day.)

I will (=I intend to) let you know the hour of my return.

The spirit of my father grows strong in me, and I will no longer endure it. Charles, I thank thee for thy love to me, which thou shall find I will meet kindly requite.

I suff be drowned; no-body skall help me. (This speech, is supposed to have been uttered by a man who had fallen into a well, shows the wrong use of skall and well; for it implies that he weshed or sutended to be drowned, and that he was unwilliar that any one should help him.)

C .- Meanings of the Tenses, Indicative Mood,

/ § 14. The Present Indefinite. The special use of this tense is to express what is true at all times alike,—past, present, or future:—

The sun shrace by day, and the moon by night.

Things equal to the same thing are equal to one another 'Sixteen annas make one rupee.

Europe a the smallest of the continents.

Death as the common lot of all men

An honest man's the noblest work of God.—Pope.

The mountains look on Marathon.

And Marathon looks on the sea. - Byron.

This tense might he called the Tense of Science, since all the permanent facts in the universe,—whatever knowledge we possess of the sky, the earth, the air, and the ocean,—are expressed by this tense.

15. The same tense is also used for expressing whatever is permanent or habitual in the lives and characters of men:—

He is a fine singer. He works hard.

He loves amusement more than work. He sells books. He teaches well.

He keeps his promises. He has good health.

104 INDIAN MIDDLE SCHOOL GRAMMAR.

- 16. (The present Indefinite can relate to some present act or event, provided that present time (a) is expressed by some special adverb, or (b) is implied by the context:---
 - (a). I am now in a hurry to start.

 I cannot start at present.

 The wind is very cold to day.
 - (b). I understand what you say.

 I see no use in doing what you advise.

 The door is open: I did not shut it.
- 17. The Present Indefinite can relate to some Future act or event, provided that future time (a) is expressed by some special Adverb or phrase, or (b) is implied by the context.
 - (4.) He comer (- will come) here in a few days' time.

 I hear that he returns (= will return) to-morrow.

 I go (= shall go) away to night; but you do not go (= will not go) this day get the day get.
 - 1 go (=shall go) away to sight; but you do not go (=will not go) till the day after.
 th.) When do you start (=will you start) for Calcutta?
 1 go (=shall go) to prepare a place for you.

-New Testament.

18. The Present Indefinite can relate to some past event, when the narrator, for the sake of vivacity, describes some past event, as if it were actually passing before his eyes: —

> Baber now leads (=then led) his men through the Khyber Pass, and esters (=entered) the plants of India.

This is called the "historic present," because it describes an historical or past event, as if it were present.

19. The Past Indefinite. The special use of this tense as to state something that was true once, but is now past and gone. It excludes absolutely all reference to present time.—

Baber founded the Mogul Empire in India.

Vasco de Gams was the first man from Europe, who rounded the Cape of Good Hope.

- As the Present Indefinite might be called the Tense of Science, so the Past Indefinite might be called the Tense of History: for all the events to which history relates are told us in this tense, unless the narrator thinks fit to use sometimes the Historic present, for the sake of vivacity.
- The Future Indefinite. This tense expresses
 Future time in its simplest form.

The expected event may be regarded either as remotely distant or as very near:—

It is commonly believed that the world itself will be destroyed at last (-in some very remote future.)

The oxen will be yoked in a few minute's time (--a very near future)

Note.—In the same way the Past Indefinite may refer equally to a very distant or to a very near past:—

The Aryans invaded India in prehistoric times. (A very remote event.)

My friend breathed his last a few minutes ago. (A very recent event.)

21. The Continuous Tenses. In all these tenses the action is regarded as still going on at the time referred to.

I am walking: (that is, I am doing this and nothing else at the present time.) (Present.)

I was walking at the time when you met me. (Past.)

I shall be weaking at the time when you will meet me. (Future.)

Note,—Such a phrase as, "He is going away to-morrow," is common, but inaccurate.

- "He is going" is a continuous or unfinished present, and must therefore relate to present time only. Hence it cannot be coupled with "to-morrow," which signifies future time.
- 22. The Present Perfect. This tense invariably brings the action or event down to the present time:—
 - I have lived 20 years in Lucknow, (that is, I am living there still, and I began to live there 20 years ago.)
 - The lamp has gone out (that is, it has just gone out, and we are now left in darkness.)
 - 23. The Present Perfect can never be used in refer-

ence to a past event, except when the state of thingsarising from that event is still wresent:-

The British Empire has succeeded to the Mogul.

The series of events, by which the British empire superseded the Mogal, took place more than a century ago. The events are therefore long past. Xet it is quite correct to use the Present Perfect Tense "has succeeded," because the state of things arising out of these past events is still present; the British empire still exist, and pretain to present time.

But such a sentence as the following is wrong :-

Baber has founded the Mogul empire.

This is wrong, because the state of things arising out of the foundation of the Mogul Empire by Baber has entirely passed away.

The verb in the following sentence is equally wrong and for

the same reason :---

Over the private sufferings and crimes of Aurangaeb we draw a veil; but history records with pain the great wrong he has done to his dynasty, to his co-religionists, and to the people of India. ("Did" ought to have been written instead of has dow.

24. The Present Perfect is ner-r qualified by any advertor physic denoting past time.

Incorrect. Correct.

The rain has exased yesterday. The rain ceased yesterday.

Babes has founded the Mogul Babes founded the Mogul Empire in A. D. 1525.

A. D. 1525.

The Sepoy mutiny has broken The Sepoy mutiny broke out more out more than 30 years ago.

1 have finished my letter last I finished my letter last evening.

evening.

The parrot has died of cold last The parrot died of cold last night.

This custom has been formerly This custom seas formerly much much practised.

An Adverb denoting past time, and the Present Perfect Tense which invariably denotes present time contradict such other, and make nonsense.] Yet the mistake is very commonly made by Indian students.

Such sentences as the following are correct, because the adverb or phrase used in each of them is of such a kind as to connect past time with the present : hence no contradiction occurs.

The English empire has been flourishing for the past 150 years : (that is, it began to flourish 100 years ago and is still flourishing.)

Letters have passed between us for the last 3 years: (that is, letters began to pass between us 3 years ago, and are passing. (dita

Fever has raged in the town since Monday last: (that is, fever began to rage on Monday last, and is raging still.)

25. The Past Perfect, (sometimes called the Pluperfect.) This is the tense used, whenever we wish to say that some action has been completed, before another was commenced.

The verb expressing the previous action is put into the Past Perfect or Pluperfect Tense. The verb expressing. the subsequent action, viz., that which was commenced after the previous one had been completed, is but into the Past Indefinite.

(a.) Previous Action. Past Prriect. He had been ill two days,

The ship had almost sunk, He had seen many foreign cities.

He had slept six hours.

(b). Subsequent Action. Past Indefinite.

Subsequent Action. Past Indefinite. when the doctor was sent for. before any one knew that it was

sinking. before he returned home. when he woke up from his aleep.

Previous Action. Past Perfect. The boat was sunk by a hurricane, which had suddenly aprung up.

The sheep fled in great haste; for a wolf had entered the fold-No one wished to live in that house, where the murder had been committed.

The doctor came to the patient, who had long been ill.

The Past Perfect ought never to be used at all except to showthe priority of one past event to another.

Yet Indian students frequently use the Past Perfect, when no priority of any kind is implied, and where they ought to use the Past Indefinite. Here is a specimen of a letter despatched under an official signature :---

"I beg to inform you that the trustees to the—
endowment, at the meeting convened in 19th July, 1891, had
unanimously resolved to reserve the option of appointing or
dismissing the men employed, etc.

Here the event referred to should have been expressed in the Past Indefinite. The use of the Past Perfect is quite wrong in this place, because there is no priority of one event to another.

- 26. The Future Perfect. This is the tense used to denote that some action will have been completed, before another will be commenced:—
 - I shall have lived 40 years, before that event will come to pass.
 - A hundred years or more will have elapsed, before the name of that good man will be forgotten.
- 27. The Perfect Continuous Tenses. These tenses combine the meaning of a Continuous tense with that of a Perfect tense. They have 3 separate forms:—(a) the Present Perfect of continued action; (b) the Past Perfect of continued action; (c) the Fature Perfect of continued action. None of these occur in the Passive voice—
 - (a.) He has been reading that book all day. (Present.) (This means that he began to read it in the morning, and is reading it still, or has only just left off reading it.).
 - (b.) He had been reading that book all day, before you took it away from him. (Past.)
 - (liere the previous action is denoted by the Past Perfect, and the subsequent one by the Past Indefinite.)
 - (c.) He will have finished that book by sunset. (Future.) (Here, the time of sunset has not yet come. But by the time it does come, he will have finished reading the book.)

§ 4.-IMPERATIVE MOOD.

1, (The Imperative Mood is used only in the Present Tense, and only in the Second Person:—)

Singular. Plural,

Speak, or speak thou Speak, or speak you, or speak ye.

 (To express the first and third persons of this Mood, we use the Auxiliary Verb let which is itself the secondperson (Singular or Plural) of the Imperative Mood of the werb "to let"; as,

Singular. Piural.

1st Person Let me speak Let us apoak.

3rd 1 Let him speak Let them speak.

X. B.—Here *peak is in the Infinitive Mood with the to left out.

In older English, however, and sometimes even to this day in poetry, but not in prose, the first and third persons of the Imperative can be expressed without the help of "let"; as,

Every soldier kill (=let every soldier kill, or every soldier is ordered to kill.) his prisoners.

-Shakepearr.
Thither our path lies; wind we (=let us wind) up the height.
-R. Browning.

The older form of the Imperative as used in the third person has survived in the common phrase suffice it, which means "let it suffice " or " let it be sufficient"; as.

Suffice it to say that all the men, whatever faults they were accused of, were guilty.

3. (The chief uses of the Imperative Mood are to express (a) communal, (b) precept, or (c) entreaty; and hence the name "Imperative," which signifies "command" only, is too narrow.)

(a.) Command :-

Speak,-or I fire.

Awake, arise, be for ever fallen.

-Milton.

(b.) Precent or Invitation :-

I will give you rest.

Go to the ant, thou sluggard; consider her ways and be wise. --- Old Testament.

Judge not, that ye be not judged.

Juage not, that ye be not judged.

—New Testament,

Come unto me, all ye that travall and are heavy-laden, and

-Now Testament.

(c) Entreaty or Prayer:— Give us this day our daily bread, and forgive us our trespasses, as we forgive them that treepase against us.

Father, forgise them; for they know not what they do.

-New Testament.

 δ 4. (In speaking to an equal or to an inferior some additional force or emphasis is given to an entreaty by adding the word do; as, j

Do come out with me, before the rain begins to fall.

Do leave of making that noise.

Note.—This emphatic form of the Imperative is the same at bottom as the emphatic form of the Present Indefinite; as, I do dislike noise. (See above § 3, para 10.)

5. In making a request to a superior, or in doing so to an equal in terms of respect, "be so good, etc.," is a phrase commonly used:—

Be so good as to lend me that book.

- 6. (The Imperative Mood is sometimes used to express a Supposition, in which case it has the same force as the Subjunctive Mood:—)
 - \Take care of the pence, and the pounds will take care of themselves (= If you take care of the pence, the pounds will, etc.); Resist the devil, and he will flee from you, (= If you resist the devil, he will flee, etc.)
- 7. Sometimes, but very rarely, the Imperative Mood is used absolutely:—)
 - A large number of men, my a hundred, are working on the railroad.

§ 5.—THE SUBJUNCTIVE MOOD.

- (The Subjunctive Mood is so called, because it is generally subjoined to some other sentence, and seldom stands alone.)
- 2. The Present, Past, and Future Tenses (Indefinite) are declined as follows in the Active Voice:—

Present Tense.

	Singular-	renrat.
1st Person	If I love	If we love,
2nd "	If then love (not lovest)	If you love
3rd ,	If he love (not lovest)	If they lov

Past Tense.

1st Person If I love If we loved.
2nd " If thou loved (act loveds) If you loved.
3rd " If he loved If they loved.

Future Tense.

But the forms thou love, he love, and thou loved, are getting more and more out of use; and the forms of the Indicative Mood are now generally used in their place; as, "if thou lovese (instead of if theu love); "if the loves" (instead of "if the loves"); "if the lovest" (instead of "if the lovest").

3. The verb to be has retained the Subjunctive forms in a more marked and complete way than any other verb:—

Present Tense.

Present Tense.

 Singular.
 Planal.

 1st Person If 1 be
 If we be,

 2ud , If thou be
 If ye or you be,

 3rd , If he be
 If they be.

Pust Tense.

Future Tense.

Singular.

1st Person If I should be
2nd , If thou should stbe
3rd , If he should be
If they should be.

The forms of the Past and Future Tenses are still in common use. The forms of the Present Tense are not so common, and those of the Indicative Mood are sometimes used intend of them.

4. The forms for the Continuous and Perfect Tenses in.

the Active Voice are shown below :---

Continuous. Perfect. If I be loving If I have loved. Past If I were loving If I had loved.

If I should be loving If I should have loved.

5. In the Passive Voice the only tenses of the Subinnctive Mood, which are in ordinary use, are the Indefinite and the Perfect :-

Indefinite. Perfect. If I be loved If I have been loved. If I were loved If I had been loved. If I should be loved If I should have been loved. The Second and Third persons, Singular and Plural, of the above 6 tenses are declined by means of the Auxiliary Verb "to

be" with the Past or Passive Participle of the other verbannexed.

THE USES OF THE SUBJUNCTIVE MOOD.

2 6. The Indicative Mood expresses u fact; the Imperative Mood expresses an order; the Subjunctive Mood expresses any thing except a fact or an order,; such as a purpose, a wish, or a condition.)

(1.)-A PURPOSE.

In this case the verb in the Subjunctive Mood is preceded by the conjunction that or lest (lest=that not.) and some of the tenses are formed by the help of the Auxiliary Verbs man and might.

Indicative. Subjunctive : Purpose. Present. | I give you a prize, that you may work well again. I shall keep your book, lest you should lose it. that you may not lose it. that you might work well again. lest you might lose it.

(2.) -A WISH.

Thy kingdom come: or may thy kingdom come.
Thy will be done: or may thy will be done.
I winh that he were as clever as his sister.
Mine be a cot beside the rill.
God says the queen. Long live the king.

God save the queen. Long live the king.

His blood be on us and on our children.

—New Testament.

(8.)-CONDITION AND ITS CONSEQUENCE.

In such cases the verb expressing the condition is generally preceded by the conjunction if. The verb expressing the consequence is expressed by the auxiliary "nonld."

First Sentence: Condition. Becond Sentence: Consequence.

Present of If he should most me, of the swould know me at once. If I word in his place, I would pay the rupeo.

Past. { If he had met me, it I had been in his place, I would have paid the rupee. Sometimes the if is left out. In this case the should, or

the had, or the were must stand first; as,)

Pressu

or Should be meet me, be would know me at once
Were I in his place I would pay the rupee.

Past. { Had he met me, Had I been in his place, I would have known me. I would have paid the rupes.

Sometimes the Conditional sentence is left out or understood, and only the Consequent sentence is expressed:—

He would never agree to that, (" if you asked him," understood.)

He would be very thankful to you for this kindness (" if you were to do him the kindness," understood.)

He would not hear my voice, fair child. (He would not hear

my valoe, if I called him bank.)

—Mrs. Homens.

- Indicative and Subjunctive. Either of these moods can be used after if, but not with the same signification.
- Y (When the verb following "if" asserts something as certain, the Indicative Mood is used. When the verb asserts something as conditional or doubtful, the Subjunctive Mood is used.)
 - (a.) Indicative :-

If he is not guilty, (and this is known to be the fact,) why do you still keep him in jail?

(b.) Subjunctive :-

If he be guilty, (and this is doubtful,) he will incur a heavy punishment.

Note.—The Conjunctions chiefly used to denote doubt, condition, or supposition, and therefore chiefly used with the Subjunctive Moods, are:—if, unless, though, lest, till.

- 8. Shall, should. In grammatical form "should" is the past tense of the verb "shall"; but in force or meaning it has two different uses:—
- (a.) For forming the tenses of the Subjunctive Mood, as has been shown already:
- (b.) For expressing some duty, as will be seen in the following examples:—

He should take a walk every day for the benefit of his health, Shouldest not thou also have had compassion on thy fellowservant, even as I had compassion on thee?

Note.—It was pointed out in § 3, pars. 13, that "half are presses a command. "Should" in the same way expresses a command or duty, but in a milder and more courteous way. To say "you should to this "means "I command you to do this." To say "you should do this "means "it is your duty to do this."

Whenever "should" is used in the sense of duty, it is in the Indicative Mood, and has no connection with the Subjunctive Mood 9. Will, would. In grammatical form "would" is the Past Tense of "will." But in force or meaning it has two different uses:—

(a.) For helping to form the tenses of the Subjunctive Mood, as has been shown already:

(b.) For expressing some habit or habitual act of will in past time:—

The bird would come every day to receive crumbs of bread.

Here " would come " means " had the will to come, or made a habit of coming." This agrees with what has been said in § 3, para. 13, where it is explained that the verb "will" implies some intention or act of will.

Whenever "would" is used in the sense of habit, it is in the Indicative Mood, and has no connection with the Subjunctive Mood.

§ 6.—THE INFINITIVE MOOD.

1. THE Infinitive Mood, (as you have learnt already,) is so called, because by means of this mood we speak of an action without defining the door. It can be used for any door, and therefore it has no number and no person,

\The word to added to the verb is the sign of the Infinitive Mood.

 The forms of the Infinitive Mood are four in number, and all are in the Present Tense: —

Form.
Indefinite,
To each,
To be sending,
To be sending,
Wanting.
To have send to have been sending,
Wanting.
To have been sending,
Wanting.

There is no Past and no Future Tense to the Infinitive Mood.

The Future Tense of the Infinitive can be expressed only by some phrase; as, "to be about to send;" "to be on the point of sending;" " to be going to send." 3. Omission of "to." The word to is the sign of the Infinitive Mood. But (there are some yerbs which take the Infinitive after them without the (s)

(a.) The most common of these verbs are shown in the following examples:—

I hear thee speak its o speak) of a better land.

I am him take (to take) aim with his bow.

You need not send (to send) those books to me.

I fair the cold air strike to strike) against my face.

He daved not say (to say) this in open day.

He made me come (to come) and air tto sit) besided him.

I det him go (to go) back to his own house.

They face we tell (to tall) thom the right read.

We suctoked him go (to go) and come (to come.)

We shalled the shir ize to triane.

(b.) The to is also left out after all the Auxiliary Verbs. (A verb which helps to form a tense or mood is called Auxiliary.)

I shall go roug! I intend to go. I can go I am able to go. I would go I was able to go. I should go I ought to go. I must go I am compelled to go. I may go I am permitted to go. I might go I was permitted to go. Let me go Permit me to go. 1 will go I am willing to go. I would oo I was willing to go, or I was in the

(c.) (The to is also left out after the verb, "had," in such phrases as, "had better," "had rather," "had sooner," "has as soon—as."

You had better not remain here. I had rather take this, than that.

I had sooner run than walk.

I had as soon run as walk.

Note.—"Had" here is used in a Subjunctive sense, ==would have. "I had better not remain here" means "I would have (it) better not (to) remain here." (d) The to need not be repeated after "than," if it has been used once already with some previous verb

He is better able to waik than runs—to run.

I am resolved to Roht sconer than yield—to yield.

They were taught to learn every thing by heart rather than understand it—to understand it.

(a.) (The to is not used after the preposition "but.")

He did nothing but touch (= to laugh.)

USES OF THE INFINITIVE MOOD.

- 4. (There are two main uses of the Infinitive Mood :---)
 - I. The Simple or Noun-Infinitive.

 II. The Gerundial Infinitive.
- 5. The Noun-Infinitive may be used (a) as the Subject to a Finite Verb, (b) as the Object to a Finite Verb, or as the Complement to a verb "of incomplete predication":—
 - (a.) Subject to a Finite Verb :-

To orr (=error) is human; to forgive (=forgiveness) is divine
To die (=death) is the common lot of man.

(b.) Object to a Finite Verb :--

They expect to succeed (=success.) A good man does not fear to die (=death.)

(c.) Complement to a verb of Incomplete Predication.

He was considered to be the best in the class.

They declared him to be a wise man.

I can go; I should go; I may go; I might go; &c.

6. The Gerundial Infinitive is used after a verb, a noun, or an adjective, and usually in the sense of purpose.

(a,) After a verb:

He came to see (= for the purpose of seeing) the sport.

The book was sent to be given (= for the purpose of being given)
as a prise.

(b.) After a noun :-

Give him a book to read.

Here "to drink" qualifies the noun "water" as an adjective would do, by showing the purpose for which the water will be used, and hence the kind of water. "To read" qualifies the noun "book" in the same kind of way.

(c.) After an Adjective :-

He is quick to hear, and slow to speak.

"Quick" in what respect or for what purpose? . To hear.

"Slow" in what respect or for what purpose? To speak.

Note.—The Gerundial Infinitive, when it comes after a Verb or after an Adjective, is sometimes used in the sense of cause or reason, and not always in the sense of purpose:—

He wept to are that shocking sight.

I was sorry to hear such bad nows.

"Wept" from what cause? at seeing that shocking sight.

"Sorry" for what reason ? at hearing such bad news.

 Infinitive with am and have. The Infinitive Mood is used in a peculiar way after the verbs to be or to have.

(1.) I am to do this -it is settled that I shall do this.

I was to do this —it was settled that I shall do this.

I was to have done this —it was settled that I should do this (but something prevented me.)

If 1 were to do this = if I should do this, (but I do not say that I will.) I should be rather imprudent.

(2.) I have to do this = it is my duty to do this.

I had to do this = it was my duty to do this, (and I did it.)

 There are two more uses of the Infinitive, which are rather common:—

(a.) (For the sake of bringing in a Parenthesis, that is, a phrase inserted into the middle of a sentence for explaining something or for introducing something new and unexpected:—

I am,—to tell you the truth,—quite tired of this work.

They were thunderstruck,—so to speak,—on hearing this

Note,—In all such cases, the Infinitive is absolute; that is, it stands by itself, and is not connected grammatically, with any other word in the sentence. This must be parsed as the Germa-

dial, and not as the Simple Infinitive, since it conveys, however imperfectly, the idea of purpose.

(b.) As a form of exclamation.

To think that he shall have told so many lies!

Foolish fellow! to suppose that such conduct would be allowed!

Note,—Here, as in the previous example, the Infinitive is absolute. This must be parsed as the Simple Infinitive. Here it is more like a Noun, and conveys no idea of purpose.

Messrs. Rowe and Webb, (in Hints, p. 113, Ed. 1887) add another kind of instance, (which they call Interrogation.) where, as they represent, the Infinitive is used absolutely; but I think they are mistaken. Their examples are:—

Why dream and wait for him longer?-Longfellow.

Come, loiterer, come ; a Douglas thou,

And shun to wreath the victor's brow ?-Scott,

Thou wear a lion's hide? —Shakspeare.

In all of these examples some auxiliary verb, (as might be expected in a rapid or exclamatory sentence.) has been omitted.

expected in a rapid or exclamatory sentence,) has been omitted.
"Why does thou dream and wait"? "Art thou a Douglas, and
dost thou shun, de." "Does or const thou wear a lion's
hide"?

Lie weith clear I Abid. Ab.A. Ab. Physical Becomes "these"

It is quite clear, I think, that the Personal Pronoun "thou" in the above examples must be the subject to some Finite Verb expressed or understood. If we understand some auxiliary Verb, such as "deet" or "cansh," then the verb following is an ordinary case of the Infinitive Mood with the "to" left out, as has been explained already in para. 3, (b.)

§ 7 .- PARTICIPLES OR VERBAL ADJECTIVES.

1. (A Participle is so called, because it is partly a verb and partly an adjective

This double meaning of Participle is very well described by calling it a "Verbal Adjective"; for a participle is not one part of speech, but two combined, a verb and adjective in one.

2. \The forms of the different Participles are as shown below:+ Transitive Verbs.

Active Voice. Passive Voice. Being loved. Present or Continuous Loving ... (Wanting) Loved. ... Having loved Having been loved. Intransitive Verbs. Present or continuous ... Fading. ... Faded. Past

3. A Participle has two main uses :-

- (1.) As part of a Finite Verb.
 (2.) As an Adjective qualifying some noun.

... Having faded.

L-As part of a Finite Vorb.

4. The student will have seen already that many of the tenses of english verbs are formed with the help of the Past or Present Participle.)

Thus all the tenses of the Passive Voice are formed out of the verb " to be" followed by the Past Participle; as) " I am loved ;" "I was loved"; "I shall be loved."

Again all the Continuous Tenses in the Active Voice are formed out of the verb "to be" followed by the Present Participle ; as, "I am loving"; "I was loving"; "I shall be loving."

Again, the Perfect Tenses in the Active Voice are formed out of the verb "to have " followed by the Past Participle; as " I have loved," "I had loved," "I shall have loved,"

5. (Absolute use of Participles. A participle can be used absolutely with a noun or pronoun in the Nominative Case going before it. A noun or pronoun so used is called the Nominative Absolute. (The word "absolute" means "free, standing alone, not dependent on any other word.")

- (1.) He having declared his Wish, the company want away.
- (2.) The town having been taken, the inhabitants fied. (3.) The dawn appearing, all the people rose up.
- (4.) I being sick, the doctor was sent for at once.
- (5.) This being done, they sat down and rested.

In this construction, the Participle is not an adjective qualifying the noun that goes before. It has the force (not the form) of a Finite Verb rather than that of an adjective, because it makes a statement concerning its noun, as a Finite Verb does concerning its Subject.

If we substitute a Finite Verb for the Participle, and put some conjunction before the noun, the above sentences would be written thus :-

- (1.) When he had declared his wish, (= he having declared his wish,) the company went away.
- (2.) As soon as the town was taken, (= the town having been taken.) the inhabitants fled.
- (3.) When the dawn appeared (= the dawn appearing.) all the people rose up.
- (4.) Because I was sick (= I being sick,) the doctor was sent for at once.
- (5.) As soon as this was done (= this being done.) they sat down and rested.
- 6. Impersonal Absolute. Sometimes the noun or pronoun, (which should be placed in the Nominative Absolute before the Absolute Participle,) is left out or understood.

The Participle in such cases is said to be used impersonally, because it may relate to any and every person, and not to any one person or persons in particular.

Supposing this to be true, what follows? Judging from the clouds, it will rain to-day.

Speaking plainly, that was a serious fault.

Granting that he is guilty, he must be punished. Assuming that he will come, what shall we say to him?

In the place of each of the above participles, some Finite Verb with some noun or pronoun could be substituted with the help of a conjunction. Thus:—

Supposing, = if I, you, he, &c., or anyone supposes. Judging, = if, you, he, &c., or anyone judges.

Substitute a Finite Verb with a conjunction in the place of the Absolute Participles noted below:—

> The fog kring wery dense, we could not proceed on our journeys. The real cultril the army confessed his crime, the other manwar released and deckred innocent. The men bring ready to start, we left four tents. Judging from what, you say, the case will be lost. St. Paul presched at Rome, no man forbidding him. Assuming that the reports it such, there is nothing more to be done. He and his friend harring put their funds together, the bushness will certainly promote.

II .- AS AN ADJECTIVE.

7. \ An adjective, as you will remember, is a word used to qualify a noun or pronoun.

A Participle (or Verbal Adjective) does the very same thing; as, a "fading flower," a "faded flower." Here "fading" or "faded" are participles of the verb "fade," and they qualify the noun flower.

Point out the noun or pronoun qualified by the participle (or Verbal Adjective) in each of the following sentences.

Big trate of work, the men went back to their houses. The returned soldier was received gaidly by his passumis. Heeting bers werned of the danger, I stayed there no longer. Grazing on the fresh grass, the lambs soon became strong. A fighting horse gives much trouble to his master. Heetings soid all that I desired to say, I wished him good morning. She has a viriality mills. Where tild you find that budding rose? A cleared from top to both healthy. The house, sheeing breatered from the best of the same and only the stately. The treach day across the road less the water time of. Whata emprising feet.

8. A Participle or Verbal Adjective can, like ordinary

The man was picked up in an almost dying state.

Having died suddenly, he was not able to express his last
wishes.

Here almost qualifies "dying," and suddenly qualifies "having died."

9. (A Participle or Verbal Adjective can, like ordinary adjectives, have three degrees of comparison, and these are formed by more and most; las, "this flower is more fadded than that." "That song is the most pleasing that I have ever heard."

Here more gives the Comparative Degree of the Past Participle "faded," and most gives the Superlative Degree of the Present Participle "pleasing."

10. Since a Participle is a verb as well as an adjective, it can govern an object like ordinary Transitive Verbs in the Active Voice; as, "Having finished his work, he went home.":

Here "work" is the object after the Transitive Verb "to finish."

Point out the object after all the Participles in the following sentences, and show which objects are Direct and which are Indirect:—

Having been asked a loan, he refused to give it. The ploughman returned home in the evening, treating ble ground with weary steps. Having give me the price which I earned, the master praised my industry. The oxen moved slowly over the ground, dragging the plough behind them. That boy there, painting spicture, is my brother. He hears his daughter singlag a new song. My wife, expecting me to return, did not leave the house.

- 11. Past Participle. (The use of such participles depends upon whether the verb is Transitive or Intransitive.)
- (a.) (If the verb is Transitive, the Past Participle is never used in the Active Voice, but only in the Passive:—)

This was a man beloved by all. The besieged city fell at last.

A man of sorrows and acquainted with grief. This much-praised man proved to be a reque-Gold is a metal dug out of the earth. He trod upon a broken reed. (b.) (If the verb is Intransitive, the Past Participle is always placed before the noun which it qualifies, and never after it:

The faded rose. A failed * candidate. A retired officer. The returned soldier. The dead horse. The fallen city. The rises sun. A withered flower.

His withered cheek and tresses gray.

Departed spirits of the mighty dead.

If the speaker or writer desires to place the Past Participle

after its noun, he must insert the Relative Pronoun and change the participle into a Finite Verb; as,

The horse of Mr. A., proceeded to England, is for sale, (This is wrong. The sentence should be;—"the horse of Mr. A., who has proceeded to England, is for sale.")

Correct the following :-

There is now no scent in the rose faded this morning. Lamps are lighted from oil rises out of the earth.

This was the sword of the soldier returned to his country.

I am sorry for the candidate failed in the last examination.

But the Past Participle of an Intransitive Verb is sometimes put after its noun in poetry. This, however, should never be done in prose.

A Daniel cone to judgment.

-Shakspeare.

[•] In Hints on the Siudy of English by Rowe and Webb, such an expression as "failed candidate" is said to be "incorrect" and "not idiomatic English." So space 226, Ed. 1887. I think, however, that it is quite idiomatic as well as grammatically correct, since it is strictly analogous to such phrases as "a deed borse," "a faded flower," the accuracy of which is surely unquestionable. "Failed" is here the Past Participle of the Intransitive verb "fail," and is convectly and idiomatically placed before its noun, as the Past Participle of many other Intransitive verbs can be in English. A "failed candidate" is a correct equivalent to "a candidate who has failed. Similarly "a possed candidate" can stand for "a candidate who he passed."

Mourn for the brave—the brave that are no more, All sunk beneath the wave, hard by their native shore,

For he's your granded come at last, -Comper.

To leave us now no more.

-M. Barr.

Even in prose the Past Participle of an Intransitive Verb is sometimes, but very rarely, placed after its noun:—

In times past=in times which have passed. In days long gone=which have gone long ago.

He is a man descended from a high family.

These are very exceptional cases and should not be

These are very exceptional cases and should not be imitated.

12. The Past Participle of Verbs is sometimes used.

to express some permanent habit, state, or character :-

A well read man—a man who has read much and read well.

A well behaved man—a man whose habitual behaviour is good.

An out-spoken man—a man who habitually speaks out his mind.

A retired man—a man who makes a habit of retiring from
public notice, a man of a retiring disposition.

(From this use of the Past Participle has arisen a large class of Adjectives, which are formed from nouns by adding ed to the end of the noun.) Such adjectives are formed exactly on the same pattern as Past Participles, and are used in the same way to express habit, state, or character .—

An ovil-levit-ed man. A hot-hend-ed man. A iznd-ed proprietor. A long-tail-ed ap. A smooth-shin-ned cat. His satistical mother. A rad-color-ed rose, A rough-face-d youth A hoed-ed make. A long-layed spider. A purple-orse-d helmet. A many-page-d book. A long-arm-ed monkey. A thickly-wood-ed hill. A noble-insid-ed man. A warm-blooded animal. A high-sadl-ed city. A quick-spit-ed man. A wing-ed messanger. A swift-fact-ed horse. A broad-broke-de elephant. A single-day-god boat. A double-barrel-ied gun. A stringed instrument. A sharp-edge-d knib.

13. Present and Perfect Participles. These participles must be parsed as Verbal Adjectives qualifying the noun, to which they belong. But there is often some meaning implied in them, which could not be conveyed by a mere adjective.

The meanings implied in such participles are (a) Time, (b) Cause or Beason, (c) Condition.

(a.) Time.

Walking along the street, (==tohile 1 was walking,) I met a friend.

friend.

Having met my friend, (==after I had met my friend,) I went back with him to his house.

The enemy, having been driven (-after they had been driven) from their fort, fied away in a panic.

(b.) Cause or Reason.

Being tired with the toil (=breausr he was tired,) he sat down to rest.

Having been lazy (=breausr he was lazy) all the year, he was

not promoted to a higher class.

The letter, having brown addressed (-because it was addressed) to the wrong house, never reached me.

(c.) Condition.

 Turning to the left, (=-if you turn to the left,) you will find the place you want.

He thought that, having enquired into everything, (-if he enquired into everything,) he would get at the facts.

14. Participles used as Nouns. In Chapter III. § 6.

para. 5, (q) it was shown that adjectives can be used as nouns, by leaving out the noun, and putting the adjective into the Plural Number; as valuables = valuable things.

Since a Participle is a Verbal Adjective, participles too can sometimes (but not often) be used as nouns, by leaving out the noun and putting the participle into the plural number; as,

By-genera-by-gene things. "Let by-genes be by-genes;" (let past grivenances be forgiven and forgestion). Birdonjings-withings belonging. "He went away with all his belongings" ("with all the takings belonging to him.) Surroundings withings surrounding. "His surroundings (esthe things surrounding him have always been pleasant."

15. Participles can also be used as common nonns, when they are preceded by the, and when person or persons is understood. (See above Chapter III, § 6, para. 5, (d.)

The conqueror spared the living and the dying, and buried the dead.

This is the first begotten of my sons.

The king is the Lord's anointed.

-Old Testament.

The deceased was only 24 years old.

He came to seek and to save the wandering and the lost Heaven is the home of the blessed; so we need not mourn for the departed.

§ 8.—GERUNDS OR VERBAL NOUNS.

 I THE Gerund of a Transitive Verb has four forms, two for the Active Voice, and two for the Passive.)

Active. Passive.

L Perfect Having loved. Having been loved.

The Gerund of an Intransitive Verb has only two forms,

since such verbs have no Passive voice)

Present or Continuous, Fading. Perfect, Having faded.

2. Now if you refer to the previous section, para. 2, you will see that the forms of the Gerund are precisely

the same as those of the Participle.

Is a Gerund, then, the same thing as a Participle?

By no means.)

(A Gerund is a Verbal Noun; a Participle is a Verbal

Adjective; and so the two must never be confounded.)

Another proof of the difference lies in this fact. In Old English the forms of the Verbal Adjective and Verbal Noun ware quite distinct,

1. Verbal Adjective ... Writende.
2. Verbal Noun ... Writung.

In later English the two suffixes, ende and ung, both gradually took the forms of ing, and hence we have now only one form instead of two for the two parts of speech.

1. Verbal Adjective ... Writing.
2. Verbal Noun ... Writing.

N. B.—In some grammars the Verbal Noun is called a Participial Noun.

But the name Participial noun is unsuitable, because it is apt to mislead the student into supposing that the Verbal Noun is a kind of participle.

 (Since a Gerund is a kind of noun, it must be the subject to some verb (Transitive or Intransitive); or the object to some verb (Transitive); or the complement to some verb (Intransitive); or the object to some Preposition; as,

Subject to a verb. Sleeping is necessary to life.
Object to a verb. He enjoyed sleeping in the open six.
Complement to a verb, His almost constant habit was sleeping.
Object to a preposition. He was fond of sleeping.

It is clear that "sleeping" in each of the above examples, is not a Participle, or Vorbal Adjective, since it does not qualify a noun or pronoun. "A sleeping cat"; here "sleeping" is a participle or verbal adjective qualifying the word cat. "He was fond of sleeping"; here "sleeping" is a Verbal Noun denoting a certain state or action.

In the following sentences say whether the words noted below are Verbal Nouns or Verbal Adjectives ;--

The rice will grow well in the rowing rains. We heard of the reasing back to-day. Did you have or the hearing one a prince The boy herring grow a prince The boy herring grow a prince Wan much preside. She was found of bring admired. Bring admired by all the was much pleased. The cow herray been killed by a tiger yeasterday could not be found. The boy was enabaned of hearing been better in class by his sister. I am titted of doing this work. Design this work every day you will some improve. Gegling is more difficult than veriting. He was in the habit of looseting of his will be the second the same form of the second the second proposed to the second to

4. A Verbal Noun is a double part of speech, like a Verbal Adjective. 'It is both a Verb and a Noun,—not a verb only, nor a noun only, but both combined.'

Taking it first as a noun, to what class of noun does it belong?

It belongs always to the class of Abstract Noun. and may denote either some state or some action :-

- . State. Sleeping is good for health.
- Action. Walking is good for health.
- 5. (A Verbal Noun can be expressed by the same verb in the Infinitive Mood : as J
 - Strping is good for health = To shrp is good for health. Walking is good for health = To malk is good for health,

But there is this difference :- you can put a preposition before a Verbal Noun; but you cannot put one before an Infinitive Mood :--)

"I am fond of wilking." You cannot say " I am fond of to walk."

Another difference is this. You can put an adjective before a Verbal Noun, for the sake of qualifying it. But if you use the Infinitive Mood and desire to qualify it in the same way, you must change the adjective into an adverb :-)

- (Adjectice.) Sound sleeping is good for health. (Adverb.) To sleep soundly is good for health.
- 6. A Verbal Noun (as you have learnt already) is not only a noun, but also a verb.)

Taking it as a verb, you will find that if the verb is Transitive, it governs an object in precisely the same way as any mood or tense of the same verb can do :--)

- (I am certain of seeing kim to-day.) He repented of having struck the horse,
- I am fond of reading this book.
- He was pleased at having won a prize, The horse is in the habit of pawing the ground.

In all those sentences the verb contained in the Verhal Noun has an object after it. Thus " seeing " is (1) a noun after the preposition of, and (2) it is a verb governing the object him. Again " having struc't" is (1) a noun after the preposition of, and (2) it is a verb governing the object horse.

7. (A noun or pronoun coming before a Verbal Noun must be in the Possessive Case:--/

I was pleased at his coming to-day.

(It would be wrong to say, "I was pleased at him coming to-day.)

He was displeased at the barber's not coming.

(It would be wrong to say, " he was displeased at the harber not coming.)

It is a common mistake of Indian students to say:...'A ask your furour of doing this." This is not in correct idiom. The mentence should be:..."I ask the favour of your doing this."

Correct the mistakes in the following Sentences:--

We were surprised at him going away so soon.

I request your favour of hearing what I have to say.

We are pleased at your prespect of returning soon.

We rely on him coming back in a week's time. Lam vexed at the carponter having done such bad work,

that the Possevice form of a noun is limited to nouns which signify perrons or living animate y(see above Chapter II., § 3, para. 6.) Hence we cannot say "I depend upon the wall" being built at once? But we must say "I depend upon the wall being built at once?

8. Sometimes the letter a is placed before a Verbal

This set him a thinking., The man has gone a hunting.

Let us go a fisking.

Here the n is a corruption or abbreviation of the proposition on.

§ 9.—THE CONJUGATION OF VERUS.

- / I. 'To "conjugate" a verb is to show its chief parts.)
- 2. The chief parts of a verb in English are the Present Teuse, the Past Tense, and the Past Participle; all the other parts, Active and Passive, can be easily formed from these three!
 - 3. There are two main kinds of Conjugation-
 - 1. The Strong or older kind, (now much less numerous than it once was,) which forms the past terro-

by changing the inside vowel of the present; as, rise, rose

3 & S. the Weak or new kind, (now much more numerous than the Strong,) which forms the past tense by adding ed or d or t to the present without any change of the inside vowel; as, love, loved.\

Besides these there is a third kind, which may be called 1 4 Mixed, being partly Weak and partly Strong.

1 .- THE STRONG OR OLDER CONJUGATION.

1 4. The Strong Verbs are conjugated by internal changes, the nature of which is too various to be reduced to a single rule

The most general process consists in (1) changing the inside vowel for the Past Tense, and (2) adding en, n, or ne for the Past Participle.

5. Formerly all verbs of the Strong Conjugation formed the Past Participle by adding on, n, or ne; but many of them have now laid aside this suffix.

Hence the Strong Verbs, as they now exist, fall into two main groups:---

(1.) These which have retained \ the en, n, or ne, in the (2.) Those which have lost | Past Participle.

GROTTP T.

Seethe	••	***	seethed			* solden, seethel.
Shave		***	shaved	***		shaven.
Shear	***	***	sheared	***		shorn.
Sow	***	•••	sowed		***	sown.
Swell		***	awelled	•••	***	swollen.
Show			showed			shown.
New	***	***	sewed	***	***	sewn.
Rot		***	rotted	***		rotten, rotted.
Strew	***	***	strewed			atrewn, or strown
Prove			proved		***	† proven, proved
Naw		***	sawed			sawa.
Shape			*haped			† shapen, shaped
Writhe			writhed			† writhen, writhe I.

Note 1.—The participles marked * "are now chiefly used as Verbal Adjectives, and not as parts of some Tense:—

reront angerette.	rate of some 1 case.	
A graven image	The image was engraved with letters.	
A molten image	The image was melted with heat.	
A rotten plank	The plank was rotted by water.	
The sadden flash	The flesh was sesthed in hot water.	

Last J. 425 - 425 -

Note 2. -The participles marked † are now seldom seen except in poetry.

3 .- THE WEAR OR NEW CONJUGATION,

All verbs, except those shown in the preceding lists belong to the Weak or New Conjugation.

Hence verbs of the Weak or New Conjugation are much more numerous than those of the Strong; and the tendency in English is to discard the old formation in favor of the new.

8. In the Weak Conjugation there is no changing of the inside vowel for the Past Tense, and no adding of aron n for the Past Participle. (The only thing to be done for forming the Past Tense and the Past Participle is to add et to the Present Tense.)

But the mode of adding this suffix is not uniform; and the two rules, given below, should be observed:—

)(1.) If the verb ends in ϵ , then d only is added, and not ed; as,

/Live, lived (not liveed.)
Clothe, clothed (not clotheed.)

To this rule there is no exception.

(2.) The final consonant is doubled before ed, provided (a) that the final consonant is single, (b) that it is accented, (c) that it is preceded by a single rowel; as:—

Fan, fanned (not faned); drop dropped (not droped.). Compel, compelled; control, controlled.

¹ But in a verb like lengthen, where the accent is not on the last syllable, the Past Tense is lengthened; in a verblike boil, where the vowel is not single, the Past Tense is boiled; and in a verb like fold, where the last consonant is not single, the Past Tense is folded.

To this rule there is one, and only one, exception; namely, the final l. The final l is doubled, even when it is not accented; as, travel, travelled (not travel-d.) But the final l is not doubled, if it has two rowels going before it; as, fravail, travelied (not travelled).

The sounding or pronouncing of the ed is not uniform; and the Weak Verbs may be sub-divided into three different groups according to the sound of ed.

Group I, in which the ed is sounded as ed, that is, as a distinct syllable.

Group II, in which the ed is sounded simply as d, and is not a distinct syllable.

Group III, in which the ed is sounded (and sometimeseven spelt) as t, and is not a distinct syllable.

To these three groups a fourth must be added, in which the ed is cut out, and consequently has no sound at all.

GROUP I.

10. Here the ed is sounded as ed; as, end, ended; lift lifted.

! All verbs of this group end in d, de, t, or te; and when you add ed or d to any such verbs, you find it impossible to sound the suffix in any other way than as a distinct syllable,—ed.

- (a.) Give the Peat Treas and the Peat Participle of the following crits ach, party grant, fold, heat, cede, trade, adopt, adapt, float, mount, post, paint, shunt, sid, compete, mend, found, bound, suspect, protects, recent, insert, concect, infect, infect, collect, connect, intend, ascend, blend, blind, hunt, blind, stunt, point, relear, recort, twist, called, proceed, precede, retract, molt, yield, sport, prevent, convert, blest, conduct, lifet, about, schoot, tappert, inpart, request, corrupt, convict, sanist, assert, invent, contract, surpend, exert, short, hoist, jeen, adjust, halt.
- (b.) Give the Past Tense and Past Participle of:—pat, blot, fit, squat, quit, plot, plod, nod, trot, allot, strut, chat, pet, not, mat, knot, whet, wet, fret, rot, spot, knit.

Explain why the final consonant is doubled before cd in examples (b) and why it is not doubled in examples (a)

GROUP II.

- \Here the ed is not sounded as ed, but as d; and so a new syllable is not added to the verb; as, drag, dragged =dragd; call, called = calld.
- (a.) All verbs ending in a soft or flat consonant (b, g, v, v, th, z, and se sounded as z,) and all verbs ending in the vowel s preceded by any of these consonants, belong to this group.
 - Gius the Past Trans and Past Participile of:—grab, rob, rub, tug; hang (Transitive,) fare, shudder, stir, save, curve, relieve, judge, rage, wedge, clothe, seite, squeeze, praise, please, rouse, cause, use, cleave (in the sense of stick.)

 Recognizand errôs:—have, had: hear, heard.

Other exceptional verbs: --bereave, bereft (not bereaved); leave, left (not leaved); cleave (in the sense of spiit,) cleft, (not cleaved); lose, lost, (not leaved).

- (b.) Most verbs, not all, ending in l, m, or n, belong to this group.
 - Spril the Past Tens as 3 Past Participle of :-All, kill, beil, call, roll, twinkle, condemn, spurn, drown, hen, pen, toil, sail, fail, had, travail, troil, complain, refrain, absain, stream, wean, shorten, lengthen, darken, thicken, blacken fashloe, threaten, fasten, gladdon, plan, tan, din, appal, control, compp., travel, trammel.
- (c.) All verbs ending in double vowels, or in silent gh preceded by a double vowel, belong to this group.)
 - file the Past Trase and Past Participle of:—play, pray, obey, prey, neigh, enjoy, awe, guaw, convey, betray, plough, low, bellow, follow, stew, stray, weigh, claw.

Exceptional verbs: +die, died, dead; shoe, shod, shod; flee, iled, fled/
Four verbs of this group spell the Past Tense and Past Parti-

- ciple in a peculiar way :--say, said, (not sayed); lay, laid, (not layed); pay, paid, (not payed.))
- (d.) Verbs ending simply in y change the y into i, when et is added; as, try, tried; dry, dried; marry, married.)

GROUP III.

- Here the "ed" is not sounded as ed but as t; and so a new syllable is not added to the verb; as drop, dropped = dropt.
- (c.) All verbs ending in a hard or sharp consonant, (r, ph and yh=f, k, p, s, ω, ch, sh,) or in the vowel s preceded by any of these, belong to this group.
 - Girc Int Pont Team and Pont Participle of --stuff, quaff, laugh, triumph, look, aach, block, stamp, aven, book, boo, guess, entice, mix, saatch, touch, quench, lash, wish, roof, chafe, pock, peck, pick, plack, rack, stake, like, joke, joke, ansak, reck, look, lark, work, streak, wreck, walk, talk, stroke, poke, yoke, shock, knoch, lick, rook, limp, jump, romp, thouse, bump, stump, step, stripe, wipe, shape, grasp, help, lay, stop, stoop, whip, ally drip, dip, drop, mop, press, same, goneses, kine, blac tous, grace, face, lace, loose, purplex, titch, sitch, soutch, block, later, meach, black, wrench, tetch, sitch, such, shock, block, later, meach, black, wrench, tetch, sitch, such, block, later, meach, black, wrench, quash, orange, crash.

Point out all the verbs in the above list, in which the final consomant is doubled before ed.

Ecceptional verbs :- make, made, made.

(b.) Some verbs of this class shorten the vowel in the Past Tense and spell the ed as t;

Present Tense.		Past Te	nse.	Past Participa		
Creep.	***	crept			crept.	
Sleep		alept	***		slept.	
Sweep		swept	114	***	swept.	
Keep		kept			kept.	
Weep		Went			went.	

(a) Some verbs ending in l, m, or n shorten the vowel, in the past tense and past participle, and change the ed into t:—

Present	Tense.	Part Ter	186.	Pa	ast Participle.
Burn		burnt	***	***	burnt.
Deal		dealt	***		dealt.
Dream	1	dreamt	(or dres	med)	dreamt (or dreamed.)
Dwell		dwelt	****	***	dwelt.
Feel		felt	·		felt.
Kneel		knelt	***	***	knelt.
Smell	***	amelt	***	***	amelt.
Spell	***	spelt			spelt.
Lean		leant (e	or leaned	i)	leant (or leaned.)
Mean	***	meant	***	***	meant.
Spill		spilt	***	***	spilt.
Spail		apoilt (or spoile	eđ)	spoilt (or spoiled.)

GROUP IV.

This group consists of verbs, which have discarded the ed altogether.

All the verbs in this group end in d or t in the Present; and this is why they have discarded the ed in the Past.

Past Participle.

(4.) Some verbs in this group have the three forms (Present Tense, Past Tense, and Past Participle) all exactly alike :-

Present Tense. Past Tense.

Burst	•	***	burst		***	burst.
Cast			cust	***		cast.
Cost			cost	***	***	Cost.
Cut			cut	***		out.
Hit	•	`	hit-		***	hit.
Hart			horse			boot.

1 P	esent Tense		Past Te	use.		Pust Participle.
17.	Let		let		***	let.
	Put	***	put	***	•••	put.
	Rid		rid	***		rid.
	Set		set			set.
	Shed	***	shed			shed.
	Shred	•••	shred	***		shred.
	Shut		shut	***		shut.
	Slit	***	slit	***		slit.
	Spit	***	spit or s	pat	~+	spit.
	Split		split	***		split.
	Spread	***	spread	***	***	spread.
	Sweat	***	sweat	***	***	aweat.
	Thrust		thrust	***	***	thrust.
	(Bet	***	bet or t			bet or betted,
Two	Quit		quit or		***	quit or quitted.
forms.	Wed		wed or		***	wed or wedded.
	Knit		knit or	knitted		knit or knitted.

(b.) Other verbe in this group end in d in the Present Tense, but form the Past Tense and Past Participle by changing d into t. (There are nine such verbs in English.)

Present Tense. Part Tense. Past Participle. Bend .. bent ... bent. Build ... built ... built. Gild ... gilt gilt. Gird ... girt ... girt. Lend ... lent ... lent. Rend ... rent ... rent. Send ... sent. ... sent Spend ... spent ... spent. Wend ... went ... wanting.

(c.) Other verbs of this group have the three forms all alike except that they shorten the vowel in the Past Tense and Past Participle:

Present Tense. Past Tense.

Past Participle

Bleed	***	bled	***		· bled.	
Breed	***	bred	***		bred.	
Feed		fed			fed.	
Speed		sped	***		sped.	
Meet		met			met.	
Lead		led	***	***	led.	
Read		read			read.	
Light	***	lit, lig			lit, lighted.	
Shoot		shot			shot.	

§ 10.—AUXILIARY AND DEFECTIVE VERBS.

THOSE verbs are said to be Auxiliary, which help other verbs to form their tenses and moods or to express some special shade of meaning.

Those verbs are said to be Defective, which are deficient or wanting in some of their parts; that is, have not the full number of moods or tenses.

The same verb is often both Auxiliary and Defective, as will be seen from the following:—

1.-BE.

programme programme and progra	Singular.				Plural		
Present. { Indic. Subjunc. Past. { Indic. Subjunc.	am be was were	2 art be wast wart	3 is be was were	1		8.	

	Infln.	Imperative.	Pres. Part.	Perject Part.
•	To be	be	being	having been.

This verb is used in three different senses :-

(a.) In the sense of mere existence:

. There are many men, who, &c., = Many menexist who, &c.

(b.) As an Intransitive Verb of Incomplete Predication. (See § 1, para. 13):—

A horse is a four-legged animal, This coat was of many colors.

(c.) As an Auxiliary Verb :--

All the tenses in Passive Verbeand all the Continuous Tenses in Active ones are formed by the help of the verb to be.

2.--HAVE.

		Phural.		
Present. { Indic. Subjunc. Indic. Subjunc.	I have have had had	2 hast have hadst hadst	has have had had	1. 2, 3 have. have. had. had.

Isfin.	Imper.	Pres. Part.	Perfect Part.
To have	have	having	having had.

This verb is used in two different senses :--

- (a.) As a Transitive Verb, denoting possession. In this sense it is declined regularly in all its moods and tenses:—
 - We have (=we possess) 4 cows and 20 sheep.

 (b.) As an Auxiliary Verb:—
 - All the Perfect Tenses, in all the Moods, Active and Passive, are formed by the help of this yerb.

8.-SHALL

		Singular.		
Pres. Part.	shall should	2 shalt shouldst	3 shall should	1 2 8 shall, should.

There are no other tenses, and there is no Infinitive Mocd to this verb. It is used in three different senses:—

- (a.) As an Auxiliary Verb, in a merely Future sense:— The first person of the Future Indicative is formed by *hall, and any person of the Subjunctive can be formed by *hould; as "I shall go," "if he should go." (See § 4, parts. 13, (a). and § 6.)
- (b.) As an Auxiliary Verb, in the sense of command:— In the second and third persons of the Future Indicative shall implies a command, as "thou shall not steal." (See above § 4, pars. 13, (b.)

(c.) As an Auxiliary Verb, in the sense of duty :--

"Should," and not "shall," is used in the sense of duty. (See above \$ 5, para 8.)

Present 1 should do (=it is my duty to) do this.

Past I should have done this, (it was my duty to do this, but I neglected to do it.)

4 -- WILL.

		Singular.		
	1	2 .	3.	1 2 3.
Present Past.	will would willed	wilt wouldst willedst	will would willed	will. would. willed,
Turke	Tomposition	Descent Day		wfoot Bout

Infin_	Imporative.	Present Part.	Perfect Part.
To will		willing	having willed,

This verb is used in several different senses :---

(a) As an Auxiliary Vorb in a merely Future sense.

The second and third persons of the Future Indicative are formed by will; and any person of the Subjuntive can be

formed by would, (See above § 4, para, 13 (a.), and § 6, para, 6.)

(a.) As an Auxiliary Verb in the sense of *intend*; see above § 4, para. 13 (c.)

I will not steal = I do not intend to steal.

To will is present with me; but what I will (-wish or intend to do) I do not, and what I will not, that I do.

—Are Tretement.

(c.) As an Auxiliary Verb secould is used in the sense of habit. In this sense it must be parsed as a Past Indicative; for it has no connection in this sense with the Subjunctive Mood. (See above § 5, pars. 9.)

He would come (=was in the babit of coming) every day.

(d.) As an Independent Transitive Verb in the sense of leaving property by a written document or "will." In this sense the Past Tense is willed, and not would.

He wilked (-decided by his written will or testament,) that all his property should go to his daughter.

5.--DO.

 		Singular.		Plural.
	1	2	8.	1 2 3.
Present.	do	dost	does	do,
Pust.	did	didst	did	did.
			1001 1000 1	

Infinitive.	Imperative.	Present Part,	Perfect Part.
To do	do	doing.	having done.

This verb is used in two different senses,

(a.) As an Independent Transitive Verb in the sense of "perform." In this sense it is declined regularly in all its moods and tenses:—

It will be a year, before you can do this.

I am now doing what you have done already.

(b.) As an Auxiliary Verb, declined only in the Present and Past Tenses:—

> Do and did are used as auxiliaries to the Present and Part Tenses, Indicative, of other verbs for the sake of emphasis, for the sake of naing a negative, and for the sake of asking a question:—(See examples given in § 3, pars. 10.)

> Do is also used in colloquial English to give force to the Imperative Mood in an affirmative sense. (See § 4, para. 4.) Do is always used, when the Imperative is preceded by "nd"; as, "Do not steal."

6.-WAV

	1	Singular.		Plural.
Present.	1 may might	mayest mightest	3. may might	123 may. might.

This verb is used in three different senses :-- .

- (a.) In the sense of permission:-
- You may leave (-sere permitted to leave) the room.
- (b) In the sense of possibility:— I might (=I could) do it, if I tried.

The rains may yet come (-perhaps the rains will yet come)

May be (= it may be, or perhaps) you will succeed after all.

(c) In the sense of a wish :-
Noy heaven (- I pray or wish that heaven will) protect thee.

7.-CAN.

		Singular		Plural.
Pi ww. Past.	1 Can Could	2 canst couldst	3 can could	1 2 3 Can. could.

This verb is used in two different senses :-

- (a) In the sense of permission:—
 You 4/8 (-are permitted to) go or not, as you like.
- (b) In the sense of power or ability:-
 He cannot (is unable to) run as fast as you.

 We could (sin able to) do this, if he tried.

Nov.—The rechs my and can are always auxiliary, that it, they never stand alone as Independent verbs. Hence in some grammars they are said to constitute a separate mood, which is called the *Potential*. But nothing is gained by a lding to the means number of moods.

8.-OUGHT.

		Singular.		Pfural,
Princat	1	2	3	123
Past.	Ought	oughtest	eught '	ought

This verb is, in its origin, the Past Tense of the verb one; as, "you ought (secowed) him a thousand pounds," In modern

Raglish the form "ought" is used only in the sense of duty and stands equally for past and present time.

Present. You ought to do this; (and you are expected to do it.)

Part. You ought to have done this; (but you did not do it.)

9.--MUST.

This verb has now no varieties of form.

It is, in its origin, the Past Tense of an old verb motan, "to be obliged," which is now obsolete.

- "Must" now relates, not to past, but to Present or Futuretime, and is used in three different senses :-
 - (a.) In the sense of necessity or compulsion :-
 - We must eat, or we shall die.
 - (b.) In the sense of a very strong intention :-
 - (c.) In the sense of certainty :-

10 .- DARK.

		Bingular,		Plural,
Present.	1 dare	2	3 (dare	128
Fremsk.		darest	dares	dare.
Past.	dared	durst	durst	durst.

Infin.	Imper.	Pres. Part.	Perfect Part.
To dare	dare	daring	having dared.

This verb is used in two senses :---

(a.) As a verb of Incomplete Predication in the sense of having courage; and in this sense the present Singular is "dare," and not "dares":---

He days not (-has not the conrage to) leave the room.

In the same sense "durst" is used for the Past Tense, and not

He durst not (-had not the courage to) leave the room.

The idiom "I dare say" simply means "perhaps."

(b.) As a Transitive Verb in the sense of challenging. When the verb is used in this sense, it is declined regularly in all the smoods and tenses:

He dares me (-challenges me) to fight. He dared me (-challenged me) to my face.

11.—QUOTH.

This Verb is the Past Tense of an old verb, which is now obsolete except in the compound form of be-queath,

It means "says," or "said," and therefore stands equally for Past and Present time. It is used only in the Third Person and only in the Singular Number, It always stands before its Subject. "Let me not live," guest be. —Shakepeare.

12.--NEED.

This is sometimes an Independent Verb, signifying "require," want." As an Independent Verb, it is declined regularly in all its moods and tenses.

Sometimes it is a Dependent or Auxiliary Verb. In this case the Third Person Singular is need, and not needs, just as dare fin the auxiliary sense) is used for dares.

He need not (=is under no necessity to) do any more work.

In such an idiom as "he must needs do this," needs is really a Possessive Case, with the spostrophe before the s omitted. So needs—need's—of need—of neessity—necessarily. Needs has therefore become an Adverb or Adverbial Phrase.

13.-WORTH.

This verb occurs in such a phrase as "wee worth the day," which equals "wee be to the day." The noun day is in the Objective Case,

Worth is here the Third Person, Singular, Subjunctive, of an Obsolete Verb signifying "to be" or "to become."

14.-WIT.

This verb signifies "to know." Only a few of its forms have survived; the rest have become obsolete.

- (a.) The Infinitive form to wit, in the sense of "namely."
 This is much used in legal documents at the present day:—
 - This is much used in legal documents at the present day :-He left me by will all his land, to wit, the three farms.
- (b.) The Present Participle has survived in the negative severbial form of unwittingly, which means "unknowingly" or unintentionally."

You cannot blame him for this, since he did it uncettingly.

(c.) In the Present Indicative it occurs in the form of wot, and in the Past Indicative in the form of wist; but these are almost obsolere.

Present. He wet neither what he babbles nor what he means.

— Tundal.

Past. They wist not what had become of him.

15 .-- BEWARE.

Every part of this verb is now obsolete, except the Imperative and Infinitive Moods.

Imperative. Beware of false prophets. -New Testament. Infinitive. He told them to becare of false prophets.

\$ 11.—IMPERSONAL VERIS.

VLERS are said to be Impersonal, or to be used impersonally, when they take "it" for their subject, and are followed by some Personal Pronoun in the Objective Case:—

It shames we to hear this—I am ashamed to hear this.
It repents me of my felly—I repent of my felly.

If behaves me to do this... I ought to do this.

There are 3 instances in which the it is omitted, and the pronoun in the Objective Case is placed before the verb instead of after it:—

Melistamit seems to me, or it pleases me-

The following phrase is elliptical: --80 please your Majesty. --- Shakspeare.

This means, "If it so please your Majesty;" that is, "if your Majesty so please or so desire."

CHAPTER VI - ADVERBS.

§ 1.—Definition and Classification of Adverses.

1. (An Adverb (according to the definition usually given) qualifies a Verb. an Adjective, or other Adverb : as./ "An almost black snake crept very silently through the 2773.88."

Here almost qualifies the adjective "black"; silently qualifies the verb "crept," and very qualifies the adverb " silently."

- N. R .- Under "Adjectives" we of course include Participles or " Verbal Adjectives."
- 2. But this definition is not sufficient. For an Adverb can qualify Prepositions and Conjunctions, and not merely Verbs, Adjectives, or other Adverbs:-

(a.) Prepositions :-

The bird flew exactly over the sleeper's head. Far from the world, O Lord, I flee. He paid the money quits up to date. This mistake was made entirely through your fault. He was sitting almost outside the door. He arrived long before the time.

The bird flew a little above his head. He found out his mistake long after the event.

He wept partly through sorrow and partly through anger. Right against the eastern gate.

Where the sun begins his state.

__ Millon.

(b.) Conjunctions :-

We stand now exactly where we were. A man is truly happy, only when he is in sound health. I dialike this place, simply because the air is too hot. I wish to know precisely how it happened. They locked the door, shortly before the thieves came. . The watch was found, long after the thieves had been caught. I will do this, only if you promise to do that.

It is evident, therefore, that an Adverb can qualify any part of speech except a Noun or Pronoun.

Note 1 .- When an adverb is placed before a noun, as "the then king," the adverb does not qualify the poun "king," but some participle which is understood, "as the then reigning king." This has been explained already in Chapter III. \$ 2. para, 3,

Note 2 .- Sometimes an adverb is compounded with a noun so as to make a single word. The adverb in such cases does not qualify the noun, as an adjective would do, but is attached to the noun, and a hyphen is placed between them, so as to make a compound word :---

A by-path = a path at one side.

A by-law = a local or minor law.

A through-carriage = a carriage which goes through all the stations without being changed.

A fore-taste = a previous taste. An after-taste = a taste coming after the first one.

The after life = the life coming after the present one.

An after-crop = a second crop.

Fore-thought = a thought perceived beforehand.

An after-thought = a thought perceived after a previous one.

An out-house = a little building apart from a large one. An out-office, out-station, &c.

Note 3 .- In the "Manual of English for Matriculation Candidates," Mr. Sheppard says, (p. 28, Ed. 1890,) that an adverb can qualify a Pronoun; and he gives as his example, " I am, yours truly or truly yours." This appears to me to be wrong. The adverb " truly " in this place does not qualify the pronoun, but the possessive relation, that is, the preposition implied in the Possessive Case of the pronoun, "I am altogether of that opinion," "I am truly yours or of you." Here the adverb in each case qualifies the proposition "of"; it does not qualify either the nown "opinion" or the pronoun "you." " Most men were decidedly against you, but I was entirely and cordially for you." Here the adverb "decidedly" qualifies the preposition "against," and the adverbs "entirely" and "cordially" qualify the preposition "for"; none of them qualifies the pronoun "you." We might put the adjective or participle "opposed" in the place of the preposition "against"; and the sentence would then be, "Most men were decidally opposed to you." In this case the adverb "decidally "qualifies the adjective "opposed," just as in the previous sentence it qualified the preposition "against." Again, we might put "attached to you! in the place of the possessive "yours or of you"; and the sentence would then be, "I am truly attached to you." In this case the adverb "truly." qualifies the adjective or participle "attached," just as in the previous sentence it qualified the possessive relation or the preposition "of" implied in "yours."

Note 4.—The same writer in the same page says that an adverbe can qualify a Noun. Here too be has, I think, fallen into an error. He gives as his example:—"I study only English." Here "only" should be parsed as an adjective, as in the sentence, "He is my only son." Here "only" mesns "one, slone." "He is the one son that I have." "English is the one lannuace that I study."

The fact then remains, that yan adverb cannot qualify a nown or promous just of course, if we put a preposition before the noun or pronoun, or (what is the same thing) put the noun or pronoun into the Possessive Case, the state of things is entirely attered: the adverb then qualifies the preposition or rather the relation implied in the preposition. In fact the noun combined with its preposition becomes "a prepositional phrase," and a prepositional phrase has the same force as an adjective; and an adjective can of course be qualified by an adverb.

- 3, Adverbs can be arranged under seven different heads, according to their meaning.
 - (1.) Adverbs of State, Quality, or Manner,
 - (2.) Adverbs of Quantity or Degree.
 - (3.) Adverbs of Number or Order.
 - (4.) Adverbs of Time.
 - (5.) Adverbs of Place.
 - (6.) Adverbs of Affirming or Denving.

The seventh class consists of Interrogative Adverbs, that is, adverbs used for asking questions about quality, quantity, number, time, &c.

§ 2.-IDIOMATIC USES OF ADVERSE.

Adverbs of State, Quality, or Manner.

 ADVERSS of this class are found by asking in uhat state or of what quality a thing is, or in what manner a thing is done.)

Adverbs of this class are much more numerous than those of any other, and most of them are formed by adding ly to the corresponding adjective:—

He dul it wissly. He dud it so or thus (in this way) We all dud it alike (in the same way) We did it together He spoke sadly. He walks softly He lives prudently.

Adrests of Quantity or Degree.

2. Adverbs of Quantity or Degree are found by asking to what extent or to what degree a thing is done -

He is quiet strong again. He is almost strong again. He is rather sick. He is rary sick. We have tailed risosph. The art is fee hot. We are sinch pleased. We are rather or semesthar pleased. We are not the pleased with pleased and for evect. We are at left pleased. He spoke those words por life in orrow and partly in anger. The lood is far the best. He is Arreftly or cearcify strong set

3. Much, Very :-

(a) "Much" qualifies adjectives or adverbs in the Comparative Degree, "Very" qualifies them in the Positive Degree:—

The sh is much hotter to-day than yesterday. We travelled muck more cheaply than he did,

The air of this place is very pleasant. We travelled quickly, but not very cheaply.

(b) For Qualifying Participles, " much" is more commonly used than " very ":---

I was much surprised at hearing the news. I am much pleased with your industry.

(c) For emphasizing the Superlative Degree of Adjac-

tives "much" and "very" can both be used with the Defimite Article, but the order of the words is not the same.

Much the smallest. The very smallest.

Much the longest. The very longest.

Correct any mistakes in the Adverbs in the following sentences, and show where the mistake lies:---

I am very autonished at what you tell me. He oxplained his meaning much eleverly. Of these two houses yours is the much largest. He is a much industrious student. He has worked very harder than you have done. You are very more industrious than you were lest year. I am much happy at hearing these good news. The air is very hotter to-day than yeatenday.

Not 1,—"Much," besides being an Adverb, is sometimes an Adjective. Whenever it is an Adjective, it qualifies some Material Noun or some Abstract Noun, and this noun is always in the Singular Number. (See above, Chapter III., § 1, para. 6); as, "mach bread," "much labour,"

Note 2.—" Vory" is sometimes used as an Adjective, in the

This is the way man that I wanted to see

He came at that very instant.

Note 3.—" Very" as an Adverb is often used to qualify "much":—

His work is sery much better than yours

Point out the parts of speech of much and rery in the following sentences:-

He was taken very ill on the very day of his arrival.

Much study is a weariness of the flesh.

They found wach gold in Southern India, and the workmen were wuch pleased.

The erry thing you ask for is what all men would be perg glad to have.

Much aun and rain produce a very fine crop.

It is very strange that you should be so week surprised.

4. Too :--

The Adverb " too" denotes some kind of excess. It means "more than enough." It implies that some limit or rule exists for a certain purpose, and that this limit has been exceeded :---

He thinks his pay foo small for his work: (=smaller than it ought to be for the work that he does,)

We must not bathe here; the water is too deep: (-deeper than it should be for us to bathe in.)

The sun to-day is too hot for a midday walk; (-hotter than is suitable for a midday walk)

Note 1.—It is a very common mistake in India to use "too" intested of "ery" in qualifying adjectives or adverts, "Very" simply denotes a high degree of anything; but "too" denotes that the most algoris has been transpressed or exceeded.

Correct the following :--

My son's progress has been too great. Sugar is too sweet. I am no happy to see you again. A ripe mango is too good. He writes foo neatly, and spells too accurately. The milk of a cow is too wholesome. The water of this river is foo pure. The roof of this house is too safe, and it shuts out the rain too well.

Note 2.—"Too," besides being an Adorsh of Quantity denoting excess, is sometimes a Conjunction signifying "alon" As a Conjunction it stands after the word to whosh is belongs; as, "Ho foo (=he also) is fond of work;" "the tiger climbs, and samm too." But observe that whenever it is used as an Adverb, it stands \$6/90 c the word to which it belongs, as in the examples shown above.

Point out the part of speech of too in each of the following

He is too honest to accept a bribe. That eight was too dreadful to be seen bribes and his brother too were industrious students Drinking water cannot be too clean. Water is good to drunk, and milk too is a wholesome drink. Be not too eager for praise; most men are praised and rewarded. for according to their dearer.

5. Enough :-

The meaning of "enough" is the opposite to that of "too." Enough" signifies that the proper limit or amount has been reached; but "too "means" more than enough," that is, that the proper limit has been exceeded.

Whenever "enough" is used as an Adverb, it is placed after the word that it qualifies :-

The air to-day is cold enough for me, (-is as cold as I wish it to be.) Your pay is high enough for your work, (=is as high as it should be for your work.)

sanding we not your work.)
The horses are tired: "we have ridden far enough to-day,
(--as far as is proper for our horses.)
He is now strong rough to leave his bed, (-as strong as he
should be for leaving his bed)

Note .- " Enough." besides being an Adverb of Quantity, can be also an Adjective of Quantity or an Adjective of Number : (See above, Chapter III., § 1, para, 5 and para 11); as, " He had enough bread," (Adjective of Quantity.) " He had enough loaves of bread. (Adjective of Number.)

Observe, that, whenever "enough" is an adjective, it is placed before the word it qualifies, but whenever it is an adverb it is placed after it.

6 Little : a little :-

This is a marked difference in the meanings of those two adverbs, and this difference must be clearly understood.

(a.) "Little" is used in a Negative sense and means " not much": in fact it is a weak form of " not," and is almost purely Negative :-

I little expected that he would succeed so well :

(I did not expect that he would succeed so well.)

(b) " A little" is always used in an Affirmative sense and means "to come extent at least, slightly, somewhat."

He was a little (slightly, somewhat) tired.

Are you tired? Yes; I am a little tired,

Note 1 .- The adverb " a little " has come into use from the habitual omission of some noun that is understood after the adjective "little," Hence "a little" is an adverbial phrase rather than a pure adverb. In the adverbial phrase "a great deal" the noun has been retained; while in the corresponding adverbial phrase " a little " the noun has been dropped.

Note 2 .- Observe that the negative meaning of "little" answers to the negative meaning of " few"; while the affirmatire meaning of "a little" answers to the affirmative meaning of "a few." (See Chap. III, § 1, para, 12.)

Note 3 .- The word "little," besides being an Adurb of Quantity, can be also used as an Adjective of Quantity; as, "he has taken a little food ' and sometimes it is an Adjective of Quality as, ' Little (trifing) things may give us more troublethan great ones' (See Chapter III § 1 para 5)

Point out the Parts of Spee h of lttl in the following sentences— This is a lattle matter about which I wish to speak to you and you will be rot a lttl surprised when you hear it A lattle learning is a dangerous thing I acrive is lttle after 8 oclock this morning Reat a lttle if you may tured

and you will be rot a the suppressed when you near it. A stitle learning is a dangerous thing I arrived a title after 8 oclock this morning Rest a title if you are tired 1 title me are often more, pro ut than great ones. He i title thought I is at I was so near

Adverbs of Number or O der

7 Adverbs of Number of Order are found by asking hou man times or in a lat order athing is done

Most of these adverbs are formed from Numeral Adjec

01 6
v Ai b
Firstly
l Sec n lly
Thur lly
la Fourtily
Tuftl ly

There are a few Aumeral Adverbs in which no par ticular number is specified as in the following examples — He * t * sam le ! He * ldo * amile ! He fton fell at k

He s s sm let He sade smile t He fire let a k He al a /s got well He are come He came aga n He come fr f t He came a or

These might be called Indefinite Numeral Adverbs

Adre ls of Time

9 Adverbs of Time are found by asking when or for

He did the bfr He did it ofterwards He has done that afr aly He did it in gap He was tirn suck. He as we said He came stops He came art as the came art as the came stops. He came at or er He same to day He came got iday. He will come to encress. The will come to morrow. The will come to make it y (come an hotr). He came de ty (come day). He came excessible Hearer is hitcom this tamely we shall not see him.

10. Since :--

This word is sometimes an Adverb of Time, sometimes a Conjunction of Time, and sometimes a Preposition of Time.

The proper use of this word is to Indian students one of the greatest puzzles in the English language; but no difficulty will exist, if the following rules are attended to:-

(a) As an Adverb it signifies from now or from the present time, and its use is limited by three conditions:—(1) It stands offer the word or words which it qualifies; (2) is preceded by a vorb in the Past Indefinite Tense; (3) it is placed after a noun or phrase denoting some period of time, never after a noun denotine some point of time.

My father died two years since (=from now.)

The shool broke up a formight states from now.)

(b) As a Conjunction it signifies from which line, and
its use is limited by three conditions:—(1) it is followed
by a verb in the Past Indefinite Tenns; (2) it is preceded
by a verb in the Present Indefinite or Present Perfect Tonns;
(3) it is preceded by a noun or phrase denoting some
paids of time, nover by a noun denoting a point of
time:—

Two years have passed since my father ded.

1t .. now a week since the school broke up.

(c) As a Preposition it signifies from, and its use is limited by two conditions:—(1) it is placed before a nous or phraso denoting some point of time, never before a nous or phrase denoting a period of time; (2) it is preceded by a verb in the Present Perfect Tense:—

rD in the Tresent Terfect Tense: ---My father have been dead since January, 1892.

The school has broken up sence last Monday.

Now.—Condition (1) is very eften neglected, however, by Indian students:—

Thus, it is incorrect to say :---

My father has been ill since sie weeks.

The proper phrase would be :-

My father has been ill for the last six weeks, or, it is six weeks since my father began to be ill, or my father was taken ill six weeks since. Point out any mistakes you can find in the following sentences, and show how the sentences should be corrected:----

I have not seen you since a long time.

cisely with the rules given above under (b.)

I am ill from fever since last Saturday. Ten months elapsed since we were last examined.

The examination has begun two days since.

My brother was made a judge since last April.

How long was it since you left school?

This boy has been studying English since six years. It is five years since my brother has gone to England,

I have been very happy since you have come.

The phrase "I am seeing you after many days" is very commonly used in India, but it is not idiomatic. It should be worded:—"It is many days (or many days have passed) since I hast saw you." The use of sence in this sentence conforms pre-

11. Ago :--

This is used only as an Adverb of Time,—never as a Conjunction or Preposition. Its use as an adverb coincides exactly with that of "since," as explained above under (a); and it signifies (as "since" also does) from the resent time. The two words are precisely synonymous.

My father died two years ago (=from now.)
The school broke up a fortnight ago (=from now.)

Here observe that the three rules noted above have all been kept:—(1) "ago" stands after the words or word which it qualifies; (2) it is preceded by a verb in the Past Indefinite Tense; (3) it is placed after a phrase denoting a period, and not a point of time.

12. Before :-

This word is used sometimes as an Adverb of Time, sometimes as a Conjunction of Time, and sometimes as a Preposition of Time.

(a.) As an Adverb of Time it signifies formerly, or on a former occasion.

I did this once before, and I will do it again. The post arrives an hour earlier than before.

I never before saw such a dreadful sight.

(b.) As a Conjunction of Time it is followed by a verb in some Past or Present Tense :---

> The crops dried up, before the rains fell or had fallen. The crops will die, before the rains fall or have fallen.

(c.) As a Preposition of Time it is always used withsome noun or phrase denoting a point of time, and never with one denoting a period of time:—

> The rains will fall before the first of next month, You will win a prize before your next birthday. They will all have escaped before that time.

It is quite wrong to use this preposition with a noun or phrase denoting a period of time. Thus it is incorrect to say:— My father died by fore a week.

We left India before three months.

These should be changed to :-

My father died a week ago or a week since.

We left India three months age of three months singe.

Point out the part of speech of before in the following sentences, and correct any mistakes that you can find ;---

> We asw you in good health bifore a year. The grass dried up before a shower of rain feel. Before he came, everything was in bad order. Before three mouths have passed, you will leave India. He won a prize before, and the will will none signin. Before a week passes, he will be quite well. He returned from school before a week. He returned before the end of the month.

13. Already :-

This adverb denotes that something has happened prior to the time mentioned or thought of. It is never correctly used in any other sense:—

Light the fire. It is lighted already.

Joseph's brethron went down into Egypt'; Joseph himself was there already.

Does he seem to be recovering? He has almost recovered already.

'He was now nearly grown up; for he had already passed his

He was now nearly grown up; for he had already passed his twentieth birthday. Before this letter reaches you, you will have already reached

Before this letter rescues you, you will nave strong resons home.

Adverbe of Place.

14. Adverbs of Place are found by asking where or in what place a thing is done:-

He stood before He stood behind He went forward, and not backward. He stood below. The birds flew above.

He as not here, but there. He was so taker found. He shood appart from us Ile stood anide. We sent him cases, We sent him off. He rode conservis. The buttle flow upstards. He rode close, You will find him catterly, and does, on the little of the rode close, You will find him catterly, and does, on the little of the rode of the r

Adverbs of Affirming or Denying.

15. Such adverbs show whether the answer to a question is yes or no, and whether a thing is said with certainty or doubt:

The chief Adverbs of this class are :-

Aftirming-yes, yea, aye, indeed, by all means.

Denying-no, not, nay, not at all, by no means.

Doubt—perhaps, perchance, possibly, probably, improbably.

Certainty—surely, certainly, doubtless, truly, verily.

16. Mistakes are often made by Indian students in the use of "yes" or "no" in answering a question.

If the question is *effirmative*, there is less fear of am-

biguity in the answer:—

Question. Is the sky cloudy to-day?
Answer. Yes: it is: or No: it is not-

But if the question is put in a Negative form, the anawer given is often ambiguous:-

Did you set find him at home?

The answer sometimes given is: -Yes: I did not find him at home.

This is quite wrong; and the proper answer would be :-
Yee: I did find him at home; or Ne: I did not find him at
home.

Two rules, then, should be remembered :-

 If the answer to be given is "yes," the verb following must be in the affirmative.

(2.) If the answer to be given is "no," the verb following must be in the negative.

An affirmative verb must never come after "no"; a negative verb must never come after "yes."

INTERROGATIVE ADVERES.

- 17. (Adverbs can also be used for making questions, and such Adverbs are called Interrogative.)
- (a.) Quality or Manner. "How (in what manner) did he do this? How (in what state of health) is he to-day"?
- (b.) Quality or Degree. "How far (to what extent) is this report true."
- (c.) Number. "How often did the dog bark? How many
- persons came"?
- (d.) Time. "When did he come? How long will he remain here? How soon will he go"?
- (c.) Place. "Where did he go! How far (to what distance) did he go! Whence has he come! Whither (to what
- place) is he going "?

 (f.) Cause. "Why (for what reason or cause) did he say
 this? Wherefore does she weep "?
- N. B.—The above words are Adverbs, only when they are used for asking outstions.
- But when they are used for joining one sentence to another and id one know soles he came," they are Conjunctions, and not Advarts.

§ 3.—Degrees of Comparison in Adverss.

MANY Adverbs have degrees of comparison like Adjectives; and these are formed in the same kind of way.

162 INDIAN MIDDLE SCHOOL GRAMMAR

(a) If the Adverb is a word of one syllable the Comparative is formed by adding or and the Surperlative by adding est.

Postive	Comp arat se	Superlat re
Soon	sooner	soonest
Hard	harder	hardest
Long	longer	longest
Loud	louder	loudest
I ate	later	latest or last
Near	nearer	nearest
Quick	qu cker	quickest
(Ratl	rati er	rathest

(b) Some Adverbs form the degrees of comparison in an irregular way —

Well	bett r	be t
Ill or badly	Worse	Worst
Much	more	most
Lattle	less	least
Forth	f rtler	further
Far	farth 1	farthes

Degree by adding more and the Superlative by adding more, as usely more unsely most unsely beautsfully more beautsfully, most beaut fully In postry however the 1j is sometimes changed into her for

() Adverbs which end in ly form the Comparative

the Comparative and into liest for the Superlative as

Strange friend past present and to be

Loved deepler darkis runderstood — Tennyson But this must not be imitated in proce

4.—THE FORMS OF ADVERES

1 Some Adverbs have the same form as the corresponding Adjectives as

Adverb

He was much pleased There is much sickness here
He stayed long He went on a long journey

Adverb

He came early
He hit him hard
He came quack
Stand seer, while I speak
He was a ! ttl tired
He only came once
He alept hearly
He has alopt enor j!

Adjective

There is a sound of loud voices

He woke up at an early hour

This is a hard puece of wood

They rode along at a guick pace

He is my scar relation

There is lattl hope now

This is my only son

This is my only son He had an hourly sleep He has eaten sough bread

2 Adverbs in 'ly The most common mode in which Adverbs have been formed is by adding by (a corruption from bike) to the Adjective, as tender, tender bike tender by

Every class of Adverb has examples of this formation -

Adjective Adie b Wisely (Adie ob of Quantity)
Whole Wholly (Adie ob of Quantity)
First Firstly (Adie ob of Number on Order)
Formen Distant Distant Distantly (Adie ob of Fine)
Centann (Cortann) (Adie ob of Affirmson)

3 But this form of the Adverb occurs most frequent ly in Adverbs of walkly or Minner, and there is generally an Abstract Noun which can be placed between the Adjective and the Adverb —

Adjective Abstract Noun Adverb Wise wisdom wisely Poor poverty poorly High height highly Short shortness shortly Honest honesty honestly Dark darkness darkly Brave bravery bravely Prudent predently prudence Sweet eweetness aweetly Just justice **fustly** Greek greatness greatly heat Hot hotly Wide width widely True truth truly

164 INDIAN MIDDLE SCHOOL GRAMMAB

4 From Demonstrative Adjectives To this list belong all Adverbs which are formed from Demonstrative Adjectives —

Demonstra tive Adjectives	Demonstrative Adverba				
	Rest	Motron to	Motion from	Trme	Manne
The He	there	thither	thence	then	thus

5 Most of the above adverbs can be compounded with a preposition which is placed after them —

From "there" we get therein, thereto, thereat, therefore, therefrom, thereuith, thereout, thereon, or thereupon, thereof

From "hore' we get herein, hereto, heretofore, hereat, herewith, hereon or hereupon, hereof, hereby, hereafter.

From "hither" we get hitherto (-up to this point of place or time)

From "thence" we get thenceforth, thenceforward. From "hence" we get henceforth, henceforward.

- 6 From a Preposition with a Noun. Adverbs are sometimes formed out of a preposition with its noun
- (a) The preposition may be separate from the noun, in which case the adverb might be called an "Adverbial Phrase"—

Adverb	Meaning	Adverb	Meaning
At random	aunlessly	In fact	actually
Of course	necessarily	To best	moreover
At length	finally.	By chance	scordentally

(b.) The preposition may be amalgamated with the noun, so as to form a Compound Adverb:—

20 mg	so torm a compon		
Adverb.	Meaning.	Adverb.	Meaning.
Indeed	actually.	Overboard	over the ship's side
Betimes	punctually.	Overhead	above our heads.
Besides	in addition.	Upside	on the upper side
Between	in the middle.	Outside	on the onter side.
To day	on this day.	Inside	on the inner side
To-morrow	on the next day	Forecoth	indeed (ironically.)

Note —The 'be' is an old form of "by." Hence "betimes" means "by the proper time, or punctually." The word "between," we sonce written "by twain," or "in the middle of two."

(c.) Many adverbs have been formed from noung by

prefixing "a" to the noun. This "a" is a contracted form of "on "or "in" and signifies at. on in or in a state of.

Adverb	Meaning	Adverb.	Meaning.
Asleep	in a state of sleep.	Apace	at a quick pace.
Abed	in bed	Apart	in a separate part.
Away	on the way.	Apiece	in separate lots.
Afoot	on foot.	Aside	at one side.
Adrift	in a drifting state.	Aslant	in a slanting state.
Aboard	on board of ship	Aslope	in a sloping state.
Afield	on the field.	Astir	in a stirring state.
Afloat	in a floating state.	Astern	on the stern of a ship.
Aground	on the ground	Athirst	in a thirsty state.
Ahead	in front	Ajar	in a jarring state.
Amain	with might and main	Awake	in a wakeful state.
Ablaze	in a blazing state.	Awhile	for a short while.
Amiss	faultily	Ashore	on the shore.
Akin	in one state of kinship.	Aloof	to one side, apart.

Note.—To the same class belong such phrases as the following:—

Wheat sells at 16 seers a ruper He called to see me once a week He gave the coolies 4 annas a piece. Passing rich on forty pounds a year

Here "a" is not the Indefinite Article, but an abridgment of "on," as in the adverbial phrases noted above. In old english the "on" was used, and not "a."

The a' looks so much like the Indefinite Article, that by a false analogy "the" is sometimes used in its place, as,

Wheat sells at 16 seers the rupee

In one phrase, and one only, the on has been contracted to o —

It is now four clock (=on the clock)

- 7 From a Preposition with an Adjective Adverbof this list are formed in precisely the same way as the preceding The adjective in all cases is used as noun or it may be said that n me n in I at leen understood. (How adjectives can be used as nouns has been explained as length in Chapter III § 6)
- (a) The preposition may be sequenter from the adjective, in this case the adverb might be called an Adverbial Phrase —

Adve b	Moans q	17 b	Mearing
In general	Lenerally	, At t rat	in the beginning
In partie il ir	especially	At la t	finally at the end
In short	briefly is eaking	At last	at the lowest degree
At large	widely extensively	At all	in any degree
In vain	f untlessly	At most	at the greatest degre
On high	ın a hı _n h place	At best	at the best reckoning
Of old	in former times	In future	henceforward
After all	event sally		at the present time

(b) The preposition may be amalgamated with the adjective so as to form a compound adverb —

Below in a lower position

Beyon I in a m re d stant (or 3 onder) place Behin I in a hind or hinder part

(c) Some adverbs have been formed from adjectives by prefixing 'a as in the case of Nouns —

Adverb Abroad Anew 1 Afresh J Awry Afar Across Aloft Aghast	M am:) to a broad distance newly from a new beginning in a crooked way to a far distance at the opposite side to a high point in a frightened state	Alive Alike Around Aright	Meaning forwards loudly in a living state in a like state or way in a circular way in a right way knowingly in a state of fear	

8 From a Moun with an Adjective. Some adverbs are formed from a noun qualified by its adjective. The two words have become amalgamated, so as to form a Compound Adverb : as.

Meantime, meanwhile, midway, vesterday, somewhat,

Note .- If we were to separate the noun from the adjective, we should parse the noun as being in the Objective Case of time. space, or degree. (See Chapter XI, § 1, Syntax.)

- 9. From a Noun in the Possessive Case. Some adverbs or adverbial phrases have been formed from nouns in the Possessive Case. These are sometimes called Genitival Adverba
- (a.) A few of these Adverbial Phrases consist of the preposition "of" followed by its noun or by an adjective used as a noun :--

Of yore, of old, of course, of right, of a truth.

(b.) Others have retained the s (or its equivalent sound ce,) but have dropped the apostrophe.

Needs (=of need, necessarily.) Once (=of one, or of one time.) Twice (=of two times.) Sometimes (=of sometime.) Always (=of all way.) Sideways (=of a side-way.) Lengthways (=of a length-way.) Eles (=of other, from an old genitive "elles," of another).

10. From an Adverb and a Preposition, Some adverbs have been formed out of an adverb joined to a preposition, or a preposition joined to an adverb :-

Forthwith, within, without, forever, at once, before, beneath, moreover, furthermore,

11. Adverbs sometimes go together in pairs, which are connected by the conjunction "and" :--

He is walking up and down.

He is walking here and there, hither and thither.

The mice run is and out. He is coming to and fro.

He comes here you and then. He works off and on (irregularly.)

You will see him by and by (in a short time.) He went backwards and foregras.

12. Two or more words habitually thrown together in an adverbial sense may be called Adverbial Phrases:—

By no means i by all means: by the by (comething and in passing); by the may (similar to by the by); come on a fine, named out (the inside part being placed outside); syside down (the upper part being placed downwards); to be serie (sertainly); had formed (with the head in front); had down-meands (with the head in front over the heads;

§ 5.—Position of the Advers.

 If the word to be qualified is an Adjective, or an Adverb, or a Preposition, or a Conjunction, the qualifying Adverb is placed immediately before it.

Adjective.
or
Participle.
(We are half pleased and half sorry.
The mango you brought was quite ripe
Your pay is too large for your work
(A anake cream mr.y silently.

Adverb.

A snake creeps very sliently.
He stood far apart from me.
He saised my hand rather eagerly.

Preposition:

He arrived long before the time.
We sat almost in the shade.
He stood reactly behind me.

He stood exactly behind me.

Tell me precedly how it happened.

Conjunction. I like mango only when it is ripe.

He did this merely because he was ordered.

He did this merely because he was ordered.

Note,—There is one exception to the above rule. The word
"enough," (when it is an Adverb and not an Adjective,) is

placed after the word it qualifies :-Your pay is large caugh for your work,

He spoke highly canugh of your work.

This has been explained already in § 2, pare, 5,

2. If the verb to be qualified is Intransitive, the qualifying adverb is placed immediately after it:—

He lived well and died happily.
He laughed heartly at that loke.

He spoke foolishly about his own merits.

Note.—To this rule there are five exceptions :---

The Adverbe always, never, often, cometimes, and seldom, (all of which are Indefinite Numeral Adverbs,) are usually placed before, and not after, the verb they qualify.

CHAPTER VI.-ADVERSS.

He shows laughed at a good loke,

He sever spoke about his own merits He often came here to see me.

He sometimes alept in my house,

He seldom stayed with me for long.

3. If the verb to be qualified is Transitive, the qualifying adverb must not be allowed to separate the verb and its object.

The Adverb must therefore be placed either before the verb or after the Object; but it is more commonly placed after the object:-

He bore his losses obserfully.

He did his work patiently till sunset He bruffy explained his meaning.

4. If the tense of the verb is formed by an Auxiliary verb, the Qualifying Adverb is generally placed between the Auxiliary Verb and the Main Verb:-

The wind has suddenly risen.

Your son will soon return.

I have quits understood your meaning. He had pirasantly related his story.

He is almost dying, I fear

Similarly the Negative Adverb "not" is always placed between the Auxiliary Verb and the Main Verb. (See above, Chapter IV. & 3, pars, 11.)

We have not seen him since Monday last.

I did not know how ill he was. We shall not punish him severely.

Correct the position of the adverb in the following senten-ORE town

> He exactly stood in front of me. He explained clearly his words. I have read often that book. He struck severely the ox with his whip. He soon will return home. He almost has finished his task. The rain began to fall suddenly. Your teacher is enough pleased with your industry. He went out asidom before numeri.

An advarb is placed first in a sentence, (a) when it

is intended to qualify the whole sentence, (b) when it is used very emphatically.

(a) Unfortunately the house was robbed before the thieves

were caught

Luckily there was no one in the house, when the roof
fell in

(b) Never man spake like that man

Aluays, before day break, he rose from his bed

6 ONLY The meaning of a sentence depends upon the position of this word

(a) Osly he promised to read the first chapter of that book Here "only" is an Adjective, and not an Adverb As an adjective it qualifies the pronoun "he"

"He alone, and no one esse, promised to read the first chapter, &c

(b) He miy promised to read the first chapter of that book
Here "only" is an Adverb qualifying the verb "promised'
and the meshing is that he merely or only promised, but did
not perform the promise

(c) He promised only to read the first chapter of that book
That is, he did not promise to study, analyse, or remem
ber, but only to read
Here "only" is an Adverb qualifying
the verb "read"

(d) He promised to read ruly the first chapter of that book That is, he promised to read nothing more than the first chapter. Here "only" is an adverb qualifying the adjective "the first"

(e) He promised to read the first chapter of that book (nly (or, only of that book)

That is, he promised to read the first chapter of no other book but that Here "only" is an adverb qualifying the ad jective "that"

§ 6 -VERBS COMPOUNDED WITH ADVERBS

1 A VERB is said to be compounded with an Adverb, when the two words are so habitually used together, that one is considered to be a part of the other

In English the Adverb is almost always placed after the verb, as "speak out, rise up." Here the out should be parsed as part of the verb " speak"; and " up " as part of the verb "rise."

But in poetry the Adverb is sometimes placed in front of the verb : as.

Out spake the victor then.

Up rose the sun with slanting beams. -Rogers.

2. Verbs, which are thus compounded with Adverbs, may be either Transitive or Intransitive.

The addition of the adverb modifies the meaning of the verb, but does not ordinarily change its nature: hence the verb in most instances remains Transitive or Intransitive, exactly as it was before the adverb was added to it. This will be seen from the following examples:-

About :--

Intransitive. How did this change come about (happen)? Transitive. How did he bring about (cause to happen) this change?

Down :--

Intransitive. We must sit down a little for rest. Transitive We must bring down (lower) our prices.

In :--

Intrans { He came in (entered) at the right moment. He falls is (agrees) with my views. He was drawn in (induced) to sign his name. Trans. He filled in (inserted) the figures.

Off. (a form of of):-

Intrant.

The fair came off (happened) yesterday.
He get of (escaped) unburt.
He passed off (appeared) as a scholar.
He has fallen off (declined) in health.

A snake casts of (discards) its skin once a year. He broke of (cancelled) the bargain.

They struck of (printed) 1,000 copies.
A rose gives of (emits) a sweet small.

On:-

He lived on teentimed living) for many more years. He is getting on (progressing) favourably. The men west on (advanced) in the dark.

He carried on (conducted) the business.
He had on (wore) his new hat.
This will help on (promote) the good cause.

Out :--

Intrans

He next out (departed) and wept bitterly.

Hills stand out (project) above the plain.

He spoke out with a clear voice

(He will carry out (accomplish) our plans.

He will carry out (accomplish) our plans.
He worked out (solved) the problem.
A rose gives out (emits) a sweet smell.

Over :-

Up:--

Intrans. This matter must be over (wait) for a time. The storm has blown over (come to an end.)

Trans. | He call d over (received) the names. | He took over (received from the other side) charge,

Intrans. He fainted, but soon came to (revived.)

Trans. He fainted, but was soon brought to (restored.)

(The school broke up (dispersed) for the holidays.

Intrans.

Intrans.

He come up (arrived) in good time
He set up (remained awake) all night.
A new difficulty has cropped up (suddenly appeared.)

They got up (concected) a false charge.
The pleader pares up (abandoned) the case.
We must show up (expose) this fault.
I cannot call up (recollect) his name

 In some of the following examples a Transitive Verb is used intransitively, or vice versa, according to the adverb, with which it is compounded.

Make.

The thief made of filed as fast as he could He has made over (delivered) charge I cannot make out (undestand) your meaning They made is up (became reconciled) with each other. They made up (connocted) a false case. A book is made up (composed) of pages The loss was made up to him the was componated)

Break.

The coach broke down (met with some accident). His planbroke down (dailed) He broke of (stopped auddenly) in lanmidst of his words. Cholera has broken out (suddenly appeared) He broke sway (separated himself) from his keepers. School broaks sp (dispurses) at 4 r. m. We must broak in (train to work) that horse.

Hold.

Hold in (restrain) the horse. Held on (wait) till I come back. They cannot hold out (maintain their position) much longer. They held him up (exposed him to view) as an example.

Call

He called out (shouted) as loud as he could. He called out (summoned from their respective homes) all the workmen. This work called out or called forth (roused into action) all his energies.

Frame sentences with the following compound verbs, showing when they are Transitive and when Intransitive. Whenever it is possible, put some other verb in the place of the Compound Verb.

Cast in, cast off, cast up, cast out, cast down, cast away.
Fall in, fall out, fall down, fall off, fall through, fall to, fall away.
Give in, give out, give off, give away, give up, give over.

Get out, get in, get up, get on, get away
Take in, take out. take down, take off, take over, take away.

take up, take back.

Pay off, pay down, pay in, pay back.

Come in, come down, come off, come out, come away, come about,
come on, come over.

'Stand off, stand over, stand up, stand out, stand by Throw up, throw over, throw down, throw in.

Set off, set in, set out, set down, set up, set on, set aside Lay up, lay down, lay by, lay out, lay in.

Cut up, cut off, out down, cut out. Carry off, carry on, carry out, carry through, carry over, carry in. Pass over, pass by, pass off

Put by, put out, put on, put off, put down, put up, put in. Run out, run over, run through, run up, run down, run off.

Turn up, turn out, turn off, turn in. Draw in, draw up, draw back, draw out, draw off.

4. When a verb is compounded with an adverb, the adverb is (as we have seen.) almost always put last.

But in forming the corresponding noun, the adverb is put first:---

Verb. Nous.

The crops will come out well ... The outcome of the rains was good erop.

The profits that came in are very small. ... His income is small.

Cholera did not break out ... There was no outbreak of cholera. He set out om his journey ... He had no trouble at the outset.

Similar instances are:—est off (verb.) offset (noun); put out (verb.) output (noun); fit out (verb.) outfit (noun); shoet off (verb.) offshoot (noun); spring off (verb.), offspring (noun);

shoot up (verb.) upshot (noun); turn out (verb.) outturn (noun); cast out (verb.) outcast (noun); set on (verb.) onset (noun); lay out (verb,) outlay (noun) ; look out (verb,) outlook (noun) ; draw in (verb.) indraught (noun) ; let out (verb.) outlet (noun) ; let in (verb.) inlet (noun); cry out (verb.) outcry (noun); pour out (verb.) outpour (noun).

§ 7 .- ADVERBS USED AS COMPLEMENTS.

An Adverb can be used, not merely to qualify a verb, but also as the Complement to a "verb of Incomplete Predication."

This peculiar use of adverbs is limited (a) to Adverbs of State or Quality and (b) to Adverbs of Place.

(For verbs of Incomplete Predication see Chapter V.

§ 1, pars. 11 and pars. 13, and § 2, pars. 5.) Adverbs of State or Quality— Subject. Verb. Complement, &c. well (in good health) to-day. My son is He better (in better health) soon. will be The boat Was set affeat (in a floating state.) was turned adrift (to go where he could.) The two boys... are much alike (like to each other.) The bear was caught ... alive (in a living state.) Those men are ... queare (conscious) of their faults. The game in ... over (finished.) is ... all over with him. Some money ... Was ... still over (remaining.) The results ... out (published.) The stars .. аге ... out (visible,) Ηe ... was heard ... out (to the vary snd.) The bargain ... is .. off (cancelled.) The train is ... off (started.) The house ... was not ... ablaze (in a blazing state.) ... well of (in good circumstances.) Ha is Prices ... are ... up (risen.) ... must be ... up and doing. His blood ... WING ... up (aroused, excited.) Time is up (come to an end.) ... Prices down (fallen low.)

... down (fallen in his luck.)

... in (having their innings.)

... is (holding office) again.

Are

He

Our side

The late minister, is

The adverb "so" is used as a Complement in reference to any kind of state that has been previously mentioned. (See above Chapter IV, § 3, para 7.)

> My business is urgent, and I hope you will treat it so. (Here somurgent, and is the Complement to the verb "treat.")

3. Adverbs of Place :-

Subject.		Part.		Complement, &c.
The tearless life	***	is		there (in that place, heaven.)
The men	***	are	•••	all together (in the same place.)
Thy mother		is		without (outside the room.)
He	***	is	***	far away (in a distant piece.)
No one		is	***	Aere (in this place.)
He	***	is		abroad (in a foreign land.)
Rocks		are		ahead (in front.)
The cart		is		behind (in some hinder place.)
Heaven		lies	***	before (in front.)
Heaven		is	***	above (over our head.)
Hell		is	***	beneath (below us.)
₩e		found		him within (in his house.)
The sheep		are		affeld (in the field.)
He .		stood		aride (on one side,)
Thou		art	***	so sear, (and yet so far.)

General Summary.

4. It will now be seen that the definition usually given, vi..., that "an adverb qualifies a verb, an adjective, or other adverb," is not wide enough to cover its actual uses.

The full definition would be :--

"An advert can qualify a verb, an adjective, a preposition, a conjunction, another Adverb, or an entire sentence; and some adverbs can be used as Complements to verbs of Incomplete Predication."

CHAPTER VIL -- PREPOSITIONS.

§ 1 -THE WORK OF PREPOSITIONS IN A SENTENCE.

- 1. A Preposition is a word placed before a noun or pronoun to show in what relation the thing named stands to some other thing.
- 2. A Preposition is never added to any part of speech except a noun or pronoun.

An adverb is never added to a noun or pronoun.

By this simple rule the student can always tell whether a word is a preposition or an adveb: and therefore the one need never be confounded with the other.

3. The same word, however, can be used in one place as an adverb, and in another as a proposition.

Examples.

Adverb. He walked about. The men ran past. The above named book. He swam across. I saw him once before. An along quickly. You must go behind. He sat below. There is nothing beyond, The horse was going by. Sit down here. He sat inside. The men stood around. He is standing near. He died two years since. Stand up straight. He lived on for two years. He came a few days after. Bees fly in and out. They came out at noon. There were four men besides, The house was clean within. The house was clean southout. Men die without aleep.

Preposition. He walked about the field. He came at half past seven, The sky is above the earth. The house stands across that field, He stood before the door. Let us walk along the bank. A man stood behind the door. He stood below me in the class. They went beyond the mark. By whom was this done? The boat floats down the stream. The book is inside the box. They walked around the fields. Your house is near mine. Since that year I have been ill. Walk up the hill. A book is on the slate. He came after a few days. Fish swim in the water. Frogs jump out of the water. and ten more besides these. I slept without the house.

4. Two Prepositions to the same Noun. The same noun may have two or more prepositions placed before it:---

He walked up and down the hillside. He was much opposed to, and wrote strongly against, that designs. (This, however, could be more gracefully worded thus:—"he was much opposed to that design, and wrote strongly against it.)

- 5. The same Preposition to two or more Nouns. The same preposition can be placed before several different nouns at once:—
 - He divided his property among his parents, wife, children, and friends.
- Position of the Preposition As a general rule a Preposition stands immediately before its object.

But to this there are a few exceptions: --

(a.) When the object is a Relative Pronoun, the preposition is often placed after the verb of the sentence, provided the verb is Intransitive:—

The house that we lived in has fallen down, or the house in which we lived has fallen down.

If, (as often happens,) the Relative Pronoun is understood, the preposition is always placed after the verb:—

The house (that) we lived in has fallen down.

(b.) The preposition can be separated from its noun by adjectives or by a noun or pronoun in the Possessive Case:—

The hen came up to my door with her ten black chickens.

(c.) In poetry (not in prose,) a preposition of two syllables can sometimes be placed after its noun :---

He dwelt the fields among.

- Wordsworth.

 A sentence preceded by a Belative Pronoun, or by a Relative Conjunction, provided no Antecedent is expressed 781

ran be the object to a preposition, in the same way as a noun is:-

This depends upon whether-be-will-consent-or-not. He toldcurry one of wheth-be-hald-heard. He did not act up to whathe-hast-promised. He made all enquiries as to where-theywers-going, and why-they-decided-to-go, and when-theywers-likely-to-return. Go whenever you like except thatvan-mat-not so in-the-return.

8. An Intransitive Verb can be made Transitive by having a preposition placed immediately after it. (See Chapter V, § 1, para. 15.)

These can be considered as real Transitives, provided they can be used in the Passive Voice. (See Chapter V, § 2, para. 6.)

We act on this rule .- Active.

This rule is acted on by us .- Passire.

When the verb is in the Passivo Voice, the on-cannot be parsed as a preposition, since there is no object to which it is profixed. It must therefore be parsed as "a part of the Verb," and the verb itself must be called "a Prepositional Verb," or a "Verb compounded with a Preposition."

 In Prepositional Verbs, the preposition is almost always placed after the verb; but "without" and "over" are often placed before it:—

He withstood (stood against, endured) the attack.

He has outgrown (grown beyond) his sister. The father has outlived (lived beyond) the son.

The hare outran (ran beyond) the hounds.

They outroted him (defeated him by votes.) Silver is outweighed (surpassed in weight) by gold.

He was overcome (defeated) by the enemy.

The banks were arreflowed (inundated) with water.
The field is overgroup (covered) with weeds.

The shadow overhangs the house, The boundary has been overstopped (transgressed.)

Kote 1.—Observe that all these verbs, when they are used east from the preposition, are Intransitive, and that it is the preposition which makes them Transitive, that is, which renders them capable of governing an object, or of being used in the Passive Yoles.

Note 2.—A verb compounded with an adverb is not similarly changed from Intransitive to Transitive. (See Chapter VI, § 5, para. 2.)

§ 2.—THE FROMS OF PREPOSITIONS.

- 1 The simple or primary prepositions are :—

 At, by, with, on, or, in, to, for, of or off, from, through, over.
 under, up, down.
- Double Prepositions. When a single preposition is not sufficient to express all that is intended, a double preposition can be formed by adding two single or simple ones together.

These sometimes remain separate words, and sometimes they are joined together so as to make a single word:—

Jaio the house, (i. e, to or towards the inside of the house.)
Throughout hway rat (e., exiting through the year, or from
the beginning to the end of the year.) He ran out of the
house. One man was closen, from samely the rest. The seed
has sprouted from sader the ground. The man stood over
the property of the samely the seed of the seed of

Note.—Similarly about = on-by-out; above=on-by-up; before=by-fore; within=with-in; without=with-out.

 Compound Prepositions. These are compounded of a preposition prefixed to some noun or some adjective used as a noun.

The prepositions chiefly used for this purpose are (1) on, which in composition is changed to a, and (2) by, which in composition is changed to be.

derest (-con-cross) to go serest the river.

Against (-con-joing); to swim against the stream.

Along (-con-joing); along the river hank.

Among (-con-gemmang, or in a multitude); among the trees.

Amond (-con-tround); to walk around the becase.

Amond (-con-biddle); the was one amond the cross.

Amond (-con-biddle); the was one amond the cross.

Belon (-by-low); he stood below the window.

Beneath (-by-neath); he dived beneath the water.

Beside (-by-neath); he stood beside me.

Between (-by-twain); between the river banks.

Bewond (-by-vonder: the life be nead the grave.

4. Prepositions formed from Participles. A class of prepositions ending it ing has arisen from the Impersonal Absolute use of participles; such as, concerning, touching, comidering, arounding, owing to.

On the Impersonal Absolute, see Chapter V, § 7, para. 6.

Occupy to the long drought the crops died.

Nothing was settled touching this matter.

Sometimes it is an open question whether we should parse the word as a preposition or as a participle :-

Ho wrote me a letter regarding that point. (Here regarding may be parsed either as a proposition, or as a present participle quilifying the noun "letter." "That point" is therefore either the object to the preposition or the object to the verb "regarding.")

Again :--

Considering my previous good conduct, he pardoned me for this one fault.

(Here considering may be parted either as a preposition, or as the present participle qualifying the pronoun " he,")

- 5. During notwithstanding, pending. These were originally Absolute participles placed after some soun in the Nominative Absolute; but they are now prepositions placed hefore a noun in the Objective Case.
 - The summer during or enduring, (Nominative Absolute,)
 = while the summer endured or lasted, = during the summer (Preposition with its Object.)
 - (2.) His anger notwithstanding or not preventing me (Now. Absolute); = while his anger did not withstand or prevent me, = notwithstanding his anger (Proposition with Object.)
 - (3) Fresh orders pending (Nominative Absolute), = while fresh orders were pending or held in suspense, = pending fresh orders. (Proposition with its Object.)
- Except, save, past. These were originally past participles used absolutely. They have now become preposi-

tions by the same process as that described in the pre-

All except one, -all, one being excepted.

All sare one, -all, one being saved or reserved.

The hour past sunset, =the hour, sanset having passed,

7. Prepositional Phrases. Two or more words habitually thrown together in a prepositional sense may be called *Prepositional Phrases*:—

By means of : because of ; in front of ; in exposition to; in spite of : on necessary of ; with reference to ; with regardeto ; for the sales of ; on behalf of ; instead of ; in lieu of ; in the place of ; in prospect of ; with a visio to ; in the event of.

The phrase on this side is used as a preposition without of; as,

On this side the river.

The noun despite is sometimes used as a preposition for in spite of:—

Despite his riches, power, and pelf. —Scott.

§ 3.—RELATIONS EXPRESSED BY PREPOSITIONS.

PREPOSITIONS (as has been already shown) are placed before nouns or pronouns to express the various different

relations in which one thing may stand to another.

The more important of the relations expressed by Prepositions can be seen from the following examples:—

1. Place, Situation, Circumstance.

In. Stand in the water. He is in a bad temper.
Into. Go into the water. Water is changed into steam.

Through. Go through the door. He passed through many dangers-Past or beyond. Beyond the boundary. This is past endurance. On or upon. Sit on the box. On this condition I will trust you. At. He is not of home. He was much at fault.

By. Sit by me. I will abide by my promise.

With. I will go with you, All with one exception failed.

Over or above. Air is above the earth. He spunds above his income.

Below, or under. Snakes live ander ground. The matter is under enquiry.

Behind. The dog is belied you. There is a smile behind his frown. Before. Stand before the door. Duty before pleasure. To. He has gone to England. This is much to your credit. For. He starts for home. He worked hard for a prize. From. He starts from home. We are now free from danger. Of. He shot wide of the mark. He was robbed of his purse. About. Walk about the streets. He went about his pusiness. Near. Come sear the spot. His surceas is near my heart.

Along The boats were tied along the shore.

Among or amid. Let us walk amid the trees. They quarrelled

among themselves.

Between the two banks of the river. He still balts detueen two coinions.

Up, down. The monkey ran up and down the tree.

Across. He sailed acrost the sea. Sit acrost the saddle.

Around, or Round. Describe a circle round a given centre.

Bestide. He sat bestide mio. He is bentle himself.

Bestides. He has two sons in India bentles one in England.

Against. It is not easy to swim against the stream.

Without. He stands without (outside) the gate. Men cannot live without food.

Within. He is within the house. This is not within my power.

2. Time.

In. He finished the work in ten days. He arrived in time. Into. He elept late into the day.

Through. He has been a lazy man through or throughout his whole life.

Past, or beyond. He is now past or beyond the age of 40.

On. I will expect you on Monday next.

At. Buts fly out at night; but retire at daybreak.

By. The sun shines by day; the moon by night.

With the return of the hot winds the grass fades.

Above, or over. He was absent above or over two weeks.

Under. You will not finish that work under two months.

Behind, after. He arrived behind time. He returned after many days.

Before. He commenced work before 7 o'clock a m. To. Te-day, b'enight, te-ountrow. The train is not up to time. For. He was made a princept for life. From: They commence work daily from 10 o'clock. About. It is now about 3 c'clock, p. m. Between. He arrived britarn 4 and 5 o'clock, p. m.

During. I will remain here during your pleasure.

Pending. Nothing more can be done pending his arrival.

Till or until. They worked all day till sunset.

Within. This was finished within the time fixed.

Some Point of Time or Space.

 When a point of time or space is to be expressed we use at or on; but when a wider extent of time or spaceus intended, we use in:—

> At Rome; but in Italy. The end is at hand (very close); the work in in hand (in a state of progress.) We knew him ata glance, as soon as he came in sight. The moon rose at-12 clock is the night. He lives at Nudden is the provinceof Bengal.

Instrument, Agent.

4. To express the instrument or means employed for-doing anything, we use with. But to express the person, agent, or doer through whom the action is done, we use bu:—

This book was written by me with a quill pen. The boat was tied by a sailor with a rope. The field was ploughed up by the peasant with a pair of oxen.

When the thing used in performing the action belongs to the object or person affected by the action, we use by:—

He seized him by the throat. He led the horse by the reins. Bind him by the hand with manucles,

Canse

 The idea of cause is expressed by from, of, through, for, and by several prepositional phrases, such as because of, owing to, in consequence of.

He almost died of fever. Of course he will be caught some day. He failed through insthention to work. He could not speak for grief. The crops failed from, (or ording to, or because of, or in consequence of) the want of rais.

The preposition for in the sense of cause is often preceded by the preposition except or but :--

Except for your help or but for your help (-if you had not helped ma), I should have been ruined.

Effect.

 The idea of effect is expressed by the preposition to, and by no other:—

To our great grief and surprise he was not successful. He was starved to death. He wasted his time to his ruin.

Exchange, Substitution.

 The idea of exchange, or of one thing being taken or mistaken for another, is expressed by for, and by such phrases as instead of, in the place of, in lieu of.

He gave me this for (or in ecchange for) that. He was taken for a traveller. The cat was mistaken in the dark for a dog. This was meant for Ian. Sixteen seems of wheat are sold for a rupee. He was taken for dead (=for a dead man.)

Opposition, Conflict, Contrariety.

8. The idea of opposition, conflict, etc., is expressed by against, and sometimes by with. The idea of defending or helping is expressed by for.

You are acting for my interests and against your own. He led his army against the city, but the inhabitants fought bravely for their homes.

One king fought with or against another. He is angry with me. He disputed that point with me. He grappled bravely with difficulties. He was offended with me unjustly.

A. B.—"With " is one of the most subiguous prepositions in the English language. Sometimes it means "agginst," as in the examples already given. Sometimes it means companionship or friendly union; as "I will go with you;" "I made a cuttant with him." Sometimes it means "from or apart from," as in the phrase, "I differ with you," "I have parted with my borce," "I soithdraw (draw back or away) that remark," "he withheld held back or restrained) his hand."

The most common meaning of with, however, is union, nearness, etc; and the opposite preposition to this is without.

He came with his horse, but without his dog. With or without help we are certain to succeed.

Material, Quality, Contents.

16. To denote the material of which a thing is made, the quality of any person or thing, or the contents of any thing, we use the preposition of, and no other:—

This house was stull to furbrunt clay, not of bricks. He is a mast of much experience. I prefer a book of travels to one of fiction. A cup of water will often do a man more good than a bottle of wine. He did it as a labour of love, and not as a matter of duty. A wreath of roses.

Possession

 To denote possession we use the preposition of, and no other. But possession can also be denoted by the Possessive case, (subject to the conditions explained in Chapter II. § 3, para. 6.)

The palace of the king (or the king's palace) was pulled down-The banks of the river were inundated. The laws of the Hindus are not the same as those of Mussulmans. Tho vote of the majority was against your proposal.

Apposition.

12. The idea of apposition is sometimes denoted by the preposition of:—

The season of winter. The city of Calcutts. The continent of Europe. The horse was sold as a cost of 100 rupess. The faland of Ceylon. The province of Bengal. The name of England. He is a brute of a man.

Contrast

13. When one thing or state of things is mentioned in contrast with another, we express this relation by the prepositions with, for, after, notwithstanding, and sometimes by such phrases as in spite of, despite.

> With all his wealth (or in spite of all his wealth) he is etill a discontented man. For all his promises he is a false man. After or notwithstanding all the advice I gave him he persisted in his folly.

Adaptation, Agreement.

14. When we wish to say that one thing or state of things is adapted to another, we express this relation by the preposition after or to:—

He was surnamed the Just after his character. This picture was painted after a good model. This tea is exactly to my taste. To all appearances he la seriously ill.

Subject of a Book, Speech, &c.

15. When we wish to describe the subject to which some book, speech, remark, &c., relates, we use the preparitions of on about concerning as to in regard to, &c.

He spoke well of me. This is a book on or about proverbs. We must take advice on or about or concerning or regarding or is regard to that matter. I enquired as to whether he would return this evening or not.

Note.—The Prepositional phrase "as to" is probably an abridge of celliptical form, which has been substituted for "as relates to," the verb in the middle having been omitted. The full expression would be "so far as it relates to." The word "as," when it is preceded by "such." it is a Relative Pronoun. Hence in the phrase so far as it relates to, "the "as " is a conjunction. But the conjunctive force of "as " has been lost in the mutilated phrase as to." Hence the world "as to "must now be parsed together as making up a Prepositional phrase. In such a phrase we cannot parse the "as "separately.

Inference, Motive, Source,

16. When we wish to describe the fact from which we injer something, or the matter from which we do something, or the source from which something is derived, we use the preposition from:—

From what you tell me he must be a bad man. You can see from his manner that he is speaking the truth. (Inference) He worked heard from a desire to came his own living. That was all done from ill feeling. (Metier.) He speke from his heart. He is sprung from noble ancestors. Dirty water comes from a dury fountain. (Source).

Valuation or Rate.

17. The only preposition denoting valuation or rate is at:---

He lends out money at 6 per cent. This must be done at any rate, or at all risks, or at all hazards, or at all events.

Measure, Standard, or Amount.

12. When we wish to describe the amount or standard by which a thing is measured, we use the preposition by:— Rice is sold by the mand, wine by the pint or quart. He is taller than you by two mehes. He is a carpenter by trade, but not by caste.

Limit or Degree.

19. When we wish to express the limit or degree to which a thing is done, we use the preposition to:—
You shall pay me to the last farthing. He is ruined to all intents and purpose. That portest is true to the life.

Proportion or Comparison.

- 20. When we wish to express the proportion between one quantity and another, we generally use the preposition to
 - l will bet 4 to 1 on his failing As. 3 is to 6, so is 5 to 10.

 His conduct, though unkind, was kindness itself to yours.

After adjectives in the Comparative Degree we use than.

This word, however, is a conjunction, and not a preposition,
except when it stands before a Relative Pronoun, or when
it occurs in such a phrase as "other than ":—

Belial, than whom a spirit more lewd Fell not from heaven. —Milton.

No person other thus (adifferent from, except) a graduate need apply for this post.

He loved you better than I (loved you.)

He loved you better than (he loved) me.

Preparation to meet some expected event.

The only preposition that denotes preparation or provision for the sake of meeting some expected event is against:—

She made the house ready ogainst the arrival of her husband.

He saved up money against the evil day. Get all the implements collected and repaired against day-break. Be ready against the day of battle.

Occupation.

22. The prepositions denoting occupation are at and about:—

Your may go about your business, (a rude form of dismissal.)
Wist ye not that I must be about my Father's business?
—New Testament.

What are you about? (a rather rade way of asking what you are doing.)

We all play at cricket. He is clever at translation. He was again caught at his old tricks.

Exception.

28. The above idea is expressed by except, but, or save.
All the candidates except or but or save one were successful.
Except for the help you gave me. 1 could not have escaped;
or but for the help you gave me, &c.

Adjuration or Appeal,

24. The name of a thing or person used in making an oath is preceded by the preposition by:---

I say unto you, swear not at all,—neither by heaven, for it is God's throne, nor by the earth, for it is God's footstool; nor by Jerusalem, for it is the city of the great king. Neither shalt thou swear by thy head; for thou canst not make one hair white of black.

Partition.

25. The idea of part, as distinct from whole, is expressed by the proposition of:-

The children of the family (who make a part of the family.)
The banks of the river. You of all men ought not to act
thus. A few of the host were clain. He had a third of the
estate. Many of the wounded did not recover. A poem of
Milton's (one of Milton's poems.) He is something of a
scholar (a scholar to some extent.)

Reference to some special point or quality.

26. When some special point or quality is referred to by an adjective, the preposition of or in is placed between the adjective and the noun:—

> Free of his money. Hard of heart. Dell of understanding, Lame of one leg. Short of money. Bill of one sey. Slow of hearing. Quick of speech. Timid of disposition. Weavy of sport. Pure of heart. Violent of temper. Tire of work. Pure is heart. Poor (a spirit. Billed is one eye. Lame is the left leg. Paitfulf of oded as well as its word. Strong is appearance, but not is fact. Learned is Sankrit. Verued is arisens.

Separation, Distance.

- 27. The idea of separation is usually denoted by the preposition from. But it can also be expressed by of, or aff. or out of:—
 - He is from bonc (not baside his bossa). That city is forty miles from here. Calcutts is not fat from the see, We are now within 8 miles of cate distance from) the house. He was within an ules of being drowned. He was acquited of that habit. Can you that the seed of the control of the contro
- Off. This preposition is more frequently used in reference to some point of space than of. The opposite to off is on, as we see in the Adverbial Phrase off and on (sometimes doing a thing, and sometimes not doing it.)
 - He was thrown of the horse. The man seems to be off his head (insens) We are off duty to day, but shall be on duty again to morrow. Ceylon is an island off the nouthern coast (expansion by a short distance from the southern coast) of India. He was taken of his goard. The best wort out is east two miles of the shore. The sun glosmed off the edge of a dark clead.
 - Out of. The opposite to this is " in," as we see in the

100

phrases, in season and out of season, indoors and out of doors, in and out, &c.

The school is out of order. He is out of debt. The flate is out of tene. This custom has gone out of use. He is out of his mind (mad.). The grapes are out of yeach. Your language is out of place. That book is out of print. His arm is out of joint. His dress is out of abilion. This plan is out of the question. We must get him out of that foolish habit.

Distinction.

23 The idea of distinguishing between one thing and another is expressed by "from."

He scarcely knows one color from another. A blind man cannot tell black from white, light from darkness. I should not know him from his brother.

N. B.—In one exceptional instance "to" has come into use, where otherwise we should use "from."

This color is different to that. (Here it would have seemed more proper to say "from that." This exceptional use of "to" occurs only after the adjective "different." Thus we say: "I differ with you or from you," not "I differ to you.")

Superiority, Interiority.

The preposition "above" is commonly used to denote superiority, and "beneath" to denote inferiority of some kind.

He is sobre (superior to) such a mean act. He is obser suspection (too good a man to deserve being suspected.) Such work is heastf in too mean for a person of my rank, abilities, &c.) He meried a wile beserft him (of lower rank than himself.) Man is deserft the angols (Inferior to the angels.) His remarks are beneath notice, beneath conempt unto worth noticing or oven despiting.)

Authority, Subjection.

30. The preposition over is commonly used to denote

anthority; while under commonly denotes subjection to authority.

> God is Lord over all. He is over me (my superior in authority). The British army under Havdook marched into Lucknow. Under whose authority do you do this? Even kings are under the law (unbject to the law.) He was tremferred under the overlay of the law.) He was tremferred under the overlay of A. He is quite under A's thumb (emitrely subject to A.)

Direction towards an object or end.

31. Direction towards an object or end is expressed by the prepositions at or on.

He took his bow and almod at the bird. He missed and all laughed at him Look at that star. Some one is pointing at you. He threw a stone at the bird. The axe was laid at the root of the tree. Do not shoot at the birds. He shouted at him to come. One man winked at the other. Do not mock at other men's failures This was his first attempt at English commostion.

ranging composition. The man has been sent away on a message. The ensury marched upon the town. The dog made a violent attack on the stranger He has just started on a long tour. You are rather severe on the student. He has his on a good plan.

Examples (a.)

The answers to these examples contain a complete enumeration, under the heading of each proposition, of the main senses in which each proposition is used:—

1. Explain the meanings of " of " in the following senten-

Cause.

1-What did he die of?

3—What are you thinking of .* .. . Concerning.
3—Of what family us he groung? .. Source
4—He is a man of strong passions .. Quality,
5—Send me a box of books
6—Look up the money in a box of iron Material
7—He was wrong of you to say that .. Reference,
8—Ho not tear the pages of that book Part,
9—Ho not tear the pages of that book Part,
10—You of all persons should have been the was the control of the control

sun Possession.

12-I want the sum of 100 rupees ... Amoutton.

INDIAN MIDDLE SCHOOL GRAMMAR. 192 2. Explain the meaning of "with" in the following senten-1-He arrived with all his luggage. .. Union, nearness. 2-He killed the kite with a stone ... - 76 They will fight—the last man, and—my mind they will gain the day.
- I learnt—my surprise that the book I gave him was not—hiv taste.

CHAPTER VIII.—CONJUNCTIONS.

§ 1.—Definition and Classification of Conjunctions. 1. A Conjunction is a word used for joining and for

 A Conjunction is a word used for joining and in no other purpose.

It may join (a) one word or phrase to another word or phrase, or (b) one sentence to another sentence:—

The cat slowly and silently approaches the mouse.

(Here two adverbs are joined by und.)

He was of good temper, but in bad health

(Here two phrases are joined by but)
I trust his word, because he is truthful

(Here two sentences are joined by because)

2 A Conjunction never governs an object, as a preposition does

A Conjunction never qualifies a word, as an adverb does

It simply joins words or sentences.

Hence if the same word can be an Adverb in one place, a Preposition in another, or a Conjunction in another, there ought to be no difficulty in distinguishing them:—

I have seen this man before ... (Adverb)
He stood before the door .. (Preposition)

The rain fell before we reached home ... (Conjunction.)

Conjunctions are sub-divided into two main classes:

I. Co-ordinative, so called because they join sentences of co-ordinate, (that is, of equal), rank :—

II. Subordinative, so called because they join a subordinate or dependent sentence to a principal sentence, (that is, to a sentence of higher rank.)

Besides these two great classes, there is a sub-class which can be called **Relative** Conjunctions. These have some distinct properties of their own; but they come under the main head of Subordinative.

§ 2.—CO-ORDINATIVE CONJUNCTIONS.

- 1. Sentences are said to be of **Go-ordinate** or equal rank, when they assert facts which are independent of each other.
- Sentences of equal rank can be combined together in 4 different ways, and this gives rise to 4 different kinds of Co-ordinative Conjunctions:—
- (a.) Cumulative By these one statement or fact is simply added to another. (In some grammars these are called "Copulative," because they couple or combine the meanings of two words or two sentences)
- (b) Alternative. These are called Alternative conjunctions, because they offer an alternative or choice between two or more things. By these conjunctions one statement or fact is made to exclude the other.
- (a) Conjunctions of Oontrast. By these one statement or fact is contrasted with another. (In some grammars these are called "Disjunctive," because they disjoin or distinguish the meanings of two words or sentences.)
- (d.) Conjunctions of Inference. By these one statement or fact is inferred or proved from another.

EXAMPLES OF THE FOUR KINDS.

Wirst Statemen

Deanud Done

(2)	He finished his work, Either he must go, He had his full pay, They were paid double,	and departed (Cunul) or I (must go) (Altern.) but he was not satisfied, (Contrast.) therefore they were
(44)	and were part double,	much pleased, (Inference)

Now if we cut out the conjunctions, we find that each of the above sentences asserts an independent fact, and can stand by itself:

	He finished his work.	He departed.
	He must en	T to dopen ood.

(3.) He had his full pay. He was not satisfied.

(4.) They were paid double. They were much pleased.

(a.) CUMULATIVE CONJUNCTIONS.

(One statement or fact simply added to another.)

- And. This is the chief conjunction of the class under notice, and is more frequently used than any other It expresses the idea of adding or combining in its simplest form:—
 - (1) My brother and I each won a prize. (Here two words are added together.)
 - (2.) That prize was given me as a reward for industry, and at a cost of six rupees. (Here two phrams are added together)
 - (3) Of those two brothers the elder received a prize, and the younger was promoted (Here two antenses are added together)
 - 4 Both, and. This is a strong or emphatic way of ex-
- pressing the union of two words or two sentences:—

 (1) He is both a fool and a knave (Here two words are
 added together He is not a fool only, not a knave
 - only, but both at once)

 (2) He was both degraded from his class, and expelled for one year from the school. (Here two sentences are added together.)
- 5. Also, too These Conjunctions have the same emphasizing force as the foregoing. They generally stand after the second of the two words or sentences:—
 - (1) He is guilty, and you also, (=Both he and you are guilty; one is as guilty as the other)
 - (2) A fool and a knave too, (=both a fool and a knave.)
 - A fool and also a knave, (=both a fool and a knave)
 (a) Where your treasure is, there will your heart be also (both your treasure and your heart will be in the same place.)

-Non Testament

- 6 As well as, no less than. (These might be called Conjunctional *Phrases.*) In adding one word or sentence to another, they give emphasis to the *first* of the two.
 - He as well as you is guilty, (—He is guilty as well as you are guilty.)
 - (2.) He no less than you is guilty, (=He is guilty no less than you are guilty.)

204 INDIAN MIDDLE SCHOOL GRANMAR.

- 7. Not only, but or but also. In adding one word or sentence to another, these give emphasis to the second of the two
 - (1.) Not only I, but all other men declare this to be true,
 - (2.) That man was not only accused of the crime, but also convicted of it by the magistrate.

He was convicted of that crime in court; mercour, or besides, or further his own friends believed that he was guilty.

It will thus be seen that by these conjunctions a new remark is introduced in *continuation* or confirmation of a previous one.

9 Likewise. This Conjunction, (like the three last named) introduces a second sontence in continuation of a previous one; but it also implies that there is some resemblance between their meanings:—

For he seeth that wise men die; thewite the fool and the brutish person perish.

-Old Testament.

 Now. This Conjunction, (which must not be confounded with the Adverb of Time,) introduces a new remark in explanation, (not simply in continuation,) of a previous one:—

And Pilate said unto them, "will ye have this man or Barabbas?" They answered, "not this man, but Barabbas." Now Barabbas was a robber.

-New Testament.

11. Well. This word, (when it is used as a Conjunction, and not as a Adverb,) implies that what has been

previously said is "so far, so good," and that a new remark may, now be made in some other direction :---

You have finished the work that was given you ;—well, you have done a good deal better than you usually do, and I am much pleased with your improvement

(b.) ALTERNATIVE CONJUNCTIONS.

(One statement or fact excluded by another.)

- 12. Either, or. This is the opposite pair to "both, and." It generally offers two, but sometimes three, contingencies:—
 - That animal swimming in the water is cither a serpent of a fish, (It must be one or the other; it cannot be both.)
 - (2.) He stood so low in his class at the end of the year, that he must have been suffer lasy or stupid or in a bad state of health. (Here the choice lies between three, and not two, contingences)
 - (3) Either this man sinned, or his parents.

-New Zestament.

- 13. Neither, nor. This pair is merely the negative to the foregoing, and shows that no alternative or choice exists, both or all contingencies being equally excluded:—
 - (1.) Neither this man sinned, sor his parents.
 - (2.) He was seither lazy nor stupid nor in bad health; but he was engaged all the year in doing other work.
- Note I.—" Nor" sometimes means the same as and not In this case it is a Cumulative Conjunction, and not an Alternative one:—

He started on his journey; nor did he loiter (=and he did not loiter) on the way.

Hote 2.—" Or" is sometimes used to express a synonym. In this case it still belongs to the class of Alternative, because it signifies that the speaker or writer has the choice or alternative between two difficult words.—

The tone or tenor of his letter is severe,

14. Otherwise, else, or These three conjunctions all mean the same thing. They are used for showing that

a certain thing will happen or would have happened, if something else does not happen or had not happened first.

I met him as he was leaving his house; etherwise, else, or, I should not have found out where he lived. (—If I had not met him at that moment, I should not have found out, &c.

(c.) Conjunctions of Contrast.

(One statement or fact contrasted with another.)

15. But This is the chief conjunction of the class under notice. But is the opposite to and; for and implies that the joined words or sentences are of kindred meaning, while but implies that they are of different or contrasted meanings.

He is sad, but hopeful. (To say, "he is sad and hopeful" would be nonsense, because the state of sadness does not ordinarily co wist with one of hope)

16. Still, yet, but yet. These are used in the same

He is immensely rich; still, or get, or but get he is not contented

17. Nevertheless. This conjunction has the same meaning as those already named, but it is especially used for making a bread or pause after what has been previously said, and is therefore preceded by a semicolon, colon, or full stop. A comma is not sufficient. It may stand either at the beginning, or at the end of its own sentence, but is not often placed in the middle.

All men were against him; severtheless he kept his courage to the last

All men were against him: he kept his courage to the last

18. However. This is used in the same way as "nevertheless", but it almost always stands in the middle of its sentence:—

All men were against him; he kept his courage houseer to the last The same meaning can be expressed by certain phrases which might be parsed as Conjunctions or Conjunctional phrases:—At the same time, for all that, in spite of that, notwithstanding that.

All men were against him; at the same time (mfor all that &c.) he never lost his courage.

19. Whereas, while. These conjunctions mean "but on the contrary," and are used for balancing one statement against another by way of antithesis or contrast; and hence they are the opposites to "likewise," which is used for balancing one statement against another by way of resemblance or confirmation:—

Men of understanding seek after truth; whereas or while foolsdespise knowledge.

...Old Testament

20. Only. This word, (when it is used as a Conjunction, and not as an Adverb,) is a short and emphatic way of saying that some exception must be made to the previous statement:

(1,) Go wherever you like; only do not stay here.

(2.) He possessed every quality required for success; only he was slow in making up his mind.

21. Indeed, but. These go together as a pair. They emphasize the contrast between the first and the second statement.

The robbers indeed were caught and convicted; but nothing that they had stolen could be found.

22. There are certain words and phrases signifying Time or Place, which when they stand alone are simply Adverbs. But when they are used in pairs for the sake of contrasting one time with another time, or one place with another place, they may be included among Conjunctions, since they join one sentence to another by way of contrast.

 On the battle-field there was a dead body here (=in one place), and a dying man there (=in another place)

(2) On the one side all was quiet; on the other there was nothing but confusion and disorder.

- (3.) On the one hand he spake the truth; on the other he broke a secret. (This might be written:—" He spake the truth indeed, but in doing so he broke a secret.)
- (4.) Now (= at one time) he laughs, then (= at another time) he cries.
- (d.) Conjunctions of Inference or Causation.

 (One statement or fact inferred from another.)
- 23. Therefore. This is one of the chief conjunctions of the class under notice, and can be prefixed either to a word or to a sentence:—
 - (i.) He is an active and therefore a healthy man. (Here "healthy" is inferred as a consequence or result of "active." If he is active, it may be inferred or taken as a consequence that he is also healthy.)
 - (2.) He was found guilty of the crime, and therefore he was hanged. (Here two sentences are joined).

The other conjunctions of Inference mean much the

- (1.) He was ordered to come, and consequently (or in consequence) he came.
 - (2.) The boy is deaf, and hence (or whence=and hence) he is also dumb.
 - He is guilty; wherefore (=and therefore) he must be punished.
- 24. Then, so, so then.—These all imply the same thing as "therefore," but in a weaker sense.

Then, (which here must not be confounded with the Adverb of Time,) never stands as the first word in its sentence:—

We were told to start at four; at four o'clock then (=a weak sense of therefore,) we got up and went.

So, (which here must not be confounded with the adverb "so"=" in this or that manner") stands at the beginning of its sentence:—

We were told to start at four; so we got up at that hour and started.

So then. This phrase must also stand at the beginning of the sentence:---

It is time to go; so then we must not wait here any longer.

25. For. This conjunction is not less important than "therefore." Both imply an inference of one statement from another, but with this difference:—"Therefore" belongs to the inferred statement; while "for" belongs to the inferring one.

- (a.) Inferring Statement.All men are mortal;
- ... Inforred Statement, .. therefore he will die some day.
- (b.) Inferred Statement He will die some day;
- ... Inferring Statement.
 ... for all men are mortal.

Note.—The difference of place between "for," and "therefore" follows from the derivation of the word "therefore."
"Therefore:" there for."="for there."="for that reason."

So when we say "all men are mortal," we can add, "for that reason (=therefore) he will die some day."

Practice in Co-ordinative Conjunctions.

Insert Co-ordinative Conjunctions in the places indicated by-

- 1 Hear the opinions of other men, -form thine own judgment.
- 2. He was not surpassed—by you—any one else.
- We have—heard—read about that matter,—we are in total ignorance, and unable to form an opinion.
- 4. We see poverty-, and prosperity-
- 5. He blamed them for their rashness, -relieved their wants.
- The flowers have come out before the season; —I have never seen such a thing before.
- They were defeated indeed,—not diagraced.
- He came upon me very suddenly, —I had no time to run off hide.
- 9. You are not a man to quarrel, --you had better come to terms.
- 10. Glamis hath murdered sleep; -he shall sleep no more.
- The approach of the horsemen was now beyond doubt; —a cloud of dust was seen in the distance,—a tramping of horses' feet was distinctly heard.
- 12. In the discharge of his duty he was a kind-a just man.
- 13. The sound of a gun near at hand startled-my horse-myself.

- 210
- 14. Stone walls do not make a prison, -iron bars a cage. 15. The rain comes—goes in slight showers; —the heavy rains have
- not yet set in. 16. My own house-yours is built of good lime-burnt brick.-it
- will not crumble to pieces sooner than yours. 17. He has given each of you a sum of money; -he has left you all his books-all his gardens.
- 18. Julius Cesar was murdered in Rome by a gang of conspira-
- tors : -Julius Cosar was the first of the Roman Emperors. 19 He fell suddenly down in a fainting fit; several persons rush-
- ed forward to support him ; -- they were too late. 20. He has run away with all the money entrusted to him ; -what steps shall we take? Shall we search for him ourselves .-
- shall we employ the police? Civil wars have been marked-by the flerceness-by the stubborn pertinacity of the contending parties. .
- 22. Heaven and earth may pass away ;-my words shall never pass away.
- 23. My son last term was-idle-in bad health; -he was not promoted at the end of the term.
- 24. He paid off his debt in time : -he would certainly have been imprisoned for debt.
- 25. He declared he would never forsake his post :- he fled away at the first sign of danger.
- 26. Prince Azgid was good-natured, handsome, and clever ; -he was of rather a timid disposition.
- 27 This poor man must be off his head; -he laughs at one time and weeps at another.
- 28 The temple stands in the middle of a fine masonry tank, -a marble bridge leads up to it : -this temple was built by an ancient Hindu Raja.
- 29. Do not take any part-in his amusements-his plots; -you will get into trouble by being in his company.
- 30. They were determined to obtain his consent-by flattering.--by force,-by persuasion; -they never succeeded after all.
- 31. My father made me go to school regularly every day; -I should not now be so successful in life as I am.
- 32. He was so shocked at the sad news that he-spoke-wept,went away in silence,-was not seen again that day.
- 33. I hope you will remember to be just-generous to those who are dependent on you.
- 34. I must speak out ; -I shall blame myself ever afterwards.
- 35. He is a worthless fellow, possessed-of ability-industry-hon. esty-common sense ;-what sort of punishment can be inflict. ed on such a creature?
- 26. Give thine ear to every man, -thy voice to few.

- That was no dream; —I was wide awake at the time,—I had not even taken off my clothes for the night.
- 38. The hole is square ;—the pole is round ;—the latter will not fit into the former.
- 39. I expect it will rain to-day'; —the sky was very red at sunrise.
 —this is anually a sign of rain.
- 40. I have never read the book you speak of; —I cannot say that it is —dry—interesting.

\$ 3 .- Subordinative Conjunctions.

 ONE sentence is said to be subordinate to another, when it depends upon the other for its meaning, and does not make a complete sense by itself.

The Dependent sentence is that to which some Subordinatine Conjunction is westered.

The Principal sentence is that on which the subordinate or inferior sentence depends.

Principal. Conjunction. Dependent,
I will read that book. if you advise me.

I will read that book, if you advise me. Here the sentence "you advise me" is dependent on the Principal sentence "I will read that book," and the subordinative conjunction if joins the two sentences together.

First Sentence. Conjunction, Second sentence,

I will read that book, and you can read it too.

Here the second sentence "you can read it too," is of co-ordinate or equal rank to the first sentence "I will read that book," and does not in any way depend upon it. The two sentences

are joined together by the Co-ordinative Conjunction and.

2. What are the different modes, in which one sentence can be made to depend on another?

The answer to this question will show what are the different kinds of Subordinative Conjunctions.

The chief modes of dependence are nine in number —
(a) Apposition, (b) Inference or Causation, (c) Effect,
(d) Purpose, (c) Condition, (f) Contrast, (g) Comparison,
(h) Extent or Manner, (i) Time.

Hence there are 9 different kinds of Co-ordinative con-

junctions; that is, there are nine different modes in which one sentence can be made to depend upon another.

Besides these 9, there are a few other modes of dependence expressed by Relative conjunctions, which will be explained hereafter.

(a.) Apposition. This is the simplest mode of dependence that can be put into words. The Dependent sentence is preceded by that, and is in apposition to some noun expressed or understood --

> Principal. He told us (the fact.) We heard (the news, He wrote to us (to the effect.) that he had arrived safely.

Devendent. that rain had fallen. that he intended to come. that he would return soon,

He made a promise, The Dependent sentence in the above examples is in apposition to the noun in brackets; and this nonn might be either omitted or expressed; but according to English idiom it is generally omitted.

"But that," or "but." After verbs of "believing." provided they have a negative attached to them, we place "but that" or "but" in front of the Dependent clause.

I cannot believe but that, or but (=anything except that) he was absent. (Here the word but is a preposition signifying " except.") .

The "but" can be placed equally well before the Principal Verb; and thus the sentence might be written as below:

I cannot but believe that he was absent.

(I cannot believe anything except to believe that he was ab-

5. (b.) Inference or Causation. Here the Dependent sentence gives the cause or reason of what has been stated in the Principal Sentence :---

Principal. Dopundent. He will succeed, because he has worked hard-I will do this. since you desire it. ••• Let us go to bed, ••• as it is now late. Take what you can, ••• seeing that you cannot get all. He feels tired. rensidering that he had no sleen. ...

The words foragmuch as, inasmuch as, are Conjunctional Phrases, which have the same meaning as the foregoing, But these are seldom or never used except in a preamble for introductory sentence) to some book or legal document. Thus the Gospel of St. Luke begins with the following words :-

Forsemuch as many have taken in hand to draw up a narrative, &c. -New Test worth.

The word whereas introduces the preamble to every new law that is passed, giving the reason of the law and showing the evils to be removed by it. But in all other cases this conjunction is a co-ordinative, and not a subordinative one, and is used in the sense shown above in para. 19 as a conjunction of Contrast.

6. (c.) Effect. Here the Dependent sentence points out the effect produced by what is said to have happened in

the Principal Sentence :--

Principal. Dependent.

He went on talking. ... till he was quite tired. He worked so hard, ... that he was quite tired.

7. (d.) Purpose. Here the Dependent sentence mentions the purpose, for the sake of which some action is said to have been done in the Principal Sentence :---

Principal. Dependent.

Men work. ... that they may earn a living. He took medicine. ... in order that he might recover.

He took medicine. ... so that he might recover. He walked with a cane, ... lest he should stumble.

Observe that " may " or " might " is used after that, in order shat, and so that; but " should " is always used after lest. Lest expresses an end to be avoided. That, &c., expresses an end to be gained. Lest means the same as that not,

8. (a.) Condition. Here the Dependent Sentence points out the condition, on which the statement in the Principal Sentence is made :-

Dependent, Principal. . I will do this. ... if I am allowed.

They threatened to beat him, unless be confessed (wif he did not confess.)

We shall have fine crops, supposing that the rain falls in time. -

I agree to these terms, ... provided or provided that you will sign your name.

He gave a sudden start, ... as if he had been shot (==as he would have done, if he had been shot,)

You must leave the room, ... whether you wish it or no, (=you must leave the room under any condition whatever.)

 (f.) Contrast. Here the fact stated in the Dependent sentence is contrasted with that stated in the Principal sentence:—

Principal. . Dependent.

He is an honest man, ... though or atthough he is poor.

He will never succeed, however much he may try.

He was not contented, . . kowever rich he became.

He was not refreshed, ... sectoritated sing that he alopt long. Note 1.—The conjunction "however," when it is co-ordinative, stands alone, (see above pars. 18) and is generally placed somewhere in the middle of its sentence. But when it is subordinative it must be attached to some adverb as "much" or some adverber as "tich," and is always placed at the bestin-

> He is poor: he is an honest man, though. (Here "though"= but yet. He is poor: but yet he is honest)

10. "Though, yet"—These often go together as a pair. The word "yet" attached to the Principal Sentence gives additional emphasis to the contrast, and the Dependent Sentence is placed first:—

Dependent, Principal.

Though he punish me,
 Though he denies it,
 yet will I trust in him.
 yet no one believes his word.

Observe that a doubt or supposition is expressed after though " in example (1) and therefore the verb following is in the Sabjunctive Mood; but in example (2) a fact is expressed, and therefore the verb is in the Indicative.

 (g.) Comparison. Here some quality mentioned in the Principal Sentence is compared with the same or some other quality mentioned in the Dependent sentence. "As, as." These are the words used, when the compared qualities are said to be equal. (This represents the Positive Degree of Adjectives, Adverbs, and Participles.)

The Same Quality Compared,

He is as clever as I (am.)
He likes you as much as I (like you.)
He likes you as much as me (as he likes me)

Different Qualities Compared.

The sea is as deep as the mountains are high.

He is as good as he is wise. (= He is no less good than he is wise.)

12. "Than." This is used when the compared qualities are said to be unequal. (This represents the Comparative Degree of Adjectives, Adverbs, and Participles. The Superlative Degree has no Conjunction adapted to it)

The Same Quality Compared,

He is more (or less) clever than I (am.) He likes you more (or less) than I (like you.) He likes you more (or less)than me (he likes me.)

Different Qualities Compared.

The sea is deeper than the mountains are high. He is more wise than (he is) good. He is less good than (he is) wise.

But "than" is a Preposition, and not a Conjunction, when it is prefixed to the Relative Pronoun:

This is my son, than whom a more indicatrious boy does not exist.

It is also a Preposition in such a phrase as other than :—

He would read no books other than novels.

(Here other thans lifterent from, and "than," being equivalent to "from," here a preposition.)

216 INDIAN MIDDLE SCHOOL GRAMMAR.

13. (a) Extent or Manner. These words do not at all mean the same thing; but the two ideas are often mixed together in the Conjunction "as":—

Principal. Dependent.

Men will reap, ... as (=to what extent and in what manner)
they sow

I will treat you,... as (=to what extent or in what manner of kindness, &c.,) you treat me.

They did, . . s. (=to what extent and in what manner)
they were told

This is not true, . so far at I can find out.

He will do, ... according as he promused.

He chose the men, according as they were strong or weak.

As. so. These often go together as a pair, with the

As, so. These often go together as a pair, with t

Dependent Sentence standing first:

Dependent.

Principal.

As men sow, . so will they also reap.

14. (i.) Time. Here the Dependent Sentence describes the time of the event referred to in the Principal Sentence

Time simultaneous.

Principal, Dipendent

He called at the house, ... as the clock struck four, I will leave the room, . as seen as you open the door.
You can hold the horse, while I bring the saddle.

Truc bafore.

Principal. Dependent.

He worked very hard, ... before he succeeded.
You have much to do, ... re you can gain your end.
He remained a minor, ... watil he was 17 years old.

Time after.

Principal, Dependent.

He returned home, ... after he had done the work.

He has been very weak, ... stace he was taken sick.

Time how long.

Principal.

The sun will rise, ... while the world lasts.

No one can harm us, ... so long as we remain friends.

Relative Conunctions.

15. The Relative Conjunctions are - When, why, where, whence, whither, how, whether,

These are a sub-class of Subordinative Conjunctions.

- 16. They are called Relative Conjunctions for two reasons:-(1) because they are formed or derived from the Relative Pronoun "who" or "what," and (2) because in any sentence, in which they may happen to be used, they can be broken up into a Relative Pronoun and its Antecedent without altering in any way the meaning of the sentence.
- 17. The same words (omitting the last, "whether") can also be used as Interrogative Adverbs: (see Chapter VI. § 2, para. 17.) What, then, is the difference?

They are Adrerbs, when they are used for asking questions

They are Conjunctions when they are used for joining sentences.*

18. The modes of dependence denoted by these conjunctions will be seen from the following examples:-

Time.

Principal.

Dependent.

He remained silent. when : = as soon as) he heard that. He feels sad.

whenever (=at any time in which) he thinks of his lost friend.

Contrast.

Principal. Dependent. He sold that house, when (= although) it was the best he had,

[&]quot; In "Hints on the Study of English " by Mesers. Rowe and Webband in certain other grammars, these are called Conjunctive Adverbe. Such a name appears to me unsuitable and likely to create a confusion of ideas in the student's mind. These words, when they join sentence, are not "adverbs" at all, but Conjunctions pure and simple. They cannot be classed as "adverbs" in any sense, except when they are used for asking questions.

Purpose. Dependent. Principal. We never understood, tohy (=the reason for which) he

acted so. Place.

Principal. Dependent.

where (=in a place in which) we We find flowers. expected only weeds.

We find flowers. tokenever, (in any places in which) we wander.

He did not tell us. whence (=the place from which) he had come.

> Respect. Dependent.

He did not tell us. where (=the place to which) he was

going. We cannot perceive. where (=in what respect) the difference lies.

Manner or Means. Principal. Dependent.

Let me ask you, (=by what means or in what how manner) you did this.

State or Condition.

Principal.

Principa". Dependent.

Let me ask you. kom (=in what state of health) you are to-day.

Doubt.

Principal Dependent.

He wished to know, whether (or if) he was ready to start.

Note 1 .- The conjunction "where," when a Preposition is appended to it, becomes a Relative Pronoun.. Thus wherein =in which place; whereof=of which thing; whereat=at which thing; whereabouts-about or near which place; whereto-to which place; whereon on which thing; whereout of which thing ; wherefore for which reason,

Note 2 .- A Relative Conjunction can often be substituted for a Relative Pronoun, as in the following examples:---

Ten o'clock is the hour soles we must start. Ten o'clock is the hour in solvel we must start.

Tell me the reason why you left us.
Tell me the reason for which you left us.

This is the home where we once lived,

This is the house as solick we once lived.

Practice in Subordinative Conjunctions.

Insert Subordinative Conjunctions in the places indicated by-

- The wind beat against the house,—a part of the roof was blown off.
 The bulls, —they stood together, were a match for the lion; but

 they separated from each other, they fell an easy prey.
- Tell me candidly—you like my composition, and—you think it shows signs of future promise.
 - 4 No sooner had he gone to bed, -a telegram was brought in.
- Klephants are not full-grown, they are 50 or 60 years of age.
 It is of no use for me to shoot. I am sure to miss the mark.
- It is of no use for me to shoot, —I am sure to mass the mar
 What can be gained in a place —every one is poor?
- 8. This dreadful thought pursues me-I go.
- IIe was received with respect—he went and—he began to speak.
 Remain—thou art. —I return.
- 11. Be ye wise—serpents, but harmless—doves.
- Be ye wise—sorpents, but harmless—doves.
 The river had risen so high, —we could not cross it even in a boat.
- 13. Present evils are sometimes less distressing-expected ones.
- 14 More is meant by that man's words-meets the ear.
- The more we study the human mind, the less able are we to understand—it came into existence or—it had its source.
- 16 I am quite as much ashamed —vou are.
- 17. I cannot fear any evil, —thou art near.
- 18. I will keep it by me night and day, —any harm should come to it
- We are glad that he has succeeded so well, —he has thoroughly deserved it.
 His success is the more creditable. —he had no help from any
- one, —many offered to help him.
- 21. At length the moon arcse, —It was almost hidden by clouds.
 22. They shut up all the shops, —the travellers might not be able to
- buy any thing or take any thing by force.

 23. Some men est—they may live; others live—they may est.
- 24 I am ready to start, —you desire it,
- The terrified women would have fied more quickly—they did,—they had not been burdened with baggage.
- 26. We can be happy, -we are poor, -we are contented.
- 27. I shall die of this desease. -I first die of hunger.
- 28. You have lied so often, -no one will trust you, -you speak the truth.
- 29. I will not rise from my seat, -I am bidden, "
- 30. He was forced to get up, -he liked-not.
- On first coming here, —I was quite honest, every one so distracted me, —for a long time I found it difficult to live.
- He gave the boy a prize, not—he had actually earned one, but—he might he induced to work harder next term.

220 INDIAN MIDDLE SCHOOL GRAMMAR.

- 33. Agriculture is the foundation of all wealth, -food is raised by this means : and no one, -clever he may be, can live without food.
 - 34. Past errors may be regretted, but past moments, -they have once fied, are fied for ever and cannot be recalled. 35. The savages, -they saw the ship approaching their island,
 - believed-it was some great animal moving on the water, they had never soon a ship before.
- 36. The peasant grows pale, -he sess a cloud of locusts approach
- 37. I do not doubt-you will succeed in time, -only you will per-
- severe and trust-your labours will be at last rewarded, 38 She turned away in disgust, -she was unable to bear the sight
- any longer. 39. I will pay you down all that you ask, -you sign a receipt on
- a stamped paper. 40. They were willing to commence work, and begged-they might
- be ordered to do so, -they were still weak from the recent attack of fever
- 41. The robber fied, he heard the shouts ; but he escaped, -any one had time to see his face
- 42. Seed must be sown, -it will germinate; and flowers must bloom for some time, -they can turn into seed
- He walked on, -he was so tired-he could walk no further; then he sat down and waited, -food was brought to him.
- 44. Do-you are told; and then no one can blame you, -a mistake has been made

CHAPTER IX.—INTERJECTIONS.

 An Interjection, properly speaking, is not a Part of Speech, since it has no Grammatical connection with any other words in the sentences.

It is merely an exclamatory sound, thrown into a sentence to denote some strong feeling or emotion:— (Jou) Hurra | huzza | bravo | heigh-ho|

(Grat) Ot shi sleet slack!

(Ridirule.) Ha! ha!

(Disgust) Pugh | puhaw | pish | pooh | tush !

(Attention) Lo! hark! hush!

2. There are certain phrases, which are used like In-

terjections, to express some strong feeling or emotion :--

For shame (=alas, on account of shame!)

Alack a day(=ab, lack or loss on the day!)

Hatt, all hast, (-be hale or healthy.)

Good-bys (-God be with ye !)

Well done ! Capital ! Bless my soul !

Bad luck to it ' D dear m: (-O dear or costly for me!) good

grecious ' good heavens '
There are certain constructions, which besides being

used in an Interjectional sense to express some feeling of the mind, give some explanation as to the source or character of the feeling:—

(a.) (Infinitiv Mood.) Foolish fellow! is think that he should have behaved so bally! To suppose that he could act thus with impunity! (See Chapter V, § 6, para. 8.)

(b.) (Adorrbusi exclamation.) How very kind of you to have remembered me after so many years of absence! (Here the Interrogative Adverb is changed into an Exclamatory one.) (c.) (Pronounce contemators.) What a sad thing it is, that the research of so middled in the wind of this.) (The same the contemators of the contemators).

c) (Protourned experiments). When a sad thing it is, that he was cut off so suddenly in the prime of life! (Here again an Interrogative Pronoun is changed into an Exclamatory one)

Ah what a life were his ! how sweet! how lovely !

-Shakspears.

(d.) (Subjunctive Mood.) If I could only gain that prine!

Would that I could gain that prine!

222 INDIAN MIDDLE SCHOOL GRAMMAR.

4. Sometimes in a rapid or exclamatory sentence an-Auxiliary Verb with its Subject is left out, and only the main verb is expressed:—

Why dream and wait for him longer '

- Longfillmo.

(-Why dost thou or why do see wait for him longer ?)

Note.—The elliptical use of the Infinitive Mord in para, 3 of the Subjunctive Mord in para, 3, and of the main verb in para, 4, is quite in keeping with the rapid and fragmentary mode of expression pseuliar to a sudden exclamation, and with the definition of an Interjection given in para, 1

CHAPTER X.

THE SAME WORD USED FOR DIFFERENT PARTS OF SPEECH.

BEFORE leaving the Parts of Speech and going on to the subject of Syntax, &c., it will be as well to recapitulate the different instances in which the same word can be used sometimes as one Part of Speech and sometimes as another.

The examples here given chiefly relate to Prepositions, Conjunctions, Adverbs, and Adjectives. Beside these there are a great many examples of the same word being a Noun or a Verb according to the context. Such examples are so numerous, and at the same time so obvious, that it was net thought necessary to mention them in this summary.

About. P.co. He walked about the house.

Adr. He is walking about.

Above. Prep. The sky is above the earth.

Adv. The book named above was lost.

Across. Prep. The house stands across that field.

Adres b. He swam across.

Around. Prep. They walked around the field.

Adr. Many persons were standing around.

All. Adr. of Quantity. He ate all the bread.

Indef. Num, Adj. We must all die some day,
Adj. used as Noun. We lost our all on that day,
Adj. All bloodless lay the untrodden snow.

Along. Prep. We walked along the bank of the river,
Adv. The ship is going along at a great pace.

Adj. of Quantity. Have you any bread?

Adj. of Number. Are there any persons present?

Adv. We must stop and rest before going any further

As. Conj of Extent or Manner. Men will reap as they sow.

Conj. of Cause. As the rain has fallen, we shall soon

see the grass spring up afreeb.

Relat. Pronoun. He is not such a fool as he looks.

Relat. Pronoun. As many men as came were caught.

Adv. I condemn you as a judge, but as a man I pity

Part of Prep. I will enquire again as to that matter. N. B .- In the phrase " as regards," the " it " has been drop-

ned. "as royards that matter " = as it regards, &c. After. Prep. He came after a few days.

Adv. He came a few days after or afterwards,

Coni. . We will go after you have dined.

N. B .- When after is used to qualify a noun, it is an adverb compounded with the noun, and must be joined to the noun by a hyphen; as, "He will be remembered in after-ages," Here "after-ages" is a compound noun,

Ralow. Pren. He stood below me in the class.

Adv. There is a world below and a world above. Before. Prep. A bogger is standing before the gate.

Adv. I never saw such a thing before.

Conj. He took the book, before he had paid for it.

Besides. Piep. He gave them money besides advice. Adı. There were four men besides (in addition.)

Rehind. Pren. The man stood behind the door.

Adv. You should walk behind, and not in front.

Between. Prep. There is a hare between the two bushes, Adv. The air touches the earth, and there is nothing

between. Reneath. Pup. He was buried beneath the sod.

Adv. There is the sky above, and the earth beneath.

Beyond. Prep. They shot beyond the mark. Adv. There is nothing beyond,

By. P.ep. By whom was this done?

Adv. The horse was going by.

N. B -When by is used to qualify a noun, it is an adverb compounded with the noun, and must be joined to the noun by a hyphen. "Let us enter this by-path or side-path." Here "by-path" is a compound noun,

Better. Comp. Adj. My book is a better one than yours.

Comp. Adr. You are working better to-day. Adj. used as Noun. Do not despise your betters. · Both, Def. Num. Adj. Both the men have arrived.

Cons. Co-ord. He is both a fool and a knave.

But. Nog. Relative. There was no one but pitied (who did not pity) the lame horse.

Adr. There is but (only) one man present,

Prep. Who could have done this but (except) him? I cannot but trust in your word.

I cannot believe but that you are lost,

(I cannot believe anything except that, &c.)

Conj. Co-ord. He is a man of common sense, but not learned in books.

Conj. Subord. Perdition catch my soul, but I love thee .- (Shakeneare) (May perdition catch my soul, if I do not love thee.)

Down. Prep. The monkey ran down the tree.

Adr. Let us sit down here.

Either. Distrib. Adj. He is ruined in either case.

Conj. Co-ord. He is either a fool or a knave. Eine. Adr. We could not catch any one clee besides

this one.) Conj. Co-ord. He has some real sorrow; else he would not weep as he does.

Enough, Ady, of Quantity. He has eaten enough bread. Ady, of Number. We have enough loaves.

Ady, used us a Noun. He had enough to do.

Even. Adj. The ground here is quite even (level.)

Cony. Even a king must obey the laws. (Not only ordinary men, but kings also must obey the laws.)

Except Prep. All except one agreed to this.

Cons. Subord. Ye shall all perish, eccept ye repent. Verb. No one can be excepted from this rule.

First. Adj. The first man who spoke was yourself. Adv. He was quite young when I fust saw him.

For. Prep. He has been ill for a long time past, Conj. Co-ord. His death was much lamented : for he was a good man.

Half, Adj. of Quantity. Half measures do not succeed, Adi, used as Noun. One half of his task is now done. Adv. of Quantity. He was half dead with fear.

How. Inter. Adv. How did you do that? How is he today?

Relat. Conj. I asked him how he did that.

In. Piep. You will find him in the house, Adr. Come m and take a seat.

Least. Adj. of Quantity. Put the least burden on the

wenkest ass. Adr of Quantity. That ass is the least strong of all.

Less. Adj. of Quantity. Of two evils choose the less.

Adr of Quantity, I love Casar less than my country. Little. Adj. of Quality. A little matter may give much

trouble idi, of Quantity He has esten a little bread

Ade, of Quantity Let us wait here a little.

Adr. used as Avan. Man wants but lettle here below. Long. Adj of Quality. You have told me a long story.

Adn of Time, He waited long. Last 4dj. He was the last man to leave the room,

Adv He was very ill, when I last saw him. idj, of Quantity. He has eaten more bread than More

you. Adj. und us Aoun. Wore has been done than was expected.

Adr of Quantity I live him more than (I like) you-Adi of Number, More men came to day than yesterday.

Adr. of Number. I saw him once more.

Most. Adj of Quantity. Most wool comes from Australia. Adv. of Quantity. I liked him most.

Adj of Number. Most men work for their living. Much Adj. of Quantity. He has wasted much time.

Adv. of Quantity. I am much pleased with your conduct.

Adj. used as Noun. You will not get much from me Neither. Adj Distrib. I agree with neither side,

Conj. Co-ord. Neither you nor I can do that, Near. Adv. Stand near, while I speak to you. Prep. There is a fine tree near our house.

Adj. He is a near relative of mine.

Neads. Valb. The earth is very dry and needs rain. Adv. He must needs know the reason of this.

Noun. Our needs or wants are few.

Next. Adj. I will wait for you at the next house. Pren He stood nest use in the class.

Adv. Who comes neet?

No. Adi. of Quantity. He has eaten no bread.

Adi. of Number. No men have been here to-day. Adv. 1 answered no to his question.

Adv of Quantity. He is no less clever than you are. Notwithstanding. Prep. He wasted his time notwith-

standing all the warnings given to him. Adv. He has gained his point, notwithstanding.

Off Prep. He fell of his saddle.

Adv. The robber ran oil and was not cancht.

On. Prep. I place my hand on the table. 1dv. The rains will soon be on.

One. Def. Num. Adj. There is but one rupes left. Inder. Per. Pron. Our is apt to waste one's time Inder. Donon. Pron. Your horse is white; mine is a black one.

Only. Adj. The only dog I had was stolen.

.1dr. I heard of this only yesterday,

Cons. Cound Take what you like ; only keep silence. Other, Adj. D mon. There is another and a better world.

Adi, wel as Noun. We should pity the sorrows of others.

Over. Fig. He is now over ten years of age. Ado. The holidays are now over.

Out. Part of Prop. He paid for that out of his own pocket. Adv. The secret is out, and we shall be caught.

Past. Prep. It is now pust 4 o'clock p. m.

Adv. The cloud is driving past.

Round. Adj. A square thing does not fit into a round hole. Prep. Draw a circle sound a given centre.

Adv. The flies are flying round and round, Verb. Vasco de Gama first rounded the Cape of Good Hope.

Noun. Men must go their daily round of duty.

INDIAN MIDDLE SCHOOL GRAMMAR.

Save. Verb. You will save him, if you try.

Prep. All men save one were frightened.

228

Since. Prep. I have not seen him since Monday last.

Adv. I took this house four weeks since,

Conj. Subord. We must trust you, since you are speaking in earnest.

So. Adv. of Quantity. Do not walk so fast.

Coni. Co-ord. The time is up; so we must start.

Some. Adj. of Quantity. Will you have some bread.

Adj. of Number. Some men escaped, but not all.

Adv. used as Adv. He died some (about) ten days ago.

Somewhat. Noun. I have somewhat to say to thee.

Adv. Quantity. I am somewhat tired of your jokes.

Such. Part of Relat. He is not such a man as I expected.

Indef. Dem. Adj. He came to me on such a day.

That. Def. Dem. Pron. You are a coward; I am not such.

That. Def. Dem. Adj. I am no admirer of that book.

Def. Dem. Pron. The light of the sun is brighter

than that of the moon.

Relat. Pron. The book that you gave use has been

stolen.

Conj. [Apposit. He heard that you had come.

Subord. (Purpose. We must eat that we may live.

Then. Adv. of Time. He was better then than he is now.

Conj. Co-ord. I see, then, we ought to start at once.

Conj. Co-ord. I see, then, we ought to start at once.

Than. Conj. Subord. I like this book better than (1 like)
that.

Prep. These workmen, than whom I have never seen men more industrious, have left me. He was fond of any kind of drink other than wine.

To. Prep. This fruit is exactly to my taste.

Adv. Walk to and fro. He fainted, but soon came to.

This. Def. Dem. Adj. Have you seen this man before?

Def. Dem. Pron. Tea is better than wine: this intoxicates, but that cheers without intoxicating.

The. Def. Article. The ass is a dull animal.

Rel. Prov. 2 he more, the merrier.

There. Introd. Particle. There is no time to be lost, Adr. Place. We shall arrive there soon. Then. Conj. Co-ord. Well, then, you know what I mean.

Adv. Time. He was then 12 years old.

Till. Prep. We cannot go till sunset.

Conj. Subord. Wait here, till I return.

Conj. Co-ord. We too must expect to die some day.

Under. I'rep. The dog slept under its master's bed.

Adv. Quinine will soon bring the fever under.

Up. Prep. The monkey ran up the tree.

Adv. The mist is rapidly rising up.

Well. Adv. of Quantity. He has done the work very well.

Adv. used as noun. Leave well alone.

Conj. Co-ord. He has finished his work in time; well.

I did not expect it of such a lazy man:

What. Inter. Pron. What did you say? what house is that?

Compound Rel. Pron. I do not know what you are driving at.

Ellipt. Adv. What with illness and losses, the man is almost rained.

When. Inter. Adv. When shall we see you again?
Rel. Con;. Let us know when you will return.

Where. Inter. Adv. Where are you living now?

Rel. Conj. I know the house where you live.

Which. Inter. Pron. Which of the books will you have?

Rel. Pron. I took the book which I liked best.

While. Noun. We must stop here a little while.

Conj. Subord. While the cat is away, the mice will

why. Inter. Adv. Why did you not obey orders?

Rel. Conj. I wish to know why you did that. Yet. Conj. Co-ord. He is poor, yet honest.

Adv. of Time. He has not yet arrived.

Within. Prep. As he was not well, we stayed within doors.

Adv. If you go to the house, you will find him within.

Without. Prep. I cannot do this without your help.

Adv. of Place. He stands without and is waiting for
you.

CHAPTER XL-SYNTAX.

- N. B.— Some of the rules given in this chapter have been incidentally alluded to already in previous chapters. It has been thought batter, however, to bring them up again and include them in the same summary with the rest.
- § 1 —General Rules on the government of Words.
- 1. A VERE must be of the same Number and Person as its subject or nominative case.

This is called a concord or agreement. Some example of this concord must occur in every sentence that can be formed.

- (σ) If the subject is Singular, the verb mi <t be Singular; as, Rain is falling.
- (b.) If the subject is Plural, the verb must be Plural; as, Rain-drops are falling
- (c) If the subject is in the First Person, the verb must be in the First Person; as, I love. We come.
- (d.) If the subject is in the Second Person, the verb must be in the Second Person; as, Theu lovest. You come.

 (c) If the Subject is in the Third Person, the work must be
 - If the Subject is in the Third Person, the vork must be in the Third Person; as, He loves. The teacher has come.
- Whenever an Infinitive Mood, or a Verbal Noun, or a phrase or sentence stands as Subject to a verb, the verb is in the 3rd Person, Singular.

To err is human ... Infinitive.
Sleeping grits rest to the body ... Verbal News.
How to do this new unknown ... Phone ...
That we must all the is certain ... Servinge.

Make the werbs agree properly with their subjects in the following examples:—

When you was here last, you was very fond of reading. The pleasures of life vanishes, when we becomes old and infirm. Thou would have seen the horse, if it had some towards us. School is breken up and the boys is playing at cricket, The Taj Mais is Aigm have soles great many year. You is not the man that I want. I am sill as fond of books as when you was here before The movement of most quadrupeds are very swift. You will be rowarded with a prize for your industry. The following plans has been settled. The origin of finish manners and customs are unknown. There's on man in the room at this time. To know the satingsis, minerals, and fruits of a country are necessary to a knowtedge of its hatery. Whiling two or three bound ddly in the open air give health and strength the body. This was the work of the country of the country of the origin of the sating of the country of the sating was such as the country of the origin of the sating was the sating the country of minerals.

3. Two or more Singular Nouns, when they are joined by and, require a verb in the Plural.

A man and his wife have come here asking for work.

Your hore- and mine (=my horse) are both at the door.

To this rule there are two exceptions:-

(a.) If the two nonns joined by and refer to the same thing or person, the verb is Singular, and not Plural, as,

The great scholar and post is dead.

Here "scholar" and "poet" refer to the same man, and the sentence might have been written:—

The man, who was a great scholar and a great poet, is dead.

Note. — When the article is mentioned only once, as in the sen-

This shows that only one pers m, (and not two,) is intended, and that hence the verb must be singular.

But if the article is monitioned twice as in the sentence "the scholar and the poet,"—then two distinct persons are intended, and the verb following must be in the plural number; as,

The scholar and the post are dead.

(b.) If the two nouns joined by and are regarded as a single object or notion, the verb is singular; as,

Truth and honesty as the best policy. Curry and rice 1024 his favorite food. Slow and steady some the race.

Here" truth and honesty, "the practice of truth and honesty, and hence the verb following is singular. Similarly "ourry and rice" the food consisting of curry and rice or the mixture

of curry and rice. "Slow and steady"—the plan of being slow and steady.

 Two or more Singular Nouns, when they are joined by "or" or "nor," require a verb in the Singular,

Either the man or his wife has been here.

Neither the man nor his wife Ass been here.

The verb is Singular, because "or" means ane of two things and "nor" means neither of two things. The full sentence would be "either the man has been here, or his wife has been here," but for the sake of shortness the verb is mentioned only ones.

N. B.—If one of the Nominatives is in the Plural Number and the other in the Singular, the verb must be in the Plural, and the Plural Nonn must stand next to it:—

Either James or his brothers are here.

5. When two Singular nouns are joined together by as well as the verb is Singular:—

He as well as his brother has gained a prize-

The verb is Singular, because it is expressed for one of the nouns and understood after the other. The verb does not stand tor both nouns simultaneously.

He has gained a prize, as well as his brother (has gained a prize)

0. When two or more Nominatives, not of the same person, are joined by and, the verb is in the first person rather than the second, and in the second person rather than the third.

James and I are (-we are) great friends.

But when two or more such Nominatives are joined by or or nor, the verb agrees in person with the one nearest to it:—

Either James or I am at the top of the class. Either you or James has done it.

Neither James nor you were present.

Correct the errore in the verbs in the following sentences: —

Neither my son nor I has ever been on board a ship. You and your friend was very regular students. Both James

and I has decided on doing this. Bither your brother or you is chosen for this work. He and you has done much harm. Bither you or your class-fallow has committed this fault. Has James and you decided on going away? He and I am the lowest boys in the class.

- A Collective Singular Noun is followed by a Plural Verb, when the individuals of the group are referred to rather than the group itself:—
 - The jury, (i e., the individual jurors, or men of the jury), were divided in their opinion, and could not agree as to the verdict.

(2.) The jury (as one body) selected its speaker.

- (1.) The multitude (individual men and women) rise from their sents and shout applause.
- (2.) This multitude (as one body) is too large to be contained in so small a building.
- A noun in Apposition with another noun, or with a pronoun, is in the same case with it.

One noun is said to be in Apposition with another-when it refers to the same object.

- (1) Alevander, the king of Macedon, conquered Pertia.
 (Here "king" is in the Nominative case, because "Alexander,"
 - (the subject to the verb "conquered"; is in the Nominative case.)
- (2) Persia was conquered by Alexander, the king of Macedon. (Here "king" is in the Objective case, because "Alexander" is in the Objective case after the Preposition by.)

Note (a_i)—A noun is sometimes placed in Apposition to a sentence:—

The men who were taken prisoners were sold into slavery.—a

proceeding opposed to the custom of every civilized nation.

Note (b)—A sentence can be placed in Apposition to a norm

expressed or understood. This occurs, when the sentence is
introduced by the conjunction that. (See Chanter VIII. § 3.

para, 3.)

He made a promise, that he would return soon.

He told us (the fact), that rain had fallen.

Here the sentence "that he would soon return" is in appesition with the supressed noun "promise"; similarly the sectence "that rain had fallen" is in apposition with the senderstood morn "fact."

294 INDIAN MIDDLE SCHOOL GRAWVAR

Note (c) -A sentence can be in Apposition to the pronounit. (See Chapter IV, § 3 para 4)

It is centain that we shall all die

(It, namely that we shall all die 1, certain)

Similarly a verb in the Infinitive mood can be in Apposition to if

It is sad to see you so sick

(It, namely to see 3 M so sick 14 cad)

Note (d)—When one noun is in Apposition with another noun in the Posses we case, the case endings is added to only one of the nours—

Herolmirrie i his bi th rli this swife (Here liother' is in apposition with I hilips)

Milton's fame as a 1 t stands very high

(Here poet is in apposition with Miltons,

Acte (c) - 1 Distribut we all ctive or phiase in the Singular number is often jut in Apposition with a noun or pronoun in the Plural number

The pris ners accuse 1 each other

(Here (ach is in significant with prisoners, and loth are

Subjects to the stab accuse 1)
fies v nt avay one / mast 1 so vn l in acc

(Blued) (Singular) i mappositin with they'

K ite (f')—A (ollective noun in the Sing i^{1} is the in apposition with a (number noun in the Plural –

The Robilles a lathan to b came and settled in the r In

dia
(Hrie trile is manuscrition with Robillas)

9 A noun or pronoun followed by a participle is in the Nominative Absolute provided that it neither governs nor is governed by any other word in the sentence (See

Chapter V, § 7 para 5)

The vorage was rajid then nd being fatou able
Beather por if n j we shall most again this evening.
We must now give up the point ** ceres linj h peles
He have ng de lare! lis wish they all departed

The toun b ing captured the inhabitants fled

Absolute or not --

My rable ended 1 returned —Conver

In the following sentence, show whether the Participles noted are

A lucrative off ce in the gift of the President chancing to fail

vecant, many conceived that this gentleman would have no difficulty in obtaining it, thinking that the President could never refuse such a favour to one of his most intimate friends.

Note.—When no noun or pronoun is expressed, the participle is called an "Impersonal Absolute." (See Chapter V, § 7, para. 6.)

Supposing this to be true, what follows?

10. A noun or pronoun, when it denotes a personor thing addressed, is said to be in the Nominative of address:—

Friends, Romans, countrymen, lend me your ears.

—Shakspears,
Mourn him, thou sun, great source of light.

Restore the dead, thou Seg '

-Mrs. Hemans,

-Sent.

Note. ... The Nominative of address is sometimes called the Vocative,

11. To every adjective or participle (=verbal adjective), there must be some noun or pronoun, expressed or understood, which it is intended to qualify:—

Nous or messed

The best men rise to the top.
He is a great scholar.
That man beloved by all is dead.
A faded rose has no secont.
When with board above to see the contract of the second second.

His withered check and tresse gray Seemed to have known a better day.

Noun understood.

Blessed are the merciful (men)

The sea gave up the dead (men)

He clung to the just (quality) mjustice.

The last (Saxon) of the Saxons.

The whole (thing) is greater than its part.

That is a fine horse of yours (=of your horses)

Note.—Adjectives can be "used as nouns": but this is only because some noun has been understood. The whole subject is explained in Chapter III, \S 6.

12. An adjective or participle (verbal adjective.) standing as the Complement to an Intransitive verb, or to a Factitive verb in the Passive voice, qualifies the subject not directly, but through the medium of the verb that comesbatuses them.

Adjective as Complement.

All things were jouful on that day.

--Souther.

And seast and small the booty proved.

The butterfly is glancing bright.

-Spencer.

He knew not that the chieftain lay

-Mrs. Hemans.

I'nconscious of his son.

-Mrs. Homans.

Participle as Complement.

The thief was caught stealing a horse.

He was found strepping soundly, He sat down reading a book.

He sank into the grave unknown and forgotton.

Note.—The words in Italies are called Subjective Complements, because they relate to the subject, that is they qualify the subject through the worb. (See Chapter V, § 1, para. 13, and § 2, para. 5.)

13. A noun, standing as Complement to an Intransitive verb or to a Factitive verb in the Passive voice, is in the same case as the noun or pronoun going before.

He was considered to be a scholar.
 They considered him to be a scholar.

In (1) "scholar" is in the Nominative case, because the noun or pronoun going before, (namely &s,) is in the Nominative case. In (2) "scholar" is in the Objective case, because the boun or pronoun going before, (namely him,) is in the Objective case.

Point out the case of each of the nouns noted below :-

He was proclaimed king.

That boy seems an industrious echolar.

They expected the boy to be an industrious scholar. Cromwell was called *Protester*, but was king in fact.

Cromwell wished himself to be crowned king, That building appears to be a eastle.

A brave man is never seen to be a countd.

They ordered him to be appointed judge.

They ordered that he should be appointed judge.

My brother is considered a good workman.

They considered my brother to be a good workman.

Note.—It might be said that the noun, which stands as Complement, is indirectly in apposition with the noun going before, through the medium of the verb that comes between them; and therefore by rule 8 it is in the same case with the noun (or promoun) going before.

14. A noun may be used as an Adjective to qualify another noun. (See Chapter III., § 2, para. 4.)

Each horseman drew his battle blade,

—Campbell.

The night cloud had covered.

-- Campbell.

The wealth of Capua's marble halls.

- Macaulay.

It was a summer evening.

—Souther.

The last of all the bards was he.

Who sung of bolder chivalry.

-Scott.
What beckoning ghost along the mosnlight shade.

-Fopt.

The night winds come and go, mother, upon the meadow grass.

—Tennyson.

In general, these streams lose themselves as little threads of

water on the hill sides.

— Tyndall.

Fitz Stephen, a see captain, came to the king and said.

— Juckens.

Note. — When a hyphen is put between the two nouns, the

whole can be parsed as a Compound noun. But when there is no hyphen, the first noun can be parsed as "a noun used lite an adjective."

15. An adverb qualifying a verb can be changed into an adjective qualifying the subject to the verb. (This occurs only in poetry.)

And furnous every charger neighed.

Dark lowers the tempest overhead.

- Longfellon .

And featless there the lowly sleep.

We frolic to and fro.

As free and blithe, as if on earth. Were no such thing as wee.

-- Keble.

- Mrs. Hemans.

How journd did they drive their team afield,

How howed the woods beneath their sturdy stroke.

—Grav.

They neither toil nor spin, but careless grow.
--Thomp

I saw him, with that hly cropped, Impatient swim to meet.

-Cowper

Slore rises worth, by poverty depressed.

And slow and sare comes up the golden year.

— Tennyana

This substitution of an adjective for an adverb is not a poetic license, (as it has been explained to be in some books,) but is in conformity with strict grammatical principles. The explanation is as follows:—

An adjective and an adverb are both qualifying words; the former qualifies a norm, and the latter a mib. In lieu of an adverb qualifying the mib, an adjective qualifying the subject to the web can be easily substituted.

But observe, an adjective cannot be thus substituted for an adverb, except in connection with some revb. For instance, we cannot say "uncommon tall" for "uncommonly tall"; we cannot say "we did a prevaluat foolish thing" for "we did a prevaluat foolish thing." This is not only a vulgarism, but it is had grammer.

In older English, however, the substitution of an adverb or an adjective for the sake of quiltings another adjective sometimes cocurred. Thus in the New Testament we have "Rejoice and be exceeding glad." Here the adjective exceeding qualifies the adjective excellents.

16. A noun or pronoun governed by a Transitive verb or by a Preposition is in the Objective case; as,

A flash of lightning struck hem.

A flash of lightning struck the or. You should not laugh at me so much.

Note.—You can parso me either as the object to the proposition "at," or as the object to the Transitive Verb "laugh at:" for the Intransitive Verb "laugh" is made Transitive by the preposition "at" being added to it. (See Chapter V, § 1, para. 15.)

They loved each other much.

Is in this sentence "each" (a Distributive Adjective) is in

apposition with "they," and is therefore in the Nominative case : "other" is in the Objective case to the verb "loved."

They loved-each loved-the other much.

- 17. An Intrausitive Verb may be followed by a Cognate object, that is, an object implied in the verb itself.
 - (1) He fought a good fight.

(2) He ran his own course

(3) He breathed his last (breath.) (4) He fought it (= the fight) out to the sud.

Observe that m (1) the Cognate noun is formed directly from the verb, in (2) it is of a meaning nearly similar to the verb. in (3) it is understood after the adjective "last," and in (4) it

is represented by the pronoun " it." All of these have been explained in Chapter V. & 1_ paras 16-18.

18. When two objects are governed by the same verb. one is called the Direct object relating to some thing, the other the Indirect object relating to some person. (See Chapter V. § 1, pars. 9.)

Give me that book He taught them English.

Note 1. - The Indirect object appears to have arisen from the habitual omission of the preposition to, or from.

Give me (=give to me) that book

I asked hun (= asked from him or of him) a question.

It is still convenient sometimes to express the to or the from for the sake of contrast : -

Give me that book

Give that book to me, and not to him,

They asked him a question They asked a question from him and not from you.

Note 2.-Similary the Dative of Interest, which is more remotely indirect than the preceding, appears to have arisen from the omission of for. (See Chapter V. & 1, para, 10.)

Prick me Bullcalf, till he rear again.

-Shakepeare. Here me means "for me," "for my amusement," "amuse me by pricking Bullcalf, till he roar again."

19. A verb, which takes two objects in the Active voice. can take one object in the Passive. (See Chapter V. 5 2 para. 4.)

INDIAN MIDDLE SCHOOL GRAMMAR.

(1.) Indirect Object of the Passive Verb.

Actine Vaine.

240

They lent me ten rapees. He taught them English. He promised me his help, I gave the boy a book, They lent me ten rupers,

Passive Voice.

Ten rapees were lent my by them. English was taught them by him. Help was promised me by him, A book was given the boy by me. I was lent ten rapees by them.

(2.) Direct Object of the Passive Verb.

Action Voice.

Passive Voice.

He taught them Eaglesh. He promised me his help, I gave the boy a book,

They were taught English by him. I was promised help by him. The boy was given a book by me

- Hool

20. A noun used in the sense of Space, Time, Price, Degree, Manner, or placed after certain Adjectives, or Interjections, is said to be in the Objective Case.

(a) Objective of Space :—

That house is two males distant from ours.

Our house is twenty feet high, thurty (feet) long, and thirty (feet) broad. He will arise, though he should be

Ten thousand fathoms deen. Virginius led the maid a little space aside. -- Mocauloy.

(b) Objective of Time :-He goes to the hills every hot season. He stays three months in the hills.

I shall start this day week (=after a week from this day) He is working day and night.

(c.) Objective of Price :-

This map cost me ten rupees. Wheat is now sixteen annas a seer. This book is worth a great deal more than that. No one cares a straw what he thinks.

Objective of Degree :--

Silver is ten times harder than tin. The sir is a trifle hotter to-day than it was yesterday.

Lahore is about ten degrees higher inlatitude than Calcutta. (e.) Objective of Manner or attendant circumstance:-He attended to his work heart and soul.

CHAPTER XI.-SYNTAX.

Bind him hand and fost, and take him away. They looked at each other fiscs to face. The two ozen were standing side by side. They hand in hand, with wandering steps and slow, Through Eden took their solitary way.

-Millon.

He dived into the water kead foremost. He attacked the tiger gas in hand. Act, act in the living present, Heart within and God o'erhead.

-Lanafellow.

(f:) Objective after certain Adjectives. The Adjectives which thus take an Objective after them are like or unlike, near, nigh or next.

No man could bend the bow like him.

Never man spake like that man. He stood next we in the class-

-New Testament.

My house is nearer the grove than yours,

Note.—The use of the Objective case, after the above adjectives appears to have alisen from the habitual omission of the preposition to, which even now is sometimes expressed.

(g.) Objective after Interjections, or in Interjectional phrases:—

Unhappy me! Oh unhappy mes!

Oh fortunate, too fortunate Ausbandmen, if only they knew what a blessed lot is theirs!

— Firgil.

O the depth of the riches both of the wisdom and goodness of God!

-New Testament.

21. A pronoun must be of the same gender, number, and person, as the noun it stands for; but in case it is dependent on its own sentence. (See Chapter IV, § 1, pars. 3 (c.) This is called a concord or agreement.

John saw a brown and a black snake in the garden, which
crept away from him, as soon as they beard his step.

Which. Relative pronoun, common geader, third person, plural number, agreeing with its two anticedent acouss "brown anake" and "black make." Nominative case or subject to the verb "crept."

Him. Personal pronoun, mesculine gender, third person,

singular number, agreeing with its noun "John"; objective case after the preposition "from."

They. Personal pronoun, common gender, third person, plural number, agreeing with its two nouns "brown snake" and "black snake." Nominative case or subject to the verb "heard."

His. Personal pronoun, masculine gender, third person, singular number, agreeing with its noun "John." Possessive case taken with the noun "step."

(2) John killed the brown snake at once

The black one nearly escaped, but was killed soon after with a stick that John had in he hand.

One. Demonstrative pronoun, common gender, third person, singular number, agreeing with its noun "snake." Numinative case or subject to the verb "escaped."

That. Relative pronoun, neuter gender, third person, singular number, agreeing with its antecedent noun "stick." Objective case to the transitive verb "had."

His. Personal pronoun; to be parsed as above,

(3) Do you dare to deceive m₁,~ m₂, who am your truest friend?
You Personal pronoun, common gender, second person, smerular number, agreeing with the person addressed. Nomin

native case to the verb "dare."

Me. Personal pronoun, common gender, first person.

singular number, agreeing with the person speaking. Objective case to the transitive verb "deceive."

Who. Relative pronoun, common gender, first person, singular number, agreeing with its antecedent noun or pronoun "me." Nominative case or subject to the verb "am."

Your. Personal pronoun, common gender, as above. Possessive case taken with the noun "friend."

(4) He is the judge who will hear this case in court, and as such be must not hear any thing from you in private.

Who. Relative pronoun, masculine gender, third person, singular number, agreeing with its autocodent noun "judge." Nominative case or subject to the verb "will hear."

Such. Demonstrative pronoun, masculine gender, third person, singular number, agreeing with its noun "judge." Nominative case in apposition with the following pronoun " he." Insert the proper Pronouns in the places left blank s-

No one on-entrance into life can be certain of success.

Every tree bears leaves after—kind. The man who loves—native land will speak and act in-defence. They all did

--native land will speak and act in--defence. They all did--duty in-respective offices. A child should obey-parents. The girl tried to get at the top of--class. The river burst --banks. A wise man will not waste--time.

Join the sentences noted below by means of relative pronouns :--

The books have been lost; you bought them. The men have come; you hired them.

There are 6 boys: we read in class with them.

This is a fine house, I live in it.

The man is caught : he fled from jail.

The man is locked up ; you caught him

Bring the keys; you will find them on the table.
Correct the mustakes an the following sentences:-

The boy, against which I complained, has been punished. I, who has always been strong before this time, have now been taken sack. You who was present saw what happened. Among the crowd sho had collected, there was one dwarf. The workens nakeh cannot us this morning will go away in the evening. You who has been so unlacky yourself will teel over; for others. The people raised the voice against new tanation. Kindness deserve gratifude from those who see lies?

22. A Relative pronoun, if it has two Antecedents, and these are not of the same person, agrees in person with the Antecedent nearest to it.

You are the man who is chosen

Correct the mistakes in the following sentences :-

I am the man who seek to help thee in distrete. Thou art the man who fleest away in the time of danger. Art thou the chief, who brokedst the power of the enemy?

23. A Relative or Demonstrative Pronoun, when it relates to some sentence going before, is in the third person, singular number, and generally in the neuter gender.

I studied Greek when I was young, and that (=I studied Greek) at Oxford (Nonter Gender.)

Make the best of your time at school; that (=one who makes the best of his time) is a wise boy. (Mase, Gonder.) They told me you gained the first prize; I was glad to hear of

this (—the fact of your having gained the first prise.) He slow all the men taken prisoners, tokick (with slaying of

all the prisoners) was a most cruel and treadment act.

He stood at the top of his class, which (=the standing at the top of the class) I consider very creditable.

He refused to believe my statement, at which (=his refusal to

believe my statement) we were all much surprised.

24. The Simple or Noun Infinitive may be (a) the Subject to a Finite Verb, (b) the Object to a Finite Verb,

or (c) the Complement to a Finite Verb.

(a.) To sleep (=sleeping or sleep) is necessary to life.

(b) We desire to smprove (=improvement)

(o) He appears to be clever

Note 1.—Sometimes a noun or pronoun comes between the Finite Verb and its Complement:—

He begs you to forgive - he begs your forgiveness

We ordered him to be punished-we ordered his punishment

Note 2.—A Noun-Infinitive must be changed into the corresponding Gerund or Verbal Noun, when it is preceded by a preposition.

We decided to go = we decided on going

Note 3.—But a Nonn-Infinitive is still used after the prepositions but (or except) and about, and in older English it was used after the preposition for.

What went ye out for to see (-for seeing)?

-New Testament

I could do nothing but (or secupt) weep.

Here the "to" is omitted after the auxiliary verb "could"

See Chapter V. 6 B. para 3 (b).

He was about to be drowned

Here "about" means "near." He was near or very near the state of being drowned. So "to be drowned" is the object to the preposition "about."

25. The Noun-Infinitive can be used absolutely by way of exclamation. (See Chapter V, § 6, para. 8. b.)

To think that he should have been so dishonest?

26. The Gerundial Infinitive may be placed (a) after a vert to express the purpose or cause of the action, (b) after a norn to qualify its meaning, and (r) after an adjective to complete its meaning. (See Chapter Y, § 6, para, 6.)

(a.) After a verb to express the purpose or cause of the action:—

He came (with what purpose?) to see the sport. He was grieved (from what cause?) to see his friend so sick.

- (b.) After a noun to qualify its meaning:-
 - (1.) He brought us some water to dried.

Observe firstly that in example (1) the verb is Transitive. "He brought us water to drink" means "he brought us water for the purpose of drinking it"; hence the pronoun "it" is understood after the verb "drink."

Observe secondly that in example (2) the verth "ait" is Intrensitive, but that in order to make it Transitive it is suppliemented by the proposition "on." "A obait to sit on "means "a chair for the purpose of sitting on it"; here the "it is understood, as in the previous example. Wheaver the Infinitive verb is Intransitive, it must have a preposition added to it to give it a Transitive force. It would be quite wrong to say "a chair to sit."

- (c.) After an adjective to complete its meaning :-
- Be quick to hear and slow to speak.
- "Quick" for what purpose or in what respect? to hear.
 "Slow" for what purpose or in what respect? to speak.
- We shall be sorry to see him defeated.
 "Sorry" from what cause? to see him defeated.
- 27. The Gerundial-Infinitive can be used absolutely by way of parenthesis. (See Chapter ∇ ., § 6, para. 8 α .)
- He is—to speak plainly—a thief.

 28. Words joined by a Cumulative Conjunction must
 (a) be of the same or similar Part of Speech, or (h) must
 do the same work and hold the same rank in the sentence.
 - (a.) Of the same or similar Part of Speech :-

They come and go as they like ... Ferb and Verb.
You and I went away ... Pronoun and Pronoun.
James and John want away ... Nown and Noun.
Young and I wont away ... Nown and Pronoun.

Slowly and sadly we laid him down
Five and evil have been my days ... Adjec. and Adjec.
Faint, yet pursuing they ran on ... Adjec. and Part.
The monkey runs up and down the tree. Frg. and Prey.

- (b.) Of the same work or rank in the sentence :-
 - (1.) Complement to a verb:—

 He made himself mean and of no regulation.

 —Now Testament.

(Here the Adjective " mean" is joined to the prepositional phrese "of no reputation," because both are Complements to the Factitive Verb " made.")

Let us then be up and doing.

.... Longfellow.

(Here the adverb "up" is joined to the participle "doing." because both are Complements to the verb "be" On the use of adverbs "as Complements." See Chapter VI, § 7. para. 2.)

(2.) Words qualifying a noun :-

A man of sorrows and acquainted with grief.

-Old Testament.

-Souther

(Here the prepositional phrase " of sorrows " is joined to the adjective or participle "acquainted" for the sake of quali tying the noun " man."

(8.) Words qualifying a verb. (By rule 15 " an adverb qualifying a verb may be changed into an adjective qualifying the subject to the verb." Rence it follows that an adverb and an adjective may be joined together by a conjunction, provided they both qualify the same verb. This occurs only in poetry)

> When faint and wearily he drags Along his noontide way. Trip it deft and merrily. ... -- Saott. But Sir Richard bore in hand

All the sick men from the land ... - Tonnyson. Very carefully and (low.)

29. A verb in the Subjunctive mood, preceded by a Subordinative Conjunction, expresses doubt or uncertainty. (See Chapter V, § 5, para. ?.) But a verb in the Indicative mood expresses a fact or certainty.

> Murder, though it have no tongue, will speak. If he but speak, I will shoot him. Whether he allow me or not, I will speak to him, Provided he confess his fault, I shall pardon him. Until he consent, we can do nothing. He shall have a prize, lest he de or should de discouraged. Unless he agree to this, I shall leave him.

80. An adverb can qualify an entire sentence. In

this case it stands as the first word in the sentence which it qualifies

Unfortunately the third was not caught, Sudently he is much distressed at the news.

Apparently he acted from some secret motive.

The above sentences can be placed in apposition to "it,"
by changing the advert into the corresponding adjective:

If was unfortunate that the thief was not county.

It was unfortunate that the thief was not caught.
It is evident that he is much distressed at the news

It is evident that he is much distressed at the news
It was apparent that he acted from some secret motive

§ 2 -Sequence of Tenses.

 WHEN two sentences are joined together by some Subordinative Conjunction, or by a Relative Pronoun, one of them is called the Principal and the other the Dependent sentence:—

Principal, Dependent
I will let you know, when I shall start.

Note.—The Dependent sentence is always that to which the Subordinative Conjunction or the Relative Pronoun is prefixed. Thus "I shall start" is the dependent sentence, because it has "when" prefixed to it

 There are two main rules about the Sequence of Tenses, and all special rules centre round these two:—

BULE I.—If there is a Past tense in the principal sentence, it must be followed by a Past tense in the dependent sentence:—

Dependent Sentence

Principal Sentence

(Past Tenes) (Past Tonse) It was settled. that I should do this. He did not know. that he would so to-day. He had been told. , that he rould not do this. Ha asked me. whether I had seen his dog He was informed, . that I had been helpens him We never understood. . how or why he did that I was afraid. .. that you more much fatigued I was enquiring, ... what you had hoard. He concealed from me, ... what he was thinking of

Note.—In the dependent seatence is will be seen that all the main verbs are in some past tenne, and that the spiritary verbs shall, well, and can have been put into the past tenses should, would, and could

RULE II —If there is a Present or Future tense in the principal ventence, it can be followed by any tense whatever in the dependent sentence

Examples of Rule II

	that he reads a book that he is reading that he has read that he has been cading	The 4 forms of the Present Tense
I know or I shall know	that he will road that he will be reading that he will have read that he will have been reading	The 4 forms of the Tuture Tunse
	that he read that he was reading that he had read that he had been reading	The 4 forms of the Past Tense

3 Exception to Rule I.— There is one exception to Rule I The Past tense in the principal sentence can be followed by a Present Indefinite in the dependent sentence, if the verb in the dependent sentence expresses some purposed or distingtificate.

They war at school,
The students war taught
His illness sh w d him
He war glad to hear,
Liev war sorry to hear

that honesty is the best policy that the earth m in round the sun that all men are mortal that his brother is industrious that he I as a bad temper

4 Exception to Rule II — When the Dependent Sentence expresses a Pnη ολ. (See Chapter VIII, § 3, pars 7) the verb denoting the purpose is formed by the auxiliary verbs "may" (Present Tense) and "might" (Past Tense)

If there is a **Present or Future** Tense in the principal sentence, it must be followed by "may" (**Present** Tense,) and by no other tense than the Present, in the dependent sentence

	P	rinoigal Bentoner.	Dope whent	Soute	nce.
Present.	Endef. Contrn. Perfect. Perf. Cont.	He comes, He is coming, He has come, He has been coming,	that he me.	may	868
Future.	Indef. Sontin Perfect. Perf. Cont	He will come, He will be coming, He will have come, He will have been coming	that he me.	may	500

Note .- If the verb in the principal sentence is in the Past tense, it is followed by "might" (Past Tense) in the dependent sentence

This is entirely in accordance with Rule I.

	Pru	ripai Benu nri.	Dependent Sentinie.
Past	Confin 1 Perfect, 1	He came, He was coming, He had come, He had been coming,	that he might need me.

5. Lest, should. A special idiom exists regarding the use of these two words.

If the dependent sentence is preceded by the Subordinative Conjunction "lest," the verb in the dependent sentence is formed by the auxiliary "should"; and "should" is the only verb that can be used in the dependent sentence. whatever may be the tense of the verb in the principal sentence.

Note .- The word "lest" = "that not." "That" expresses an end to be gained. "Lest" expresses an end to be avoided. (See Chapter VIII, § 3, para. 7.) Principal Statence

Dependent & ntence

lest he should see me, Past. He went. or that he might not see me. fleat he should see me. Present. He goes, for that he may not see me lest he should see me, or that he may not see me Future. He will go,

N. B .- After the Imperative Mood, lest can be followed by the Subjunctive Mood without the help of should. Love not sleep, lest it bring (=should bring) thee to poverty.

-Old Testament.

6. Conjunctions of Comparison When the connecting link between two sentences is some Conjunction of Comparison, (See Chapter VIII, § 3, para. 11, 12), Rules I and II have no existence whatever.

Any tense whatever can be used in the dependent sentence, whatever may be the tense of the verb in the principal sentence; and the writer or speaker must be simply guided by the souse which he desires to express:—

Principal Sentence.

He likes you better, than he liked me.

He liked you better, than he likes me.

He will like you better, than he has liked me.

He has liked you better, than he liked me.

He liked you better, ... than he is liking me. He will like you better, &c.... than he was liking me, &c.

Note 1.—If the comparison is expressed by "as well as" instead of "than," the same rule holds good. Any tense may be followed by any tense, according to the sense intended by the speaker.

He likes you as well as he liked me.

He will like you as well as he has liked me, &c., &c.

Note 2.—If no verb is expressed after "than" or after "as need as," the tense of the verb understood in the dependent sentence is invariably the same, as that of the verb expressed in the principal sentence.

He liked you better than (he liked) me.

He will like you as well as (he will like) me.
In the following axamples say whether the web in the dependent sentence

is right or met; and sijt it is not right, correct it,
I was informed that he had been reading a book. He did not
say when he will come. No one know whether he intended
to come or not. He concealed from now what his plans are.
I fear that you sorre displeased with me yesterday. I shall
soon find out, why you now so displeased. His face was
so changed that I do not know him again. The teacher gave
me a prize that I may sowh hard next year. The teacher
will be pleased to hear, that I here soon a prize. He such
will be pleased to hear, that I here soon a prize. He also how
he why I wisk to go away so soon. No one understood he
he why I wisk to go away so soon. No one understood ho
he do so much work. He had come that he weight halp
me to flash the task. You did not tell me when you sagest

to return home. I was sorry to find that I have displausely you. I hope that you will praction us soon. I did not know why you give me this order. We shall soon know what progress he has made. We heard to-day what progress he has made. You never told us that honesty sear the best policy. They told me that my brother eas fond of his books. He gave magond advice lest I may fall into will ways. He staught me that good deeds serve sever lost. He lends his book, that I might he saved the express of buying one.

§ 3.—The Infinitive as Object on as Complement.

1. The two main forms of the Infinitive are (a) the Indefinite "to love," and (b) the Perfect "to have loved." (See Chapter V. § 7, pars. 2.)

When should the one be used, and when the other?

2. Infinitive as Object. When the Infinitive mood is used simply as the noun or object to some Transitive verb, the proper form of the Infinitive is the Indefinite, and this form should be used after any and every tense of the governing verb. In fact the tense of the governing verb as no effect on the tense of the Noun-Infinitive.

Finite verb in all tenses. Infinitive (Indefinite.)

 But the Perfect Infinitive should be used after the Past Tenses of verbs expressing wish, intention, hope, &c., provided the speaker or writer desires it to be understood that the wish, intention, or hope was not fulfilled.

He wished to have come, He intended to have come, He hoped to have come,

but something prevented

He hoped to have come, He expected to have come, Note, --- If we substitute the Indefinite for the Perfect, nothing is implied as to whether the desire, &c., was fulfilled or not:---

He wished to come, He intended to come, but whether he came or not

He hoped to come,
He expected to come,

4. Infinitive as Complement. When the Infinitive mood is used as Complement to a verb of Incomplete Predication, the form of the Infinitive does not at all depend upon the tense of the preceding verb.

The form of the Infinitive in this case depends solely upon the intention of the speaker or writer.

- (a) If he intends it to be understood, that the action denoted by the Infinitive was accomplished at some time previous to the act denoted by the Finite Verb, the Perfect form of the Infinitive must be used.
- (b.) But if he makes no reference to the time of the action denoted by the Infinitive, the *Indefinite* form must be used.
 - (a.) Present He seems, Past He seemed, Future He will seem, time.)
 - (b.) Present He seems,
 Past He seemed,
 Future He will seem,

 to work hard:—
 (time not specified.)

Note.—The Perfect form of the Infinitive in the sense (a.) is frequently used after verbs of saying or reporting, when the Finite Verb is in the Present Indefinite Tense and in the Passive Voice:—

He is said to have done this.

Sixty men are reported to have been slain.

- § 4.—DIRECT AND INDIRECT NARRATION.
- When the verb in one sentence relates what is said by some speaker in another sentence, the verb in the first sentence is called the reporting verb, and what is said in the second sentence is called the reported speech; as,

Reporting Varb. Reported Speech,
My father said, ... "It is time to go away."

2. Now, there are two different ways in which the reported speech may be expressed:—

It may either (a) repeat the actual words used by the speaker; or (b) it may give their substance.

 When the reported speech repeats the actual words, this is called Direct Narration, as in the above example.

Reporting Verb. Reported Speech,
My father said, ... "It is time to go away."

Note I.—This is the mode generally used in the Vernacular languages of India.

Note 2.—In all cases of Direct Narration the reported speech must be marked off by commas, as in the above example.

1. When the reported speech gives the substance of the words used by the speaker, and does not repeat the actual words, this is called **Indirect Marration**: as,

Reporting Verb. Reported Speech.
My father said. ... that it was time to go away.

 The tense of the reporting verb is never changed. But the tense of the reported speech is liable to certain changes, when it passes from the Direct Narration to the Indirect.

6. There are two main rules regarding the change of tense in the reported speech; and these are similar to the two main rules about the Sequence of Tenses, which were shown above in § 2, para 2.

Rule I.—If the reporting verb is a Past Tense, the verb in the reported speech must be changed to one or other of the four forms of the Past Tense.

Rule II.—If the reporting verb is a Present or Future Tense, the verb in the reported speech is not changed at all.

Rule II.

7. Rule II is so simple, that we can dispose of it at once. By this rule the reporting verb is assumed to be in some Present or Future tense; and whenever this occurs, the verb in the reported speech is not changed at all.

in its passage from the Direct to the Indirect Narration, but remains exactly as it was.

```
Reporting Verb.
                                        Reported Speech.
                                          Any Tense.
     Present Tense.
Direct, He has told you,
                                     " I am coming."
Indirect, He has told you,
                                    that he is coming.
Direct, He says to his friend,
                                    "I have been reading."
Indirect, Ho says to his friend, ...
                                    that he has been reading.
     Future Tense.
                                         Any Tense.
Dirrot, He will say,
                                    " Thou hast spoken falsely."
Indirect, He will tell thee,
                                    that thou hast spoken falsely.
Direct, He will say,
                                     "The boy was lazy."
 Indirect, He will tell them,
                                    that the boy was lazy.
```

8. Sometimes there is an uncertainty as to whether the pronoun he in the reported speech refers to the person speaking or to the person spoken to:—

```
Reporting | ech. Reported Spc.ch.

Gobind says to Cleon. ... 'I am wrong.'
Gobind says to Cleon. ... 'You are wrong.'
Indirect. Gobind says to Cleon. ... 'that he (who?) is wrong.

How is this uncertainty about the he to be removed?
```

How is this uncertainty about the he to be removed? This can only be done by inserting the name of the person intended after he, as in the examples given below:—

```
Reporting Varb

[Direct. Golbind says to Cleon, ... "I am wrong,"
I natirect. Golbind says to Cleon, ... that he (Golbind) is wrong,
Direct. Golbind says to Cleon, ... "you are wrong."
Indirect. Golbind says to Cleon, ... "you are wrong."
Indirect. Golbind says to Cleon, ... "that he (Cleon) is wrong.
Convert the following from the Direct is the Indirect Narration:
The judge will say to you, "You are innount of that critic."
```

All mon declare, "He has never been defeased."
He has told them, "I did not commit this fault."
He is still declaring, "You are the man who did it."
He has been saying all day, "I an tired of work."
I shall tell him plaintly, "You cannot come here again,"
I shall always affirm, "He, and not I, is the guilty man."
He says every day, "This climate will not suit my health,

I must go away as soon as I can,"
The judge informs the court, "The man is guilty and will be hanged in 4 days' time."

The man has confessed, "I am the guilty man, and deserve the punishment."

Rule I.

9. Rule I is much less simple than Rule II; and here the difficulty begins.

By Rule I, as the student will remember, (see para. 6) the tense of the reporting verb is assumed to be a Past Tense; the tense in the reported speech must therefore be changed into a Past Tense also.

For the working out of this rule in detail, the following special rules must be observed:—

- (a.) The Present Tense (in the reported speech) must be changed to its corresponding Past form:
- (b.) The Past Indefinite (in the reported speech) must be changed to the Past Perfect:
- (c.) The Past Continuous (in the reported speech) must be changed to the Past Perfect Continuous.
- 10. Special rule (a).—Change the Present Tense (in the reported speech) into its corresponding Past Form.
- Thus shall is changed into should; will is changed into would; may is changed into might; can is changed into could; come is changed into came; is coming is changed into was coming; has come is changed into had come; has been coming is changed into had been coming

Reporting Verb. Reported Speech. Direct. He said. "the man shall come." (Present.) ••• Indirect. He said that the man should come (Past.) Direct. "the man will come," He said. (Present.) Indirect. He said that the man would come. ... (Past.) Direct. He said, "the man may come." (Present.) Indirect. He said that the man might come. ... (Past.) Direct. He said, Indirect. He said " the man can come." He said. (Present.) that the man could come. (Past.) Direct He said, "the man comes." (Pres. Indef.) Indirect. He said . that the man orme. (Past Indef.) He said. "the man is coming." Direct. (Pres. Contin.) (Part Contin.) Indirect. He said that the man was coming. ... Direct. Indirect. He said. "the man Ass come." (Pres. Perfect.) ... that the man had come; He said. (Past Perfect.) Direct. He said. "the man has been coming." (Pres Per. Com.) Indirect. He said. that the man had been coming, (Past Per. Con.) Examples are not always so simple as those given above; yet the change of the Present Tense is invariably into its corresponding Past:—

Direct. And Jacob said: "It is enough; my son Joseph is yet alive; I will go and see him before I die"

—Old Testament.

Indirect. And Jacob said that it was enough; that his son
Joseph was yet alive, and that he would go and see him
before he died.

Direct. And David's angor was greatly kindled, and he said.

"The man who hath dore this thing descrets to die, and he shall restore the lamb fourfold."

—Old Testament.
Indirect. And David said that the man who had done this thing descreted to die. and that he should restore the lamb

fourfold.

11. Special Rule (b.)—Change the Past Indefinite (in the reported speech) into the Past Perfect.

Reporting Verh. Reported Speech.

Direct. He said, "the man came at six." ... (Past Indect.) [Indirect. He said that the man had come at six, (Past Perf.) [Direct. He said, "the rain fell yesterday." ... (Past Perf.) [Indirect. He said that the rain had failen yester-

day (Pasi Indef.

12. Special Rule (c.)—Change the Past Continuous (in

the reported speech) into the Past Perfect Continuous.

Reporting Verb. Reported Speech.

[Direct. He said, "the man was coming," ... (Past Cont.)

[Indirect. He said that the man had been coming, (Past Perf. Cont.)

[Direct. He said, "the rain was falling yesterday," (Past. Cont.)

[Indirect. He said that the rain had been falling

yesterday. (Past Perf Cont.)

Examples on Special Rules (a), (b) and (c) of Rule I.

Examples on Special Rules (a), (b) and (e) of Rule 1.

(1). "owers the following sertimens from Birect to Indirect 1.

We said to him, "the weather is stormy, and the way is long."

The teacher tool at, "the carriage has come and we shall start soon."

The teacher tool at, "the prize will be presented to morrow."

He said, the "rain has been falling since daybrest, and you cannot go."

We said to him, "your fault will be pardoned, if you confess it."

He said to he, "I am glid to tell you that you are pardoned."

He said "the man was starting, but he has not yet come."

He said to me, "you are mistakun you will not go to-day."

He said to me, "you are mistakun you will not go to-day."

Hasain said; or all, "you will be tired before you sarrive."
Hasain said, "our friend sarrived yeasterdey, but you do day."
My son arclaimed, "some one has taken the book I was reading."
He said, "I have been very iil, but am now better."
He said, "I have been very iil, but am now better."
He said, "I have been very iil, but am now better."
He said to me, "you say guilly, and I am immoonth."
He said to me, "you say guilly, and I am immoonth."
They said, "the boy is hiding in the place where we left him."

They said, "the boy will soon be found; and we will bring him."

(2.) Convert the following sentences from Indirect to Direct.

They made them understand that he would soon return. He told them that he had been robbed of the book which he had bought. He said that he was very sorry for the fault he had committed. They all said to him that he deserved to be pardoned. They affirmed that he was the best worker they had seen. He admitted that he had not worked so hard as Ram had done. He heard them say that he did not deserve the prize. He promised them that he would do it as soon as he could. They said that he deserved their thanks for all he had done. All who heard this said that he was speaking the truth. He said that he had been three years in jail, and yet was innocent. They told him they would never believe what he said. He replied that he would prove what he had said to be true. My brother told me that he had been reading all day. My father told me that I was wrong and would be fined. I replied that if my fault was proved I would pay the fine. I admitted that I had seted foolishly in what I said.

13. There is one exception to Rule I, similar to that described in § 2, para. 2, for the Sequence of Tenses.

If the reported speech relates to some universal or habitual fact, then the Present Indefinite in the reported speech is not changed into the corresponding Past, but remains exactly as it was (See Chapter V. § 3, para 14 and 15)

Reporting verb. Reported Speech. Direct. He said, " we cannot be quite happy in this life. that we cannot be quite happy in this life, Indirect. He said "here we have no continuing city." Direct. He said. ... Indirect. He said that here we have no continuing city. Direct. He said. "the earth moves round the aun. ... Indirect. He said that the earth moves round the sun. Direct. He said. ... "God rules and generas all thines. ... that God rules and goserns all things. Indirect. He said He reminded me "when the cat is away, the mice play." Indirect. He reminded me, that when the cat is away, the mice play

Direct.

He said,

14. In the reported speech, when the Present Tense is changed into the Past by Rule I, an adjective, verb, or adverb expressing nearness is similarly changed into one expressing distance.

Thus as a general rule we change:

```
then;
Now
                               that or those:
This or these
                     11
                               thither;
Hither
                     ,,
                               there:
Here
                     .
Hence
                               thence:
Thus
                               80;
Come
                               ao :
                     ••
                               that day :
To-dan
To-morrow
                               next day :
                               the previous day;
Vesterdan
                               the previous night :
Last night
                               before ;
Ago
                    ..
                               then.
Non
```

Reporting Verb. Reported Speech.

" I will leave you now."

that he would leave them then. Indirect. He said " I will come here." Direct. He said. that he would go there. Indirect. He said " I have seen this man." He said. Direct. that he had seen that man. Indirect. He said ••• He said. " I saw this man long ago." Direct.

Indirect. He said ... that he had seen that man long before.
But if the speaker desires to lay very special stress upon

this time or this place or this thing, then no change of adjective or adverb is made in the reported speech.

```
Reporting Vorb.
                                      Reported Speech.
            Gobind said.
                           ... " This is my coat."
  Direct.
Indirect. Gobind said
                            ... that this (the coat in his hand) was
                                      his cost.
Direct.
           Gobind said,
                                "I will return this evening."
Indirect. Gobind said
                                that he would return this evening.
                            •••
 Direct.
           Gobind said
                                44 I will do it now or never.
Indirect. Gobind said
                                that he would do it now or never.
                           ***
```

Direct. Gobind said, ... "your horse is gone from here."

Indirect. Gobind said ... that your horse had gone from here.

15. Reported Questions.—When the reported speech contains a question, and not a statement or assertion, the Reporting Verb "say" or "tell" is changed into "ask" or "enquire"; but there is no change in its tense. (See above para. 5.)

16. In its passage from the Direct Narration to the Indirect, the tense of the reported question is subject to procisely the same rules as the tense of the reported speech or etatement; and the two main rules given above in para, 6 must be strictly observed :—

```
Reporting Verb.
                                         Reported Question.
Direct.
            He said to me,
                                    "What is the shortest way back?"
Indirect. He enquired of me,
                                    what was the shortest way back,
Direct. He said to me
            He said to me.
                                    " Where are you going?
                                    where I was going.
Direct.
            He said to him,
                                    " Why do you stop here?"
Indirect. He asked him
                                    why he stopped there.
Direct. He said to us, ... Indirect. He exquired of us,
                                     " Are you going away to-day?"
                                     whether we were going away to-day.
Direct. He said to me, ... Indirect. He demanded of me
                                    "Why did you strike me?" why I had struck him.
```

In all of the above examples, the Reporting Verb is in a Past Tense; and hence the verb of the reported question has been changed into a Past Tense by Rule I.

But in the examples which follow, the Reporting Verb is in a *Present* or *Future* Tense, and hence by Rule II. the verb of the reported question is not changed.

```
Reporting Verb.
                                      Reported Verb.
                              "What is the shortest way back ?"
 Direct.
          He says to me,
Indirect. He asks me
                              what is the shortest way back
Direct.
           He says to me,
                              "Why have you done this?"
Indirect. He asks me
                              why you have done this.
Direct. He will say,
                               " Is the man coming or not?
                              whether he is coming or not.
Direct. He will say,
                               "Have you been reeding to-day or not."
Indirect. He will ask
                              whether you have been reading to-day
                                 or not.
```

 Reported Imperative When the reported speech is in the Imperative mood, the Reporting Verb "say" or "tell" must be changed to some verb signifying a command, or a precept, or an entreaty; and the student must select the verb best suited to the sense or context.

Note.—In Chapter V, § 4, para. 3, it has been already explained that command, precept, and entreaty are the three uses or significations of the Imperative Mood.

 In its passage from the Direct Narration to the Indirect, the Imperative mood must be replaced by the Infinitive.

```
Reporting Verb.
                                                Reported Imperative.
Direct. He said to his servants, ... "Go away at once." Command. Indirect. He ordered his servants ... to go away at once."
Direct. He said to his friend, ... "Work steadily."
Indirect. He advised his friend ... to work steadily.
Direct. He said to the student,... " Do not make
                                              noise."
Indirect. He forbade the student ... to make any noise.
Direct. He said to his master, ... " Pardon me this
                                             once."
 Indirect. He begged his master ... to pardon him this
Direct. He said to his friend,
                                     ... "Please lend me your
                                              book.
                                     ... to be kind enough to Request.
Indirect. He saked his friend
                                              lend his book.
```

If some dependent sentence in the Indicative mood happens to be attached to the Imperative mood, then the tense of the Indicative mood is subject to the same changes after a Past Tense as those shown above under Rule I, para 6.

```
Reporting Verb.

[Direct. He said to his servant, ... "De, as I sill you" |
Indirect. He ondreed his servant ... to do as he told him.

Direct. He said to his Irland, ... "Weit here till I reform."
Indirect. He bopped his Irland ... to said there till it returned.
```

19. Reported Exclamation. When the Reported Verb contains an exclamation of some kind, the Reporting Verb "say" or "tell" must be changed to some such verb as

"exclaim," "cry out," "pray," &c., and the student must select the verb best suited to the sense or context.

Reporting Verb. Reported Exclomation.

[Direct. He said, "Hernah! my friend to come."

[Direct. He said to them all, "Good bye, my friends!"

{ Direct. He said to them all, Indirect. He hade good-bye
| Direct. He hade good-bye | ... o all his friends. | ... May God pardon this sinner! | ... outle pardon that sinner.

Indirect. He prayed that God ...would pardon that sinner.

Direct. He said, ..." Also! how foolish I have been."

Indirect. He confessed with regret ...that he had been very foolish.

I. In the following examples an assertion, a question, and an imperative are mixed up in the same speech.

I. Direct. And he said, "I will arise and go unto my father and say unto him: "Father, I have sinned against heaven and before thee, and om no more worthy to be called thy son; wake me as one of thy hired servants."

—Non Testament.

Indirect. And he said that he would arise and go to his father and sould confess that he had sinced against heaven and against him, and sous no more worthy to be called his son; and that he would entreat his father to make him one of his hired servants.

Direct. "What is this strange outery"? said Socrates: "I sent
the women away mainly in order that they might not offend in this
way; for !kee heard that a man should die in peace. Be quiet then
and have patience."

Indirect. Socrates engined of them what this strange outery uses. He enseminded them that he had sent the women away mainly in order that they might not offend in this way; for he had heard that a man should die in peace. He brogged them therefore to be quiet and have pationes.

3. Direct. The teacher became angry with the student and said, "Why hose you again distarted the class in this way? I have take you before that when I am speaking, you should be silent. Leave the room, and do not return again to-day."

Indirect. The teacher became angry with the student and enquired of him why he had again disturbed the class in that way. He reminded him that he had teld him before that he (the student) should be silent, when he (the master) was speaking. He ordered him therefore to leave the room and forbeds him to return same that day.

II. Miscellaneous examples of sentences to be changed from Direct to Indirect Narration.

1. And Beuben said unto them. "Shed no blood: cast Joseph into

 And headen said unto them, "Shed no blood; cast loseph into this pit that is in the wilderness, but lay no hand upon him."

2. And Judah said unto his brethren, " What profit is it, if we alay our brother and conceal his blood. Come, let us sell him to the Ishmaelites, and let not our hand be upon him ; for he is our brother and our flesh."

-Old Testament.

- 3. Joseph said to James, " I can tell you what strikes me as the most useful machine in the world." James replied, "Can you, Joseph? I should like to hear of it. What is it used for "?
- 4. "What do you mean"? asked the man, "How can a rope be used for binding flour "?" A rope may be used for any thing," replied the man, " when I do not wish to lend it."
- 5. Once the rich man said to his poorer brother, " Why do you not enter the service of the king, so that you may relieve yourself from the baseness of labour "?
- 6. Finding no remedy, he said to himself, " It is better to die than to live in such misery as I am compelled to suffer from a master, who treats me and has always treated me so unkindly."
- 7. All her maidens watching said, "she must weep, or she will die." -Tennyson. 8. And they said one to another, "We are verily guilty concern-
- ing our brother, in that we saw the distress of his soul, when he besought us, and we would not hear: therefore is this distress come upon -Old Testament.
- 9. The violent man said, "What violence have I done? What anger have I been guilty of?" Then the others laughed and said to him, "Why should we speak? You have given us ocular proof of your violent temper."
 - 10. And Nathan said unto David, "Thou art the man,"
- 11. The robber said to Alexander, "I am thy captive: I must hear what thou art pleased to say, and endure what thou art pleased to inflict. But my soul is unconquered; and if I reply at all to thy reproaches, I will reply to thee like a free man."
 - 12. "You are old, Father William," the young man cried,

The locks that are left you are gray ; You are hale, Father William, a hale old man;

Now tell me the reason, I pray."

- 13. "I am sorry indeed," replied the king, "that my vessel is already chosen ; and I cannot therefore sail with the son of the man Who served my father." -Dickens.
- 14. He cried to them in agony, "Row back at any risk! I cannot bear to leave her behind to be drowned." -Dickens.
- 15. He made a promise to the king's surgeon, saying; "Bleed the king to death with this lancet; and I will give you a thousand pieces of gold; and when I ascend the throne, you shall be my chief minister."

- 16. Starting up from his couch, the king exclaimed i" There is treachery in this. Tell me instantly what it means: a full confession alone will save your life."
- "Which of these three men," said Jesus, "was neighbour unto him who fell among the robbers?" And the lawyer said, "He that showed mercy on him." And Jesus replied, "Go and do thou likewise."
 Neo Testament.
- 18. So he enquired of the sailors, "Pray, tell me why there is so much mourning on board your ship?" They answered, "We are carrying alsew whom we captured in different countries; and those who are chained in the ship and will be sold as slaves are weeping." Then he said, "Please, brothers, sak your captain, if he will give me
- the slaves for ready cash."

 19. "Since yesterday," he observed, "the wind has changed, and Damon will soon be here. Make haste therefore," said he to the executioner. "and do your office."
 - Miscellaneous examples of sentences to be changed from Indirect to Direct Narration.
- 1. Pythias, before his execution, requested but one favour from Dionysius, which was that he might be permitted to visit his wife and children, who were at that time a considerable distance from
- him, promising faithfully to return on the day appointed.

 2. This Dionysius refused to grant, unless some person could be found who would consent to suffer death in his stead, if he did not
- perform his promise.

 3. In a short speech Pythias told the surrounding multitude that
 his dear friend Damon, would soon arrive; but he hoped, not before
 his own death had saved a life so dear as Damon's was to his family,
 his friends, and his country.
- 4. He sent his compliments to Francis, Clavering, and Monson, and charged them to protect Raja Guru Das, who was about to become the head of the Brahmans of Bengal.
- 5. The governor of the town then called out with a loud voice, and ordered Androcles to explain to them how a savage and hungry llon should thus in a moment have forgotten its innate disposition, and be converted all of a sudden into a harmless and inoffensive animal.
- Androces then explained to them that the very lion, which now stood before them, had been his friend and partner in the woods.
- 7. Socrates then suggested to Glaucon that the entire sholition of the guards which he (Glaucon) recommended could not remedy the evils which he desired to remove, and he enquired of Glaucon whether he knew by personal examination that the guards did their work as badly as he imagined.

- 8 Whon he reached home, his father asked him where his ship was and what had become of his merchantus. The son in reply had him what had happened,—how he had given up his recest with its carpo, and had taken us exchange the slaves and set them free, and how he had consented to take this girl back with him and make her his wrife.
- When they asked Thales what thing in the world was more universal than every thing else, he replied that Hope was the most universal thing, beacuse Hope remained with those who had nothing else.
- 10. When Solou and Pernander were atting together over their cups, Periander, finding that Folon was more silent than usual, asked hum whether he was allent for want of words or because he was a fool Solon told him in reply that no fool could be silent over his cups.
- II A man, being repreached by his neighbours for doing kindness to the bad, explained to them that he had shown this regard not to the man, but to mankind
- 13. Sir Walter Scott, in a letter addressed to his son, gave him two pieces of advice about the buying of horses.—the first was not to buy an aged horse, however showy it might be; for an aged horse must have done work, and would at anyest be unserviceable as a few years:—the second was, to buy when the horse was in rather poor condition, so that he must be better able to see all its united.
- 13 When St. Paul visted Atheras, own of the Atherians spoke contemptuously of him, and enquered of each other what that babbler meant to say Others remarked that he seemed to be a setter forth of strange god's 50 they took him to Mar's hill and saked him to explain to them what the new doctrine was of which explose 150 rb e had brought (as they said) certain strange things to their cars, and they washed to know what these things meant.
- 14. An old grey mouse, with a merry twinkle in his eyes, now got up and said that the plan of the last speaker was an excellent one; but he feared it had one drawback the last speaker had not told them who should tre the bell round the cat's neck.

CHAPTER XII.-ANALYSIS OF SENTENCES.

& 1.—Analysis of Simple Sentences.

1. A SENTENCE, which has only one Finite Verb, is called a Simple sentence; as,

Subject. Finite Verb.

 The Finite Verb, (that is, any part of a verb, excepting the Infinitive Mood or a Participle,) is called the Predicate or part of the Predicate; as,

Subject. Predicate.

3 A sentence is not Simple (that is, Sinc'e,) if it has more than one Finite Verb. If it has two or more Finite Verbs, it is called by some name other than Simple, (such as. Compound or Complex.)

Thus:—"If I see him to-day, I will invite him to my house." This is not a Simple sentence, because it has two Finite Verbs, viz... "see" and "will invite."

Again:—"The rain fell before they reached home, and every one got wet." This is not a Simple sentence because it has three Finite Verbs, viz., "fell," "reached," and "got."

4. There are four distinct parts or elements, of which a Simple sentence can be composed; and the analysis of a sentence consists in decomposing it (that is, in analysing or breaking it up) into these several parts:

- & 1.-The Subject.
- § 2.-Adjuncts to the Subject, if any.
 - § 3.—The Predicate.
 - § 4.—Adjuncts to the Predicate, if any.

Of these four elements the first and third, (viz., the Subject and the Predicate) are essential to the sentence, that is, the sentence could not exist without them. But the second and fourth, (viz., the adjuncts to the Subject or Predicate) are not essential. They are mere additions, which may or may not be present, and could be removed without destroying the sentence.

- (a.) The Subject must be either some Noun or something used instead of a Noun.
 (b.) The additions or Adjuncts to the Subject. (if there
- are any,) must be either Adjectives or words used like adjectives to qualify the Subject.
- (c) The Predicate must either be a Finite Verb, or it must contain one.
 (d.) The additions or Adjuncts to the Predicate. (if
- there are any,) must be either Adverbs or words which have the force of an adverb for qualifying the verb of the Predicate.

So the form of a Simple sentence, (if the sentence is complete in all the parts,) is as shown below:—

I. Surject.	II. АБЈИКОТЯ ТО SUBJECT.	III. PREDICATE,	IV. ADJUNCTS TO PREDICATE.
A tiger		was shot will sleep	to-day.

This is the form to which every Simple sentence can be at last reduced; but many sentences are much more complicated than those here shown, and hence the analysis cannot always be performed so easily.

Predicate.

THE SUBJECT.

6. The Subject can be expressed in several different forms, all of which, (as you have already learnt,) are either Nouns or words that have the force of a Noun:—

(a.)	A Noun.	Rain		is falling.
(b.)	A Noun under-			-
	stood.	The virtuous	s (men)	will prosper.
(0.)	A Pronoun.	We		must go.
(d.)	A Gorund or Ver-			
	bal Noun.	Working		is healthy.
(0.)	An Infinitive used			
	as a Noun.	To work		is healthy.
(f.)	A Phrase used as a			

Subject.

Nous. How to do this ... is doubtful.
7. The Subject is almost always placed before the Predicate.

But it stands after the Predicate in such a sentence as that given below :---

It is sad to are this = To see this is sad.

Here the Noun-Infinitive is used as a Subject in apposition to it: "It, namely, to see this, is sad."

ADJUNCTS TO THE SUBJECT.

8. The Subject, as you have already learnt, does not always stand alone. It may have some word or words added to it, and these are called Additions or Adjuncts.

It has been explained already that all such additions qualify the Subject, and hence they are either adjectives or words having the force of an adjective.

- 9. The principal kinds of addition are :-
 - (a.) An Adjective ;
 - (b.) A Participle or Verbal Adjective;
 - (c.) A Gerundial Infinitive used as an Adjective;
 - (d.) A Noun or Pronoun in the Possessive case

- (e.) A Noun used as an Adjective;
- (f.) A Noun in Apposition.
- (g.) A Preposition with its Object.

Examples.

(a.) An Adjective ; as,

A heavy shower fell to-day.

Here heavy is something added to the meaning of the Subject "shower," because it shows what kind of shower is meant.

(b.) A Participle or Verbal Adjective; as,

A tertilizing shower fell to-day.

Here fertilizing, which is the Present Participle of the verb "to fertilize," is something added to the meaning of the Subject "shower," because it shows what kind of work the shower is expected to do.

A shower fertilizing the ground fell to-day.

Here ground is the Object to the verb "fertilizing," and this added to the verb or participle makes a further addition to the meaning of the Subject "shower."

(c.) A Gerundial Infinitive used as an Adjective; as,

Water to drink is scarce in this place.

A chair to sit on was brought by the servant.

Here to drink shows the purpose for which the water will be used, and is like an Adjective qualifying the Noun "water." In the same way "to sit on" is like an Adjective qualifying the Noun "chair." (See Chapter V., § 6, pars. 6.)

(d.) A Noun or Pronoun in the Possessive case; as, My son's teacher called here to-day.

Here my son's is something added to the meaning of the subject "teacher," because it shows what teacher is meant. It has the same force as an adjective would have in qualifying the noun "teacher."

(e.) A Noun used as an Adjective ; as,

The village watchman fell asleep in the night.

Here village is a noun used like an adjective to qualify the noun "watchman."

(f.) A Noun in Apposition; as, Alexander, the King, conquered Persia. Here the noun king, since it refers to the same thing or person as "Alexander," is said to be in apposition to it. It qualifies or adds something to the meaning of the noun "Alexander," by showing what sort of man Alexander was.

If we say the King of Macedon, we add something more to the meaning of "Alexander," than if we say merely "the king."

Again if we say Alexander the Great, the King of Macedon, we make a still further addition to the meaning of Alexander, for we have now added a second noun "the Great=the great man," in apposition to the noun "Alexander."

(g.) A Preposition with its Object; as,

Walking in the fields is good for the health.

Here in the fields adds something to the meaning of the subject "walking," since it shows in what place the walking is meant to be done.

A man of wirtus will not tell a lie.

Here of virtue adds something to the meaning of the subject man, since it shows what kind of man is meant. The phrase man of virtue, means the same as "virtuous man," and hence a preposition with its object, when it is added to a noun, qualifies the noun in the same way as an adjective would do.

THE PREDICATE.

- 10. The Predicate, as you have learnt already, must always contain some Finite Verb. But a complete Predicate is not always expressed by the verb alone; some other word or words are often joined to the verb in order to express its meaning in full.
 - 11. Intransitive Verbs of complete predication.

Now, there are some Intransitive Verbs which express a full meaning by themselves, and therefore require no word of any kind to be placed after them. These are called verbs "of complete predication."

The boys laugh. Birds sing. A river flows. A shower falls.
All animals sleep. Hogs grant.

12. Intransitive Verbs of Incomplete Predication.

To this class belongs all those verbs which say what a thing is, seems, or becomes. Such verbs require some word or words to be placed after them in order to make the predicate complete.

Whatever is placed after them for this purpose is called the Complement.

The Complement may take the form of a noun, an adjective, a participle, or a prepositional phrase, or a verb in the Infinitive mood, or an adverb. (See Chapter V, § 1, para. 13.)

		PREDICATE.	
SUBJECT.	Verb.	Complement	with Adjuncts.
The horse	is	a four-logged a	nimal (Noun,)
The moon	is shining	bright	(Adjective.)
That old man	Beems	very tired	(Participle.)
His coat	Was	of many colors	(Prep. Phrass.)
The fruit	appears	to be ripe	(Infinitive,
The time	is	ир	(Adverb.

13. Factitive Verbs in the Passive Voice.

These, too, are verbs of incomplete predication, and therefore they require a Complement. The Complement can take exactly the same forms as those used with Intransitive Verbs, of incomplete predication.

Suranor.		PREDICATE.
SUBJECT.	Verb.	Complement with Adjuncts.
The prince That book The thief The school The thief The boat	Was crowned is considered was caught was found was o rdered was set	king of England (Noun.) useless (Adjective.) stealing a watch (Participle.) in bad order (Prop. Phreso.) to be pussished (Infinitive.) afloat (Adverb.)

14. Auxiliary Verbs followed by an Infinitive.

These, too, are verbs of incomplete predication, since they make no sense until an Infinitive has been placed after them. To such verbs therefore the Infinitive is the Complement (See Chap. V. § 6, para. 3.)

_		PREDICATE.				
SUBJECT.	Verb.	Complement with Adjuncts				
These men	can	ge away.				
You	should not	behave badly.				
The boys	may	have a holiday.				

15. Transitive Verbs which take one Object.

Every Transitive Verb must have one Object at least, either expressed or understood; for a Transitive Verb makes no sense until its object is known or implied. The Object therefore is part of the Predicate.

The Object may take the form of a Noun (or noun understood,) a Propoun, a Verbal Noun or Gerund, an Infinitive used as a noun, or a phrase used as a noun.

NUBJECT.		PREDICATE.					
	Verb.	Object	t with A	djunct	8.		
This man	killed	a flerce tiger			(Noun.)		
We	love	the virtuous (se	rn)		(Nous.)		
May horse	carried	Aim		`	(Pronous.)		
Most men	like	walking		(Verbal nous.)		
They	hope	to mound	•••	***	(Infinitire.)		
He	enquired	how to do this		***	(Phrase.)		

16. Transitive Verbs which take two Objects.

There are some Transitive Verbs which take two objects, one of which relates to a thing, and is called the Direct Object, while the other relates to a person, and is called the Indirect. (See Chapter V. § 1, para. 9.)

	PREDICATE.					
SUBJECT	Verb.	Obj. Indirect with Adjuncts.	Object Direct with Adjuncts,			
This tutor	teaches	my son	grammar.			
The teacher	will give	the boy	a prize.			
The father	left	his sons	all his wealth.			
1	forgave	him	his faults.			
My servant	owed	me	twelve rupees.			
He	paid	his servants	their monthly wages.			

17 .- Factitive Verbs in the Active Voice.

A Factitive Verb in the Active Voice not only takes an Object, like an ordinary Transitive Verb, but requires some Complement to be placed after the Object, in order to complete the sense. (See Chapter V. § 1, para. 11.)

The Complement may be a noun, or an adjective, or a participle, or a prepositional phrase, or a verb in the Infinitive mood, or an adverb:—

SUBJECT.		PREDICATE.					
		Verb.	Object.		Complement.		
The people		made	him		iting	(Noun.)	
That grief		will drive	his father		mad	(Adjective.)	
They		caught	the thief		stealing a	watch (Fart.)	
The teacher		put	the school		into good	order (Prep. Phrass.)	
The judge		ordered	the jailor		to lock up th	e thief (Infin.)	
They		found	the man	٠	astrop	(Adverb.)	

18. Thus every possible kind of Predicate can be shown in the following form, whatever the nature of the verb may be:—

•			Pi	EDICATE,		
٠	Subject.	Object with adjuncts.			Complement with ad-	
_		Verb.	Indirect.		juncts.	
1	The boy	laughs				
2	The horse	is			afour-legged animal	
1	The prince	was crowned			King of England.	
3	The thief	was ordered			to be punished.	
4	These men	can			depart at once.	
5	This man	killed		a tiger		
В	The tutor	teaches	my son	Grammar		
7	The teacher	has put		the school	into good order.	

The verb in example (1) is an Intransitive Verb of Complete Predication, (See para, 11.)

The verb in example (2) is an Intrensitive Verb of Incomplete Predication, which therefore requires a Complement. (See para. 12.)

The verbs in example (3) are Factitive Verbs in the Passive Voice, which therefore require a Complement. (See pars. 13.)

The verb in example (4) is an Auxiliary Verb, which therefore requires for its Complement a verb in the Infinitive Mood with the to left out. (See pars. 14.)

The verb in axample (5) is a Transitive Verb, which takes one Object. The object is called Direct, when only one object is required or expressed. (See para. 15.)

The verb in xample (6) is a Transitive Verb, which takes two bjects, one Direct, and the other Indirect. (See para. 16.)

The verb in example (7) is a Factitive Verb in the Active Voice. It therefore requires a Direct Object.) and a Complement. (See pars. 17.)

19. In any sentence the Object or Complement may have a word or words added to it in order to qualify or increase its meaning.

Thus if the Object or Complement is a Noun, Pronoun, or Verbal Noun, it may be qualified by an Adjective or by some word or phrase having the force of an adjective, as in the phrase "a four-legard unimal."

Again, if the Object or Complement is a verb in the Infinitive Mood, it may be qualified by an Adverb or by some word or phrase having the force of an adverb, as the sentence "These men can depart at once."

In the analysis of soutences all such qualifying words or phrases should be mentioned with the Object or Complement to which they belong. There is no need to carry analysis any further than is shown in the examples given in para 18.

ADJUNCES TO THE PREDICATE.

20. Anything which qualifies the action of the rest, (by saying something about the time, manner, place, cause, means, instrument, purpose or any other circumstance,) is called an Adjunct or addition to the Predicate.

All such additions, since they qualify the verb, must be either adverbs or words having the force of an adverb.

- 21. The principal kinds of adjuncts are :--
- (a.) An Adrerb. "He sleeps soundly."
- (b.) A Participle. "He sat down reading a book."
- (c.) A Gerundial Injuntive. "He came to see the horse."
- (d.) A Preposition with its " He fell into the well."

 Object.
- (e.) A Noun of Time. "He walked all day." of Length. "He walked ten miles."
- (f.) An Absolute Phrase. "The sun having set, we went away."

In the last example the Noun "sun" is in the Nominative case used absolutely with the participle "having set." (See Chapter V. § 7, para. 5.)

This absolute phrase adds something to the meaning of the predicate, by mentioning the time or reason of the action. "We went away." Why? because the sun was set. "We went away." When? When the sun had set.

Examples for Analysis.

- The heavens spangled with stars declare the glory of God in silence.
 - n silence.

 2. The statutes of the Lord are right, rejoicing the heart.
- 3. A darwesh, travelling through Tartary, having arrived at the town of Balkh, entered the king's place by mistake, thinking it to be a public inn or sersi.
- 4. The darwesh, being tired with walking, spread out his wallet, in order to repose himself after the manner of Rastern nations.
- 5. My fathor taught all his sons Euclid with much success.
 6. Alexander, the King of Maccdon, was surnamed the Great after his conquest of the Persian Empire.
- 7. The man employed for this purpose caught the thier stealing a watch.
- My friend, seeing his distress, lent him sixty rupees to help him to the end of his journey.
- 9. The merchant, having much property to sell, caused all his goods to be conveyed on camels, there being no railway in that particular part of the country.
- 10. A gentleman of wealth and position, living in London, some sixty years ago, had a country seat in Kent, some forty miles distant from the metropolis.
- 11. A man convinced against his will is of the same opinion still.
- 12. The judge fined the watchman a month's wages for criminal breach of trust.

Analyze the following Simple sentences according to the model.

1 A certain fowler, having fixed his net, withdrew to a little dis-

tance for the sake of allowing the birds to come.

2 The king of the pigeons was by chance passing through the sky

at this time with a troop of followers.

3 He and they caught sight of the rice-grains scattered by the fowler near the wet.

4 The king of the pigeons then asked his ricc-loving followers this question.

5 Why are rice-grains lying here in this lonely place?

6 We will see into this thing.

7 We must be cautions in our movements.

8 One conceited pigeon among the rest gave them had advice.
9 He told them to fly down to the rice-grains for the sake of satis

fying their hunger.

10 Having flown down and listened to this had advice, they began to peck up and swallow the grains against the advice of their king.

11 On their beginning to peck they were all caught in the net.

12 Then they blamed their rash and imprudent friend for having given them such bad advice.

13 They ought rather to have blamed themselves for having listened to him.

14 The king now told them what to do.

15 At one moment and with one united movement springing suddenly up fly off with the net.

16 Small things become strong by being united among themselves.
17 Even mad elephants can be held fast by a rope made of thin blades of grass.

18 The Digeons acted on this advice.

19 Making a sudden spring together, they flow up into the air, carrying the net with them.

20 At first the fowler hoped to see them come down again to the earth.

21 But they passed out of sight with the net about them.

In this way the fowler lost both his net and the pigeons.
 The pigeons then said to their king:—"O king, what is the next

23 The pigeons then said to their king:—"O king, what is the nething to be done?"

24 The king directed them to a certain place.

25 There his friend, the king of the mice, received them kindly.

26 The king of the mice set them all free by nibbling through the net. 27 Thus the whole troop of pigeons escaped by means of union.

28 All men should profit by this lesson. 29 A chariot will not go on a single whoel.

30 A creeper, having nothing to support it, must fall to the earth and die.

§ 2.—Analysis of Compound Sentences.

- H. B.—The student will understand this and the following sections much more thoroughly, if he has made himself master of Chap. VIII, Conjunctions.
- When two or more Simple sentences, (which are usually called Clauses,) are linked together so as to form one larger sentence, the larger sentence so formed is either Compound or Complex.
- Between the several clauses, of which a Compound or Complex sentence is made up, there must be some "connective" word by which the clauses are joined together.

Now, there are two, and only two kinds of words, which can be used as connectives; viz., Conjunctions, and Relative Pronouns.

- But Conjunctions, (as was shown above in Chap. VIII., § 1, para. 3,) fall into 2 main sub-divisions and 1 minor one—Co-ordinative, Subordinative, and Relative.
- So the entire scheme of connectives stands as fol-
 - A.—Conjunctions Co-ordinative. I. Subordinative. II. Relative. III. B.—Relative Pronouns. IV.
- 3. A Compound sentence is one made up of two or more Co-ordinate (that is, equal or independent) clauses.
- 4. The Co-ordinate clauses, of which a Compound sentence is made up, are joined together by the Co-ordinative Conjunctions:—
 - (1). The sun rose with power, and the Cumulative.
 - (2) Rither he must leave the house, or Alternative.
 - (3.) He called at my house, but I did | Contrast.
 - (4.) He came back tired; for he had Inference.

- 5. The conjunctions of the Cumulative class are:—
 and, both—and, also, too; as well as; not only—but also;
 moreover, besides, further, furthermore, likewise; now; well.
- The conjunctions of the Alternative class are :-cither, or : neither, nor : otherwise, else.

The chief conjunctions of Contrast are:—but, yet, but yet, nevertheless, honeceer, whereas, while, only; indeed—but; on the one hand—on the other hand; here—there; on this side—on that side; now—then; at one time—at another time.

The chief Conjunctions of Inference are:—Therefore, then, so then, so, for; consequently, hence.

Note.—These have all been described in detail with examples in Chapter VIII, § 2, pars. 1-26.

- 6. Contracted Sentences.—Compound Sentences often appear in a contracted or shortened form, so as to avoid the needless repetition of the same word:—
- (a.) When there are two Predicates to the same Subject, there is no need to mention the Subject more than once:—
 - (1.) The sun rose with power and (the sun) filled the sky with
 - (2.) He called at my house, but (he) left soon after.
- (b.) When there are two Subjects to the same Predicate, there is no need to mention the Predicate more than once:—
 - He as well as you is guilty, (=He is guilty, as well as you are guilty.)
 - (2.) Either this man sinned or his parents (sinned).
 - Either this man ainned or his parents (sinned).
 He is poor, but (he is) honest.

Note.—As regards case (a), there can be no doubt whatever that a sentence of that kind is capable of being broken up into two Co-ordinate clauses. For whenever you find two or more Finite Varb, such as "rose" and "filled" in example (1) or "colled" and "left" in axample (2), each Finite Verb to the colled and left in axample (2), each Finite Verb to the best predicate, and every Predicate smat have its own Subject, whether this Subject is mentioned twice or only once.

As regards case (5) no doubt can exist as to the sentence being made up of separate parts or clauses, so long as the two Subjects are joined by any Conjunction except and.

But when the two Subjects are joined by and, the case is not

In some instances, such as the following, the two Subjects

In some instances, such as the following, the two Subjects united by "and," are inseparable: in this case the sentence cannot be braken up into parts, but must be considered an indivisible simple sentence:—

He and I are great friends.

A carriage and pair costs a great deal.

The great scholar and post is dead.

Youth and experience seldem exist together.

Here we cannot split up any of the above Sentences into two soparate clauses. Thus we cannot say, "He is a great friend, and I am a great friend": nor can we say, "youth seldom exists together, and experience seldom exists together." This makes nonzense, and therefore the Sentence must remain indivisible.

On the other hand there are instances, in which the two Sabjects, even when they are united by and, can be separated, so that each of them can become the Subject of a distinct clause:

Youth and white paper take any stamp.

Here two sentences can be made:—"youth takes any stamp.",
"white paper takes any stamp." The separation is legitimate;
but it is not always necessary, and in the Analysis of sentences it
is not always convenient. Nor is it well in keeping with the
usule of Syntax by which two Singular Nonas, when they are
joined by and, are regarded as one compound subject to the
Plural Verb. (See Rule 2, in Clap. XL, Syntax, § 1.)

7. Omission of Conjunctions.—Alternative conjunctions, and conjunction of Contrast or Inference, are never omitted: but Camulative conjunctions can be left out, when the aim of the writer is to give a string of sentences, one after another, all bearing upon one central fact which he wishes to enforce. Only the last sentence or the last verb should have "and" prefixed to it in such a case.

- (1.) The state of Ceylon, immediately before the rainy monsoon bursts upon it, has been thus described by a string of centences :---
 - The deciduous trees shed their foliage, the plants cease to put forth fresh leaves, the grass withers on the baked and cloven earth, the red dust settles on the branches and thirsty brushwood, the insects disappear under the ground or hide beneath the decaying bark, the snails retire into the crevices of the rocks, and all vegetable life languishes under the unwhole. some heat.
- (2.) The uses and power of steam have been thus described. one single word standing as Subject to no less than 26 Finite verbs or predicates :-

What will not the steam-engine do? It propels, alevates, lowers: pumps, drains, pulls, drives, blasts, digs, cuts, saws, planes, bores, blows, forges, hammers, files, polishes, rivets, cards, spins, winds, weaves, coins, prints, and does more thingsthen I can think of or enumerate.

- 8. Co-ordinate or equal clauses can be expressed by while, where, or which, provided we can substitute " and " for " while," "and here" or " and there" for " where," " and this" or " and that" for " which." In such sentences the second clause is not subordinate to or dependant on the previous one.
 - (1.) Some men sit down, while (-and) others stand.
 - (2.) He slew all the prisoners, which (and this) was a very berbarous act.
 - (3.) He is clever at planting young trees; for which purpose (=and for this purpose) every one is glad to employ
 - (4.) He went to London, where (-and there) he stayed
 - (5.) Immense saw mills have been erected near Rangoon and Moulmain, which towns (: these towns) are situated, at the mouths of the two great rivers of Burma-

In each of these examples the clauses joined together by the Relative conjunctions are simply added together, and there is no inequality of rank between them. Hence the sentence so formed is Compound, and not Complex,

Rules and Model.

- 9. The process of analyzing Compound sentences can be described under the following rules:—
 - (a,) Pick out the Finite Verb of each clause;
- (b.) If any Finite Verb is understood, but not expressed, supply it.
- (a) Pick out the Subject to each Finite Verb in succession.
- (d.) If the Subject to any Finite Verb is understood, but not expressed, supply it.
- (c.) Then write out each clause with its Subject, Predicate, and Adjuncts (if there are any Adjuncts) in full;
- (f.) Pick out the Connective word, by which any one clause is joined to any other clause.
 - (1.) His greatest enemy, as well as his best friends, declared him to be innecent of the fault laid to his charge.
- A. His greatest enemy de clared him to be innecent of the fault, &c.
- B. His best friends declared him to be innocent of the fault, &c.

Connective:—As well as.

2. Either you or your son must sign his name.

A. You must sign your name,

B. Your son must sign his name

Connectives : -- either -- or.

3. He, not I, is certainly the author of that plan.

A. He is certainly the author of that plan,

B. I am not the author of that plan.

Connective :- (nil.) Here no connective is required.

Miscellaneous examples of Compound Sentences to be unalyzed. Each clause, after being separately stated out in full, should be analyzed according to the model given in the previous page.

1. He as well as you is tired of all this work. (2 clauses.) 2. Either he or his friend must have opened the door : for

no other person had the key. (3 clauses.)

3. The Lord knoweth the way of the righteous, but theway of the ungodly shall perish. (2 clauses.)

4. He either does not or will not understand the orders given to him. (2 clauses.)

5. How to do this or how to do that was never explained to us, and so we did neither. (2 clauses.)

6. He acts like a child; for now he laughs, and then he cries; he goes first here, and then there; and no one knows what he will do or not do next. (6 clauses,)

7. They found the horse indeed : but it distressed them tosee it : for it was lame. (3 clauses.)

8. The Spaniel frisked and gambolled about the lion. barked at him, would now scrape and tear at his head with his claws, then seize bim by the ear and bite and pull ; but nothing could aggravate the noble beast. (9 clauses.)

-The Lion and the Spaniel.

With cane extended far, I sought

To steer it close to land : But still the prize, though nearly caught, Escaped my eager hand. (2 clauses.)

-The Dog and the Water Lily.

10. At length I to the boy called out; He stopped his horses at the word.

But neither cry, nor voice, nor shout, Nor anght else like it could be heard. (6 clauses.)

-Alice Fell.

11. Sir Ralph the Rover tore his hair, And beat his breast in his deepair :

The waves rush in on every side,

And the ship sinks down beneath the tide. (4 clauses.) . - The Inchcape Rock.

- 12. The musquito is our declared enemy, and a very trouble-some one it is; however, it is well to make its acquaintance; for by doing so we shall be forced to admire it, and even to admire the instrument used by it for wounding us.
 - -History of a Musquito.
- 13. The life of the musquito is brief, but very active; the female lives for two or three weeks, lays its eggs and dies,
 ---History of a Musquito,
- 14. In wet weather the water rises and floats the eggs, producing an abundant harvest; whereas in dry seasons many eggs fail to reach the water, and so dry up and perish.
 - ---History of a Musquito.
- 15. The tailors sit at a table, not on one; and both they and the shoe-makers work well and cheaply.

 —City of Singapore.
- 16. The barbers have to shave heads and clean ears; for which latter operation they have a great array of tweezers, picks and brushes.

 —City of Singapore.
- 17. Others carry a portable cooking apparatus and serve up a meal of fish, rice, and regetables for two or three halfpence; while coolies and boatmen waiting to be hired are seen on every side,

 —City of Singapore,
- 18. In this way the spider lived in a procarious state for more than a week, and nature seemed to have fitted it for such a life; otherwise it could not have subsisted upon a single fly for so long a time.

 —Sugnetly of the Spider.
- 19. Then he was led to enquire into the condition of more distant jails; for which purpose he visited every large jail in England and many of those in Scotland and Ireland.
- —Howard the Philanthropist. 20. At Venice he went with the greatest obserfulness into the sick-house, where he remained as usual for forty days, and thus exposed his life for the sake of his fellow-creatures.
 - -Iloward the Philanthropist,
- 21. The diver, on descending into the water, seizes the rope with the toes of his right foot, while he takes hold of the bag with those of his left; nor does he expect to remain under water for less than two minutes.

, 22. The Brahmans or astrologers promise success to the divers ; for they expect a liberal gift of pearls as a reward for the happy sense of confidence imparted by them to those men. -Pearl Pisheries of Ceston.

§ 3.—Analysis of Complex Sentences.

1. A Complex sentence consists of a Principal clause with one or more Dependent clauses attached to it.

A Dependent clause is one which cannot stand alone, but depends upon a Principal clause for the completion of its meaning. (See Chapter VIII, § 3, para. 1.)

2. Dependent clauses have been distinguished into :--(a.) The Noun-Clause:

- (b.) The Adjective-Clause;
- (c.) The Adverb-Clause.
- 3. The following definitions should be clearly understood and remembered :---
- (a.) A Noun-Clause is one which does the work of a Noun in relation to the rest of the sentence.
- (b.) An Adjective-Clause is one which does the work of an. Adjective in relation to the rest of the sentence.
- . (c,) An Adverb-Clause is one which does the work of an Adverb in relation to the rest of the sentence.
 - (a.) The Noun-Clause.
- 4. There are three kinds of connectives by which a Noun-Clause can be introduced :-
- (1.) The Conjunction that in the sense of Apposition. (See Chapter VIII, § 3, para, 3):-
 - We did not know that he would leave us so soon,
- (2.) A Relative Conjunction whose antecedent is not expressed :-

Where he is going is not known to any one.

(3.) A Relative Pronoun, whose antecedent is not expressed :---

We did not enquire who came here to-day.

- 5. The Noun-Clause, since it does the work of a Noun-
 - (1.) The Subject to the Finite Verb of the sentence.
 - (2) The Object to some Verb in the sentence.
 - (3.) The Object to some Preposition in the sentence.
 - (4.) The Complement to the Finite Verb of the sentence.
 - (5.) In Apposition to some Noun in the sentence.
- Noun-Clause as Subject. This can be seen from the following examples:—

Where he is going is not known to any one.

That he will come back soon is certain (=R is certain that he will come back soon.)

Who steals my purse steals trash. —Shakspeare.

7. Noun-Clause as Object to some Verb. This can be seen from the following examples:

He promised that he would seen pay back the debt. I shall be glad to know when he will pay it.

I hope to find out who made that noise. .

Perceiving what a mistake he had made, he yielded.

There is no hope of getting what we asked for.

8. Noun-Clause as Object to some Preposition. This can be seen from the following examples:—

My success in future depends upon who is placed over mc.

My success depended on whether he was honest or not.

Except that he speaks too fust he is an excellent teacher.

9. Noun-Clause as Complement. This can be seen from the following examples:—

This is exactly what I expected,

My question was whether there was any hope of his recovery. This is what no one can understand.

10. Noun-Glause in Apposition. In point of fact some noun is always understood or expressed before the Conjunction "that": (this has been explained already in Chapter VIII., § 3, para. 3). When the noun is expressed, the clause. introduced by the Conjunction that is in apposition to that moun.

The news that he intended to come gave us much pleasure.

The reason why he was so sad is unknown to me.

Here the clause "that he intended to come" is in apposition to the Noun "news." This is the reasonwhy the Conjunction stat is said to signify apposition. (See above, Chapter, VIII., § 3, pars. 3.)

11. The Conjunction, "that" (in the sense of spposition) is often left out after a verb; but it is better to make a habit of expressing it.

I think (that) I shall never know this.

It seems (that) he is not clover.

N. B.—The Conjunction that is never left out after a noun :—

The news he intended to come gave us much pleasure.

This is quite inadmissible. Since the Noun "news" is expressed, the appositional clause "he intended to come" must

be introduced by the Conjunction "that."

12. In such a sentence as the following, the noun mark.
ed in Italics is said to be in apposition to the sentence
going before:—

They began to insinuate publicly that Socrates did not acknowledge the gods whom the state acknowledged,—an entirely false charge.

Here the noun "charge" is in apposition, not to any particular word, but to the whole of the preceding sentence.

But the phrase "an entirely false charge" might be expanded into an entire sentence possessing both a Subject and a Finite Verb. The phrase so expanded must be called a Noun-Clause, because it does the work of a noun, being in apposition to the sentence going before:—

> They began to insinuase publicly that Socrates did not acknowledge the gods when the state acknowledged, (which was an entirely false charge), and that he corrupted the youth with his unsound notions of morality.

 A clause expressed in the form of the Direct Narration, (See Chapter XI, § 4, para. 3,) may be the Subject or Object to a verb, and must therefore be considered as an example of a Noun-Clause :---

He said, "I have seen this man before,"

The multitude cried out, "Great is Diana of the Ephosiana," The sleeper started up from his bed, shouting "I am bitten."

Examples of the Noun-Clause.

Pick out the Noun Clause and say whether it is the Subject. to the main verb, or the Object to some Verb, or the Object to some Preposition, or the Complement to the main Verb, or in Apposition to some noun expressed. Supply the Conjunction "that," wherever it has been left out.

- 1. No one knows when he will come, or whether he will come at all or whather he is even alive.
 - 2. How this came to pass is not known to any one.
 - 3. What is sauce for the gaose is sauce for the gander.
 - 4. It is quite evident rain will fall to-day.
 - 5. The Equator shows where days and nights are of equal length. 6. What is one man's meat is another man's poison.
 - 7. You must know that the air is never quite at rest.
 - 8. I think I shall never clearly understand this.
 - 9. We heard the school would open in ten days' time.
- 10. The name "Volcano" indicates the belief of the anicant Greeks. that the burning hills of the Mediterranean were the workshops of the divine blacksmith, Vulcan.
 - 11. Even a feather shows which way the wind is blowing.
 - 12. Whatever faculty man has is improved by use.
 - 13. The fool bath said in his heart " there is no God," 14. "Know thyself" was the edvice given us by a Greek sage.
 - 15. He did not know that his father had been shot,
 - 16. The fact that you have not signed your name to a letter shows that you lack moral courage.
- 17. It will be easily understood how useful even the simplest weapons were to the first dwellers on the earth.
- 18. The question first occurring to the mind of a savage is how is fire to be made.
- 19. Common sense soon taught him that fire could be produced by rubbing two sticks together.
- 20. In chipping their fliat weapons men must have seen that fire occasionally flashed out. 21. We learn from travellers that savages can produce fire in a few
 - seconds.
 - 22. He shoated out to the thief " Leave this house."
 - 23. We cannot rely on what he says.

- 24. It is quite evident you have made a mistake.
- 25. It was very unfortunate that you were taken fil.
- 26. He was a man of fine character except that he was rather timid.

(b.) The Adjective-Clause.

- 13. The Adjective-Clause is not itself an adjective, but it does the work of an adjective by qualifying some noun or Pronoun expressed in some other clause. The only kind of Connective word by which an Adjective-Clause can be introduced is a Relative Pronoun, or a Relative Conjunction which can be substituted for a Relative Pronoun.
- Among the men, who came here to-day, not one turned out to be honest.

"(Here "who came here to-day" is an Adjective-Clause, because it qualifies the noun" men." as an Adjective would de.)

2. We found the wolf lying dead in the very place where (-is which)

(Here "where" is quivalent to the Relative "in which," and agrees with its Antecedent "place." The words "where it was shot" are therefore an Adjective-Clause.)

14. The Relative Pronoun, provided it would be in the Objective case, is often left out:-

The food he needed (=which he needed) was not procured without great deal of trouble.

Pick out the Adjective-Clause or Clauses in each of the following examples, and point out the noun or pronoun qualified by it is the Principal sentence. If the Relative Pronoun has been omitted anywhere, supply it:

- ted anywhere, supply it:—

 1. Man has the power of making instruments, which bring into view stars, whose light has taken a thousand years to reach the earth.
- The first thing which man needed was some sharp-edged tool.
 The exact time when the theft was committed was never found out.
 - 4. The man by whom the theft was committed has been caught.
 5. The house we lived in has fallen down.
 - 6. This is the same story as I heard ten years age.
 - 7. It's an ill wind that blows no one any good. 8. He is still reading the book you gave him.
- 9. He made his living by the presents he received from the men he served.

10. All is not gold that glitters.

- 11. In ponds, from which but a week before the wind blew clouds of dust, men now catch the reanimated fish.
- 12. A river is joined at places by tributaries that swell its waters.
- 13. Of what use is a knowledge of books to him who fails to practice virtue?
- 14. Fortune selects him for her lord, who reflects before acting. 15. Springs are fed by rain, which has percolated through the rocks
- 16. Nuncomar prepared to die with that quiet fortitude with
 - which the Bengalee, so backward, as a rule, in personal conflict, often encounters calamities, for which there is no remedy.
 - 17. I have seen the house where Shakspeare was born.
 - 18. The plan you acted on has answered well.
 - 19. They accepted every plan we proposed.
 - 20. Surely the story you are telling me is not true.
 - 21. Thrice is he armed that bath his quarrel just.
 - 22. The night is long that never finds the day.
 - 23. He travelled home by the way his father showed him,
 - 24. There are times when every one feels a little sad. 25. Before his death he parted from those who were most nearly
 - connected with him. 26. I forgot to tell you the time when I shall return.

(c.) The Advert-Clause.

- 15. The Adverb-Clause is not itself an Adverb, but it does the work of an Adverb by qualifying some Verb. Adjective, or Adverb in the Principal Clause.
 - 16. The Adverb-Clause can be introduced by any of the Subordinative Conjunctions; but an exception must be made of the Conjunction "that," when it is used in the sense of Apposition.
 - N. B .- The Conjunction "that" in the sense of Apposition is reserved for the, Noun-Clause. (See above, para. 4.)

Principal Clause. Adverb Clause. Subord. Conjunc. He will succeed. because he works hard ... (Cause.) He worked so hard. that he was quite tired. (Effect.) He took medicine, that he might get well. (Purpose.) I will do this. if I am allowed ... (Condition.) He is honest, although he is poor ... (Contrast.)

He likes you more, than (he likes) me ... (Comparison.) Men will reap. as they sow

... (Extent or Manner.) The sun will rise, so long as the world lasts, (Time.)

- 15. The chief Sub-ordinative Conjunctions (exclusive of "that" in the sense of Apposition) are as follows:--
- (a.) Cause or Reason ;-because, since, as, for-as-much as, in-as-much as, seeing that, considering that.
 - (h.) Effect ;-that, so that, with the effect that, till.
 - (c.) Purpose; -that, in order that, so that, lest.
- (d.) Condition; -if, unless, supposing that, provided provided that, as if, whether or no.
- (e.) Contrast; -though, although, however much, notwithstanding that, though, yet, whereas, when.
- (f.) Comparison;—as—as, as much as, no less than, wrore than, less than, rather than.
 - (y.) Extent or Manner; -as, so far as, according as.
- (h.) Time; as, as soon as, when, while, whilst, before, ere, until, after, since, so long, as, whenever.

N. B.—These Conjunctions have been described already in full in Chapter VIII, § 3.

16. After the Conjunctions though, when, if, and while the Auxiliary Verb preceding a Present or Past Participle is often understood. In analyzing a sentence, care must be taken to supply such Auxiliaries, since these are an essential part of the Predicate, and the sentence is not complete without them:—

Though much alarmed at the news, he did not lose all hope. Though he was much alarmed, &c., he did not lose all hope. He sprained his foot, while walking down the steps in the dark.

He sprained his foot, while he was walking down the steps in the dark.

A snake, when creeping silently through the grass, is not always noticed.
A snake, when it is creeping silently, &c., is not always noticed.

The number of rings round the stem of a concanut tree would, if counted, show the age of the tree.

The number of rings round the stem of a conceant tree would, if they were counted, give the age of the tree.

17. After the Conjunction than the verb is often omitted altogether. Care must therefore be taken to supply it, before the process of analysis is commenced.

He loves you better than (he loves) me.

He loves you better than I (love you).

Note 1.—When than is used with the Relative Pronoun who," it is a preposition and not a conjunction :—

Belial, than whom a spirit more lewd.

Fell not from heaven, —Milton.

Note 2.—Similarly when than is placed immediately after "other," it is a preposition:—

No man other than yourself shall enter this house.

Pick out the Adrerb-Clause or Clauses in each of the sentences given below, and mention the particular kind of qualification denoted by each conjunction. (See paras. 14 and 15.) Analyze each sentence according to the model.

- 1. He will succeed, because he has worked bard.
- 2. Men engage in some work, that they may carn a living.
- 3. He threatened to beat him, unless he confessed.
- 4. He was always honest, though he was poor,
- 5. This is not true, so far as I can tell, 6. He likes you as much as I do.
- 7. He tried much, before we succeeded.
- He tried much, before we succeeded
 Let us go to bed, as it is now late,
- 9. He walked with care, lest he should stumble,
- 10. I agree to this, provided you sign your name.
- 11. Though he punish me, yet I will trust in him,
- 12. He returned home, after he had finished the work...
- Prove a friend, before you trust him.
 When the cat's away, the mice will play.
- 15. He worked so hard, that he succeeded at last.
- As he has been well punished already, I will let him off.
- 17. He sees very well, considering that he is 60 years of age.
- I gave him a prize, that he might work harder next year.
 Now when I am poor and unfortunate, my friends so-called have left me.
- 20. As the tree falls, so will it lie.
- 21. Ever since we left the house, It has not ceased raining.
- 22. I would be glad to lend you that money, if I had as much in my own pocket.
 - 23. Murder, though it have no tongue, will yet speak.
 - 24. Unless you leave the house at once, I will send for a policeman-

25. A jackal, while proviling about the suburbs of a town, alipped into an indige tank; and not being able to get out he laid himself down, so that he might he taken for dead.

26. The owner of the tank, when he beheld what seemed to be a dead jackal, carried the body into the jungle and there flung is down.

27. This one fact, H closely examined, proves the man to be guifty.
28. He is an honest man, though poor; and industrious, though eld and rather infirm.

29. Better to reign in hell than serve in heaven. — Milton.

30. If the trunk of a tree, when young and pliable, is not made to grow straight, it cannot be straightened afterwards, when old and stiff.
30. A rabbit cannot run so well as a hare; but it is more skilled than a hare in digging the ground and boring holes under the earth.

than a hare in digging the ground and boring holes under the earth.

31. The wild grey rabbit is not so large as the tame rabbit kept in a

cage.

32. A rabbit is about as large as a cat; but it has a shorter tail than a cat and much longer cars.

33. A certain courtier, while in the very act of speaking to the king about certain affairs of state, was stung by a scorpion; but the man, though badly bitten and suffering much pain, kept his face unmoved, until the king had finished speaking.

Mixed Sentences.

A Noun-Clause, an Adjective-Clause, or an Adverb-Clause may itself have some clause or clauses dependent on it.

Again, a sentence may be partly Compound and partly Complex; and a mixed sentence of this kind may be joined to another mixed sentence by some Co-ordinative Coniunction.

In fact, the kinds of mixture which may and do occur in ordinary composition are so various, that it is not worth while to attempt to classify them,

- 19. However mixed the sentence may be, the same general principles apply to all, and the process of analysis is as follows:—
 - (a.) Pick out the Finite Verb of each clause,
- (b.) If any Finite Verb is understood, but not expressed, supply it;

- (c.) Pick out the Subject to each Finite Verb in succession:
- (d.) If the Subject to any Finite Verb is understood, but not expressed, supply it;
- (e) Then write out each clause with its Subject, Predicate, and Adjuncts (if there are any) in full;
- (f.) Pick out the Connective word, by which any one clause is joined to any other clause;
- (g.) If a Connective word is understood, but not expressed, supply it;
- (h) Show what kind of clause each of the clauses is neucossion; that is, show whether it is a Principal Clause, or a Co-ordinate Clause, or a Noun-Clause, or an Adjective-Clause.

Examples.

- (1.) The unfortunate man had not long lain quiet in the cavern
 before he heard a drendful noise, which seemed to be the roar of some
 wild beast and terrified him very much.
 - A. The unfortunate man had not | Principal Clause.
 - B. Before he heard a dreadful noise, Adrerb Clause.
 - C. Which seemed to be the roar of Adject. Clause to B. some wild beast, (noise.)
 - D. And which frightened him very much, Co-ordinate to C.
- (2.) The governor of the tours, who was present, called out with a loud voice and ordered Androcles to explain how a savage beast voild have so forgotten its insate disposition all of a sudden that it became converted into a harmless animal, which preferred rather to sparse its critis than to deepen him.
 - A. The governor of the town cried out with aloud voice,

 B. Who was present, | Adject. Clause to A. (governor.)
 - C. And (the governor) ordered An- Co-ordinate to 4,

- E. That it became converted into harmless animal.
- Which preferred rather to spare \ Adject.-Olause to E. (animal.) its victim,
- Than (it preferred) to devour Adverb-Clause to F.
- (3:) All the persons present were astonished and delighted with the story, which showed that even the flercest beasts can be softened by gratitude towards one who has done them a kindness.
 - A. All the persons present were astonished (with the story.)
 - And (all the persons were) de lighted with the story.
 - Adject.-Clause to B. (story.) C. Which showed,
 - D. That even the fiercest beasts can Noun-Clause to C. be softened by gratitude to-(showed.) wards one.
- E. Who has done them a kindness. Adject.-Clause to D. (one.) (4.) The foolish man was at first amused at seeing how tipen the monkeys were, and therefore he continued for a little while to watch their hideous grimaces and listen to their foolish jabberings ; but as he happened to be sober himself at the time, he soon changed his mind and began to reflect what a degraded and hideous creature he must be himself when under the influence of liquor, if he too behard as these monkeys were then doing before his eyes.
 - A. The foolish man was at first Principal Clouse. amused at seeing,
 - How tipsy the monkeys were, \ Noun-Clause to A. C. And therefore he continued for
 - a little while to watch their Co ordin. to A. hideous grimaces and listen to their foolish jabberings;

D. But he soon changed his mind, Co-ordin, to A. and C.

98 INDIAN MIDDLE SCHOOL GRAMMAR.

E. As he happened to be sober himself at the time,

F. And (he) began to reflect, Co-ordin, to D.

G. What a degraded and hideous Noun-Clause to F. creature he must be himself, (reflect.)

H. When (he was) under the in- Adverb-Clause to G. fluence of drink,

fluence of drink,

If he too behaved.

Adverb Clause to G.

J. As these monkeys were then Adverb-Clause to I.

Miscellaneous Examples for Analysis.

N. B.—These examples should be read aloud and worked out in class before the teacher. The students should be asked in turn to state each clause in full, supplying any Finite vertor any Subject or any Connective word that may have been omitted.

When each separate clause has been distinctly stated and all its emissions (if there are any) supplied, it is easy to say whether it is a Principal clause, a Noun-clause, an Adjectiveclause, or an Adverb-clause, and to pick out the Connective word the Subject the Finite verb. &c.

The detailed analysis (according to the model given) can be worked out more easily on paper.

- Blessed is the man that walketh not in the counsel of the wicked, nor standeth in the way of sinners, nor sitteth in the seat of the scornful. (4 clauses.)
